What do you like about our SD products? Which is your favorite? I put the SD Hand & Body Treatment on my feet, then put on socks before bed. I also use it on my hands and elbows so that in the morning, my skin is super soft. It helps to soften dry and hardened skin while retaining moisture. I love using the SD Body Lotion on my arms to help with the dry bumps that I get on my upper arms. The SD Body Lotion also helps with psoriasis and eczema!

**Julie Geddes** My neighbor came over the other day and asked for the lotion his wife uses as he did not want to use all of hers up. Now he has his own SD Hand Cream. Uses it on his elbows, only thing that works for him.
