Medication Free!

My wife and I have been melaleuca customers for a year and are very satisfied with all their products. My wife has been taking the total vitamins for the last 9 months and suggested I go on them too to see if they would lower my LDL (the bad cholesterol). I asked my doctor for his advice and he said to try the vitamins for two months and see what the results would be. I had blood tests taken before and after this time period. End results? My bad cholesterol went from 162 to 119! I did not have to take any medication. Thanks to the total vitamins for men over 50, I am medication free.
