According to Dr. Ignarro's book, research shows:

- Nitric Oxide is one of the most significant molecules in the body.
- Nitric Oxide influences the functioning of virtually every human organ, from the heart to the lungs to the stomach.
- Nitric Oxide can relax your blood vessels, reduce your blood pressure, and lower your risk of having a heart attack or stroke.
- Adequate levels of Nitric Oxide may play a role in preventing diabetes complications, Alzheimer's disease, erectile dysfunction, arthritis, infections, and ulcers.

How Do YOU Increase NO in YOUR Body? Simple..Click this link
