Infections

INFECTION - BLADDER

I got another bladder infection and decided not to take the usual antibiotics and loaded up on TF+. I was really impressed that my infection cleared up in 24 hours.

INFECTION - STAPH

For years my friend had a staph infection on his arms that would itch so bad there would be open sores, and after 7 days on 4Life™ Transfer Factor™ the sores were healing.

Kevin O.

INFECTION - STAPH

I had a type of staph infection on my arms that would itch so bad I'd end up with bleeding sores, but after 3 weeks on transfer factors, the sores are finally gone."

Bob B.

INFECTION - EAR

A 17-month-old toddler come to the pediatric office with a complaint of three days of fever, poor sleeping and poor feeding, associated with a week's congestion and cough. He is diagnosed as having his fifth ear infection in 5 months and is sent home on this fifth 5-10 day course of antibiotics and anti-cough and cold medication. This time, he doesn't tolerate his medicines well, with multiple diarrhea stools, a yeast dermatitis, and a hive-like rash, necessitating a change in antibiotics, bowel rest, and an antihistamine for his hives. Three days later, and five days out of Daycare, with parents missing four days of work, our little patient is finally better. Consumption of transfer factors is started by his parents (out of pure frustration and worry) at low daily dosing (1 cap/day). Two weeks later, he arrives at our office with a cold, but nothing more. Three months later, we see him for a well child visit, with amazed and delighted parents. A year later, another well child visit and no reported illnesses. This is an everyday occurrence in our Pediatric office. This is the real power of the immune boosting with transfer factors, and we have now seen this

for two full consecutive "sick seasons" in this General Pediatric office.
David Markowitz, M.D.

INFECTION - EAR

Because of a car accident in November of 1997, I was unable to return to my job as a school librarian until the beginning of the 98 term. The fumes from the 3-year-old carpet in the library immediately made my throat and nose burn. Within a week, I had a terrible cold, which developed into an ear infection, laryngitis, bronchitis, and eventually pneumonia. I got over the pneumonia, but the sinus infections, laryngitis, tightness in my chest and throat, and ear infections still plagued me. Early in November, I learned about transfer factors. I took 3 capsules, 3 times a day for 3 days then cut back to 2-3 times a day, then 1-3 times a day. Within a week, I felt great.
Mary Anne S.

INFECTION - EAR

Last year, I got an infection in my ear called "swimmer's ear." The last time I had it I didn't want to go for the antibiotics so I started taking a lot more vitamin C, but it didn't go away; it got worse. Then I went out and got some goldenseal and Echinacea and started using them, but it didn't go away. I finally gave in. I said, "Well, I better go get the antibiotics." Tuesday of last week I got another earache. I was taking a maintenance dose of transfer factors but I decided to take some more of it and just really see what happened. So I took 10 transfer factors capsules, then four hours later I took four more. Four hours later I took another four. I woke up Wednesday morning and it was 90 percent gone. It was there just slightly, nothing like the night before, and through the day it just totally disappeared. I was totally amazed, so I'm a believer.
Ray M.

INFECTION - EAR

As a practicing Pediatrician I actively use 4Life™ Transfer Factor™ in my practice and look forward to drastic decreases in the number of colds and their complications, and middle ear infections that are so common. My Transfer Factor™ kids shows an 85-90% reduction of illness as 'sick season' in Maine has started.
David Markowitz, M.D.

INFECTION - EAR

Over the past 4 years, I have experienced chronic Bronchitis, sinus infections, ear infections and conjunctivitis. I started taking 3 capsules of Transfer Factor™ a day for the first 3 or 4 days and didn't really notice much. I talked to Dr. Rob, and he encouraged me to go to 9 capsules a day. Due to the fact that I only had 1 bottle on me, I went to 6 a day. Well within 3 days I started breathing better, feeling more energy, feeling better than I had felt for 4 years. I have been on the Transfer Factor™ for 2 weeks and am taking 9 capsules a day and my health is back. Transfer Factor™ is the only thing that has been

able to bring my energy level back up to where it is. I am so excited about being able to help people with their health, but also being able to share a product that can help them with their wealth. To give them an opportunity to make a living doing something that is helping people. I am so excited to be involved with the people and the company. I appreciate all that has been given to me.

Julie Cardenaz.

INFECTION - EAR

Since my son, Elijah, was born he has suffered from severe ear infections. He was constantly put on antibiotics and had tubes put in his ears. He is now four years old. He has been on transfer factors. He has not experienced an infection.

January Jackson.

INFECTION - EAR

Last Wednesday I started to get another ear infection in my left ear. I get these stupid things about 4 or 5 times a year and they usually send me to the nearest clinic or emergency room about midnight. It seems to always happen at night and/or on a weekend. By 11P.M. the pain was going down my neck. Not good. When that happens I know I'm really "in for it" and am headed to the clinic - fast. It usually takes 2 to 3 days for the antibiotics they give me to get rid of it when it gets to this stage. I decided to "test" my new enhanced transfer factors with me as the guinea pig. I took 4 about 11Pm, got up at 3AM and took 4 more, got up at 7AM and took 4 more, got up at 10:30AM and took 4 more. Now that's probably way too much but I was hurting and didn't want to mess around. The pain began to subside instead of increasing, by the time I got up at 7AM. It was much better by around 2PM Thursday afternoon.

Jim Clary.

INFECTION - EAR

I listened to the information a friend gave me about transfer factors because my seven year-old daughter has had numerous sinus and ear infections during her life usually using an antibiotic at least 4-5 times a year. The last time she was sick prior to starting the transfer factors it took two antibiotics to actually clear up her infection. I decided to buy a bottle and just keep it on hand, but hadn't given it to her yet. About 3-4 days after I got the bottle she woke up from a nap with a high fever, 103°, and her ear was hurting. I had drops for her ear for the pain so I did put those in, and I gave her five of the transfer factors mixed in with a little grape juice since she doesn't swallow capsules well. She went back to sleep and about four hours later she woke up, and I repeated it giving her five more in some juice. She slept some more heading into the night. By morning when she woke up her fever was gone and she was feeling fine. She actually went to her little summer camp program that afternoon.

JoLynn Carr.

INFECTION - YEAST

I really am thankful for TF+. I have suffered for years with infections of various kinds. Yeast, bladder, kidney, and sinus infections just kept on popping up. I began taking Transfer Factor Plus™ 18 months ago. I have been basically infection free now for that long. At first I would get a mild infection but nothing like I did before.

Karen T.

INFECTION - YEAST

I am a 61 year old man and I've had a Candida yeast infection for quite a few years. I lost a lot of weight from it. I normally weigh 175 pounds and I was down to 155 pounds. After getting transfer factors, I immediately started taking it. Within three days, I had a tremendous appetite. The next day, I was on top of the world. I gained those 15 pounds back within three weeks after starting on transfer factors.

Denton B.

INFECTION - BRONCHITIS I am so thankful for enhanced transfer factors. I have suffered from sinus infections and bronchitis for at least a dozen years. I have been on antibiotics and taken every nutrient I could find. I received a postcard in the mail and read a Naomi's testimony. I couldn't wait to try this product. After I received my product it wasn't more than a couple weeks before I was feeling better. Now for a couple months, I have felt better than I had in many years.
