Dr. Naidu

Dr. Narain Naidu, is a medical microbiologist with more than 25 years of research on bio active substances and their benefits on human health. As an international expert on protective and applications of natural bio active compounds, Dr. Naidu's scientific collaborations extend to Austria, Bulgaria, Denmark, Germany, Hungary, India, Italy, Poland, Netherlands, Sweden, and the United Kingdom.

Nikken and Dr. Naidu joined hands to introduce the Next Generation of dietary supplements. Lactoferrin Gold, Osteodenx and Caldex. He will be explaining the theory of bio-replenishment; a novel approach to reversing metabolic bone dis-ease markers by a food-derived cytokine; angiogenesis with a new orally administered agent and improvement of inflammatory marker profile.

Early work on Staphylococcal food poisonings and toxic shock syndrome brought International recognition to Dr. Naidu. He received the European Young Scientist Award in 1989 from the European Society for Clinical Microbiology and the Par Excellence Citation for Medical Research in 1992 from the Lund University in Sweden.

Dr. Naidu began his journey with milk lactoferrin research from the mid-1980s in Sweden and published over 50 peer-reviewed scientific articles on this topic. In 1999, he made a major breakthrough in this research area with the invention of 'activated lactoferrin'. Thus, he has originated the Theory of Bio-Replenishment. Proof of his theory, as recently published in Osteoporosis International and Inflammation Research, is the body's own mineral managing molecule that starts reversing osteoporosis and osteopenia in as little as 2 weeks. Dr. Naidu's discovery also brings hope for arthritis sufferers and offers many side benefits to the body's other organs.
