 Kelli has been diagnosed with a neurological disorder called Chiari. Chiari Malformation affects 300,000 people world wide. It includes a wide range of symptoms which include headaches, neck pain, balance problems, weakness in arms and legs, respiratory problems and speech problems.

LifeWave patches are a safe, non-drug approach to relieve pain and bring about balance in the body. The LifeWave patches are not intended to treat, prevent or cure any disease.

I met Kelli's sister whose son has Chiari as well and also suffers severe headaches. He has responded well to the LifeWave patches and introduced me to Kelli. Watch what else happens when Kelli is patched for her headaches.
