## FITLINE TESTIMONIAL----PLEASE READ.

### FitLine Testimonials

"I have lived with the symptoms of MS for the last 4 years, when I was 10 my eyesight failed and it took a year to find out that I had demyelination of the optic nerve, the Doctors told me I had Multiple Sclerosis. It wasn't until October 2003 that my balance started to get worse. I started on Interferon but in August 2004 I had another attack to the point I ended up in hospital on a course of steroids.

After I got out of hospital my fatigue was shocking, I was in a wheelchair, unable to walk unassisted & had really bad bladder problems. Worst of all I was unable to attend school for most of the term but finally ended up going for the last few weeks for a couple of half days with the assistance of the wheelchair. My parents have taken me to a Chiropractor that has helped me greatly however since I have been on the Fitline, I have regained energy that I haven't had for years. Also I now sleep wonderfully where before I was on sleeping tablets. Before I used to stay home because I was always so tired but now I can go to the Movies, stay up at Parties like New Years Eve and then get up early the next morning and spend the whole day on the boat having great fun with my family and friends. I have only been taking Fitline® for around 3 weeks and I am sure that by the time I start school I will be able to go fulltime. With Fitline® and the extra energy I have to regularly exercise, I have great hope to get my MS under control and my balance back to normal. 3 months ago I was in a wheelchair, I had medication for my bladder, sleeping tablet every night and my life as a teenager was just awful, this not only affected me but also my whole family. Thank you to all at Fitline® for changing my life so much."

Maddy Clark, WA, Age 15...

(Maddy is one of many sufferers of MS that take our product regularly and has also been the face of the MS Society in 2005)

"I have been using FitLine® now for three months and have found it an excellent aid for my running. My training run times have improved by up to five minutes and I completed the Puffing Billy Fun Run eight minutes faster than last year. I have changed nothing in my training routine or my eating routine other than taking FitLine® and have achieved these great results from this wonderful product. I would recommend anyone to try it, if not for running, or another sport, then just for general wellbeing."

Pauline Anderson, Melbourne...

"I am a cyclist with the Australian Institute of Sport High Performance Program preparing for the Beijing Paralympics. I am a road and track cyclist, holding two world records. Since commencing to use the Fitline® Program I have observed a significant energy increase and a high level of sustainability. I am able to maintain heart rate levels for longer with an increase in my stamina and endurance. In particular, my recovery has dramatically improved allowing me to back up efforts the next day."

Angela Fleming, Adelaide...

"Having had 3 heart operations and wearing a pacemaker, I was lacking energy badly... had no desire to do any thing. Since I use Activize Oxyplus, Basics Plus and Restore I feel revitalized. I have lots of energy and feel great."

Werner Steinbruck, Langwarrin, Victoria, Age 60...

"I am 53 years young and a below knee amputee. After my leg was amputated I sat around in a wheel chair feeling sorry for myself. My weight went from 90 kilo to 140 kilo which was a problem because of the following reasons:

1. the weight itself was making the fitting of prosthetics very hard and costly. My stump was constantly getting infections and blisters because of my unfit state
2. my blood pressure was going up to the stage where it reached 190/120
3. with the amount of weight I was carrying I was diagnosed as sugar diabetic type 2
4. blood sugar got up to 7.4 - 7.9

In November 2005 I was introduced to the Fitline® Optimal Set (morning, noon and night) and with an open mind I started taking the product every day. It is now the 1st of February 2006 (it has been 3 months), and I now feel better within myself. I have lost 7 kilos, my blood sugar has been constantly 4.9 for over 1 month now, and my blood pressure has dropped to 120/80. Infections on my stump have reduced drastically and friends that haven't seen me for a while keep saying, you are looking well these days."

Jim Cross, Ferndale, WA...

"I was diagnosed in 1995 with a cross between the then newly discovered Chronic fatigue & Ross River Virus. At the time the medical profession could not give me a full diagnosis of my problems. My problems were: over tiredness, and constantly sleeping, (generally 14 hours a day or more), unable to stay awake for longer than 2 hours, massive inactivity led to my weight going from 83kg to 100kg, elevated LFT's normal range 0-48...mine 300+ (LFT=Liver Function Test), swollen liver (hepatitis) but not viral A,B,or C...again no answers for me! This resulted in constant visits to my GP for blood tests and I lost my job as this continued for 10 years. I was introduced to Fitline® about 18 months ago by a good friend who managed to overcome my skepticism by being persistent about me trying the products. Today I am happy he did persist as I am feeling better than I did 18 years ago! In 10 months of taking the Optimal set along with Zeilschutz I have lost a massive 22kg or 45lbs! I do not exercise, I have not changed my diet, and I still don't eat vegetables with the exception of carrots and potatoes. I feel fantastic, I look like I'm 10 years younger, and I'm a lot more active!

My wife Jan Marie is a sufferer of MS (Multiple Sclerosis) and she has her own remarkable testimony."

Lee Bartholomew, Rockingham, Age 36...

"Being a grand mother of 4 little active boys, using the Optimal Set helps me to enjoy these little life bundles. Also I feel far more energetic and with that have lots more fun playing tennis. I seem to out last younger opponents playing long matches. I also had some skin problems that have gone away since using the product."

Gisela Steinbruck, Langwarrin, Victoria, Age 65...

"Since using FitLine Activize Oxyplus, Basics Plus and Restore, I feel I have more energy as I am not so tired any more and can concentrate on my business. Also as I am a sufferer of headaches and migraines, I feel FitLine has helped to subside them which is a great relief for me as they can wipe me out for a couple of days."

Debbie C, Langwarrin, Victoria, Age 40...

"Using the Activize Oxyplus I find that I have far more energy than before. It definitely helps me through my time at work and I seem to recover much quicker from tiredness."

Angelika Krause, Frankston, Victoria, Age 53...

"I have been suffering badly from hay fever every summer for many years. I tried all kind of medication that is on the market. I am taking Activize Oxyplus, Basics Plus and Restore now for 2 month and the hay fever is gone. Now I can enjoy my long distance running again without any problems. "

Michelle Krause, Frankston, Victoria, Age 23...
