Terminal Lymphoma

Edith Groom, Victoria, B.C., Canada January, 2004

I would like to share my story of how Immunocal® has saved my life.

In November of 2001, at 83, I lost my husband, Howard, to cancer. In the next few months I became aware that I was losing weight, although I felt fine. By January, after successive checks with my doctor, he suggested I go for a few tests. A few tests included several weeks of ultrasounds, and biopsies of my liver, stomach, and bone marrow.

By April the results were in. I had cancer (lymphoma). As my doctor put it, this can be like a raging lion within the body, but chemotherapy is very successful in knocking it back. By mid-August, after six treatments, I was in pretty bad shape with terminal lymphoma (Stage IV, rampant/wasting). The last scan still showed cancerous nodes on my abdomen and chest.

My grand-daughter was a great help to me, as I just didn't have the energy to do very much for myself. I had a walker by my bed, but couldn't even get out of bed to stand or use the commode.

In early September, Paul Rothe, suggested I try Immunocal®. I took three packs per day, and by November, was feeling much better. I must have been better because I was able to host the family dinner for Christmas!

In March, when Paul made one of his calls to see how I was doing, I was able to tell him that I was almost back to my old self. My last scan was completely clear, and I didn't have to go for another checkup for three months!

Although I have only regained 20 of the 34 pounds I lost during my illness, I am doing really well. But, I am still taking two packs of Immunocal® per day to keep the cancer from coming back.

If I hadn't taken Immunocal, the story would have been a lot different.

Edith

Healthy Aging

My name is Eugene Kralik and I am 98 years old. My body parts of course are old and have been well used.

When you get close to 100 years old it is expected that your eye sight and hearing are starting to fail and legs of course are getting weaker. However what I am excited about is that my mind is relatively good and I think I am the only senior in this nursing home who is not on any daily dose of drugs. I am basically drug free and I think the reason for this is the fact that I have been taking the supplement Immunocal 2 packs a day for over 10 years and that is what has kept me healthy."

Multiple Conditions

Stronger Immune System

Fourteen years ago, my health and physical characteristics changed. This is when I first discovered Immunocal.

I was the kind of person who would catch a cold if it was on the other side of the street. After maintaining my daily regimen of Immunocal a cold could not catch me if it was under my nose. Today, not only do I have a very strong immune system, I also appear much younger than I am (according to everyone I meet) which is another long term effect of taking Immunocal. My wife and children have experienced amazing results also. We don't use anti-biotics, although if the kids catch something and the Doc' prescribes some, we get them (just in case) but first we increase the dose of Immunocal and every single time, our sicknesses go away quickly, without anti-biotics. Immunocal is truly a blessing in our lives."

Dave Bergsma, Ontario Canada
