DENTAL: TEETH, GUMS, MOUTH DISEASE

1. "I was diagnosed with acute periodontal disease about 35 years ago, and I was told by UCSF (University of California San Francisco) that the severity of my condition was found in only 2% of the worldwide population. I lost track of how many periodontists I have gone to over the years, but enough that when someone begins working in my mouth, I know immediately if I have confidence in them or not. I have also lost track of how many surgeries I've had in attempting to deal with this condition. Now, I work part-time jobs as a nanny for dogs and horses to support our nonprofit horse sanctuary, Cimmaron Sanctuary. Last month, I was overbooked with a nearly impossible schedule of 15+ hours almost every day. I was already tired and worn out, when a huge tooth abscess blew up on the left side of my mouth. Despite a high tolerance to pain in my mouth and head, this was a duzzie, and I could not bite down at all on that side - it was almost numb. I live on a very tight budget but I knew I would not be able to function and meet all these obligations without extraordinary help.

Then I learned that I had an immune deficiency or weak immune system which means that my body was unprotected and susceptible to infections. I did some research and found a unique natural immune support supplement called Transfer Factor that has the reputation to boost the immune system over 430%. I ordered a Quad Discount Pack of Transfer Factor Plus formula @25% discount and had it shipped overnight. For the first two days I took 8 capsules/day, and I experienced relief, but not enough to be comfortable and face the whole month. Then I read an Australian story about tooth abscess - he said he took 12 capsules of TF+ a day, and his abscess went away. So I increased my dose to 12/day, and immediately the pain subsided, I felt normal, and I moved through the month completing all my obligations with ease. Not only that, I forgot about the abscess and felt vibrant and healthy the whole month. Despite my tight budget, I have decided to put me and my health first from now on. I made a commitment to myself to order the TF+ Quad Pack every month, which will support me in maintaining vibrant health and well being. I wish I had known about this product 35+ years ago!!" *Gwen Justis lives in Petaluma, CA*

2. I have a serious gum problem, periodontal disease. I have been seeing a dentist for sometime. I began consuming transfer factors sometime ago. The last time I was in to see the dentist, he asked me what I was doing to my gums. I said nothing. He said some how they had cleared up. I was listening to the veterinarian testimony on how periodontal disease is the number one killer of animals and how transfer factors were helping their immune systems. Then it dawned on me what had happened to my diseased gums. We have one great product." *Guy Sinclair*

3. "About 15 years ago one of my back teeth became loose. My dentist told me at that time that I had significant bone loss in my jaw, which caused pockets. I didn't want to have the tooth removed, so I struggled for about 10 years to save it. I used hydrogen peroxide with a water pick, Echinacea, goldenseal, and just about every other supplement you could name, but I still had a constant low grade infection around the tooth from bacteria collecting under it. Finally, about 5 years ago I had to have the tooth removed. The infections had begun moving back and forth from my tooth to my sinuses. I never seemed to be free of infection. Almost immediately after losing that tooth, the tooth next to it became loose and the same thing started happening, only it was deteriorating much faster. I was experiencing severe sinus infections, tooth abscesses, and infections in my right ear. I was really miserable. Then I started on transfer factors. Within one day I could tell the difference and within seven days the infection in my ear and sinuses was cleared up and my tooth felt much better. Most of the pain was gone. Within six weeks the tooth was so tight that I couldn't wiggle it with my fingers. My sinuses and my ear are completely healed and I can chew on the right side of my mouth again." - Susan S.

4. "I was sick for many years, and I know herbs helped me to get back to life. However, my immune system was still down, and I had a severe infection in my gums that I could never get rid of. I heard two people talking about transfer factors. It interested me, but I didn't think any more about it until one of them called and we were talking about it. Then another called me, and that's when I really got interested. I listened to the 800-number, then I called her back and said I wanted to get transfer factors for myself. When my product came in I took five that afternoon, then I took two more that night before I went to bed. Well, the next day I took five and two, but I had already begun to feel better. The third day my gum infection was gone." Carmen Prevatte

5. "My experience with transfer factor toothpaste. I had cracked a couple teeth which were going to come out so I went to the dentist. I also had swollen gums and it hurt. The dentist wanted me to get an implant in the missing spot where my tooth was which I refused. She also said she could only give me one more round of antibiotics. I got to thinking that 4 - life had toothpaste so I better try it. I got the toothpaste and began using it right away. Within about 3 days my gums were healed, no more puss or infection. My teeth although were never replaced, luckily there on the side of my mouth, started to get better also. It's like the transfer factor cleaned and repaired everything it could in my mouth. Well needless to say I have never had another problem with my mouth, teeth or gums again. I use it regularly." Nancy
