You wouldn't believe what a pair of socks can do!

July 29, 2009 at 1:54am

What I am going to tell you will make you say, "Really? That guy is simply doing marketing job for Nefful!" or "Yes, he just fake the whole thing up." I am putting it down here because I want people especially those with diabetes to benefit from the wonderful effect of Tevirons clothings made by Nefful. If there is something that money can buy to lessen the pains suffered by diabetics, then this is the product to go for.

I am as skeptical and weary as you when I first get to know Nefful's products. How can it be possible by wearing something on your skin, you can get cured for your illness. Well, Tevirons clothings prove this impossible statement to be true. It works on the principle of ion charges generation when two material are being rubbed together. As it has been established that when Tevirons material rubbed with our skin, an abundance of negative ions charge are being generated. This negative ions is being used to remove our toxins in our body. Ever wonder why you feel so fresh and rejuvenating when you a re in the forest or near a waterfall? It is simply due to the same negative ions that present there. So by using this principle, Nefful creates Tevirons clothing to heal our body by removing the toxins with negative ions.

If you strain your ankle, by wearing the Tevirons socks 24 hours a day, you can feel the relief in as short as 3 days. For diabetics or family with a diabetic, you will know how difficult it is to heal any bruises or cuts suffered around the ankles. Again, by wearing Tevirons socks, it can speed up your healing process. Just remember to change your pair of socks everyday as the material had absorbed all the toxins in it and need to be washed and removed in order for it to function again. Refer to the photos above to see the healing process that occurred and note the time periods in the recovery process.

I wonder why this great invention is not available to everyone of us especially those with diabetes. Modern medicine hasn't found a cure for diabetics and facing great difficulties in healing the cuts and bruises they suffered. Why not try Nefful for a change? You will never know the joys it can bring to your love one. Of course, other than cuts, bruises or muscle strain, it is effective for treating sinus, improving eyesight or removing tumors but that will be on another review if I decided to write one.

Just with a pair of NEFFUL Teviron socks

Before wearing the

NEFFUL Teviron socks.

Results after wearing the NEFFUL Teviron socks.
