Oct 2006

Early this year (2006) I was diagnosed with Hepatitis C. I wasn't feeling well and my specialist said I had significant scarring on my liver. I didn't even have enough energy to cut my own lawn or even work at this point.

I went to my brother's funeral who died from Hep C and it was at the funeral my son told a friend that Dad had the same disease as what his brother died from. The friend told him about HFI and PXP and how well it worked.

Prior to this I was told to start Interferon treatments but I feared that I was too weak to go through with these treatments. I just kept getting weaker and weaker and didn't know what I was going to do. It was at this point I decided to try the HFI and PXP that I was told about. I immediately felt the difference, I started taking 3 pills per day then bumped it to 6 per day. I have been taking them for approx 8 weeks now and feel more energy, began sleeping better and much better mental alertness. I have been able to fight off the flu and I know that HFI and PXP has really helped my immune system.

I even felt so good I got a new job and last week was number one in sales at the company I work for. HFI and PXP has made the difference in my life and I am feeling so good. I thank the Lord that I was introduced to this wonderful product.
