Lou just wanted to let you know that after just 4 applications of Nerium to the eczema on the top of my hand it has drastically improved to the point that it is no longer open or bleeding and almost healed. I have started using it in my fingers now. I thought the improvement in my face and neck was nice but it is nothing compared to the relief I am getting on my hand. I thank **Samantha Stanley** for suggesting using it on my hand. I could hug you both. Anyone who has ever suffered from eczema knows the itch and pain from the cracking and bleeding. I am SOLD on Nerium.
