"Touch Sensitivity in Spencer "

Barbara & Ethan Dunn | BEND, OR

"My name is Barbara Dunn I am a happily married stay at home mom to 4 beautiful amazing children. 2 boys 2 girls. The story I want to share with you is one that has changed my life in a way I never could have imagined. This story is about my 12 year old son Spencer he is an avid wrestler and basketball player 4.0 student and the most helpful kind sweet kiddo any parent could ever ask for. In 2009 Spencer started experiencing some strange symptoms in his hands and feet he would get shocking pains in them after he would shower or wash his hands anytime he would try to touch anything, this eventually moved on too not even being able to touch any papers or anything with texture for hours after showers or normal hand washing until the natural oils came back to his hands still even then he struggled . This turned my sons life upside down he would have to literally turn the pages of his books (reading is his very favorite thing to do) with the insides of his wrists or use pencil erasers to turn pages. I took him to the doctor probably 5 times in a year every time they said here is a new cream or new gel or he needs an MRI and brain EEG because they assumed this is all due to a neurological issue and nothing worked. Well we did that and everything came back normal. I must have spent over \$500 just trying to find something that works and sadly NOTHING DID!! I had a teacher friend give me some "lotion for eczema" so i thought hey i will put this on my daughters eczema and be done with it I guess I never thought about using it on my sons hands and feet because i felt i had exhausted every alley for him and just felt defeated So just out of the blue about 6 months later I met an amazing woman that is partnered with Melaleuca and she came walking in to a weekly women's business support group we go to mutually and I said hey I have some of that lotion at home its awesome. So I get to thinking I need to try this "awesome" lotion on my son and see if by some huge chance this will be the help that he so desperately needs. So I ran home and pleaded with him to try just one more thing. This was the night i will never forget. My sweet son just gets out of the shower I say lets try this lotion see what it does so he puts on a dab of Renew on his hands rubs it in real good and walks over to the couch and rubs his hands up and down the couch about 20 times and says to me mom look look look it doesn't hurt and starts crying which in turn makes me cry. Ever since that day I have seen the many blessings not only renew had brought to ours lives but the whole Melaleuca line . Spencer can now touch anything when and how he wants with ease BUT only after using the Renew. This has impacted us so much and I can not thank your company enough for making honest natural amazing products I myself am now a director 1 with your company and plan to continue spreading the word and wellness with as many as I can and share my testimony to ensure that if you have somebody in your family that has medical issues and you feel exhausted with doctors and medicines I want you to know don't give up looking for that answer my answer was as easy as finding the right healthy treatment for my son . Renew has Renewed my son! Barbara Dunn"
