My 2 year old daughter has had an unusual bout with eczema since she was a couple of months old. We've used prescription creams from the physician, stuff over the counter, etc., and it would help a little. But our daughter would still complain from all the itching and irritation. It continued to be almost a year.

We tried the Renew lotion on her and within 2 days, I was drying her off from a bath, noticed that ALL of her eczema had disappeared! I was blown completely away!! We will be with Melaleuca from now on!
