Stevens Johnson Disease

STEVENS JOHNSON SYNDROME

I am so thankful and so excited about transfer factors. I believe with all my heart that transfer factors have saved my life. I suffered from Steven Johnson Syndrome for years. I was hit by a number of viruses, one after another. My immune system basically collapsed. My WBC went way down to a very dangerous level. My platelets went down. I almost died a number of times with such a weakened immune system. Along came transfer factors. I could tell almost immediately that I was getting better. I am a new person! My loved ones have a new person. Life now has color.

Leslie Hoare.
