## Testimonial – Stage I Rectal Cancer

in [Testimonials](#) /

From ACMA Patient Group on May 22, 2009:

I worked with Dr. Bob for about 10 months for stage I rectal cancer and between the diet and herbs 3x day, my body healed.

It's important to have faith and patience, especially tracking your vitals and symptoms (if you are recording those). His herbs are very powerful, but it's up to you to give your body the tools it needs to heal itself.
