March 2008

I was diagnosed with terminal liver cancer and the Mayo Clinic in Rochester gave me 6 months to a year to live, that was over 3 years ago. I went totally organic, ate no sugar and watched my diet. I started taking Alfa PXP 2 to 3 times per day. I went from stage 4 cancer and am now at 1-1/2 to stage 2, this is remarkable!

My hands were severely cracked and I was losing my fingernails. Today my skin is so much better and my fingernails are now normal. One thing I have noticed is how much energy I have.

I am now back to shift work and I am really feeling great. PXP has been a godsend to me and my family, I am so grateful.
