
August 2007

When Kevin came and shared to my wife and I the PXP story of how much better we could be by using this product, I didn't know just how much I should believe. It's not that I don't trust Kevin, but the stories just seemed so unreal....but after some thought I said, "sure Kevin we will try".

For over 30 years my cholesterol was in a slow but steady climb.....once I took the PXP for just over a month I went to my heart doctor and had my blood tested.....my goodness.....every sign was improved....I was shocked at how well the numbers went. I must admit that Kevin also shared that for the first month I needed to take PXP 3 times a day....well....I took it twice and on many days only once.....little did I know.....but after the blood test, I've gone back to 2 to 3 a day uses and am waiting to see how the numbers will look at my next blood testing.....

The nurse said, WOW, whatever I was doing I should keep doing it....my cholesterol dropped from 265 to 240 with the good numbers going up 20 and the bad numbers going 25 down....I'm on my way. I've never had a number drop in 30 years...whew

In the mean time, I feel great. AS for my wife Ruth, she also has her own improvements so we both now support each other in this effort to live a better and healthier life....thanks PXP, and thanks to Kevin...
