Cold, Cough and Flu

COLD

A newborn with a serious cold took 4Life™ Transfer Factor™ through pumped breast milk and recovered in 3 days.

COLD

In July I acquired what I assumed was a common cold. Two days later my cold had become severe. I started taking TF+ at the rate of 3 capsules every 2 hours and proceeded with my activities. By afternoon I was feeling much better and my evening my symptoms were gone so I stopped taking TF+. The next morning the symptoms were back so I continued taking TF+ for two more days. I haven't been sick since and would not be without the product. I consider TF+ a doctor visit and prescription in a bottle.
Jack, NC.

COLD

4Life™ Transfer Factor™ knocked out my summer cold within 24 hours.
Dr. Gary H.

COLD

I'm very, very excited about Transfer Factor. My family has been using it every day for over two months and I can tell you we feel a difference already. My son who's only two years old gets colds which usually go right to his ears. Since I began giving him Transfer Factor, he hasn't had a cold or an earache! This product really helps build up his immune system.
Teri.

COLD

I had ignored a cold for over 2 months and it was getting worse and worse. I was totally exhausted and for me, that is not a normal way of life. I was introduced to transfer factors. Within 3 days, I felt like a new woman. I was up and moving again. I have loved it. I would recommend it to anyone.
Billie T.

COLD SORES

Recently I have had two bouts with cold sores that I have been afflicted with all of my life. The first of the last two incidents I was given some Transfer Factor and was told that others had seen good results with dabbing some on their cold sores. I will try anything to get rid of these painful sores. I did open a capsule and applied some of the powder to the sore. The powder doesn't stick very well so I actually did this about three times before going to bed. The next morning I was pretty impressed that the sore had not grown any bigger and actually was already starting to decrease and heal. About six weeks later another sore started. Again I applied some of the powder out of a Transfer Factor capsule. To my amazement the next morning the sore was itching (a sign of healing). Two sores, two successes. If a cream is ever made for just this reason I will be first in line to buy some!

Patty Westover.

COUGH CONGESTION

I have a granddaughter that's fifteen months old. She's been sick for about three months with a cough and a lot of congestion. She has had stomach flu off and on. We've tried everything. We've taken her to the doctors without success. We finally gave her transfer factors, and within a week she was better.

Patricia Tavish.

FLU

Our daughter, Eileen, suffered her first flu-infection in 11 months, May 9, 2003. Started with a sore throat in the morning. Then coughing, runny-nose, vomiting and wheezing. Saturday morning visited doctor, who said it was caused by a rare new cross-breed of new mutant virus & bacteria. She was prescribed with the antibiotic called Erythromycin. We chose to try TF first. We gave her 3 TF every 4 hours and 1 TF+ morning and night. Again another horrible Saturday night and we had to use asthma machine to ease her breathing. By Sunday morning she was happy chirpy and singing away, and playing her recorder/flute! Amazing recovery.

Henry, New Zealand.

FLU

My flu was gone after 20 TF capsules and 10 hours.

Linda B.

FLU

My granddaughter is 2 and she had the flu virus. She was on four different kinds of antibiotics for 4 months and she was not getting better. I started her on three TF in the morning and three at night. The next morning the sniffles had started to go away, and within 4 or 5 days she was completely cleared up. My husband and I have also had wonderful success with allergies.

Sue H.

FLU

The Transfer Factor Plus has helped our immune system keep us well. I got the flu and thought I wanted to die. Ten hours and 10 capsules later and I was fine. The immune system is an amazing thing when it is working right.
Linda.

HUNTINGTON

I am a health caregiver. I take care of a Huntington's patient who has fought colds and flues every season for the past the eight years. Since I have placed her on Transfer Factor she hasn't experienced a serious cold or flu. The difference is like night and day. This is a great immune product.
B. Whitmore.

INFLUENZA

I came down with a very bad case of influenza a couple months ago. I had swollen glands, a high fever, a very bad sore throat, the cough -- and I had to give a lecture the next day. I doubled up my dose of transfer factors that day and the next day. Within 48 hours from the start of the infection it had resolved itself and I was up and around – which is absolutely amazing for me, and not at all my pattern.
Rita Elkins.
