June 04, 2007

Not sure whether my testimony will mean much to others, but it sure means a LOT to me.

I joined Enzacta because my brother-in-law was so excited what PXP was doing for him with his diabetes. I started taking PXP on a Friday night, April 13th, after having an extremely bad Thursday with my right knee, which was damaged in a fall in 1998. Since that date I have had pain in that knee, some days are worse than others and rainy days are usually bad days. I have been taking glucosamine with Chondrontin for about 4 years which helped, but if I forgot to take it only one day I could feel the difference. Well, I took PXP just before going to bed that Friday night and I got up Sat morning and was doing the usual working around the house, when all of a sudden, I realized my knee was NOT hurting, this was really strange to me since it was a rainy day and I remembered how bad it had been for last 2 days. On Sunday, I got up and it still was not hurting, I went off to church and had to walk up stairs, something that has been almost impossible for me the last year and half, when I realized I was having NO problem walking up the steps. Coming down was always more difficult and today NO PROBLEM! Now that was exciting. That afternoon I called Kevin Hentges and told him I thought I was having imagination problems, when I told him my experience, he laughed and said I told you it would help. Well it has been 6 weeks now and I am still enjoying the pain FREE knee and have stopped taking the glucosamine with no difference in how it feels.

I have always slept good but since being on PXP, I am sleeping more sound and waking more refreshed. A side note, I have experienced a lot of detoxing over the years, but nothing has worked as well as PXP. I have lost 14 pounds in the last 6 weeks not staying on a diet or getting to exercise as much as I usually do so I am very happy about that.

Looking forward to more improved health!
