Defender Room Air Cleaner

The Defender works 24 hours a day to remove indoor air pollution from your home at a filtration level that is higher than required in

many hospitals. Energy efficient and quiet, the Defender actually filters many of the tiny, harmful particles that HEPA cleaners leave behind.

Beware of silent air cleaners – many produce ozone which may be problematic to your health. The Defender does not produce ozone.

NEW Power Nozzle and Attachments

More Reach! Five inches more hose! This durable yet flexible wire reinforced hose is actually 5 inches longer than our old hose!

No wires or cords to deal with! The auto-snap connections mean no-hassle electrical connections between the Hose, Wand and Power Nozzle.

Fits in Smaller Spaces! Our new 75th Anniversary Power Nozzle was engineered with a sleek low profile design for optimum maneuverability.

Deeper Cleaning Power! The rotating chevron style brush is powered by its own motor for powerful deep cleaning.

Longer Lasting Belt! The new gear belt won't slip and is designed to be long lasting.

Additional Filtration! The Motor Emission Filter is designed to filter incoming and outgoing air. The filter captures any carbon released from the motor.

Superior Edge Cleaning! Designed to clean from the front and side. Any dirt surrounding the nozzle is literally snatched up by the powerful edge cleaning ability.

Gentle on Furniture and Baseboards! The double-wide rubber bumper is designed to protect the items in your home.

New Safety Feature! The automatic shut off and reset button will protect the motor from over heating.

Hose Handle Designed for Comfort! The ergonomically designed hose handle fits comfortably in the palm of your hand. The swivel hose allows you to rotate the handle from side to side.

Superior Performing Attachments! We've made some important design changes to these attachments, which means better performance. The set includes dusting brush, upholstery/drapery brush, crevice tool, floor brush, and attachment crown.

New Combi Floor Tool with Microfiber Pad

The Combi Floor Tool makes cleaning all types of flooring convenient because it can quickly go from cleaning hard floors to area rugs without switching to a different attachment.

The included Micro fiber Pad turns your Majestic® into a "dust mop". Intended for dry use only, this pad is idea for reducing the amount of cleaning chemicals in your home. Use it daily to keep your fine floors from collecting unwanted dirt and dust. Best of all, the Microfiber Pad is machine washable!

Here are a few suggestions to help reduce damaging pollutants inside your home:

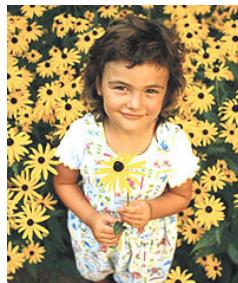

1. Remove shoes at the door.
2. Replace furnace and air conditioner filters regularly.
3. When dusting, use a wet cloth to avoid stirring up damaging dust and dirt or dust with the FILTERQUEEN Majestic.
4. Run the FILTERQUEEN Defender room air cleaner to remove particles from the air before they settle.
5. At least twice a week, use the FILTERQUEEN Majestic, an effective filtration system with continuous airflow.
6. Furniture polish leaves behind a residue that can build up and dull furniture's finish.
7. Abrasive cleaners damage furnishing often beyond repair.
8. Vacuums that are supposed to remove dust and dirt from carpets and upholstery actually spew dust back into the air as they run. Beware of upright cleaners with beater bars. They can scratch hardwood and linoleum floors.

Quick Facts About Allergies and Asthma

17 million Americans, including 4.8 million children, suffer from asthma.

Since 1980, the number of reported cases of asthma has jumped 50%.

Asthma attacks account for 33% of all pediatric emergency room visits.

Asthma is the leading cause of school absenteeism, accounting for 10 million school days missed each year.

Allergies and Asthma

The Problem...

Airborne allergens, like dust mites, dirt, and irritants cause the body to react with congestion, difficulty breathing, and headaches. Prescribed medications only treat the symptoms of allergies and asthma linked to indoor pollution - they do nothing to help eliminate the source of the problem!

The Solution...

FilterQueen®'s Indoor Air Quality System may provide relief for asthma and allergy sufferers. The FilterQueen® IAQS helps remove common bacteria, pollen, mold, pet dander, cigarette smoke, and fumes from the air, allowing asthma and allergy sufferers to breathe freely again!

The Majestic removes dust and dirt from surfaces using its cyclonic action and patented filtration system before releasing cleaner, healthier air back into your environment.

The Defender works 24 hours a day to remove indoor air pollution from your home at higher filtration rates than those required in many hospitals without producing harmful ozone like many other filtration systems do.

Home Preservation

The Problem...

Much of the steady deterioration in homes is a result of dust and dirt that is not effectively removed.

The Solution...

The FILTERQUEEN Indoor Air Quality System will contribute tremendously to preserving the investment you have made in your home. Even a new carpet will last longer when it is cleaned properly on a regular basis!

FILTERQUEEN is unlike any other cleaning system available for your home. As you clean, it thoroughly removes damaging pollutants, helping prevent dust from resettling. The interior of your home is more fragile than you may realize – and it is worth preserving!

For more information about FILTERQUEEN's IAQS visit the product section of the site.

Eliminating the allergy risks could prevent asthma in more than 500,000 children in the United States, according to a new study in Pediatrics. The study underscores what scientists already suspect about the role environmental factors, such as cigarette smoke and pet dander, play in how asthma develops.

Helpful Hints & Tips

Dirt and dust are the main culprits when it comes to wear and tear inside your home. Hardwood floors slowly deteriorate as dirt grinds at the surface. The fibers in your furniture and carpets are gradually being destroyed by the razor-like dust that settles in and can't get out.

Helpful Hints & Tips

- Doctor Recommended
- The Defender® Room Air Cleaner is recognized by the FDA as a Class II medical device

Prescribed medications treat the symptoms of the allergies and asthma linked to indoor pollution. The FILTERQUEEN Indoor Air Quality System (IAQS), however, attacks the source of the problem by helping remove allergens from the air and surfaces in your home.

The FILTERQUEEN IAQS has a unique filtration ability that is specifically designed to remove harmful particles from your home. The filters in the system have been independently tested to remove 99.98% of particles at 0.1 micron. Also, the addition of activated charcoal helps to remove over 300 toxic gases and noxious odors that come from pets, cooking, and even cleaning products.

Here are some tips to help reduce harmful particles from your home....

Dust mites live in mattresses, pillows, carpets, fabric-covered furniture, bedcovers, clothes, and objects such as stuffed toys. Keeping dust mite populations low will improve the indoor air quality and help prevent allergic reactions. To reduce dust mites inside your home:

1. Replace feather and down pillows with synthetic-filled pillows.
2. Replace wool blankets with washable, nylon or cotton cellulose types.
3. Cover pillows, mattresses, and box springs with an impervious fabric.
4. At least once a month, wash all bedding in hot water.
5. Change sheets and pillow cases at least every seven days.
6. Use a cleaner with an effective filtration system and continuous airflow.
7. Use a portable, high-efficiency air purifier in each room.

– Dr. Bill Loughridge F.A.C.S., F.A.C.C.

Here are a few suggestions from the American Lung Association to help you maintain a healthy home:

1. Don't smoke inside your home.
2. Keep humidity levels low with a dehumidifier or air conditioner, as needed.
3. Clean regularly to help keep dust mites and other allergens at a minimum. Wash bedding in hot water (at least 130°). Replace carpets with area rugs that may be washed often.
4. Check commercial cleaning products and pesticides for toxic ingredients. Keep your home well ventilated while using the products.
5. Never leave a car or lawn mower running in an attached garage. Avoid the use of unvented heaters.

Are you concerned that your home environment might be causing health problems?

HEALTHY HOME TIPS

Here are some questions to ask:

1. Does anyone in the family have frequent headaches, fevers, itchy and watery eyes?
2. Did these symptoms appear after moving to a different home?
3. Do the symptoms appear when you're away at work or school?
4. Does your home feel humid? Is there moisture on the windows, walls, or ceilings?
5. Have you recently had water damage?
6. Is your basement damp?
7. Do your household plants show signs of mold?
8. Do you have pets?
9. Does your home have cockroaches or rodents?

Tom Dolan

Olympic Gold Medalist, World Record Holder, and Asthma Sufferer

At 6'6" and 180 pounds, Dolan has the perfect body for a world-class swimmer but he suffers from extreme allergies and asthma. His unusually narrow windpipe allows him to handle only 20% as much air as the average person and most drugs commonly used to treat similar conditions are banned in international competitions.

But Tom won't let that stop him from achieving his goals. He knows he must have some other type of relief. Breathing clean air is absolutely essential. Tom knows full well that allergens and pollutants in the home can trigger asthma attacks.

That's why Tom uses the FILTERQUEEN Defender at home and in his room in the Olympic Village.

- The Defender room air cleaner helps remove allergens and irritants from the air so that he can lead a more normal life
- Pollen, dust, noxious fumes, and dander are just a few of the irritants that Tom no longer has to deal with because FILTERQUEEN protects his home.

"Winning the Olympic gold medal feels great," said Tom, "but nothing feels better than knowing that my family and I are breathing cleaner, healthier air in our home."

Technical Information

Ordinary vacuum cleaners don't really clean. They simply pick dirt up off the ground and scatter it back into the air you breathe.

As air is forced through, larger particles are captured while many harmful, smaller pollutants escape. Have you ever noticed that "vacuum cleaner smell" while cleaning?

After continued use, dust builds up on the bag or flat filter reducing airflow and cleaning power...This actually happens faster with ordinary HEPA filters. Instead of scattering pollutants, the Majestic® filters them out of your home. The Majestic's® unique design combines three key features in order to provide superior cleaning.

- The original cyclonic action
- Patented, cone-shaped filters
- Superior filtration

The cyclonic action forces dirt and dust toward the outer wall of the container, away from the cone-shaped filters. Airflow is maintained, maximizing cleaning ability at all times.

Class II Medical Device

The FilterQueen® Defender® Room Air Cleaner is recognized as a Class II medical device by the Food and Drug Administration (FDA). The FDA has recognized three classes of medical devices based on the level of control necessary to assure the safety and effectiveness of the device. Class II medical devices are subject to special controls and standards, while providing safety to users of the products. Designed to remove airborne particles and allergens such as dust, smoke, pollen, mold spores, animal dander, dust mites and harmful fibers that may lead to allergic reactions, the Defender® was found to have efficiency ratings better than HEPA (High Efficiency Particulate Air), the industry standard. The Defender® is manufactured using Good Manufacturing Practice (GMP) requirements, which are enforced in the U.S. by the FDA. GMP requirements outline the aspects of production and testing that can impact the quality of a product. Health-Mor is dedicated to delivering safe and dependable products that are the best in its industry. Consequently, the Defender® Room Air Cleaner is both ISO 9001 and ISO 13485 Certified. ISO 9001 is an internationally recognized Quality Management System, with the focus on increasing customer satisfaction. ISO 13485 is specific to the design and manufacture of medical devices, with the focus on meeting regulatory requirements.

Health-Mor, an HMI Industries Inc. Company, specializes in the manufacturing of the FILTERQUEEN® Indoor Air Quality System. The FILTERQUEEN® System consists of the Majestic® surface cleaner and the Defender® room air cleaner. These high-quality products are used to remove both surface and airborne allergens, dirt, and dust from home interiors. For over 80 years, FILTERQUEEN® products have been sold exclusively through direct, in-home sales. This channel of distribution offers a greater level of customer service, a more complete presentation of the products' benefit and convenience to the customer. Today there is a network of independent FILTERQUEEN® Distributors throughout the United States, Canada, and over forty other countries worldwide.

Health-Mor is a recipient of The Direct Selling Association's (DSA) prestigious "Education for Life" award. This award recognizes companies in the direct selling industry that go beyond just sales and training. These award-winning companies educate employees with skills they can use in life such as ethical, moral, and legal standards.

Allergies and Asthma The Problem...

Airborne allergens, like dust mites, dirt, and irritants cause the body to react with congestion, difficulty breathing, and headaches. Prescribed medications only treat the symptoms of allergies and asthma linked to indoor pollution - they do nothing to help eliminate the source of the problem! The Solution...

FilterQueen®s Indoor Air Quality System may provide relief for asthma and allergy sufferers. The FilterQueen® IAQS helps remove common bacteria, pollen, mold, pet dander, cigarette smoke, and fumes from the air, allowing asthma and allergy sufferers to breathe freely again!

The Majestic removes dust and dirt from surfaces using its cyclonic action and patented filtration system before releasing cleaner, healthier air back into your environment.

The Defender works 24 hours a day to remove indoor air pollution from your home at higher filtration rates than those required in many hospitals without producing harmful ozone like many other filtration systems do.

Home Preservation

The Problem...

Much of the steady deterioration in homes is a result of dust and dirt that is not effectively removed. The Solution...

The FILTERQUEEN Indoor Air Quality System will contribute tremendously to preserving the investment you have made in your home. Even a new carpet will last longer when it is cleaned properly on a regular basis! FILTERQUEEN is unlike any other cleaning system available for your home. As you clean, it thoroughly removes damaging pollutants, helping prevent dust from resettling. The interior of your home is more fragile than you may realize – and it is worth preserving!

Tom Dolan

Olympic Gold Medalist, World Record Holder, and Asthma Sufferer

At 6'6" and 180 pounds, Dolan has the perfect body for a world-class swimmer but he suffers from extreme allergies and asthma. His unusually narrow windpipe allows him to handle only 20% as much air as the average person and most drugs commonly used to treat similar conditions are banned in international competitions. But Tom won't let that stop him from achieving his goals. He knows he must have some other type of relief. Breathing clean air is absolutely essential. Tom knows full well that allergens and pollutants in the home can trigger asthma attacks. That's why Tom uses the FILTERQUEEN Defender at home and in his room in the Olympic Village.

Are you concerned that your home environment might be causing health problems?

Here are some questions to ask: 1. Does anyone in the family have frequent headaches, fevers, itchy and watery eyes? 2. Did these symptoms appear after moving to a different home? 3. Do the symptoms appear when you're away at work or school? 4. Does your home feel humid? Is there moisture on the windows, walls, or ceilings? 5. Have you recently had water damage? 6. Is your basement damp? 7. Do your household plants show signs of mold? 8. Do you have pets? 9. Does your home have cockroaches or rodents?

Helpful Hints & Tips

Prescribed medications treat the symptoms of the allergies and asthma linked to indoor pollution. The FILTERQUEEN Indoor Air Quality System (IAQS), however, attacks the source of the problem by helping remove allergens from the air and surfaces in your home.

The FILTERQUEEN IAQS has a unique filtration ability that is specifically designed to remove harmful particles from your home. The filters in the system have been independently tested to remove 99.98% of particles at 0.1 micron. Also, the addition of activated charcoal helps to remove over 300 toxic gases and noxious odors that come from pets, cooking, and even cleaning products.

Here are some tips to help reduce harmful particles from your home....

Dust mites live in mattresses, pillows, carpets, fabric-covered furniture, bedcovers, clothes, and objects such as stuffed toys. Keeping dust mite populations low will improve the indoor air quality and help prevent allergic reactions. To reduce dust mites inside your home:

1. Replace feather and down pillows with synthetic-filled pillows.
 2. Replace wool blankets with washable, nylon or cotton cellulose types.
 3. Cover pillows, mattresses, and box springs with an impervious fabric.
 4. At least once a month, wash all bedding in hot water.
 5. Change sheets and pillow cases at least every seven days.
 6. Use a cleaner with an effective filtration system and continuous airflow.
 7. Use a portable, high-efficiency air purifier in each room.
- Dr. Bill Loughridge F.A.C.S., F.A.C.C.

Eliminating the allergy risks could prevent asthma in more than 500,000 children in the United States, according to a new study in Pediatrics. The study underscores what scientists already suspect about the role environmental factors, such as cigarette smoke and pet dander, play in how asthma develops.
