## INFLUENZA

1. "My granddaughter is 2 and she had the flu virus. She was on four different kinds of antibiotics for 4 months and she was not getting better. So I gave her three transfer factors in the morning and three transfer factors at night. The next morning the sniffles had started to go away and within 4 or 5 days her symptoms completely cleared up. My husband and I have also had wonderful success with allergies." Sue H.
2. "I came down with a very bad case of influenza a couple months ago. I had swollen glands, a high fever, a very bad sore throat, the cough -- and I had to give a lecture the next day. I doubled up my dose of transfer factors that day and the next day. Within 48 hours from the start of the infection it had resolved itself and I was up and around -- which is absolutely amazing for me, and not at all my pattern." Rita Elkins
3. "I've done a lot of networking with a lot of nutritional companies and had some success and some not so good success. I was ready to quit and my husband said no. He's not a networker, but he's a good supporter. I love the product and I think we've found a home. The transfer factors, because we are fairly healthy, has helped us from getting sick. I got the flu and thought I wanted to die. Ten hours and 20 enhanced transfer factor's later and I was fine. I made Presidential Diamond in my first month and I'm looking forward to International. All of you, get out there and share this with everyone, because everybody needs it!" Linda B.
4. "Here's my personal testimony on the benefits of TF Immune Spray. I work in a health care setting, around sick people all day long. I keep the spray with me at all times so I can give myself an 'immune shot' when needed. About 2 weeks ago, felt myself weakening, scratchy throat, all the symptoms of flu coming on. Gave myself an extra few sprays on back of throat, the next day I was back at work feeling fine, no flu-like symptoms. Also, I've noticed since using this product for the past 2 mos., I no longer get those mouth ulcers which frequently plague me. Hopefully, these are now a thing of the past. I am certainly grateful to 4 Life for introducing such an outstanding way to take transfer factors. We have not scratched the surface on the potential uses of this one product alone." Steve
5. "This past winter the flu was going through everyone at my workplace. Most of them were miserable for two weeks and missed at least one day of work because of it. When my turn to have the flu came around, I took three enhanced transfer factors twice on the first day, then increased it to five or six twice a day on my sponsor's recommendation. My symptoms lasted a total of four days and I missed no work." H. S. 4Life Distributor

6. "I have a small health food store and transfer factors have been the greatest product that I have come across in ten years. I've never had anything that's given me the constant feedback that transfer factors have for allergies, asthma, chronic sinus infections, colds and flues--just on and on. I'm just so grateful to have come upon this and I thank my up line." Diana H.

7. "I gave transfer factors to an elderly friend of mine who recovered within 4 days from a flu-like illness that had afflicted her for 6 weeks." - Eva B.

8. "Transfer factors helped my 9-month-old granddaughter recover from the flu instead of making her dependant on antibiotics." - Rita E.
