

Hello A ,

The following is my story.

February of 2008 I was diagnosed with Colitis and Diverticuli but tests also showed a possibility of Chrons.

I was on various medications throughout 2008 and 2009 with nothing really helping.

Then one day in late January of 2010 A called and talked to me about Vivix and offered to send more information along with testimonials. After reading the material I ordered Vivix and after a month thought it wasn't going to help me but I remembered A saying to try it at least for two months.

I started taking Vivix in February and after two months I could see improvement and by three months I was symptom free and I still am.

Before taking Vivix I had diarrhea, bloody stools, and mucus discharge to the point I didn't leave the house but for a short time. I was basically living on toast and yogurt and drinking only water. I had no energy. Now I watch my diet but I can eat most things and I still drink mostly water but occasionally have tea or a soda. I am now able to do my regular activities.

I am so thankful for that call from A in 2010.

L B
