## Testimonials

### **SLE**

• I am SLE patient and was taking 12 tablets of prednisolone 5mg for the last 4 years. I was suffering from joint pain, swelling, protein leakage from kidney and high level of creatinine in urine. I started to take 2 caps of TF Adv 3 times daily for 3 months. I saw big improvement in my health

condition. Pain has reduced and I stopped pain killers. The swelling has gone and protein and creatinine level has reduced lot. My doctor was amazed with my results and has gradually reduced my prednisolone dosage to 2 tabs daily. Now I am taking 2 TF Adv 2 times daily.
