

"Completely Unexpected"

Barbara & Michael Hays | PANAMA CITY, FL

"I have had high cholesterol most of my life. Even in my 20's being very active, eating healthy and at a healthy weight my cholesterol was very high and required medication; my problem is heredity. We moved about a year ago and prior to moving I had run out of my prescription and decided I would wait on a refill until we got settled and I found a new doctor. I started taking the Phytomega not expecting it to make a difference, my Dr. told me for my condition prescriptions were the only way to go. I just got my latest blood work back and for the first time ever my total cholesterol is below 200! I am totally amazed. The only thing different I have done to effect my numbers was taking the Phytomega. Thank you Melaleuca for helping me and so many other families stay healthy!"

"The "HEART" of Melaleuca"

Marvin & Sherry West | DECATUR, TN

"I come from a family of high cholesterol. I have a constant fast food from being on the road full time in ministry. I had been on Phytomega for 2 years and then I had my cholesterol checked. My Dr, was pleased with the levels. 2 years later, I had my cholesterol checked again and my cholesterol results were within normal range. I have been on this wonderful product for about 7 years. Phytomega is truly the "HEART" of Melaleuca."
