

Claus Klockmann

June 2 at 10:34pm · Rødding, Denmark

Skar med en hobbykniv ned ovenfra i leddet på min pegefinger. Man kunne ane knoglen så det var relativt dybt. På skadestuen blev det renset og det blev sat strips plaster på. Ingen lim eller sting. Efter 5 dage med camocin oven på plasteret fra sygehuset ser fingeren sådan ud!!

Cut with a utility knife down from above in the indent on my finger. You could know the bone so it was relatively deep. In the er it was gutted and it was put strips patch. No glue or stitches. After 5 days with camocin on top of the patch from the hospital seeing my finger look like this!!
