

bearing. Keeping the bearings coated with Luboil® prevents the seal from drying out, causing the bearing to get dirt and dust into it, making it fail.

In our shop, you will find several 22 oz bottles of Luboil® and Rust Bomb® hanging on the wall, ready for use when needed. What is a container of Luboil® worth? I don't really know...I can tell you this, it is worth a whole lot more than what we pay for it!

P.S. Here is a tip from a fellow IBO. DO NOT use Luboil® as a cutting oil. He was drilling holes in metal and ran out of cutting oil. He thought he'd just use some Luboil®. The first thing he noticed was the bit was not drilling as well, so he pushed a little harder on the drill. The harder he pushed the more the smoke rolled...Luboil® was protecting that metal from friction! Amazing!

Buddy Myers

## Health Products

I have a problem with acid reflux and IBS, (a muscle problem in my stomach). I got food poisoning and was up all night and the next day. My stomach was getting very sore with pain. I was having too many bowel movements and could not keep anything down. Nothing I took was working, so I had to do something. I had heard people talking about, and had heard a testimony on a DVD about a product called PROBIOTIC SUPPORT. So, I ordered a bottle and took two of them right away. By afternoon the same day, I started to feel better! It even started to help with my acid reflux. Right now I'm taking two every four days and the PROBIOTIC SUPPORT is helping with my IBS. I feel as time goes on I will keep getting better and better! I know I am taking a natural product, something that works with my body instead of against it like the toxins in other medications and some of the foods we eat.

Steve W. Shoemaker

PROBIOTIC SUPPORT has been a very successful product for me. I've had gingivitis in some areas pretty bad. After taking PROBIOTIC SUPPORT for a few months, the gingivitis was gone. The dentist was just amazed! He could not believe it! PROBIOTIC SUPPORT saved me a \$2,000.00 dentist bill.

Rosa Mae Hilty

I had Tendonitis develop in my right hand about mid-November, 2005. It would hurt so bad that I

would cry. I tried some different medicines to help reduce the pain with partial results. I do not like to take drugs because of the side effects known and especially the long-term side effects that are unknown.

In December, 2005, I was introduced to Joint Support®. I started taking 2 capsules twice a day. In 3 days the pain went completely away. WOW!!!! I was very surprised and thankful. As of today, I have been on Joint Support® for 3 months and am continuing pain-free results. I now take 2 Joint Support® capsules a day. Thank you Conklin,

Sheree Dailey

I have a **Cellular Energy®** story that I'm sure you will find exciting. I will give a brief history of the medical problems that I have lived with for the past 13 years. In 1994, I was diagnosed with Graves Disease and Fibromyalgia. The Graves disease affected my eyes and the Fibromyalgia was a source of constant flu-like aches and pain. I was unable to function very well and my life seemed to be put on hold. The Graves Disease caused my eyes to protrude from the swelling and inflammation of the eye muscles. My right eyelid was retracted and I was unable to close my eyelid. I had surgery to remove the affected muscle and attach a graft behind the eyelid. My eyelid was stitched shut for two weeks. It was a long and painful recovery, but eventually it did heal.

In 1996, I decided to fight back and try to conquer my illness, and decided to go back to work. I was a Home Health nurse and eventually went into Hospice full time. I lived on pain pills to get through each day, but I was able to do my job well. I was diagnosed with Diabetes Type 2 and also had high blood pressure. My blood pressure and diabetes were controlled with medication, and the cost of many prescriptions to control my symptoms became very costly. I worked for eight years, but the stress of my job as well as the symptoms of my illnesses had become too difficult to manage. I decided that it was time to leave the work place and spend my time at home trying to regain some aspect of a healthy and possibly normal lifestyle.

Fortunately, I did have a period of time that I was able to decrease my need for pain medication and actually began to feel healthy. I was so happy that finally after so many years, I could do most of the things I wanted to do. My husband and I were even walking three miles a day, and it was a great feeling to feel healthy. About a year ago, the symptoms of the Graves Disease started to reappear and I knew that it was active again. The pain from the Fibromyalgia also returned and I was physically exhausted again. It was depressing.

This time, my left eyelid retracted, and couldn't be closed completely. I had many visual changes and gave up driving. I visited my sister, Carol Welch for a few days in October, 2006. She started me on packets of **Cellular Energy®** and **Vital H®** in hopes that it would help me. I was waiting for the Graves disease to become inactive again so that I could have surgery on my right eyelid muscle. I faithfully took two packets a day. By Christmas time, I was feeling much better and was so thankful that I had energy that I hadn't had in several months. I was able to cut back on my pain medication to once a day, and some days I didn't need it at all. My eyes were still affected and really didn't look improved. I had become very self conscious and hated for anyone to see me.

In January I saw a Surgeon to determine if I could have the corrective surgery soon. Surgery was the only way to go, because there was extensive scar tissue behind my eye. The surgery was done on February 20th. This time, my eyelid was not stitched shut and I was given instructions to follow for the next three weeks to promote healing. I kept an icepack on my eyelid for three days and covered it with a shield to protect it while I slept with my head elevated. After the first three days, I put icepacks on my eyelid for 20 minutes four times a day. The swelling and bruising seemed minimal, and I really had no discomfort from my eyelid. I thought that the healing was going very well and was extremely pleased with the way my eyes looked.

My follow up appointment with the surgeon was on March 5th, 13 days after the surgery. I was anxious to hear what he would say about the healing. When he entered the room, he asked how I was. I told him that I feel great. He said that I looked good, and then did a double take. He told me, **"You look great, really great!"** His other expressions included, **"I can't believe you have healed so fast"**, **"I expected to still see swelling and bruising"**, **"Your incision is healed"**, **You look like you are at least a month to six weeks out from your surgery"**, **"I'm amazed"**, **"You are really a fast healer"**, **"Do you always heal this fast?"**. I told him that my first surgery was difficult and took a long time to heal. He said that I could forget about the instructions for the third week, because I was way ahead of that.

I am amazed because I am almost 64 years old and am diabetic. One of the classic symptoms of diabetes is slow healing. I had been experiencing frequent numbness and tingling in my feet and hands due to the diabetes, and recently realized that it had been two or three months since I had any tingling or numbness. My blood pressure is excellent and I am no longer on blood pressure medication. I am very thankful that the Lord has given me back my life through lots of **prayer and Cellular Energy®**.

Sharon C., NE

I had been taking Vital HF® for about a year and had run out. I always would reorder when my supply was low, but this I was busy and didn't get around to ordering a new supply. Three days later, I was sick. I went to the doctor and was put on medicine. I will not fail to order my Vital HF® again. I know this could have been a coincidence, but I think it was due to the fact that I ran out of Vital HF®. A friend is using the Probiotic Support® and used to go to sleep with antacids by his side and a glass of water. After being on the Probiotic for awhile, he no longer needs any antacids by his bed side.

Bill Wilson

4 years ago I had to start using reading glasses to read. (75-100) I could not read fine print even holding it out as far as my arms could reach. I have been on Cellular Energy® for about a year. The last 3 or 4 months I have not used my reading glasses that sit by my recliner. The funny thing about it is that I didn't even realize this fact until I was at a Conklin meeting in March and someone was talking about someone else's eyesight. I am 44 year old and the doctor told me that at age 40 when I started using reading glasses, that my eyes would continue to get worse year after year until I would have to go to prescription eye glasses. I was getting benefits from Cellular Energy and didn't even know it.

Bill Wilson, NE

I have had sinus problems for several years and have tried many different sinus pills. Nothing seems to work. The first time I started using the Cellular Energy®, sinuses started draining immediately. I could breathe again.

Cindy Simonsen

For the last 4 or 5 years my Dr. has been warning me that my blood pressure has been rising and that I needed to be more careful with my diet and exercise. Like a lot of people, I'm afraid that I made only small changes to keep my blood pressure in check. At my last check up, my blood pressure was 145/89.

I started taking Vital HF last fall and also started on a maintenance dose of 3 capsules of **Cellular Energy™** since the end of January. I have noticed an increase in my immune system as well

as clarity of thinking even at times when I was tired. Recently I was injured in a horse accident and broke 4 ribs and punctured my lung. In the emergency room, they took my blood pressure when I was in considerable amount of pain and I expected that it would be higher still. To my surprise, it was 114/56. In the five days I was in the hospital, my husband brought me the **Cellular Energy™** and **Probiotic Support™** as I was on IV antibiotics. My blood pressure was between 100 to 118 over 50 to 57. The highest it ever got was 124/59.

Both the ER doctor and the Trauma doctor commented that for my age, I was very healthy. They had me hooked to a heart monitor for three days because they were worried that I had bruised my heart. Those readings showed a strong healthy heart. They were surprised that I'm taking no Rx meds and only taking Conklin's **LifeTrack®** supplements. I know that Conklin's products are also playing a role in my recuperation and I would not be without them.

Kris Pierce, Gold

I am 61 years old and have been in good health all of my life. PRAISE THE LORD! I had pulled my right throwing arm back in my thirties, but it wasn't a big deal. I have been playing basketball three mornings a week for the last eight or nine years. It has helped keep me in shape. My big toes have given me some problems over the years – stiff and numb.

In March of 2004, my hands got sore and hurt; they got a little better but were still stiff and sore. Then one morning I awoke and could not raise my right arm off the bed, as it hurt so badly. The doctor had me doing exercises, and I did them faithfully, but the tightness and hurting were still there. Then in November 2004, I pulled something in my right hip and I started to walk with a hitch in my "getty-up". Through all of this, I began taking 800 mg Ibuprofen or 2 Aleve tablets twice a day. In early January of 2005, I was playing basketball and later in the morning my knee began to swell and hurt. I iced it several times a day, but to no avail.

I started taking **Cellular Energy™** on January 31, 2005. I took one capsule the first two days,

two the third and fourth days, and have taken three every day since. At the end of one week, my swelling on the knee went down. At the end of two weeks the knee hurt very little. I had greater range of motion in my shoulder with not anywhere near the soreness. I also lost my “getty-up”. I don’t have the stiffness in my fingers and toes, and have a full grip. I’ve only taken 2 Aleve capsules one time since. Thank you, Lord!

Marvin G. Flory, Dallas Center, IA

I have a 2-year-old daughter named Audree. When she was 1 year old, she was diagnosed with a genetic disorder called neurofibromatosis. Among other problems, this disorder causes a person to grow small tumors all over. A small tumor started growing on Audree’s left hand when she turned 1. It is a rare type of tumor for this disorder and it is one that the doctors said would continue to grow all her life. It has a nerve, with scar and fatty tissue all mixed together, so they could not surgically remove it. She would lose motion in her fingers if they did. The doctors said there was nothing they could do. As she got older, she would have increased pain in her palm, carpal tunnel syndrome-type pain in her wrist and numbness in her fingers. As the year rolled by, the tumor grew to where it covered most of the palm of her hand with a big mass. It also extended up each finger and down her wrist.

She developed a breast bud, which is another kind of hard tumor, on her right breast area. I found out about **Vital HF™** and started her on 2 tablets a day. Within the first month, we noticed the tumor on her hand had not gotten any larger and her breast bud had completely disappeared! We then added 2 scoops of **Cellular Energy™** to her diet. Within 60 days her tumor had begun to shrink! She now has a mushy tumor; previously it had been hard and knotty-feeling. She also has little wrinkles in the skin on the tumor, from where the skin had been stretched tightly and now is not. She has a lot less pain associated with it also. For something that was incurable, we have seen a great deal of healing! For my own testimony, I had an unknown fungal infection last year, as well. I grew big boil-like

sores on my right leg. I grew three of these before the doctor decided the best route was to cut them out. They didn’t heal over – even in 8 months time. Then I tried some **Vital HF™**. I only took it for three weeks, deciding it was better to have it for Audree. But, in that three weeks, my sores healed over completely. The scar tissue actually began to shrink. My family has seen the benefits of these products and I would recommend them.

Renee York, Mammoth Spring, AR

Lucy Field reports that she had a staph infection. The doctor prescribed medication, which she took for 2 weeks, but she was getting worse. She had sores inside and outside her mouth. She started taking **Vital HF™** (6 a day). After 5 days, the staph infection completely cleared up.

Lucy Field, Guthrie, OK

A couple years ago, I was diagnosed with IBS (Irritable Bowel Syndrome). I was told to watch what I ate and was given medication to carry with me and to take 30 minutes before meals. I always had to scout out the nearest restroom in a restaurant or meeting place, because I knew I’d have to make use of such a facility. I started taking the **Vital HF™** (2 a day), not for the IBS, but because I was unable to get a flu shot, even though my asthma doctor had wanted me to take both the flu and pneumonia shots. I noticed, within just a couple of days, that I no longer had any bowel problems and have not had any since! On another note, I also noticed that I was sleeping soundly, consistently, where, for some time, I had been plagued with insomnia. **Vital HF™** was the only change I made and I directly relate my relief to this product. Also, I have not had any flu or colds. What a blessing!

Connie Benson, MO

My hands have trembled for as long as I can remember. The only thing I can say which brought this on was my falling out of my dad’s pickup when I was a child and landing on my head. Also for all of my adult life my blood pressure has always ran around 140/85. On April 8, 2005 I started taking 1 scoop of **Cellular Energy™** and 1 **Vital HF™** tablet per day. In 3 weeks my hands stopped trembling when I used

them and in 4 weeks my blood pressure was down to 120/70. This is totally amazing!!! I am very thankful that the LORD sent these products my way.

In addition, I've always had hypoglycemia. I would get shaky and feel weak if I went too long without eating on time. I no longer get the shakes, even if it is 2-3 hours past my regular mealtime.

Heath Potter, age 35-Moulton

I was diagnosed with Leukemia in 2000. In January of 2005 my health was getting serious to the point that I was about to lose my Pilot's license. My white blood cell count was up to 59,000 (6000 to 10,000 is the normal range) and my platelet count was down to 130 (140-400 is the normal range). I started taking 1-2 scoops per day of **Cellular Energy™** and 1-2 tablets of **Vital HF™**. I couldn't remember to take it on schedule every time. In 6 weeks my white blood cell count was down to 38,000 and my platelet count was up to 160. My cholesterol also went down from 260 to 230. This is wonderful!!!

Ed Widener-age 68-Delta,CO

My husband was diagnosed with Parkinson's Disease in 1998. The most relief we could find was in natural vitamins and herbs with good results for the first two years. But for the last 5 years he was getting worse and worse. In February 2005 we were introduced to **Cellular Energy™**, **Vital HF™** and **Probiotic Support™** and decided to try it. In the first week he was able to stop using laxatives which he had to use often before. His tremors began to lessen in the following weeks to the point where he is now with very minimal shaking after only 4 months. The doctor has reduced his drug medication by 66% to date. He is now getting out of the house and even pushed the lawn mower across the lawn 2 passes the other day while I went in to get a drink of water. We are looking forward to see how much more the improvements will be in the coming months. We are very thankful that the LORD sent these products!!!!

Carrol Haynes, Cullman, AL

I have had several skin cancers on my face and ears for quite some time. I have enjoyed taking **CONKLIN'S LifePack and Men's Essentials™** for several years. When **Vital HF™** and **Cellular Energy™** came out I started taking 2 **Vital HF™** and 8 capsules of **Cellular Energy™** per day and I now have great energy and after 4 months my skin cancers are drying up and some have already fallen off.

Dale May-age 62-Goodland, KS

I was diagnosed with Thyroid Cancer in November 2004. It was already spreading through my body when they found it. I went through extensive chemo and radiation completing my treatments in February. It didn't do much for the cancer but almost killed me. My energy was gone. I started taking 2 **Vital HF™** and 2 scoops of **Cellular Energy™** in February and my energy came back so well that when I went back to the doctor in April he couldn't believe it. The next scan they did showed that the tumors had shrunk to nearly nothing. My husband and I decided to NOT take anymore treatments for now. I feel great and would recommend anyone to try these wonderful products.

Mrs. J. Flanders- 69-Goodland, KS

Our 12 year old son has ADD. He has a real hard time in school. We started him on 1 capsule of **Cellular Energy™** every morning and 2 capsules at night, plus 1 **Probiotic Support™** a day. In 30 days he went from making F's & D's to A's & B's in school. Our 8 year old son has Mynew tremors in his hand and when he writes his hand will sometimes jump completely off of the page. We started him on 1 capsule of **Cellular Energy™** in the morning and 3 capsules at night and now he can write without any problem.

Keith & April Happs

I have had Asthma very bad for much of my life. I had to use inhalers very often. I also have had a lot of problems with allergies even to the point of sometimes having sores on my skin. My energy was always low and felt bad most of the time. February 1, 2005 I started taking 3 scoops of **Cellular Energy™** and 6 tablets of **Vital HF™**

per day. By April I was feeling the best I've felt in years. I now have energy, I don't have to use my inhaler much and I don't have sores on my skin now. Thank you Conklin!!!!

Henry Lentz -age 38- Jamesport, MO

My mother, Alice Sommers is 87 and has had depression and increasing dementia for the last 7 years since my dad died. She would repeat the same stories as many as 3-4 times in 15-20 minutes. She also has had frequent Colds and sicknesses. She hasn't been able to wash her dishes for the last 5 years. In January we put her on 1 scoop of **Cellular Energy™** per day and 1 **Vital HF** 2 times a day. Her resistance to sickness was greatly increased in short time. In May we increased the **Cellular Energy™** to 2 scoops per day. Now, 5 months since she started on the products, she no longer repeats what she says and is talking about current events in her life. She no longer has depression. She is also washing her dishes again. This is so wonderful!!! We thank GOD for this wonderful blessing.

Galen Sommers

I have had carpal tunnel syndrome for the last 10 years. It has been very painful for the last 8 years. I trim trees for a living which means I use a chainsaw every day. My hands would be in much pain and almost immovable by the end of the day. I started taking 1 scoop per day of **Cellular Energy™** and 1 **Vital HF™** per day in February and by April I have regained most of the strength back in my hands and can work all day pain-free.

Jeremy McCombs-29-Twain Harte, CA

When I recently went to my optometrist, Dr. Bigley, he reported that my eye pressure had gone down from 18 at my last exam, to 14! The normal range for eye pressure is between 11 and 21. The doctor was watching my eye pressure closely for glaucoma. When he saw the number was at 14, I told him the **Cellular Energy™** was keeping the glaucoma in check. I gave him Dr. Peiper's book and the 24/7-phone number to call to hear Dr. Smith and Dr. Gabbert. Dr. Bigley is now the *second* medical person to congratulate me on finding something natural that has proven to be a definite benefit in fighting off the normal

aging process. He expressed a lot of interest in what the **Cellular Energy™** is.

In addition, my cholesterol went down from 227 (6 months earlier) to 202. My joints don't ache like they used to – especially my knees, ankles and feet! I have been taking 4 tablets of **CE** in the morning and 2 in the evening. On a daily basis, I also take one **Probiotic Support™**, 1 **Vital HF™**, 1 **Triple Essentials™** and 1 **Twin Tabs Multi™**. This combination is working for me in mid-2005, but I know some others are taking more or less for other health issues, which they have. Each person must find his/her own levels and this one is sure getting the results I like!

Maynard Brubacher, Scottdale, PA

I have gone through several personal problems over the last 10 years. I suffered from depression, migraines every week, constipation, no energy, couldn't remember things and sinus & allergy problems. I also had to take vitamin B-12 shots weekly because my body wouldn't absorb vitamin B-12 in pill form. I felt bad just about all of the time. I had a lot of neck and shoulder pain from arthritis so bad that I would have to keep a heat pad on my neck even when I was at work. I started on **Probiotic Support™**, **Cellular Energy™** and **Vital HF™** - and recently added **Joint Support™**. **Results:** I started having more energy the first week. I was on 3 anti-depressants, 1 nerve medication, 2 allergy medications and Botox injections for the migraines. *After 90 days I no longer take these medications.* I also have TMJ. I had to wear a mouth appliance 24 hours a day. I no longer have to wear it. My neck and shoulders no longer hurt as long I don't forget to take **Joint Support™**. I feel the best I've felt in years!!!!!!

Lorie Lewis -age 39- Arab, AL

I have diabetes. In November of 2004 I started taking 2 capsules of **Cellular Energy™** three times a day and 1 **Vital HF™** twice a day. My blood sugar always ran around 200-250 and I took an average of 60 units of insulin per day. I also had to have 2 toes removed from my left foot 2 ½ years ago, and it has been infected ever since. In the first 60 days on the products, my sugar went down about 40 points. I also felt a

little better, so I was convinced to keep taking them. The first week in July, my sugar dropped to 100-125 and then down in the 80's twice during the past two weeks. WOW!

After these two weeks, I decided to double my **Cellular Energy™** to 4 capsules 3 times a day. The next week I had to cut my insulin back 20 units. Also, my foot seems to be improving some now. I am very excited about these improvements!!

Jerry Holland, Leighton, AL

As a result of being raised on a farm, rodeo riding and working on large animals as a veterinarian, I've had several broken bones, as well as a damaged knee, elbow and hip joints. This has resulted in a considerable amount of aches and pains, as I grow older.

I have used glucosamine and MSN, among other things, on horses and small animals, and have seen very noted improvements in their mobility. I had not seen these results on myself. Because I needed relief, I tried many different joint products, even animal formulas, but did not get the relief I wanted.

When I was introduced to Conklin's **Joint Support™**, I was not interested, because I didn't see anything different on the label from what I had tried previously. My Conklin Sales Director decided that, since I wouldn't buy it, he would give me some. I took it reluctantly. Amazingly, it worked so well that when I ran out and several days went by without taking the **Joint Support™**, I really began to feel badly once again. I used to have to use a walking cane because of the pain, and now I don't even know where my cane is! **Joint Support™** has become my absolute favorite Conklin product.

Michael Brown, DVM – Arab, Alabama

My husband and I started taking the **LifeTrack®** products in May of 2005. I have arthritis very badly and didn't have much energy. I had surgery on my right hip in December to try to improve my mobility. I was in rehab for six weeks before I could go home. The surgery was not a success. In June, my doctor told me that the bone was dying and said I should get a hip

replacement. On May 20<sup>th</sup>, I started taking 1 of Conklin's **Joint Support™** 2 times a day, 1 scoop of **Cellular Energy™**, 3 **Bone Support**, 1 **Vital HF™** and 1 **Triple Essentials™**. This was due to my good friend, Doris Clotfelter's, suggestion. She had been using these products with great success and J.C. and I wanted to feel better, too. We could tell a difference in just one-week. I began to feel much better, have more energy and less aching from the arthritis in just 30 days. On July 5<sup>th</sup>, I had my hip surgery, but the only significant pain I had just prior to the surgery, was in my hip. On July 10, when the doctor came in to release me to rehab, he looked at my chart and was shocked to find that I had already walked 120 feet – far more than any other patient of his had done! He released me and sent me back to our Assisted Living apartment. A therapist has been coming 3 times a week to help me exercise. After my first week at home, I had walked to the lunchroom. At the end of the second week, I walked with my walker and now I am no longer using the wheelchair. My therapist said he's never seen anyone my age recover *so well – so fast!*

J.C. has had many health problems during the last 15 years – heart surgeries (stints), diabetes and arthritis. He is taking 1 scoop of Cellular Energy™ one to two times a day, 1 **Vital HF™**, 1 **Joint Support™** 2 times a day and 1 **Triple Essentials™**. He no longer has to eat 5 times a day for the diabetes; his mind is more alert and he can have a good conversation with others and me; his arthritis is no longer bothersome and I say, "He's doing great!" We are so thankful for these Conklin products!

J.C. and Hilda Brown, Decatur, AL

I'm very excited about **CELLULAR ENERGY™** and **VITAL HF™**. Until these great products came along, my cholesterol was 273. This was on January 19, 2005. On January 28<sup>th</sup>, I started taking 6 capsules of **CELLULAR ENERGY™** twice a day and 1 **VITAL HF™** twice a day. In March, my cholesterol was down to 247 and on June 10<sup>th</sup>, it was 189! This is truly remarkable. Thank you CONKLIN!!!

Betty Shenk, Utica, OH

This past week, my joints and muscles were extra “achy”. We were very busy at the Star City Fulfillment Center here in Lincoln, and I thought my condition was just soreness from the heavy workload. By late in the second day, I felt even more punk, sore and hot. We worked until 7:00 p.m. that day, so it was 7:30 before we arrived home. Gloriann took my temperature (after I took a cool shower) and it was 102<sup>0</sup>. I took three **Vital HF™** tablets, two Aleve (fever reducer) capsules, drank some Gatorade and went to bed. One hour later I took another three **Vital HF™** tablets with more Gatorade. I went to sleep and when I awake at 2:20 a.m. my temperature was perfectly normal and I had no more achiness in my body. However, I was hungry, since I hadn’t eaten the night before, so I had a bowl of cereal and checked out a couple things on the Internet. I was feeling so well, it was hard to go back to sleep! That day I felt great.

I always take one **Vital HF™** per day, but, in my opinion, fighting viruses is like fighting a war . . . sometimes you have to call on more troops (**Vital HF™**) and take a heavier dosage to win the battle. **Vital HF™** helped me avoid a trip to the hospital emergency room. We are always concerned about the West Nile virus because we live on an acreage surrounded by horse people. Two of our neighbors had bad cases of the West Nile illness two years ago. Currently, new cases are on the rise again in Nebraska. If my temperature had gone up one more degree, Gloriann would have insisted that we head for the hospital.

Dale Nobbman, Lincoln, NE

In October of 2004, I had my blood drawn for a PSA (protein-specific antigen) test. A normal PSA count is 4.0 and below. Typically, any count above that indicates the potential of existing prostate cancer. My blood test in October showed a reading of 7.8! The medical personnel indicated that I should take a series of 4 shots that would determine if it was indeed cancer and, hopefully, this treatment would lower my PSA count.

On December 2, 2004, I started taking 2 **Vital HF™** tablets. When **Cellular Energy™** was made

available at Conklin’s annual meeting in early February of ’05, I added 3 **Cellular Energy™** tablets per day, as well. In March of 2005, I had another blood test taken, just prior to my 2<sup>nd</sup> shot. I was told at that time that I shouldn’t expect to see any decrease in the PSA this early, because it typically takes the full series of 4 shots to show any improvement. However, my March PSA reading was .9!

So, on a regimen of 2 **Vital HF™** in combination with 3 **Cellular Energy™** tablets daily, I approached my 3<sup>rd</sup> shot on May 27, 2005. The blood test now showed a PSA of .3! *The results are quite evident that **Vital HF™** and **Cellular Energy™** are individually, or in combination, helping to reduce the PSA numbers, in addition to any benefit I might be receiving from the series of 4 shots.*

Erling Albin, Hanley Falls, MN

I have had epilepsy all of my life. I also have irritable bowel syndrome. Before I was introduced to **Cellular Energy™**, I had an average of 6 seizures per month. Every time I had a seizure I would not be able to work for at least 24 hours and I would feel terrible for about a day and a half. My irritable bowel would send me to the bathroom about 6 times a day.

I have been taking one scoop a day of **Cellular Energy™** for about 5 month now. I started noticing some very exciting results during the first 30 – 60 days. I have more energy than I used to. Previously, I became very tired the second half of each day. Now I still have energy to do chores when I get home from work! I now have only 4 seizures a month and am able to get back to work in 2-3 hours. Also, I don’t feel badly afterward, like I used to.

Regarding my irritable bowel, I need to “hit the bathroom” only twice a day now. I’m considering trying 2 scoops a day of **Cellular Energy™** to see if my seizures will become even fewer. I am very pleased with this product and recommend everyone with health problems to try it for at least 90 days. You’ll be glad you did.

A 44-year old in Decatur, AL

I have a history of very high blood pressure and was not able to get it down with prescribed medicine. With my medication, it was running

160/123. I lost my commercial truck driving license because of my blood pressure.

I was recently introduced to CONKLIN LifeTrack® products. I started taking 1 Probiotic Support™, 1 Vital HF™ and 1 scoop of Cellular Energy™ - all 2 times a day. It has only been 3 weeks and my blood pressure is down to 128/103. WOW! I was not over weight, but I have also lost 12 pounds without changing anything. I do know that my appetite has changed and I'm not hungry between meals. Thanks, CONKLIN.

Bryan Barron, 25, of New Hope, AL

I have arthritis in my knees and left hip. For the past 15 years I had not been able to sleep at night unless I took a minimum of 6 ibuprofen before going to bed. I started taking Vital HF™ on December 10, 2004, and have not taken any Ibuprofen since. I take both Cellular Energy™ and Vital HF™, taking the latter in the AM and before going to bed. I am getting the best sleep and rest ever. These are life-altering products.

Don Benson, West Plains, MO

Myrtle developed sores in and around her mouth, which she knew were the forerunner of shingles, a disease she's had for some time. She tried the Vital HF™ and the sores were totally healed in 10 days, as opposed to what formerly would have taken about a year.

Myrtle Sorrell

I have had Planter's warts on both feet for years. Nothing has helped. The doctor suggested surgery and I said, "No". I began taking Vital HF™ and . . . WOW, what a difference. All but one of the warts is gone and it is getting smaller. Thanks for Vital HF™.

Virginia Austin, Bucyrus, MO

My daddy has Alzheimer's disease. He could not feed himself, he had to be fed and had to be led to the bathroom, he didn't talk or communicate in any way, and he just sat with his eyes closed most of the time. He didn't know anyone, his face had no color and for the last 3 years he's been dependent upon laxatives.

One day I started giving him 1 scoop of Cellular Energy™ and 1 Vital HF™ at noon and another scoop of CE at supper. The following day I increased the CE to 3 scoops a day, along with the 1 Vital HF™. By the third day he was feeding himself (cleaning his plate), going to the bathroom by himself, talking a bit with us and he knows our names. His normal face color returned and his bowels are now working normally. We just can't believe it! He went from a body with nothing more than only an existing life, to being our daddy once again. We plan to start our mother on this program next, as she also has Alzheimer's and severe heart problems.

We thank Dr. Michael Brown for introducing us to these life-changing products.

Daughter, Evelyn Gregory

I recently reported on the vast improvement in my father's condition when we started him on Cellular Energy™ and Vital HF™. Our mother also has Alzheimer's (although less advanced) and we began her on these products also. After only a week, she is talking non-stop and seemingly back to normal. This is absolutely wonderful.

We had a birthday party for her and daddy participated. After taking Cellular Energy™ and Vital HF™, our dad now moves around the house freely and can remember things about his life up to 6 - 8 months ago, when the Alzheimer's became full blown. He also remembers the events of his life for the last 4 days. I strongly urge anyone who has a loved one with this disease, or any form of dementia, to try these wonderful products.

Mr. and Mrs. Ozro Fuller

I have Osteo Malitis, a rare bone disease where infection resides in the bones. It sometimes progresses to an abscess, requiring surgical removal. It is treatable only with chemotherapy. My bones used to hurt all of the time, especially when the weather was cool and damp. Sometimes I had to go home from work and go to bed. I couldn't lift my arms above my

shoulders because of the pain and I had no energy.

I was taking 8 (100-mg) pills of Neurontin and 2000 mg. of Ibuprofen and Mobic (for inflammation) 2 times a day. I also have glaucoma and have trouble seeing well. I use 2 kinds of eye drops – usually 3 times a day. I also have bronchial asthma and usually need 2-3 breathing treatments per day. Then, I began taking 2 **Probiotic Support™** each day. In one week, my bone pain was going away. I could now raise my arms over my head without pain. At the end of the second week, I no longer needed to take any Ibuprofen. I am now taking only 1 Neurontic a day and I've had only 1 breathing treatment in the last week. I've been able to decrease my eye drops to 2 times a day and my eyesight has definitely improved. I have so much energy I can hardly believe it. These results have come after only two weeks with the **Probiotic Support™** and I can hardly wait to see “the rest of the story”.

My most recent appointment with the Ophthalmologist showed my eye pressure (from the glaucoma) in both of my eyes to be down 2 points. He said that this is unheard of! Glaucoma has been known to be irreversible; he wants to see what I'm taking.

Sue Hanson, Arab, AL

In December of 2003, Heather was involved in a motorcycle accident. She was not wearing a helmet and sustained a serious closed head

injury. She was paralyzed on her left side and was in a coma for over a month. She had two surgeries to her skull and underwent hyperbaric (saturated oxygen) treatments. After about a year in a hospital and rehabilitation setting, the physicians decided that she had reached her maximum potential and suggested that she be placed in a nursing home.

Conklin IBOs, Ed and Laura Coleman (Heather's aunt and uncle) heard about **Cellular Energy™** at the Conklin convention in January of 2005. As registered nurses, Ed and Laura were skeptical, so with reservation they asked Dr. Gabbert (Conklin's doctor on staff) to supply the **Cellular Energy™** free of charge as a test case. He agreed to do this and after a month of taking **Cellular Energy™**, Heather's speech was clearer, she could now lift her left hand over her head and her therapists were seeing a marked increase in her overall strength.

Because of Heather's lack of mobility and multiple antibiotics, her bowels would not function independently. She required an enema or suppository every few days to make her bowels move. This had been going on for over two months when Ed and Laura heard about this. They provided Heather with **Probiotic Support™** and she was given 2 capsules daily. Within two days she had a bowel movement on her own and has not had artificial stimulants since.

Heather Coleman
