3y

Why I am using collagen for my concussion recovery! In 2008, I fell face first into a beach in Maui. I had tripped over my son and fell 10 feet onto the sand. Five years later, I still feel the indentation in my face of that fall. I am hoping with continual use of **#liquidbiocell** **#collagen** that I will create better tissue to fill the scar tissue and not worse. I first started using the **#liquidbiocell** for my arthritis, my teeth and hair were failing. Both have recovered. My teeth, especially where I hurt it in the Maui fall have hardened to the point that I think they are dentures. My hair grew back in 4 months. I have hope for my broken back 1992 and my four concussion sites, age 7, 32, 48 and 51. They creak as they rehydrate. www.Jusuru.com/...
