We have Flavon available to order, To do so please contact us.

Our clients that benifited from Flavon!

[Below Kasia talks about why Flavon and why she recommends it.](#)

### WHAT MAKES OUR PRODUCTS SO UNIQUE?

We use all together 40 different fruits and vegetables for our products

Test results of Brunswick Laboratories, the World's leading independent laboratory proves the outstanding ORAC value (antioxidant capacity) of our products that is second to none in the World

No preservatives, chemicals, food colorings, additives or artificial agents added

They have a unique, self-consistent gel consistency. This ensures high absorption and bioavailability.

The ingredients come from constantly tested, trustworthy suppliers who supplies us according to specifications and with proper certifications. 2-3 spoonful of any Flavon products – irrespective of seasons- provides you all the active substances of fruits and vegetables every single day of the year Besides the juice concentrate of sun-ripened fruits and vegetables, in many cases they contain seeds, peel grist and traditional spices to guarantee the highest possible synergy The special and trade secret production process ensures the preservation of the high content of active substances.

We have our own factory and laboratory so we can guarantee the highest quality all the time From the moment of receiving the ingredients, through quality control, production up to the final packaging, every step is controlled by ourselves

Our products are developed with the help of Prof. Dr. Zoltán Dinya, our scientific advisor who is Member of the Hungarian and Russian Academy of Science and researching the flavonoids for more than 40 years

Our products incorporate the scientific achievements of the World renown Nobel Prize winner Albert Szent-Györgyi who started the research of flavonoids

## TESTIMONIALS

About Flavon Max from our Clients

I heard about Flavon about 3 years back. My mum was diagnosed with colon cancer, she started taking Flavon during and after her chemo and radio therapy. She has made a full recovery and I highly recommend this product. I suffered from knee pain that restricted me from sitting on the floor or kneeling down. Upon taking Flavon for a few weeks my pain disappeared and the restriction I suffered with my knee movements too has gone. For years I suffered from neck and shoulder pain that I had to see an osteopath every few weeks which just gave me temporary relief. Since taking Flavon I hardly go see her. Flavon is the best product that has come about. It has so many benefits for just a general wellness in our lives. - Rashmi .M From London

I bought the Kids Flavon for my daughter who was about one at the time and wasn't very good at eating her vegetables. She loved it and I took it myself. Prior to this my gums were very sore, blistered and bleeding. The very next day I noticed that my gums felt better. I continued to take Flavon and 2 weeks later visited a new dentist. According to my notes, the dentist was expecting my gums to be in quite bad condition, but on examination, she was surprised to find healthy gums with no bleeding or tartar on the teeth. The only change I had made was taking Flavon. My daughter often asks me for her "jam", and I give it to my elderly father to support his health also. - Ness .S

'My two children aged 5 and 7 have been taking Flavon Kids for the last year and a half. I have noticed an incredible improvement in their health since then. Their immunity has been boosted, and apart from an occasional sniffle during season change, they have not been ill at all! Together with balanced diet, full of vegetables and grains, Flavon has helped to settle their tummy aches and generally calmed them down.' - Monika
