Wow just ●● at Marivel Guerra-Peters results from her cancer story and Juice plus. This is amazing

12 October · 🌐

Hello, my name Marivel and I am a Cancer Survivor for the second time. I was blessed to have been introduced to JP+. Along with what chemo did to my body, I also had migraines, depression, insomnia, and arthritis in my left knee and chemo left me with debilitating diarrhea, a weakened immune system and all over body aches. My first cancer was in 2009 and my second was in 2011 and since then I was miserable. For the last four months, I have been taking JP+ and EVERYTHING is gone. I am able to leave my house and join the rest of the world with no pain, no tummy issues and I am able to sleep at night without any strong anti-depressants. My son who is Asperger's had a tough time last year emotionally and would have a hard time sleeping at night. Over the summer we did JP+ and Degas is like a new boy. Homework is so easy, he sleeps all through the night and he can keep it together much better than he used to. Please share your Testimonials with JP+. Thank you.
