Flavon London

December 6, 2014 ·

Let's face it our GP hasn't got the time nor the knowledge to help us find a more holistic approach to solving our health issues rather than using a more conventional treatment based on drugs.

My most recent interest has been with the discovery of Flavonoids and their incredible potential health benefit.

Flavonoids are quite a remarkable group of phytonutrients found in plant foods, mainly in vegetables and fruits.

They are the largest nutrient family known to scientists, over 6000 unique Flavonoids have been identified in research studies. Flavonoids are best known for their antioxidant and anti-inflammatory properties.

I feel very passionate about disease prevention and therefore very exited about flavonoids and their ability to directly support all the systems in our bodies, cardiovascular systems, nervous system, digestive system and much more.

Furthermore, because flavonoids are known to modify the body's detoxification pathways you might expect to lower your exposure to some unwanted toxins that could increase the risk of cancer.

As part of the talk I will be introducing to you an award winning supplement that has been the result of 40 years of research by a renowned Hungarian scientist, Prof. DR . Zoltan Dinya. It is called Flavon and the uniqueness of it is that it is 100 % natural live and highly absorbable jam made from fruits and vegetables.

If you want to know more about the benefit of flavonoids and this very unique supplement , if yourself , a family member or a friend is suffering from conditions such as heart disease, high blood pressure, high cholesterol, diabetes 1 and 2, osteo-arthritis, immune disorders, skin problems, thyroid issues, cancer, allergies, asthma, fertility problems, depression and more, you are all welcome to let me know and will do my bets to assist you
