Say NO to CANCER !!!!!!!!!!!

If you know anybody who has or had CANCER share this page with them. FLAVONOIDS reduce the side effects of chemotherapy, they protect "good" cells, help to cumulate free radicals in cancer cells and eliminate them faster.

You can prevent cancer by eating Flavon every day and you can help yourself with the aggressive side effects of chemotherapy.

In a 20 year study, it was found that participants with the highest intake of flavonoids and proanthocyanidins had a 44 and 40 percent lower risk of oral cancer and laryngeal cancer, respectively. The occurrence of colon cancer was also lowered by a third, and there were reductions in breast, kidney and ovarian cancers too.

Healthy or sick..... the choice is yours !!!
