

This is me!! I am very thin but I got big hips. That is the problems that girls these days are having. Besides, I am also very unhealthy. I had athma, which i have to go to clinic to inhale the oxygen(dunno what its called), then I have sinus, every morning sneeze here sneeze there, tissue was my best friend. Ahaha. I also am allergic to seafood, everytime I eat seafood, my face will swollen. Urgh why doesnt it swollen at other place. And my period was 2 months once. And i use to get fever very often.

Now, Alhamdulillah, I am healthy! No athma, no allergies, sinus getting better, period normal and my fever sometimes only come. Thank you Allah, thank you Herbalife!!
