### Skin Disease

#### ECZEMA

My 6-year-old son has had terrible eczema all his life, yet 4Life™ Transfer Factor™, in just 2 months, has made significant improvements.

Anthony V.

#### PLANTER WART

A 4 year old wart disappeared while taking TF.

Eunice, NJ.

#### PSORIASIS

I am a registered nurse, 64 years old and respect what medications can do. However, prescriptions were not helping my severe allergies or my psoriasis. Allergic episodes usually resulted in a mega-infection of bronchitis or a sinus infection. My psoriasis did not respond to any of the many medications. Both of these health problems are in the autoimmune category. I included 4 capsules of Choice 50 and 3 Transfer Factor in my daily supplements. The Choice 50 served as my antioxidant, and the Transfer Factor helped my immune system. Both the allergies and psoriasis have totally disappeared. Choice 50 and Transfer Factor are a dynamic combination that has truly improved the quality of life.

Doreen L.

#### SEVERE RASH

I have been going to a highly respected dermatologist regarding a rash for the past three years. I had been taking erythromycin for most of that time along with ointments, creams, lotions, etc. Two months ago, I began taking TF and I noticed a huge improvement. I went to the dermatologist just a few days ago, and he was amazed with the improvement. He told me to just keep doing with I am doing, and I don't have to come back for a month. I am still using all of the external medication, but I am convinced that the major contributor to the improvement is the TF. I will continue with the TF indefinitely.

DRW, Seattle.

## SKIN

For years I've had trouble with my hands. They split open and they bleed. They itch, and they crack. They can become very painful. I was told at one point that it was a parasitic condition yet I knew, of course, it was an immune condition. Well, when I started on TF I had one finger that had not healed up for a couple of months and I really didn't know what I was going to do about it. After just a couple of days on TF, and I guess at the time I was probably taking four a day, that finger healed up completely. Then as time went on over the next couple of weeks the rest of my fingers healed up very nicely and today I don't suffer from the condition that really has plagued me for several years. All I can say is thank you to TF, and thank you to this company.

Susan K.

## SCABS & SORES

He had scabs and open sore wounds all over his arms. As he was rolling his shirt sleeves back he said, "You know, I've seen dermatologist after dermatologist, doctor after doctor. Nobody knows exactly what this is. They tell me it's viral in base, but they've never been able to do anything about it." As his sleeves rolled back I saw that they had gone from open wounds to blemishes in a seven to ten day period. If I hadn't seen it with my own eyes, I'm not quite sure I'd believe it. It was a real testament to the fact that we have a very, very powerful product on our hands.

Kevin O'Conner.

## SKIN BAD CONDITION

I'm almost embarrassed to say I was so skeptical it took me three months to listen to what transfer factors would do for me. But I had a very bad skin condition on my chin and I had spent thousands of dollars going from doctor to doctor and they literally could not correct it. I tried every medication you could think of and they just simply gave up. Well it was really upsetting to me, as you can imagine. I finally gave in and I tried transfer factors internally and even topically. Within about 12 hours for the first time, it began helping. My face is practically back to normal now. I'm just so thankful for the product.

Bonnie T.

## MELANOMA

I was diagnosed with a level 3 Melanoma 13th June 2001 after my GP removed a mole from my back Friday 8th June 2001. I proceeded to take 8 TF Plus a day. My GP referred me to a specialist for an appointment on Monday 18th June and at the appointment he proceeded to inform me of the severity of the problem and that there were dangerous cells still in the area of the removed mole going by the Pathology report. He said that with technology that is available today he can determine the area that had to be removed and had to book me into Hospital to remove a sizable chunk from my back to reduce the chance of further problems. I was to be admitted to Hospital the very next morning. Now comes the interesting part , I have had the stitches removed

Friday 6th July 2001 and the Doctor sat me down after removing the stitches and said that I was to see him every 3 months as a precaution but was at a loss to explain the Pathology results. The results came back all clear, NO DANGEROUS CELLS TO BE FOUND!! I'm so thankful for finding 4Life Research and in particular the Professional Networkers Team, because I truly believe that we have a product that can, and will change peoples lives. What has come out of this experience for me is a determination to promote the products to as many people as I can because I truly believe that by helping people to experience a better healthy life I have succeeded in what we are all put on this earth to do, Help others and our lives will be fulfilled.  
Paul Simpson.
