Do YOU like Spirulina and/or Chlorella? #Superfoods for Optimum Health

NaturalNews.com ~ #Chlorella and #Spirulina are truly the most astounding food sources on planet Earth. In this special report, you'll learn about the astonishing health benefits and nutritional achievements of these two foods, and you'll see why you need to get these into your diet immediately.

Most people have heard of chlorella and spirulina, but they don't really know the details of why these are truly the best food sources on the planet. For example, did you know that, ounce per ounce, spirulina contains twelve times the digestible protein of beef? It's a far better protein than beef, and it contains a much healthier mineral balance (such as #magnesium) that just isn't found in beef.

Did you know that a #phytochemical found in chlorella can actually rebuild nerve damage in the #brain and #nervous system? That's why chlorella is being used in the recovery of patients with #Alzheimer's and #Parkinson's disease.

Were you aware that both chlorella and spirulina can actually reverse #cancer in the human body? Both of these superfoods have been clinically shown to demonstrate stunning preventive and curative properties when it comes to all sorts of cancers."

And finally, did you know that these superfoods also contain a high content of essential fatty acids such as #GLA that are routinely missing from the diets of most Americans and yet are critical for healthy brain function?"
