One of the things I love about LifeVantage is the science behind the products! MAYO CLINIC just published a study on Protandim and ovarian cancer!

The Background of this study: Nutraceutical approaches are increasing in cancer patients. We encountered a recurrent ovarian cancer patient who incurred durable tumor regression and decreasing CA-125 with initiation of the nutraceutical Protandim, a combination of five phytochemical extracts (ashwagandha, bacopa, green tea, milk thistle, turmeric). Preclinical studies were undertaken to investigate Protandim and its constituent anticancer effects and underlying mechanism(s). TUMOR REGRESSION! Wow! Here is the link to this study: <http://gradworks.umi.com/15/55/1555561.html>
