Jusuru has helped with my last joint on RH middle finger, which was declared arthritic after an injury a few years ago. The discomfort disappears with, and returns without, Jusuru.

A friend who saw me weekly since July commented recently that I should keep drinking it as it has improved my skin.

I have two clients who are customers only, one who is testing it (can easily afford to) and one who depends on it to alleviate pain in his legs (and he is young and healthy).
