

"My doctor is amazed"

Angie Beem | SPOKANE VALLEY, WA

"I started using Phytomega 2 months ago along with the Vitality Omega-3 Lime Sorbet. I have been unable to take any cholesterol reducing prescriptions because it makes my legs hurt badly. My total cholesterol was getting very scary. My triglycerides are also crazy high due to another chronic illness I have. I just got my most recent test results back. My total cholesterol went down from 263 to 135. My HDL (good cholesterol) was extremely low mostly due to my inability to do much in the way of exercise. On my most recent test results my HDL went from the low 20's up to 40. I still have a lot of work to do on my triglycerides. The preferred value is less than 150. My triglycerides went down from 430 to 212! The actual preferred value has suddenly moved into the realm of possibility! I can't say enough about these fabulous products."

"The "Heart" of Melaleuca"

Marvin and Sherry West | DECATUR, TN

"I have been taking Phytomega for nearly 6 years. I come from a family that has high cholesterol and a constant fast food diet because my life is spent on the road in ministry. After been on Phytomega for 2 years, I had my cholesterol checked and they were within the normal range. 2 years later, had my cholesterol checked again and actually saw my results, it was within normal range. Phytomega is the "Heart" of Melaleuca products."
