

## FLAVON, a Great New Health Product

Posted on August 13, 2014 by Barbara Hattermer

You know I have been trying my best to stay healthy so that I can "Live Every Day of My Life." My post this month is about a great new product that is winning many prizes for being a breakthrough health product. It is called FLAVON. I am taking it and have found it to be so helpful I will be taking it for the rest of my life. I have even become a distributor so that I can purchase it for friends who desperately need it but cannot afford it for themselves. I'd also like to see my grandchildren on it. It is the best and easiest way I know to receive the health benefits of eating a variety of fresh fruits and vegetables.

### WINS TOP PRIZE IN EUROPE FOR BEST NEW HEALTH PRODUCT

A product like this has never been done before. It is a sublingual antioxidant that works faster, better and has more absorption than any other product. Sublingual means that you put it on your tongue and it goes directly into your blood stream. It rebuilds your blood system and detoxifies your body at the same time.

### WHY WAS IT DEVELOPED?

The wife of the owner of Flavon had breast cancer. Believing that it would help her beat the cancer, he wanted to feed her the healthiest, most pure food he could find. He understood that fruits and vegetables contain the most food value with the fewest problems. They are full of flavonoids which neutralize free radicals that result in disease. Over several years, he developed this product and kept improving it. His wife is now cancer free and he is dedicated to spreading the good news of this product all over the world.

### WHAT SUCCESS HAS IT HAD?

Flavon is a family-owned, debt free company. The product has been developed over ten years in Hungary and has a solid reputation all over Europe. It sells 230,000 boxes of product per month in Hungary alone and is now selling in 37 countries. The number of customers is growing daily. It was launched in the United States in December of 2013.

### WHAT EXACTLY IS IT?

Small jars of non GMO fruits and vegetables that have been grown without pesticides or chemicals, sun-ripened, harvested at their peak, and immediately processed without preservatives at very low temperatures so they are essentially raw and lose none of their potency. The produce is harvested when it has the optimum level of enzymes and because it is not cooked, enzymes are alive in the jam. Each small jar contains 70 to 80 lbs. of fruit or vegetables. Vacuum technology extracts water and oxygen so it becomes a compact sweet tasting jam that is full of raw enzymes and minerals. No sugar is added. The flavor is so satisfying people have found that their craving for sweets diminishes.

The exciting thing is that its absorption rate is roughly 95% which is absolutely unique. The absorption rate for pill supplements is 5 to 15%, for liquids or juices 40-50% and for Flavon 90 to 95% or higher. The product is regularly checked at Brunswick Lab to make sure it is pristine clear.

The product has large quantities of flavonoids, which are antioxidants that defend your body from free radicals – unstable electrons that damage your cells and cause diseases like cancer, allergies and wrinkles. The more flavonoids you consume, the less likely you are to develop heart disease. There are no flavonoids in any source but fruits and vegetables, but there are one million antioxidants in Green and Protect. These counter chemicals, preservatives, excessive medicines and stress. The jam literally goes after the cancer cells. Protect and Max Plus, two of the products, have more flavonoids than 300 liters of red wine.
