

# Melaleuca Replenex Is Easing my Pain

I had a serious cervical disc injury 5 years ago. My doctor has had me on heavy pain meds. Every now and then that disc swells & causes me severe neck and arm pain. My new RX plan doesn't kick in until January 1 so I haven't been able to get my pain meds in the past few months. For 2 weeks before ordering the regular Replenex I was suffering this awful pain. As soon as I started taking the Melaleuca Replenex my pain has eased a great deal. I may not even need the pain meds any longer at this rate! I just started as a Melaleuca Preferred customer 2 weeks ago and am so satisfied with everything I've received.

my brother has an allergy to antinflamitories. He has a plate in his ankle from an old injury which is now seriously affecting him, lots of pain and swelling. Does the Replenex have these antinflamitory ingredients that a shelf medication might have, like tylenol?
