SKIN

"I got stung by a wasp today, twice, actually.... As normal, I made a paste of baking soda and ice cold water and smeared it over the sting. Normally when I get stung, it swells up for a couple days and still hurts a bunch! This time I opened a couple of capsules of **Transfer Factor-Plus** and mixed it into the paste. Then I applied it to the sting as usual and covered it with gauze. I also took two capsules orally. I was busy working but couple hours later I realized IT DIDN'T HURT ANYMORE! I unwrapped the gauze, washed off the paste, and to my amazement, there was no swelling at all. I grabbed the camera and snapped the attached picture of the sting (no whistling at my leg, please ladies). You can see where the two stings are and there is a little bit of hardness at those spots, but no swelling and no pain. WOW!!! I'm *sure* it must be a coincidence, but I'll take it anyway" Tom Stephan

1. "About two weeks ago I brought a friend on as a Diamond Distributor with us and, of course, he got right on transfer factors. I saw Bob and I asked him, "Any results?" He began to roll back his shirt sleeves and he said, "Kevin, have you ever noticed my arms?" He has scabs and open sore wounds all over his arms. As he was rolling his shirt sleeves back he said, "You know, I've seen dermatologist after dermatologist, doctor after doctor. Nobody knows exactly what this is. They tell me it's viral in base, but they've never been able to do anything about it." As his sleeves rolled back I saw that they had gone from open wounds to blemishes in a seven to ten day period. If I hadn't seen it with my own eyes, I'm not quite sure I'd believe it. It was a real testament to the fact that we have a very, very powerful product on our hands." Kevin O' Conner

2. "For five years I was on antibiotics for a severe case of acne. I still broke out about 20%. After 6 weeks on transfer factors my acne completely cleared up. My dermatologist asked me to bring him some information on whatever I was taking." Marsha S.

3. "My mother, who is 83, was suffering from frequent boils on different areas of her body, but especially on her arms. I started her on enhanced transfer factors, 2 per day, and transfer factors at 6 per day. The problem went away, and after a month she stopped taking the enhanced transfer factors. Things seemed to be stabilized for a period of several months, then she started having boils again. I couldn't figure this out until I was informed that her transfer factors dosage had been cut to about 2 per day for two or three weeks. I got on her case, and she started taking 6 per day once again. Now she is once again free of boils, and will not go off transfer factors ever! I explained to her that as we age, our immune system tends to weaken, and it needs more support. Thanks for the wonderful products!" Jackie Benson

4. "Transfer factor has changed my life. I had a severe acne condition. I have been taking antibiotics for years but still couldn't stop this ugly breaking out. Now in six weeks my face is clear. Also the MalePro works great. My libido is going through the roof. I can't believe how much more satisfying my relationship with my wife is. Thank you for making a difference in my life. I have never taken any products that match these." Bob M.

5. "I have fought acne for years. I have been using TF RenewAll on my face for the past few months. It works great. It clears my face in a few weeks. When I stop using it, my acne comes back. I have experimented with this process four times. Each time it goes away and comes back as I use it and stop using it." Chris

6. "I sincerely feel that transfer factors have changed my life. One of the most amazing things that I have had with the transfer factors are using them not only internally but the topical results that I've had. I do food demonstrations a great deal and I had worn and broken a terrible blister on my finger. I came home after doing about 1500 ice cream cones in a eight hour period. When I got home, I could hardly move my hand. I went into the bathroom, wet my finger, put the stuff from two different capsules of the transfer factors on my finger, wrapped up, put the band-aids on and because I was so exhausted went directly to bed. When I got up in the morning my hand was ok. I think that is just such an amazing thing. I've used it several times because if I do a lot of cooking, I seem to gouge myself or cut my fingers and things. I've been using it that way, topically. I have heard of people using the transfer factors powder out of the capsules with Vitamin E and Aloe and putting them together. So I am fixing up a little container of that to have and I think this is going to be something that is going to help all of us with the healing part of it." Katie B.

7. "Back in the '70s and 80's I was a serious marathoner. In preparing for the race on marathon day it was customary to rub copious amounts of Vaseline on my feet and toes to minimize the blisters which inevitably occur. About ten years ago I developed a serious fungus in my toe-nails. Nothing would help it. After one month on transfer factors, my once thick toe-nails are reduced in thickness by at least one half. Is there no end to what transfer factors can accomplish?" Charles Kowalski

8. "I have some major health concerns and I wondered how I would know when and actually if transfer factors were kicking in. It didn't take long. The day my first order from this company came, I had a "shoot me" of a cold blossoming. The thing is my colds always turn in to bronchitis. I was really prepared for the initial feat. I started the transfer factors and three days later, every cough and snuffle was absolutely gone and I was totally amazed. The other thing that happened was, I had a hole in my face, and now, I know this sounds strange, but it's the best way I can describe what a cosmetologist did to my cheek, 23 years ago. About every two weeks, I would have to do my ritual cleaning and poking around so the spot wouldn't get infected. It was actually a 5mm hole. Well, about two weeks ago I got all of my stuff together getting ready for my ritual and I got my magnifying mirror and know what, that hole was gone. This is after twenty-three years. That hole was gone! You know, I always was one who caught every bug coming down the tide. I realize now that it wasn't that I was born under some sort of a cloud. Now I see and now I know it was because my immune system just never had the "umph" to protect me effectively. Now, this is the first time I am really hopeful that one day I am going to be able to say that my long standing health issues are finally dissolved. And until then, I'm going to tell the rest of the world about 4Life and transfer factors." Rebecca N.

9. "I am a registered nurse, 64 years old and respect what medications can do. However, prescriptions were not helping my severe allergies or my psoriasis. Allergic episodes usually resulted in a mega-infection of bronchitis or a sinus infection. My psoriasis did not respond to either of many medications. Both of these health problems are in the auto-immune category. I included 4 capsules of Choice 50 and 3 transfer factors in my daily supplements. I feel great now! Choice 50 and transfer factors are a dynamic combination that have truly improved the quality of life." Doreen Lassiter

10. "I had been suffering from a recurring fungal condition on my neck and shoulders. My doctor prescribed an anti-fungal drug, which made the problem disappear temporarily. However every two or three months the condition would flare up again and I would have to go back to the doctor for another prescription. I started taking transfer factors in July of last year. The condition has gone away completely and has not returned in

over 9 months. There's no question this outstanding product works!" Ron Santoro

11. "I had a burn on my arm. I dropped a curling iron on the inside of my arm and after three days, it was so infected it had a huge red ring around it. I heard the Tuesday night conference call where somebody had applied transfer factors to a burn, so I thought I would try it. I put the transfer factors with some water and, the next day it had a little scab on it. I had two spots on my face that looked like they were pre-cancerous, they hurt to touch, one was red, one was sort of grayish brown. They'd been there about six months. Well, I put water on it, then I dotted the transfer factors on there. The next day, I didn't pay attention, I just left it on there. I don't know if it peeled off or what, but I looked in the mirror that afternoon and they weren't there anymore. I couldn't even figure out where they were. I don't know what happened to them. I had a wart on the top of my hand. I put it on. In three days, the wart was gone. I couldn't believe it. So it works really well topically." Pat T.

12. "I had irritating itching and pain caused by a severe sunburn. It had been suggested to me to try TF RenewAll. I was already using other lotions to try and relieve the irritation, but not getting the results I needed so I was more than willing to try TF RenewAll. Much to my surprise, the irritation and skin damage were reduced by more than 50% just overnight." TF RenewAll works!" Amber Patton

13. "My son, who is a 20 year-old mechanic, was at work one day and a radiator blew up in his face. By the time I went to pick him up they had run a cold shower on him and the skin was peeling off his face. We went to any emergency care facility and they gave him pain pills and told him to put ice and silvadene cream on it. I came home and I said, "Okay, Tyson, we are going to try transfer factors. You're going to give me ten minutes. You can handle ten minutes worth of pain." I mixed the transfer factors in the cream, applied it to all of the burns, and within four minutes of application the pain was totally gone. That was amazing enough by itself. That night he slept through the night, and went back to work the next morning. He came home at noon and you could start seeing signs of infection. The open wounds were weeping, and I couldn't keep the cream on him. Out of desperation I laid him on the floor, opened up the capsules of powder and applied them right to all the open wounds. Within four hours of doing that his face was 100% improved, the signs of the infection were diminishing, the weeping sores were going away. We did the same thing that night. We put two transfer factors capsules all over every part of his burned face. The next morning he woke up, came down the stairs, with a big grin on his face, and he said, "Mom, you are not going to believe my face." I looked at him and there wasn't an open sore. Tuesday night was the burn; Friday night he went on a date, Saturday he went water skiing and you could barely see that he had been burned. That should have been a minimum of three weeks recovery with scabbing and infections, but it only took about four days with transfer factors." Susan B.

14. "There is nothing more embarrassing than having middle-aged acne. My doctor says that they are seeing more and more women with middle-aged acne than ever before, as well as rosacea. He thinks that they are finding it being related to peri-menopause, (that is pre-menopause) I refused to go to my husbands company dinner at Christmas because I was so humiliated by the condition of my face. I had already spent 300 on 2 products that I bought from TV infomercials DOESN'T WORK, my sponsor GAVE me a tube of TF RenewAll, first, because I was so depressed, I wouldn't even buy it for myself. Immediately, I saw results, but still wasn't totally clear. When I went to the conference, I bought Bio-C. I am using Bio-C and TF RenewAll every day, and I am clear, baby's skin again. I have now showed this to my doctor and he is reading some material. If your teens have acne, definitely get them TF RenewAll and Bio-C. You won't regret it." Sonya

15. "I had a burn on my arm. I dropped a curling iron on the inside of my arm and after three days, it was so infected it had a huge red ring around it. I heard the Tuesday night conference call where somebody had applied transfer factors to a burn, so I thought I would try it. I put the transfer factors with some water and, the next day it had a little scab on it. I had two spots on my face that looked like they were pre-cancerous, they hurt to touch, one was red, one was sort of grayish brown. They'd been there about six months. Well, I put water on it, then I dotted the transfer factors on there. The next day, I didn't pay attention, I just left it on there. I don't know if it peeled off or what, but I looked in the mirror that afternoon and they weren't there anymore. I couldn't even figure out where they were. I don't know what happened to them. I had a wart on

the top of my hand. I put it on. In three days, the wart was gone. I couldn't believe it. So it works really well topically." Pat T.

16. "I just want to share with you about one of my customers that was burned just before Christmas. She was making candles and some thing happened with the wax. Anyway she got 2 and 3 degree burns on her hands. When I was talking with her the other day to see how she was doing, I just had to share what she told me. She has healed just wonderful. When she was in the hospital, they told her that they couldn't believe how fast she was healing. They told her she has an excellent immune system. You can hardly tell that she burned her hands, except one hand is a little red. My customer told me that she knows the reason she healed so fast was because she started taking transfer factors 2 months ago. She is sure that is why she healed so fast." Jeann K.

17. "I have been using the TF RenewAll Skin Gel since the convention. It really works. I have a skin condition, that I have had for several years. It is totally cleared up. The wrinkles around my eyes are 50% gone. My husband used it on his feet and his foot condition is almost gone. My daughter burned her hand and with TF RenewAll it was like new over night. It's great!" Mary

18. "I had accidentally poured boiling water on my hand and it was very red and looked like it was going to blister. I immediately put it under cold water than applied TF RenewAll on it. It still burnt badly and was very red and appeared as if it would blister. Before I went to bed, I applied more TF RenewAll. When I woke up, my hand was fine...no redness, no blistering. just like I never had poured boiling water on my hand..Amazing!" Karen Peckenham

19. "My husband Nelson was diagnosed with diabetes in January of this year. When Nelson went to the doctor his blood sugar count was 450 within 3 months we had it back down to 110. The doctors office even called our house in astonishment about how quickly things had gotten back to normal. Especially since in monitoring Nelson every week the doctor was concerned that the medication he had given Nelson was not working properly. That is when we added transfer factors. Within 3 days Nelsons levels started to drop. Also with diabetes comes certain skin diseases, one of which is psoriasis. Nelson has had it very severely on his head, that he was embarrassed when he was out due to flakes or getting his hair cut because it looked so awful. It would itch so badly that in his sleep he would scratch his head to the point of bleeding. Then 4-Life came out with TF Spray with colloidal silver. We started spraying that on his head every night. Not only has the severe itching gone away but his head is clearing up and the psoriasis is going away. We are both very grateful to this company for the products they have come out with that help us have a much better quality of life." Mickey B

20. "Having had a long naval career as an aviation & ship command specialist and a typically Australian 'life in the sun,' Keith suffered badly with solar keratosis - or skin cancer - until adopting a daily regimen of Transfer Factor Plus (TF Plus) and more recently, TF Plus Advanced Formula. Since that time, all his skin cancer has disappeared and people comment on how smooth and healthy his skin appears. Ineke's immediate family had a history of cancer and she started on Transfer Factor to rule out the possible emergence of this in her own body. We both use the 4Life Choice 50 powerful antioxidant to scourge free radicals from our bodies and rely on Transfer Factor Spray as a first line of oral protection, especially when travelling. We cannot recommend these products too highly since they can harm nobody and yet produce almost miraculous results in people's lives. We think they are a gift from God."--Keith & Ineke Callins.

21. "I take 4Life Transfer Factor Plus Advanced Formula to support my immune system. It's been great, especially in terms of providing balance to my immune system. I also started using 4Life Transfer Factor RenewAll and Aloe Vera to promote healthy skin. Both of these products help keep my skin soft and healthy." --Heidy C, Pennsylvania

22. "I'm almost embarrassed to say I was so skeptical it took me three months to listen to what transfer factors would do for me. But I had a very bad skin condition on my chin and I had spent thousands of dollars going from doctor to doctor and they literally could not correct it. I tried every medication you could think of and they just simply gave up. Well it was really upsetting to me, as you can imagine. I finally gave in and I tried transfer factors internally and even topically. Within about 12 hours for the first time, it began helping.

My face is practically back to normal now. I'm just so thankful for the product." Bonnie T.

23. "I just want to share with you about one of my customers that was burned just before Christmas. She was making candles and something happened with the wax. Anyway she got 2nd and 3rd degree burns on her hands. When I was talking with her the other day to see how she was doing, I just had to share what she told me. She has healed just wonderful. When she was in the hospital, they told her that they couldn't believe how fast she was healing. They told her she has an excellent immune system. You can hardly tell that she burned her hands, except one hand is a little red. My customer told me that she knows the reason she healed so fast was because she started taking transfer factors 2 months ago. She is sure that is why she healed so fast.

"I have been using the TF RenewAll Skin Gel since the convention. It really works. I have a skin condition, that I have had for several years. It is totally cleared up. The wrinkles around my eyes are 50% gone. My husband used it on his feet and his foot condition is almost gone. My daughter burned her hand and with TF RenewAll it was like new over night. It's great!" Mary

24. "My co-worker gave her one-year-old transfer factors to see if it would help with diaper rash she developed after her doctor put the baby on antibiotics. The rash cleared up right away. One day her husband called her at work and wanted to know where the "stuff" was that made the baby's diaper rash go away, because she broke out again. He gave her the transfer factors and called back a little later and said it was completely cleared up. I suggested she keep the baby on it to prevent any more outbreaks." Nancy Gaddy

25. "My 6-year-old son has had terrible eczema all his life, yet transfer factors, in just 2 months, have made significant improvements." Anthony V.

26. "For years I've had trouble with my hands. They split open and they bleed. They itch and they crack. They can become very painful. I was told at one point that it was a parasitic condition yet I knew, of course, it was an immune condition. Well, when I started on transfer factors I had one finger that had not healed up for a couple of months and I really didn't know what I was going to do about it. After just a couple of days on transfer factors, and I guess at the time I was probably taking four a day, that finger healed up completely. Then as time went on over the next couple of weeks the rest of my fingers healed up very nicely and today I don't suffer from the condition that really has plagued me for several years. All I can say is thank you to transfer factors, and thank you to this company." Susan K.
