◊ Silver - The Germ Fighter

Did you ever wonder how people kept their milk from going sour back in the old days when they didn't have refrigerators? They would drop silver coins in their milk jugs because silver inhibits the growth of bacteria and other disease causing organisms. This may be the very reason that silver was used on utensils as well.

Silver has been known to be able to kill 750 different types of viruses and infections. Studies have shown that silver is a very effective alternative to antibiotics. This is good for us because there are so many times we go to the doctor and get antibiotics for what we think is an "infection" but is actually a virus. Having too many antibiotics in our system can actually cause our immune system become resistant to them, then the next time we go to the doctor we get even stronger antibiotics.

Use colloidal silver gel, which is great for cuts and scrapes when applied topically, and colloidal silver (in liquid form), which is a tasteless liquid that can be used to fight countless diseases internally. Colloidal silver products are non-toxic, approved by the Environmental Protection Agency and is also safe for children and animals. The silver in these products will not cause argyria or any discoloration in the skin. For very serious infections, people have actually consumed as much as a bottle a day for up to three weeks.

Silver supplements are antibacterial, antifungal, antimicrobial, antiparasitic, antiviral and antiseptic products. Here is just a short list of some ailments that Silver has been known to help: Abrasions, abscesses, acne, AIDS/HIV, bladder infections, blisters, blood poisoning, burns, Chicken Pox, cold sores, Pink Eye, Herpes, Gonorrhea, jock itch, tuberculosis, urinary tract infections, vaginitis, yeast infections, pneumonia, whooping cough, staph infections, strep throat, Malaria, flu, fever, and gum disease. The list goes on and on!

Help protect you and your family with Nature's Sunshine's Silver Shield Products by fighting germs, bacteria, disease, and viruses.

Live well,
