Melagel

When I get a cold I get it very bad and it usually lasts for 3-4 weeks. Well this year I haven't yet had a cold. I felt a couple of times I could be in for one, so I put the Melagel around my nose, as you would vicks, then sprayed my pillow with Sol-u-mel. It is only a few weeks to the end of the year, and if I don't get a cold between now and then, it will be the first time that I can remember never having a cold. I have been using Melaleuca for 6 -7 yrs now and also I just realized the other day that my partner hardly ever uses his asthma puffer, he used to use it nearly every night before going to bed. I Love Melaleuca
