

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF MICHIGAN

RAY AND KRIS ANGERMAN,)	Civ. No. 18-13832
PAULA STOCKBRIDGE, and JANICE)		
PARKER Individually and on Behalf of)		CLASS ACTION COMPLAINT
All Others Similarly Situated,)	
)	
Plaintiffs,)	
)	
vs.)	<u>DEMAND FOR JURY TRIAL</u>
)	
WHIRLPOOL CORPORATION,)	
)	
Defendant.)	
)	

Plaintiffs Ray and Kris Angerman, Paula Stockbridge and Janice Parker (collectively, “Plaintiffs”), bring this class action complaint for damages and equitable relief against Defendant Whirlpool Corporation (“Defendant” or “Whirlpool”). Plaintiffs allege the following upon information and belief based on the investigation of counsel, except as to those allegations that specifically pertain to Plaintiffs, which are alleged upon personal knowledge:

INTRODUCTION

1. Whirlpool designs, manufactures, advertises, and sells a line of gas and electric stoves, ranges, and ovens featuring its proprietary “AquaLift® Self-Cleaning Technology” (“AquaLift”), an attribute that Defendant purports to, *inter alia*, “self-clean” the interior of a dirty oven in less than one hour using only water and low heat.¹ Whirlpool’s marketing and advertising for its ovens containing AquaLift (the “AquaLift Ovens” or “Ovens”) is false, deceptive, and misleading to reasonable consumers because AquaLift – a key product feature – does not “self-clean” as advertised. Hundreds, if not thousands, of consumers nationwide have complained publicly and to Whirlpool directly, and Whirlpool and its authorized sellers have admitted that AquaLift *does not work*.

¹ A list of the known model numbers of Whirlpool appliances featuring the falsely advertised AquaLift feature is attached hereto as Exhibit 1.

2. Whirlpool describes AquaLift as “*oven cleaning redefined*,” “*innovation nearly 50 years in the making*,” and a “*first-of-its kind cleaning solution*.”² According to Whirlpool, AquaLift uses an “exclusive coating on the interior [that] activates with water and heat, allowing moisture to release soils from underneath so food and debris *easily wipe away*.”³ Whirlpool emphasizes that consumers “can use AquaLift™ self-clean technology frequently to clean *tough baked-on soils*[,]”⁴ and that the cleaning process takes only 40 to 50 minutes. Further, Whirlpool represents that after a “self-clean” cycle is complete, users of the Ovens can simply “remove residual water and *loosened soils* with a *sponge or dry cloth*.”⁵

3. In Whirlpool’s nationwide advertising and marketing campaign for AquaLift, Whirlpool does not set forth *any* limitations to the performance of the

² Whirlpool Corporation AquaLift Technology, Frequently Asked Questions, http://whirlpoolcorp.com/aqualift/faq_q1.html (last visited Dec. 10, 2018), attached hereto as Exhibit 2. Unless otherwise noted, emphasis is added throughout.

³ *Id.* at http://whirlpoolcorp.com/aqualift/faq_q2.html (last visited Dec. 10, 2018), attached hereto as Exhibit 3.

⁴ *Id.* at http://whirlpoolcorp.com/aqualift/faq_q7.html (last visited Dec. 10, 2018), attached hereto as Exhibit 4.

⁵ *Id.* at http://whirlpoolcorp.com/aqualift/faq_q3.html (last visited Dec. 10, 2018), attached hereto as Exhibit 5.

Ovens’ “self-cleaning” technology and does not inform consumers that AquaLift only works on certain parts of the Ovens.

4. Contrary to Whirlpool’s representations in its advertising and marketing, AquaLift does not “self-clean” the Ovens or otherwise perform as advertised to consumers. Indeed, the Internet is teeming with consumer complaints that describe the extent of Whirlpool’s falsely advertised AquaLift technology.⁶ Consumers complain, by way of example, that AquaLift “is *totally useless*” and “*doesn’t work AT ALL.*” These putative class members have called AquaLift “*a waste of money,*” “*worthless,*” “*junk,*” “*a joke,*” “*the biggest ripoff,*” and “*fraud plain and simple,*” and these consumers have asked, “[H]ow can the company get away with advertising [a] self-cleaning oven when it absolutely *does not clean one bit?!*”⁷

5. Whirlpool knew or should have known that its AquaLift feature cannot “self-clean” and does not function as advertised. Indeed, in some instances, dissatisfied consumers, including Plaintiffs, have voiced their complaints directly to Whirlpool. In response, Plaintiffs were largely advised by representatives of Whirlpool or its agents that if the AquaLift feature does not work, *consumers should*

⁶ See infra ¶¶101-106.

⁷ *Id.*

purchase cleaning supplies to manually clean the oven. This advice contravenes Whirlpool's advertising of AquaLift's ability "to clean tough baked-on soils" and the ability for a consumer to "remove residual water and loosened soils with a sponge or dry cloth" after the AquaLift feature is activated. This advice is also contrary to the "AquaLift Quick Reference Guide" which instructs consumers to avoid using "commercial oven cleaners" to manually clean the Ovens because it will damage the oven's interior.⁸

6. Plaintiffs and the Class (defined below) did not receive any of the "self-cleaning" benefits of the AquaLift Ovens or observe the feature to work as advertised. Instead, Plaintiffs have been forced to either endure futile and inconvenient service attempts and/or complain to Whirlpool about the "self-clean" feature that does not work as advertised.

7. Plaintiffs and members of the putative Class have no choice but to manually clean virtually all surfaces of their Ovens, due to AquaLift's inability to "self-clean" and work as advertised, or tolerate a perpetually dirty oven cavity. Whirlpool, in response to Plaintiffs' complaints, has sent "cleaning kits" and instructed some Plaintiffs to manually clean the Ovens.

⁸ AquaLift Technology, Oven Cleaning Quick Reference Guide, http://pdf.lowes.com/howtoguides/883049329918_how.pdf (last visited Dec. 10, 2018), attached hereto as Exhibit 6.

8. At all times, AquaLift has failed to work and operate as advertised for Plaintiffs and the members of the putative Class resulting in damages including, but not limited to: (1) payment for a falsely advertised product; (2) overpayment for a product advertised to include a self-cleaning function, but did not; (3) a decrease in value of their Ovens due to the false advertising; and (4) out-of-pocket money spent in connection with servicing AquaLift and/or manually cleaning the Oven.

9. Plaintiffs assert claims on behalf of a Class for violations of the consumer protection statutes of Minnesota, Washington, and Georgia as well as claims for breach of contract, breach of express and implied warranties, and unjust enrichment.

10. Plaintiffs also assert claims on behalf of a Minnesota Subclass, Washington Subclass, and Georgia Subclass (all defined below), for respective violations of the Minnesota Prevention of Consumer Fraud Act, Minn. Stat. §325F *et seq.* and Minn. Stat. §8.31, *et seq.* (“MCFA”), Minnesota Uniform Deceptive Trade Practices Act, Minn. Stat. §325D.43, *et seq.* (“MDTPA”), Georgia Fair Businesses Practices Act, Ga. Code Ann. §10-1-390 *et seq.* (“GFBPA”), Georgia Uniform Deceptive Trade Practices Act, Ga. Code Ann. §10-1-370, *et seq.* (“GUDTPA”) and Washington Consumer Protection Act, Wash. Rev. Code §19.86.010 *et seq.* (“WCPA”), as well as for breach of contract, breach of express and implied warranties, and unjust enrichment.

11. As alleged herein, Plaintiffs and other reasonable consumers (the “Class members”) purchased Ovens equipped with AquaLift, which were designed, manufactured, advertised, marketed, and sold by Whirlpool, its subsidiaries, and its authorized sellers. Plaintiffs and the Class purchased the Ovens after Whirlpool and its representatives and agents represented to them that AquaLift would “self-clean” their Ovens.

12. Contrary to Whirlpool’s advertising, marketing, and express and implied warranties, AquaLift does not and cannot “self-clean” the inside of an Oven. Therefore, Plaintiffs and the Class were damaged by Whirlpool’s false, deceptive, and misleading advertising campaign.

13. Plaintiffs and the Class members would not have purchased the Ovens had they known they would not self-clean as promised. Plaintiffs and the Class would not have purchased the Ovens – certainly not at the prices they paid – were it not for Whirlpool’s false, deceptive, and misleading advertising and/or Whirlpool’s failure to disclose to consumers the material fact that AquaLift “self-clean” is incapable of performing according to Whirlpool’s advertising, marketing, and express and implied warranties.

THE PARTIES

Ray and Kris Angerman

14. Plaintiffs Ray and Kris Angerman (“Mr. and Mrs. Angerman” or the “Angerman’s”) are citizens of Minnesota and, at all relevant times, were residents of Hastings, Minnesota. On or around October 17, 2013, Mr. and Mrs. Angerman purchased a Whirlpool Electric Stove equipped with AquaLift from the retailer Judge’s Appliance in Hastings, Minnesota. One of the bases for the purchase of that oven was that it contained a “self-clean” feature.

15. Shortly after they purchased their oven, Mr. and Mrs. Angerman ran the AquaLift self-cleaning cycle. Once the cleaning cycle was complete, Mr. and Mrs. Angerman observed that AquaLift’s “self-clean” did not clean the inside of the oven. Mr. and Mrs. Angerman re-ran the AquaLift cleaning cycle several times after that and observed that it still did not work to self-clean the oven. Mr. and Mrs. Angerman were forced to manually scrub their oven after each use.

16. At all times, the AquaLift feature of the Angerman’s oven has not performed as advertised and has not “self-cleaned” their oven, thereby causing them damages.

Janice Parker

17. Plaintiff Janice Parker (“Ms. Parker” or “Parker”) is a citizen of Georgia and, at all relevant times, was a resident of Woodstock, Georgia.

18. On or around March 27, 2014, Ms. Parker purchased a Whirlpool Electric Stove equipped with the AquaLift “self-clean” feature from a BrandsMart U.S.A. store in Kennesaw, Georgia. Ms. Parker was specifically in the market looking for a “self-cleaning” oven. Prior to her purchase, Ms. Parker saw advertising on the oven indicating that the appliance was a self-cleaning oven. She also recalls observing that the oven was energy efficient. A BrandsMart U.S.A. sales representative informed Ms. Parker that AquaLift was the latest in self-cleaning technology and the cleaning cycle worked well.

19. Approximately two months after her purchase, Ms. Parker used AquaLift for the first time. She closely followed the instructions in the user manual. When the cleaning cycle was complete, however, she observed the cleaning cycle had no effect on the interior of her oven – it only left a large puddle of water. As a result, Ms. Parker, was forced to manually clean her oven and remove the water from the bottom of her oven.

20. Ms. Parker has activated AquaLift several times since she first used it, each time closely following the user instructions and has suffered the same results. Because of AquaLift’s poor cleaning ability, she no longer uses her oven.

21. At all times, the AquaLift feature of Ms. Parker’s oven has not performed as advertised and has not “self-cleaned” the oven, thereby causing her damages.

Paula Stockbridge

22. Plaintiff Paula Stockbridge (“Ms. Stockbridge” or “Stockbridge”) is a citizen of Washington and, at all relevant times, was a resident of Gig Harbor, Washington. On or around February 2016, Ms. Stockbridge purchased a KitchenAid Electric Stove equipped with AquaLift from Albert Lee Appliance in Tacoma, Washington. The AquaLift cleaning system appealed to her because she saw placards in the Albert Lee appliance store showcasing the ease of the oven’s self-cleaning attribute.

23. Within approximately three months of purchase, Ms. Stockbridge activated the AquaLift feature after closely following the user instructions. At the end of the “self-cleaning” cycle, Ms. Stockbridge observed that the AquaLift feature had no cleaning effect on the walls and back of her oven cavity and it did not loosen any baked on soils from the bottom of the oven. She then attempted to manually clean her oven with Whirlpool’s AquaLift “cleaning kit.”

24. Thereafter, Ms. Stockbridge complained to the retailer Albert Lee about the cleaning performance of AquaLift. An Albert Lee sales representative informed her he would relay her complaint to Whirlpool. She was later told by the sales representative that there was nothing Whirlpool or Albert Lee could do to help with the cleaning performance of her oven.

25. Ms. Stockbridge continued to use AquaLift and followed the instructions closely. Still, AquaLift's "self-cleaning" attribute cannot remove or loosen any of the grease and soils from the back, side, and bottom of her oven. Ms. Stockbridge is, therefore, forced to manually clean her oven.

26. At all times, the AquaLift feature of Ms. Stockbridge's oven has not performed as advertised and has not "self-cleaned" her oven, thereby causing her damages.

Whirlpool Corporation

27. Defendant Whirlpool is a Delaware corporation headquartered in Benton Harbor, Michigan. Whirlpool describes itself as the world's leading manufacturer and marketer of household appliances. Ovens equipped with the AquaLift feature are sold and distributed under the Whirlpool brand name and its wholly-owned subsidiaries including Maytag Corporation ("Maytag"), KitchenAid, Inc. ("KitchenAid"), and the Jenn-Air Products Company ("Jenn-Air") (collectively, the "Ovens"). At all relevant times, Whirlpool designed, manufactured, distributed, advertised, marketed, promoted, and sold the Ovens equipped with the falsely advertised AquaLift feature.

JURISDICTION AND VENUE

28. This Court has jurisdiction pursuant to 28 U.S.C. §1332, as amended by the Class Action Fairness Act of 2005, because at least one member of the Class

is a citizen of a different state than Whirlpool, there are more than 100 members of the Class, and the aggregate amount in controversy exceeds \$5 million, exclusive of interest and costs.

29. Venue is proper in this District pursuant to 28 U.S.C. §1391 because many of the acts and transactions giving rise to this action occurred in this District and because: (a) Whirlpool is authorized to conduct business in this District and has intentionally availed itself of the laws and markets within this District through the promotion, marketing, distribution, and sale of its appliances with AquaLift; (b) Whirlpool conducts substantial business in this District; and (c) Whirlpool is subject to personal jurisdiction in this District.

FACTUAL ALLEGATIONS

Whirlpool Extensively Advertises AquaLift's Purported Ability to "Self-Clean" the Interior of Its Ovens

30. Whirlpool describes itself as the world's leading manufacturer and marketer of household appliances. Whirlpool sells household appliances, such as kitchen ovens, under various brand names, including, Whirlpool, Maytag, KitchenAid, and Jenn-Air.

31. Whirlpool designed, manufactured, advertised, and sold throughout the United States at least 87 models of kitchen Ovens featuring AquaLift "self-cleaning" technology. AquaLift is available on gas or electric Ovens of different sizes.

32. Whirlpool advertises its AquaLift technology as a key feature to distinguish the Ovens from competitors. Indeed, through its website, in-store point-of-sale displays, and product information labels on the appliances themselves, Whirlpool touts AquaLift as “*oven cleaning redefined*,” “*innovation nearly 50 years in the making*,” and a “*first-of-its kind cleaning solution* that is activated with heat and water to release *tough baked-on soils* from the oven interior in less than 1 hour.”

33. Whirlpool even dedicates an independent page of its website solely to showcase its AquaLift technology.⁹ On that page, under a large bold heading that reads, “*Cleaning your oven just got faster, cooler, and easier*,” Whirlpool shares a video demonstration of the purported superiority of its AquaLift self-clean technology over traditional self-cleaning ovens:

⁹ Whirlpool Corporation AquaLift Technology, “Cleaning your oven just got faster, cooler, and easier,” <http://whirlpoolcorp.com/aqualift/index.html> (last visited Dec. 10, 2018), attached hereto as Exhibit 7.

34. A voiceover in the video states that, “it’s time for something new. Time for AquaLift technology”:

35. “The baked on stains may be the same, but now you can have your oven back in less than one hour. All with less heat and no odor.”:

36. “AquaLift technology, *an innovation* from Whirlpool Corporation. *Redefines oven cleaning.*”:

37. “Simply remove the oven racks . . .”:

38. “. . . and wipe out the excess soil.”:

39. “Pour two cups of water in the bottom of the oven, and *let AquaLift technology do the work.*”:

40. “This *innovative coating* is activated by water and heat.”:

41. “It lifts tough baked-on soils from underneath, making oven cleaning a snap.”:

42. “In under an hour, the oven is ready for a final wipe down to remove the soil.”:

43. “All done in less time, with no odor, and no extreme heat like traditional, high-temperature self-clean ovens. AquaLift technology is *oven cleaning redefined*.”:

44. On the AquaLift “frequently asked questions” (“FAQ”) page, Whirlpool describes AquaLift as “a *first-of-its kind cleaning solution* that is

activated with heat and water to release *tough baked-on soils* from the oven interior in less than 1 hour.”¹⁰

45. Whirlpool’s FAQs page represents that AquaLift works through an “exclusive coating on the interior [that] activates with water and heat, *allowing moisture to release soils from underneath so food and debris easily wipe away.*”¹¹

46. Whirlpool also offers consumers an AquaLift “Quick Reference Guide” which describes AquaLift as an “*innovative cleaning solution*” that “utilizes heat and water to release baked-on spills from the oven interior in less than 1 hour.”¹²

47. The “Quick Reference Guide” sets forth five steps to make the AquaLift perform as advertised stressing that consumers should not attempt to manually clean the Oven with “commercial” cleaners or any other cleansers, that the “residual water and loosened soils” can be removed by a sponge or dry cloth *immediately after the cycle is complete*, that the “cleaning action loosens baked-on residue *from the oven bottom*” and that consumers must “clean the oven door and wall” themselves “to *avoid baked-on soil.*”¹³

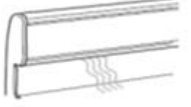

¹⁰ See Exhibit 2.

¹¹ See Exhibit 3.

¹² See Exhibit 6.

¹³ *Id.*

48. The “Quick Reference Guide” also has a “Helpful Tips” section. This section states in pertinent part that “[h]eavily soiled ovens may require a second cleaning cycle.”¹⁴ While this language implies that the AquaLift, if at least used multiple times, will remove heavy soil from all parts of the Oven cavity, Whirlpool fails to mention that the AquaLift cannot clean the Oven walls and the Oven door.

Helpful Tips	
<p>Cleaning Your Ceramic Glass Cooktop Clean your cooktop after each use with ceramic glass cooktop cleaner and apply with approved cooktop cleaning pads. Scrape off sugary spills while the cooktop is still warm. You may want to wear oven mitts while cleaning the cooktop. Remove stubborn stains with Cooktop Cleaner, Scraper and Cleaning Pads available in the Cooktop Care Kit (not included). Do not allow spills and stains to remain on the cooktop over night. Do not clean with steel wool, abrasive powder cleaners, chlorine bleach, rust remover, or ammonia as they will damage the glass. Razor scraper edges will not scratch the glass when used properly at a 45 degree angle to the surface.</p> <p>Cooktop Glass The surface cooking area will glow red when an element is on. It may cycle on and off to maintain the selected heat level. Portions of the element may cycle on and off at different times on some elements. This is normal. The Warm Zone element area will not glow red when cycling on.</p> <p>Oven Odor There may be some odors the first few times you use your range. This will go away after the oven is used a few times. To eliminate these odors, it is recommended that you run the Bake cycle at 400°F (204°C) for 30 minutes prior to cooking for the first time.</p>	<p>Oven Preheat Time The standard time necessary to preheat your oven to 350° (177°C) is 10 to 15 minutes. Factors that have an impact on preheat times are: room temperature, starting oven temperature, and the number of oven racks. Unused oven racks can be removed prior to preheating your oven to reduce the preheat time.</p> <p>Convection During convection cooking, the bake, broil and convection elements cycle on and off in intervals to maintain the oven temperature, while the fan circulates the hot air. If the oven door is opened during convection cooking, the fan will turn off immediately. It will come back on when the oven door is closed.</p> <p>AquaLift™ Technology Cleaning Some condensation will form on the oven window during the cleaning cycle. This condensation will evaporate within 30 minutes. During the AquaLift™ Technology cleaning cycle, some steam will come out of the bottom of the console. This is normal and part of the cleaning cycle. Make sure that the oven is level to ensure water is evenly distributed on the bottom of the oven cavity. Adjust the leveling feet as instructed in the Installation Instructions. Remove heavy spills before starting the cleaning cycle. Heavily soiled ovens may require a second cleaning cycle. For assistance with AquaLift™ Technology, call 1-877-258-0808, or visit our website at http://whr.pt/aqualift.</p>

AquaLift™ technology **Oven Cleaning Quick Reference Guide**

AquaLift™ Technology is an innovative cleaning solution that is activated with heat and water to release baked-on spills from the oven interior in less than 1 hour. This new cleaning technology is a low-heat, odor-free alternative to traditional self-cleaning options.

<p>STEP 1</p> <p>REMOVE all racks and accessories from the oven cavity and wipe excess soil. Use the scraper to remove additional easily-removed soils.</p> 	<p>STEP 2</p> <p>POUR 2 cups (16 oz) of distilled or filtered water onto the bottom of the empty oven and close the oven door.</p> <p>IMPORTANT: Do not use cleansers, chemicals or other additives with the water.</p> 	<p>STEP 3</p> <p>PRESS CLEAN then press START. Cleaning action loosens baked-on residue from the oven bottom.</p> <p>Allow 40 minutes for cleaning and cool down. Some condensation will form on the window. When the cleaning cycle is complete, a beep will sound. Press CANCEL to end.</p> 	<p>STEP 4</p> <p>REMOVE the residual water and loosened soils with a sponge or soft dry cloth immediately after the cycle is complete.</p> <p>Remove remaining soils with a non-scratch scrubbing sponge or plastic scraper. Additional cleaning cycles may be run to help remove stubborn soils.</p> 	<p>STEP 5</p> <p>CLEAN the oven door and walls to avoid baked-on soil. Refer to the User Instructions for additional information.</p> <p>IMPORTANT: The use of chemicals, including abrasives and commercial oven cleaners, or metal scouring pads may damage the oven interior.</p> 
---	--	---	--	---

Use regularly to clean oven spills

7/11
Printed in U.S.A.

49. Whirlpool also represents the ease of use of AquaLift and that operation of the AquaLift feature “takes just a few steps.”

50. For example, its website states that:

- “[a]fter removing all racks and accessories from the oven cavity and wiping excess soil up, simply:
- Pour . . . water onto the bottom of an empty AquaLift™ self-clean technology enabled oven and close the door.
- Press “Clean” then “Start” to begin the 40 minute cycle. . . . When the cycle is complete, a beep will sound. Press “Cancel” to end.

- Immediately after the cycle is complete, remove residual water and loosened soils with a sponge or dry cloth.¹⁵

51. Whirlpool further represents that AquaLift was “developed to directly address *consumer dissatisfaction with traditional high-temperature self-clean ovens* and to provide them an alternative cleaning solution.”¹⁶

52. According to Whirlpool, the “key benefits of using AquaLift™ self-clean technology” include that it “SAVES TIME: The cleaning process takes under one hour compared to the average 3-6 hours of traditional self-cleaning ovens” and “NO ODOR: Since AquaLift™ self-clean technology uses water to clean it avoids the traditional chemical odors associated with traditional oven cleaning.”¹⁷

53. Whirlpool further represents that AquaLift can be used “frequently to clean *tough baked-on soils*.”¹⁸

54. A “Glossary” section of the Whirlpool website contains the following entry for AquaLift: “AquaLift® Self-Clean Technology. Get your oven clean in less than an hour with odor-free, low temperature AquaLift® technology. This *exclusive*

¹⁵ See Exhibit 5.

¹⁸ See Exhibit 4.

coating on the interior activates with water and heat, *allowing moisture to detach soils from underneath* so food and debris *easily wipe away*.”¹⁹

55. Whirlpool also advertises the AquaLift feature on individual product webpages. For example, the webpage for Whirlpool’s 6.4 Cu. Ft. Freestanding Electric Range model number, WFE540H0ES, with AquaLift® Self-Cleaning Technology, states that: “[a]t the end of the meal, this large oven’s easy wipe ceramic glass cooktop offers hassle-free cleanup, while AquaLift® self-cleaning technology delivers *odor-free oven cleaning without chemicals in only 50 minutes*.”²⁰

56. Similarly, the webpage for Whirlpool’s 5.8 cu. ft. Front-Control Gas Stove with Fan Convection, model number WEG730H0DB states that: “[w]hen it’s time for cleanup, AquaLift™ self-cleaning technology helps you *wipe away messes* in your slide-in gas stove without harsh chemicals or odors.”²¹

¹⁹ Whirlpool Corporation AquaLift Technology, Frequently Asked Questions, <http://www.whirlpool.com/glossary/#A> (last visited Dec. 10, 2018), attached hereto as Exhibit 10.

²⁰ [http://www.whirlpool.com/kitchen-1/cooking-2/ranges-3/-\[WFE540H0ES\]-1022746/WFE540H0ES/](http://www.whirlpool.com/kitchen-1/cooking-2/ranges-3/-[WFE540H0ES]-1022746/WFE540H0ES/) (last visited Dec. 10, 2018), attached hereto as Exhibit 11.

²¹ [http://www.whirlpool.com/-\[WEG730H0DS\]-1022391/WEG730H0DS/](http://www.whirlpool.com/-[WEG730H0DS]-1022391/WEG730H0DS/) (last visited Dec. 10, 2018), attached hereto as Exhibit 12.

57. The webpages for Whirlpool's various other models of the Ovens include similar misrepresentations regarding AquaLift's purported ability to "self-clean[]" ovens in less than one hour.²²

58. Whirlpool echoes these misrepresentations directly on the product label of each Whirlpool oven equipped with AquaLift.

**Whirlpool's Nationwide Advertising Campaign for AquaLift
Is False Deceptive and Misleading to Reasonable Consumers**

59. Whirlpool's entire advertising campaign for AquaLift – a key product feature – is false, deceptive, and misleading to reasonable consumers because, contrary to Whirlpool's representations, AquaLift does not "self-clean" the interior of the Ovens and, instead, requires consumers to manually clean their Ovens with cleaning products – *defeating the purpose of a "self-cleaning" oven*.

60. To be sure, the Internet is teeming with consumer complaints regarding AquaLift's inability to "self-clean." For example, on February 8, 2013, one consumer posted the following complaint on Consumerist.com:

I have a 30 day old Kitchen Aid convection gas range. Love how it cooks. HOWEVER, their "*Aqualift*" *cleaning technology is a rip*

²² See, e.g., [http://www.whirlpool.com/-\[WEE730H0DS\]-1022332/WEE730H0DS/](http://www.whirlpool.com/-[WEE730H0DS]-1022332/WEE730H0DS/) (last visited Dec. 10, 2018); [http://www.whirlpool.com/-\[WEC530H0DS\]-1022331/WEC530H0DS/](http://www.whirlpool.com/-[WEC530H0DS]-1022331/WEC530H0DS/) (last visited Dec. 10, 2018); [http://www.whirlpool.com/-\[WFE745H0FS\]-5764098/WFE745H0FS/](http://www.whirlpool.com/-[WFE745H0FS]-5764098/WFE745H0FS/) (last visited Dec. 10, 2018); [http://www.whirlpool.com/-\[WFG715H0EH\]-1022749/WFG715H0EH/](http://www.whirlpool.com/-[WFG715H0EH]-1022749/WFG715H0EH/) (last visited Dec. 10, 2018), attached hereto as Exhibit 13.

AND entirely misleading. . . . So... every time you want to clean your cool new oven, you'll be scrubbing it yourself!!!²³

61. This dissatisfied consumer also posted the following photograph of the final results of Whirlpool's AquaLift "self-clean" technology:

²³ <https://consumerist.com/2013/02/08/my-advanced-new-self-cleaning-oven-needs-a-lot-of-help-to-clean-itself/> (last visited Dec. 10, 2018), attached hereto as Exhibit 14.

62. In November 2015, another dissatisfied consumer posted a photograph of an Oven that had “self-cleaned” with AquaLift:²⁴

63. Countless other complaints from putative Class members can be found on the Internet. Online references and complaints regarding the Ovens mirror plaintiffs’ experience, including the following sampling:

Source	Comments
Consumer Affairs 4/18/16 https://www.consumeraffairs.com/homeowners/kit_stoves.html	Purchased the oven in summer 2015. Very disappointed in the AquaLift Self-Cleaning oven. Absolutely useless. <i>Does absolutely nothing and I end up cleaning the oven by hand.</i> As a senior citizen, this is uncomfortable; I have injured my leg in the process and now feel I must wipe the oven down after each use. I was so looking forward to having a nice clean oven at all times and it’s not happening. This is of no value to me.

²⁴ https://www.consumeraffairs.com/homeowners/kit_stoves.html (last visited Dec. 10, 2018), attached hereto as Exhibit 15.

Source	Comments
meowners/whirlpool_ranges.html ²⁵	
Consumer Affairs 4/7/16 https://www.consumeraffairs.com/homeowners/whirlpool_ranges.html ²⁶	I HATE, HATE, HATE the aqua lift clean feature. It's awful. The bottom came somewhat clean but cook bacon and the sides and top are filthy and the aqua lift can't clean that. I don't know how this ever made it past the thought process stage to become a "thing" but it needs to go away. I'm quite cranky right now as <i>I've just spent two hours scrubbing my oven while reaching past the oven door that doesn't come off because it's a "self-clean oven."</i> This is what I have to look forward to for the next 10 years until it dies and I can get a new oven? What a joke!!
Consumer Affairs 4/1/16 https://www.consumeraffairs.com/homeowners/whirlpool_ranges.html ²⁷	We bought a new stove from Lowe's in 2015 which is a Whirlpool with an AquaLift self-cleaning function. <i>This function is totally useless.</i> We have tried it several times and it does not remove the grime from the oven. We did not even have a very dirty oven. It doesn't clean the sides at all and the bottom is still dirty. I complained to the store and they told me the AquaLift function should be used every time the oven has been used. They recommend that I use a spray for the oven (which is porcelain) and scrub off the dirt. Give me back my old self-cleaning oven with the high heat. This new technology doesn't work.
Consumer Affairs 3/4/16 https://www.consumeraffairs.com/homeowners/whirlpool_ranges.html?page=2 ²⁸	Whirlpool Gold Series gas oven with Aqua Lift. Very unhappy with this oven. Cons: <i>Aqua Lift technology doesn't work AT ALL</i> (manual cleaning required); stove top hard to clean; 2 front gas burners are "super" burners which is fine for boiling water, but too hot for regular cooking. Would be better to have one super burner in the middle or back but two upfront is way too hot for regular cooking, even on lowest setting. Was going to use spray cleaner but cannot on convection ovens. In a bind what to do except scrub with Brillo. Anyone used Brillo?
Consumer Affairs 2/23/16 https://www.consumeraffairs.com/homeowners/whirlpool_ranges.html	Whirlpool gas range Model#wfg10h0ah1 with aqua lift technology. This is the biggest ripoff that was ever done to me. It say self clean, not it cleans and then you clean. <i>This is fraud plain and simple.</i> I am handicapped and made it very clear to the salesperson that it had to be self cleaning. 4 times

meowners/whirlpool_ranges.html?page=2 ²⁹	I did the clean cycle and I was in shock, I called repair, I thought the self clean was broken. However this is the line they give you over and over, that it's not broken. "This is working the way it was designed to work." So they made a range that is self cleaning, but no it doesn't do that. For 899.99, I did not deserve to get duped like this.
Consumer Affairs 9/24/15 https://www.consumeraffairs.com/homeowners/kit_stoves.html?page=2 ³⁰	<p>Like so many other reviewers I am totally dissatisfied with my KitchenAid Gas Range Model KGRS202BSS. I second the reviews by Gary of Tonawanda, NY on May 20, 2015 (and others) that the AquaLift Self Clean is not effective and that the black stove top stains, but primarily I totally agree with his comment about how the heat vents out and heats up the handles. This was also the comment of Sharyn of Pearl River, NY on July 2, 2015 (who I would like to thank for the tip about requesting the black knobs which I intend to do).</p> <p><i>This range is TERRIBLE. It becomes a literal sauna in my kitchen</i> when I try to cook using the stove top and/or the oven. Everyone who comes to my home comments on it. And this is despite the fact that I have a fan above the oven which is vented to the outside. I take care of my 2 year old grandson, and I live in fear of him burning himself since the knobs are obviously within his reach. He has definitely learned about the concept of HOT. <i>I purchased this range from PC Richards, and they have sent 3 different servicemen out, only to tell me that's the way it is!</i> Unbelievable. I just visited my friend who has a kitchen much smaller than mine, and her new Maytag slide in gas range did not produce the sauna effect that my KitchenAid range does. DON'T BUY KITCHENAID. YOU'LL REGRET IT.</p>
Consumerist 9/28/14 https://consumerist.com/2013/02/08/my-advanced-new-self-cleaning-oven-needs-a-lot-of-help-to-clean-itself/ ³¹	Whirlpool's Aqualift self-cleaning system seemed to be a technological advance comparable to see-through dishwashers, but she reports that her oven only cleans the bottom center, and not the sides or the corners. You know, the parts that you want your self-cleaning oven to take care of for you.

Houzz (GardenWeb) 9/19/2012 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³²	<i>Get ready for rubber gloves and oven cleaner. It does not work.</i> Consumer reports says it doesn't work, but I bought before reading reviews. I want to get rid of mine. They are sending me a special oven cleaner for this piece of junk so what good is this self cleaning oven that needs a special oven cleaner? I will never again buy American.
Houzz (GardenWeb) 1/29/13 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³³	I bought A Whirlpool range convection, self cleaning and I'm very furious too because the self cleaning, after several time of cleaning, which the last one <i>I let it go for 4 hours, it didn't clean anything at all.</i> My old GE of 30 years used to come out spotless. It has been over a year already, twice the technician came out and there was nothing he could do. We bought 5 years extended warranty and Sears told us there is nothing they can do. I still have to try calling the manufacturer, hoping they'll give me some satisfaction. It really sucks. We should be more further ahead with technology. Now I don't know who to trust anymore.
Houzz (GardenWeb) 2/11/2013 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³⁴	I, too, unfortunately purchased this awful oven. <i>It is uncleanable!</i> I bake frequently, and any form of grease splatter is not removable from the sides and back. Wrote to the company and all they did was tell me to follow the instructions that came with the range! Do they think I'm stupid? I am very angry. Any advice that can be passed along regarding how I can clean it, or how to make the company responsible for this lousy oven, would be greatly appreciated.
Houzz (GardenWeb) 2/13/2013 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³⁴	I was also dumb enough to buy this range. I've had it one year. Have written complaints to Maytag and Whirlpool. I received phone calls from some underpaid know nothing who treated me as if I'd never cleaned an oven before. <i>For Whirlpool/Maytag to call this "self-cleaning" is false advertising and they need to make it right with me or I will not purchase another product from them ever again!</i>

Houzz (GardenWeb) 1/18/2014 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³⁶	I have this horrible range and it is a piece of garbage. It might as well not even have a self cleaning feature. It does not work. Cleaning the glass top of the stove is also very difficult. <i>It was a total waste of money, Maytag doesn't care and won't do anything about it. DO NOT PURCHASE ONE.</i> There is also little to no storage space in the drawer. There is not one good thing I can say about this stove. Not one.
Houzz (GardenWeb) 5/11/2015 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³⁷	I bought this range WYMER888BW the 25th Jan. 2014. <i>What a waste of money, self clean not at all. Would never buy a Maytag or Whirlpool product again. Takes a lot of hard scrubbing & scraping not to mention time to do repeated steam clean cycles and trying to clean this trash.</i> Biggest mistake in a purchase we have made in our 50 years of marriage. Would not recommend!!!
Houzz (GardenWeb) 9/13/2015 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ³⁸	Does not work at all! My wife and I bought it 2 years ago from Lowes (on sale). We have tried the self cleaning feature multiple times, even have run it twice (simultaneously) to see if double the cleaning time would help. Each time, we end up using gloves and other cleaning products to scrape out the mess. I don't know how Maytag tested this before it was marketed, but it does not clean anything.
Houzz (GardenWeb) 9/14/2015 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning)	i gave up fighting with maytag/whirlpool..after a year of owning the same oven, it was junk. I sold it for 500\$, (loss 200\$)and bought a regular GE stove which has the old fashion kind of self cleaning oven cleaning feature...and i LOVE it. Never will i purchase a whirlpool or Maytag product again. They are throw away appliances in more

	<p>Whirlpool replace the oven with one comparably priced that has conventional cleaning capabilities</p> <p>Follow-up: I finally got in touch with Whirlpool after 4 emails and posting on Facebook. It seems that they respond when you post on social media. I was requesting a replacement oven with conventional self cleaning and after much back-and-forth I was informed that because the technician reported that the oven was functioning correctly that they could not give me a replacement. Their reason being that a continually dirty oven had nothing to do with function but was a cosmetic issue. The CS rep was “kind” enough to offer me a bottle of the Affresh cleaner. Don’t fall for the AquaLift hype.</p>
<p>Houzz (GardenWeb) 1/31/2016 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning⁴³</p>	<p>Yes. <i>This oven aqua clean is a joke!</i> I wish I could have my old oven than got VERY hot and stinky back. Would rather clean up a little ash than scrub my fingers off!</p>
<p>Houzz (GardenWeb) 2/20/2016 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning⁴⁴</p>	<p>I just tried the Aqualift feature and am on the thrid cycle now. So far only the bottom part has gotten clean and the sides are still greasy. Hate this feature. <i>Had I known how horrible it was I would have never bought it. I am also not happy with the glass top as that too is difficult to keep clean.</i> This is the first time I have used the Aqualift feature and it was right after grease was spilled from a meatloaf pan. If anyone is looking to buy a stove with this feature don’t.</p>
<p>Houzz (GardenWeb) 3/18/2016 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning</p>	<p>The aqualift does not clean at all! I finally go disgusted and used oven cleaner and it took the finish off the sides of oven, so now my oven is ruined. Looks dirty all the time, so dissatisfied. As I used the oven cleaner I know I will have no prayer with Whirlpool. I bought this stove without reading reviews. My mistake, never again! <i>With all these complaints and a product that obviously does not do it’s job, there has to be a class action maybe?</i></p>

Houzz (GardenWeb) 4/30/2016 http://ths.gardenweb.com/discussions/2293510/aqualift-technology-on-maytag-ranges-oven-cleaning) ⁴⁶	Welcome to the crappy Aqualift club! I finally put some foil on the bottom rack to help catch any drips. This was suggested from the dealer who agrees it's worthless!! Evidently our govt regulations at work!! I also bought some Easy off with a blue top as it was suggested it works well. I haven't used it yet but I will when needed!! Good luck.

Plaintiffs' Experiences with Whirlpool's Deceptively Advertised AquaLift Feature

Ray and Kris Angerman

64. Plaintiffs Ray and Kris Angerman are citizens of Minnesota and, at all relevant times, were residents of Hastings, Minnesota. On or around October 17, 2013, Mr. and Mrs. Angerman purchased a Whirlpool Electric Stove equipped with AquaLift from the retailer Judge's Appliance in Hastings, Minnesota. One of the bases for the purchase of that oven was that it contained a "self-clean" feature.

65. Shortly after they purchased their oven, Mr. and Mrs. Angerman ran the AquaLift self-cleaning cycle. Once the cleaning cycle was complete, Mr. and Mrs. Angerman observed that AquaLift's "self-clean" did not clean the inside of the oven. Mr. and Mrs. Angerman re-ran the AquaLift cleaning cycle several times after

⁴⁵ Attached hereto as Exhibit 36.

⁴⁶ Attached hereto as Exhibit 37.

that and observed that it still did not work to self-clean the oven. Mr. and Mrs. Angerman were forced to manually scrub their oven after each use.

Janice Parker

66. Plaintiff Janice Parker is a citizen of Georgia and, at all relevant times, was a resident of Woodstock, Georgia.

67. On or around March 27, 2014, Ms. Parker purchased a Whirlpool Electric Stove equipped with the AquaLift “self-clean” feature from a BrandsMart U.S.A. store in Kennesaw, Georgia. Ms. Parker was specifically in the market looking for a “self-cleaning” oven. Prior to her purchase, Ms. Parker saw advertising on the oven indicating that the appliance was a self-cleaning oven. She also recalls observing that the oven was energy efficient. A BrandsMart U.S.A. sales representative informed Ms. Parker that AquaLift was the latest in self-clean technology and the cleaning cycle worked well.

68. Approximately two months after her purchase, Ms. Parker used AquaLift for the first time. She closely followed the instructions in the user manual. When the cleaning cycle was complete, however, she observed the cleaning cycle had no effect on the interior of her oven – it only left a large puddle of water. As a result, Ms. Parker, was forced to manually clean her oven and remove the water from the bottom of her oven.

69. Ms. Parker has activated AquaLift several times since she first used it, each time closely following the user instructions and has suffered the same results. Because of AquaLift's poor cleaning ability, she no longer uses her oven.

Paula Stockbridge

70. Plaintiff Paula Stockbridge is a citizen of Washington and, at all relevant times, was a resident of Gig Harbor, Washington. On or around February 2016, Ms. Stockbridge purchased a KitchenAid Electric Stove equipped with AquaLift from Albert Lee Appliance in Tacoma, Washington. The AquaLift cleaning system appealed to her because she saw placards in the Albert Lee appliance store showcasing the ease of the oven's self-cleaning attribute.

71. Within approximately three months of purchase, Ms. Stockbridge activated the AquaLift feature after closely following the user instructions. At the end of the "self-cleaning" cycle, Ms. Stockbridge observed that the AquaLift feature had no cleaning effect on the walls and back of her oven cavity and it did not loosen any baked on soils from the bottom of the oven. She then attempted to manually clean her oven with Whirlpool's AquaLift "cleaning kit."

72. Thereafter, Ms. Stockbridge complained to the retailer Albert Lee about the cleaning performance of AquaLift. An Albert Lee sales representative informed her he would relay her complaint to Whirlpool. She was later told by the sales

representative that there was nothing Whirlpool or Albert Lee could do to help with the cleaning performance of her oven.

73. Ms. Stockbridge continued to use AquaLift and followed the instructions closely. Still, AquaLift's "self-cleaning" attribute cannot remove or loosen any of the grease and soils from the back, side, and bottom of her oven. Ms. Stockbridge is, therefore, forced to manually clean her oven.

Whirlpool's Acknowledgement AquaLift Does Not Work as Advertised

74. From June 2018 to the present, the *Wisconsin State Journal* has reported that Whirlpool, in direct response to complaints about AquaLift's inability to "self-clean" as advertised, is initiating "buy backs" (*i.e.*, refunds of AquaLift ovens).

75. The *Wisconsin State Journal* has published several articles about Whirlpool's "buyback" initiative. First on June 4, 2018 the *Wisconsin State Journal* reported that Whirlpool ovens with a low heat "self-cleaning" feature called "AquaLift" does not, and cannot, work as advertised. The article specifically featured the experience of consumers who complained to Whirlpool about the Ovens' inability to self-clean. One consumer Barbara Behnke, for example, performed "five consecutive cleanings" with the AquaLift cycle and found it did not (at all) remove baked on grime from her oven. What's more, Ms. Behnke told the *Washington State Journal* she "had numerous phone calls and emails to Maytag"

and “multiple visits from Maytag service techs” to try, in vain, to get AquaLift to work. See Exhibit 38.

76. On behalf of Ms. Behnke, the *Wisconsin State Journal* wrote to Whirlpool and attached fifteen photos it had received from Ms. Behnke of her oven, showing AquaLift’s inability to clean. ***In response, Whirlpool refunded her the full cost of her AquaLift oven (\$894.64).***

77. This was not an isolated transaction. In other articles from July to September, the *Wisconsin State Journal* reported that over **20 consumers** had received refunds or exchanges or would receive them as part of the “buy back” initiative. Jan Rohde, of Madison Wisconsin, for example, complained that she had spoken to multiple Whirlpool customer care representatives about AquaLift’s inability to “self-clean” and “was told the stains are cosmetic and that Whirlpool would send a me a free cleaning kit! ***This is not acceptable!***” In response to her complaint, Whirlpool ***refunded the full cost of her oven (\$1,410).***

78. Whirlpool continues to offer consumers refunds and exchanges in response to complaints about AquaLift’s “self-cleaning.” Whirlpool, in fact, has publicly confirmed the existence of this program to the *Wisconsin State Journal* through its representative, Cean Burgeson. Mr. Burgeson has specifically informed the *Wisconsin State Journal* that Whirlpool is employing a process to complete “buybacks” for consumers who have complained about AquaLift’s self-clean

feature. *See* Exhibit 39. Therefore, not only is Whirlpool aware of the scores of complaints about AquaLift, it has acknowledged, through these refunds, that AquaLift's advertising has deceived, or can deceive consumers who believed they were purchasing a "self-cleaning" oven when the oven is incapable of doing so.

NOTICE AND DEMAND PROVIDED TO WHIRLPOOL

79. On March 24, 2017, Plaintiffs' counsel wrote to Whirlpool to provide notice of Whirlpool's violations of the statutory and common laws of Minnesota, Georgia, and Washington on behalf of Plaintiffs, the Class, and Plaintiffs' respective state subclasses, as well as to demand, *inter alia*, a cessation of Whirlpool's false and misleading advertising, compensatory damages, restitution, and disgorgement. True and correct copies of the demand letters are attached hereto as Exhibit 40. Whirlpool has failed to cure its violations of the statutory and common laws of Minnesota, Georgia, and Washington within thirty days of Plaintiffs' counsel's demand letter.

CLASS ACTION ALLEGATIONS

80. Plaintiffs bring this action individually and as a class action pursuant to Fed. R. Civ. P. 23(a), 23(b)(2), and 23(b)(3) on behalf of the following proposed Class: ***All persons who purchased a Whirlpool, Maytag, KitchenAid, or Jenn-Air oven equipped with AquaLift in Minnesota, Georgia, and Washington.***

81. Plaintiffs also seek certification of the following subclasses:

Minnesota Subclass: All persons who purchased a Whirlpool, Maytag, KitchenAid, or Jenn-Air oven equipped with AquaLift in the state of Minnesota.

Georgia Subclass: All persons who purchased a Whirlpool, Maytag, KitchenAid, or Jenn-Air oven equipped with AquaLift in the state of Georgia.

Washington Subclass: All persons who purchased a Whirlpool, Maytag, KitchenAid, or Jenn-Air oven equipped with AquaLift in the state of Washington.⁴⁷

82. Subject to additional information obtained through further investigation and discovery, the foregoing definitions of the Class and Subclasses may be expanded or narrowed by amendment or amended complaint.

83. Specifically excluded from the Class are Whirlpool, its officers, directors, agents, trustees, parents, children, corporations, trusts, representatives, employees, principals, servants, partners, joint venturers or entities controlled by Whirlpool, and their heirs, successors, assigns, or other persons or entities related to or affiliated with Whirlpool and/or its officers and/or directors, the judge assigned to this action, and any member of the judge's immediate family.

84. *Numerosity*. The members of the Class are so numerous that joinder of all members is impracticable. Upon information and belief, the Class includes thousands of members who are geographically dispersed across the country and the

⁴⁷ The Minnesota, Georgia, and Washington subclasses are collectively referred to as the "Subclasses." Unless otherwise noted, the Class and Subclasses are referred to herein as the "Class."

states of Minnesota, Georgia, and Washington. The precise number of Class members are unknown to Plaintiffs. The true number of Class members is known by Whirlpool, however, and thus can be ascertained through appropriate investigation and discovery and may be notified of the pendency of this action by first class mail, electronic mail, or published notice.

85. *Existence and predominance of common questions of law and fact.*

Common questions of law and fact exist as to all members of the Class and predominate over any questions affecting only individual Class members. These common legal and factual questions include, but are not limited to, the following:

- (a) Did Whirlpool represent the Ovens to be “self-cleaning”;
- (b) Whether Whirlpool’s advertising campaign for AquaLift was false, deceptive, or misleading to a reasonable consumer;
- (c) Whether Whirlpool knew or should have known that its AquaLift technology could not perform as advertised;
- (d) Whether Whirlpool had a duty to disclose AquaLift is incapable of self-cleaning;
- (e) Whether the purported ability of AquaLift to “self-clean” tough baked-on soils from the interior of an oven in under one hour is a material fact to consumers;

(f) Whether Whirlpool breached an express warranty made to Plaintiffs and the Class members;

(g) Whether Whirlpool breached an implied warranty of merchantability made to Plaintiffs and the Class members;

(h) Whether Whirlpool breached a contract with Plaintiffs and the Class members;

(i) Whether Whirlpool represented that the Ovens with AquaLift have characteristics, uses, and benefits, that they do not have;

(j) Whether Whirlpool advertised the Ovens with AquaLift with the intent not to sell them as advertised;

(k) Whether Whirlpool failed to reveal a material fact regarding its AquaLift technology, the omission of which would tend to mislead or deceive consumers, and which fact could not reasonably be known by consumers;

(l) Whether Whirlpool made a representation of fact or statement of fact material to its sale of Ovens equipped with AquaLift such that a person could reasonably believe the represented or suggested state of affairs to be other than it actually is;

(m) Whether Whirlpool failed to reveal facts that were material to its sale of Ovens equipped with AquaLift in light of representations of fact made in a positive manner;

- (n) Whether Whirlpool violated the MCFA;
- (o) Whether Whirlpool violated the MDTPA;
- (p) Whether Whirlpool violated the GFBPA
- (q) Whether Whirlpool violated the GUDTPA;
- (r) Whether Whirlpool violated the WCPA;
- (s) Whether Whirlpool was unjustly enriched;
- (t) Whether Whirlpool acted willfully and in wanton disregard of the consequences of its actions to consumers;
- (u) Whether Plaintiffs and the Class members are entitled to damages and the amount of such damages;
- (v) Whether Plaintiffs and the Class members are entitled to an award of punitive damages; and
- (w) Whether Plaintiffs and the Class members are entitled to equitable relief, including an injunction enjoining Whirlpool from engaging in the wrongful and unlawful conduct alleged herein and ordering Whirlpool to engage in a corrective advertising campaign.

86. **Typicality.** Plaintiffs' claims are typical of the claims of the other Class members in that Plaintiffs and the Class members were injured by the same wrongful conduct and scheme of Whirlpool alleged herein.

87. *Adequacy of representation.* Plaintiffs will fairly and adequately protect the interests of the Class. Plaintiffs have retained counsel highly experienced in complex consumer class action litigation, and Plaintiffs intend to vigorously prosecute this action. Further, Plaintiffs have no interests that are antagonistic to those of the other Class members.

88. *Superiority.* A class action is superior to all other available means for the fair and efficient adjudication of this controversy. The damages or other financial detriment suffered by individual Class members is relatively small compared to the burden and expense that would be involved in individual litigation of their claims against Whirlpool. It would, thus, be virtually impossible for the Class members, on an individual basis, to obtain effective redress for the wrongs committed against them. Furthermore, even if Class members could afford such individualized litigation, the court system could not. Individualized litigation would create the danger of inconsistent or contradictory judgments arising from the same set of facts. Individualized litigation would also increase the delay and expense to all parties and the court system from the issues raised by this action. By contrast, the class action device provides the benefits of adjudication of these issues in a single proceeding, economies of scale, and comprehensive supervision by a single United States District Court, and presents no unusual management difficulties under the circumstances presented in this case.

89. In the alternative, the Class may also be certified because:

(a) the prosecution of separate actions by individual Class members would create a risk of inconsistent or varying adjudication with respect to individual Class members that would establish incompatible standards of conduct for Whirlpool;

(b) the prosecution of separate actions by individual Class members would create a risk of adjudications with respect to them that would, as a practical matter, be dispositive of the interests of other Class members not parties to the adjudications, or substantially impair or impede their ability to protect their interests; and

(c) Whirlpool has acted or refused to act on grounds generally applicable to the Class as a whole, thereby making appropriate final declaratory and injunctive relief with respect to the members of the Class as a whole.

90. Alternatively, certain issues relating to Whirlpool's liability may be certified pursuant to Fed. R. Civ. P. 23(c)(4).

CAUSES OF ACTION

COUNT I

Breach of Contract (On Behalf of the Class and the Subclasses)

91. Plaintiffs reallege and incorporate by reference each allegation above as though fully set forth herein.

92. Whirlpool offered to sell the Ovens with AquaLift technology that would “self-clean” heavy baked-on soils from the interior of an Oven in under one hour.

93. Plaintiffs and the Class members accepted Whirlpool’s offer by tendering the asking price for each Oven, thereby creating a valid and enforceable contract, supported by valuable consideration, for the sale of a Whirlpool Oven with AquaLift technology that would “self-clean” heavy baked-on soils from the interior of the Oven in under one hour.

94. Whirlpool breached this contract with Plaintiffs and the Class members by delivering a Whirlpool oven equipped with AquaLift that, contrary to the terms of the contract between Whirlpool on the one hand and Plaintiffs and the Class members on the other, was incapable of “self-cleaning.”

95. As a result of Whirlpool’s breach of contract, Plaintiffs and the Class members suffered damages.

COUNT II

Breach of Express Warranty (On Behalf of the Class and Subclasses)

96. Plaintiffs reallege and incorporate by reference each allegation above as though fully set forth herein.

97. Whirlpool designed, manufactured, advertised, distributed, and sold the Ovens equipped with AquaLift.

98. In connection with each sale of a Whirlpool kitchen oven equipped with AquaLift, Whirlpool made certain affirmations of fact and promises relating to its Ovens specifically, that the AquaLift technology would “self-clean” heavy baked-on soils from the interior of the Oven in less than one hour.

99. Whirlpool’s affirmations of fact and promises relating to its Ovens became part of the basis of the bargain and created an express warranty that Whirlpool Ovens equipped with AquaLift would conform to Whirlpool’s affirmations and promises.

100. Whirlpool’s express warranty regarding the benefits of AquaLift extends directly to consumers like Plaintiffs and the Class members, who are intended third-party beneficiaries of any contract between Whirlpool and the retailers where Ovens with AquaLift were sold.

101. Whirlpool breached its express warranty by delivering Ovens with AquaLift that, contrary to the terms of the express warranty, could not “self-clean.”

102. Whirlpool’s breach of its express warranty directly and proximately caused damages to Plaintiffs and the Class members.

103. All conditions precedent to this claim, including notice, have been satisfied.

COUNT III

Breach of Implied Warranty of Merchantability (On Behalf of the Class and the Subclasses)

104. Plaintiffs reallege and incorporate by reference each allegation above as though fully set forth herein.

105. Whirlpool is a merchant with respect to kitchen ovens. As such, a warranty that its Ovens with AquaLift were merchantable and was implied in the contract of each sale, including to Plaintiffs and the Class members.

106. In order to be merchantable, Ovens with AquaLift, at a minimum, were required to: (a) pass without objection in the trade under the contract description; (b) be fit for the ordinary purposes for which such goods are used; and (c) conform to the promises or affirmations of fact made on the container.

107. Whirlpool breached the implied warranty on its Ovens with AquaLift because, contrary to Whirlpool's representations, promises, and affirmations of fact, including on each product's label, AquaLift could not "self-clean" heavy baked-on soils from the interior of the Ovens.

108. Indeed, the AquaLift technology in the Ovens could not "self-clean" when such Ovens left the possession of Whirlpool and, as such, could not perform according to Whirlpool's affirmative representations that the system would "self-clean" heavy baked-on soils from the interior of an oven in under one hour.

Therefore, the Ovens with AquaLift were not reasonably fit for their intended, anticipated, or reasonably foreseeable use.

109. Accordingly, the Ovens with AquaLift would not: (a) pass without objection in the trade under the contract description; (b) are not fit for the ordinary purposes for which such goods are used; and (c) do not conform to the promises or affirmations of fact made on the container.

110. Whirlpool's breach of its implied warranty directly and proximately caused damages to Plaintiffs and the Class members.

111. Whirlpool's implied warranty regarding the benefits of AquaLift extends directly to consumers like Plaintiffs and the Class members, who are intended third-party beneficiaries of any contract between Whirlpool and the retailers where The Ovens with AquaLift are sold.

COUNT IV

Violations of the Magnuson-Moss Warranty Act (Implied Warranty) (On Behalf of the Class and Subclasses)

112. Plaintiffs reallege and incorporate by reference each allegation above as though fully set forth herein.

113. Under the MMWA, an "implied warranty" is one that "arise[s] under State law . . . in connection with the sale by a supplier of a consumer product." 15 U.S.C. §2301.

114. Plaintiffs and the Class members are “consumers,” Whirlpool is a “supplier” and “warrantor,” and Ovens with AquaLift are “consumer products” as defined by the MMWA. 15 U.S.C. §2301.

115. Under state law, a warranty that goods shall be merchantable is implied in every contract for the sale of goods by a merchant that deals in such goods.

116. Whirlpool is a merchant with respect to kitchen ovens. As such, a warranty that its Ovens equipped with AquaLift were merchantable was implied in the contract of each sale, including to Plaintiffs and the Class members.

117. In order to be merchantable, the Ovens with AquaLift, at a minimum, were required to: (a) pass without objection in the trade under the contract description; (b) be fit for the ordinary purposes for which such goods are used; and (c) conform to the promises or affirmations of fact made on the container.

118. Whirlpool breached the implied warranty on its Ovens with AquaLift because, contrary to Whirlpool’s representations, promises, and affirmations of fact, including on each product’s label, AquaLift could not “self-clean” the interior of the Ovens.

119. The AquaLift feature on the Ovens was incapable of self-cleaning when such Ovens left the possession of Whirlpool and, as such, could not perform according to Whirlpool’s affirmative representations that the system would “self-clean” heavy baked-on soils from the interior of an oven in under one hour.

Therefore, the Ovens with AquaLift were not reasonably fit for their intended, anticipated, or reasonably foreseeable use.

120. Accordingly, the Ovens (a) would not pass without objection in the trade under the contract description; (b) are not fit for the ordinary purposes for which such goods are used; and (c) do not conform to the promises or affirmations of fact made on the container.

121. As a direct and proximate result of Whirlpool's breach of the implied warranty of merchantability, Plaintiffs and the Class members have been damaged.

COUNT V

Unjust Enrichment (On Behalf of the Class and Subclasses)

122. Plaintiffs reallege and incorporate by reference each of the allegations above as though fully set forth herein.

123. This claim is pled in the alternative.

124. In reliance on Whirlpool's false and misleading advertising campaign for the AquaLift technology, Plaintiffs and the Class members conferred a monetary benefit on Whirlpool.

125. As such, Whirlpool has been unjustly enriched at the expense of Plaintiffs and the Class members.

126. Specifically, through its false and misleading advertising campaign, as alleged more fully herein, Whirlpool has unlawfully received money and other benefits at the expense of Plaintiffs and the Class members.

127. Whirlpool's receipt and retention of this financial benefit is unfair and improper under the circumstances.

128. Therefore, Whirlpool should be ordered to disgorge its ill-gotten gains.

129. Plaintiffs and the Class members have no adequate remedy at law.

COUNT VI

Violation of the Minnesota Prevention of Consumer Fraud Act – Unlawful Practices, Minn. Stat. §325F.68, *et seq.* and Minn. Stat. §8.31, *et seq.* (On Behalf of the Minnesota Subclass)

130. Plaintiffs, the Angerman's, repeat, reallege, and incorporate by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

131. Pursuant to the Minnesota Prevention of Consumer Fraud Act ("MCFA"), the Ovens sold by Whirlpool are merchandise as defined in Minn. Stat. §325F.68 and Whirlpool is a person as defined in Minn. Stat. §325F.68.

132. The MCFA prohibits "[t]he act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale

of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby” (Minn. Stat. §325F.69(1)).

133. Defendant engaged in unlawful practices, misrepresentations, and the concealment, suppression, and omission of material facts with respect to the sale and advertisement of merchandise and/or services in violation of the MCFA in at least the following ways:

(a) Deceptively representing to the Angerman’s and the Minnesota Subclass that the Ovens could “self-clean” when they cannot;

(b) Falsely promising the Ovens could “self-clean” to the Angerman’s and the Minnesota Subclass when the AquaLift Ovens are incapable of “self-cleaning”;

(c) Failing to warn or disclose to consumers, including the Angerman’s and the Minnesota Subclass that the Ovens cannot “self-clean”;

(d) Failing to reveal a material fact – that AquaLift does not function as advertised – the omission of which tends to mislead or deceive consumers, and which fact could not reasonably be known by consumers; and

(e) Making a representation of fact or statement of fact material to the transaction – *i.e.*, that AquaLift has the capability to “self-clean” the inside of a Whirlpool oven in less than one hour – such that a person reasonably believed AquaLift could “self-clean” when it was not capable of self-cleaning.

134. That Plaintiffs, Mr. and Mrs. Angerman, and the Minnesota Subclass believed they were purchasing Ovens that could “self-clean” when they could not, were material facts and would be material to a reasonable person.

135. As a direct and proximate result of Defendant’s violation of the MCFA, the Angermans’s and the Minnesota Subclass have suffered and continue to suffer ascertainable loss in the form of money.

136. Plaintiffs and the Minnesota Subclass seek relief under Minn. Stat. Ann. §8.31, including, but not limited to, damages, injunctive and/or other equitable relief, and attorneys’ fees and costs.

COUNT VII

**Violation of the Minnesota Prevention of Consumer Fraud Act –
False Statement in Advertisement
Minn. Stat. §325F.67, *et seq.*
(On Behalf of the Minnesota Subclass)**

137. Plaintiffs, the Angerman’s, repeat, reallege, and incorporate by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

138. Under the MCFA, the Ovens sold by Whirlpool are merchandise as defined in Minn. Stat. §325F.68 and Whirlpool is a person as defined in Minn. Stat. §325F.68.

139. Whirlpool made materially misleading and deceptive statements to consumers about the “self-cleaning” ability of the Ovens through advertising touting

AquaLift as: (i) “oven cleaning redefined”; (ii) an “innovation nearly 50 years in the making”; and (iii) having an “exclusive coating on the interior [that] activates with water and heat, allowing moisture to release soils from underneath so food and debris easily wipe away.” Also, Whirlpool advertised AquaLift as a self-cleaning feature that could do most, if not all, the work for consumers: (i) “pour two cups of water in the bottom of the oven, and let AquaLift technology do the work”; (ii) “it lifts tough baked-on soils from underneath, making oven cleaning a snap”; (iii) “all done in less time, with no odor, and no extreme heat like traditional, high-temperature self-clean ovens. AquaLift technology is oven cleaning redefined”; and (iv) “at the end of the meal, this large oven’s easy wipe ceramic glass cooktop offers hassle-free cleanup, while AquaLift® self-cleaning technology delivers odor-free oven cleaning without chemicals in only 50 minutes.”

140. This advertising was deceptive and misleading because AquaLift was incapable of “self-cleaning” and performing in the way Whirlpool represented.

141. Whirlpool had superior knowledge and bargaining power in its transactions with consumers and misrepresented AquaLift’s “self-cleaning” ability to induce consumers to purchase the Ovens. These facts are material because reasonable consumers, like Mr. and Mrs. Angerman, would have paid less for their Ovens or would not have purchased them at all if they had known the Ovens could not “self-clean” as Whirlpool advertised.

142. Mr. and Mrs. Angerman and the Minnesota Subclass seek an order requiring Whirlpool to disgorge all ill-gotten gains and provide full restitution of all monies it wrongfully obtained from the Angerman's and the Minnesota Subclass through its false and deceptive advertising of AquaLift.

143. The Angerman's and the Minnesota Subclass also seek an award of damages and attorneys' fees for violations of Minn. Stat. §325F.67 pursuant to Minn. Stat. §8.31, subd. 3a.

COUNT VIII

Violations of the Minnesota Uniform Deceptive Trade Practices Act, Minn. Stat. §325D.43, *et seq.* (On Behalf of Plaintiff and the Class)

144. Plaintiffs, the Angerman's, repeat, reallege, and incorporate by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

145. This claim is brought under the Minnesota Uniform Deceptive Trade Practices Act (the "MDTPA"), Minn. Stat. §325D.43, *et seq.*

146. Whirlpool is a "person" as defined in the MDTPA.

147. Under the MDTPA, a person engages in a deceptive trade practice when in the course of business, vocation, or occupation, the person:

(a) "[R]epresents that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that

a person has a sponsorship, approval, status, affiliation, or connection that the person does not have”;

(b) “[R]epresents that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another”; and

(c) “[A]dvertises goods or services with intent not to sell them as advertised.” (Minn. Stat. §325D.44 (5)(7)(9)).

148. Defendant violated these provisions of the MDTPA by:

(a) Deceptively representing to Mr. and Mrs. Angerman and the Minnesota Subclass that the Ovens could “self-clean” when the Ovens are incapable of self-cleaning;

(b) Falsely advertising the Ovens as “self-cleaning” to Mr. and Mrs. Angerman and the Minnesota Subclass when the Ovens are incapable of “self-cleaning”;

(c) Failing to warn or disclose to consumers, including the Angerman’s and the Minnesota Subclass that the Ovens cannot “self-clean”;

(d) Failing to reveal a material fact – that AquaLift does not function as advertised – the omission of which tends to mislead or deceive consumers, and which fact could not reasonably be known by consumers; and

(e) Making a representation of fact or statement of fact material to the transaction – *i.e.*, that AquaLift has the capability to “self-clean” the inside of a Whirlpool oven in less than one hour – such that a person reasonably believed AquaLift could “self-clean” when it was not capable of self-cleaning.

149. That Plaintiffs, Mr. and Mrs. Angerman, and the Minnesota Subclass believed they were purchasing Ovens that could “self-clean” when they could not were material facts and would be material to a reasonable person.

150. The above unlawful and deceptive acts and practices by Defendant were immoral, unethical, oppressive, and unscrupulous. These acts caused substantial injury to consumers that the consumers could not reasonably avoid; this substantial injury outweighed any benefits to consumers or to competition.

151. As a direct and proximate result of Defendant’s violation of the MDTPA, Plaintiff and the Class have suffered and continue to suffer ascertainable loss in the form of money.

152. Pursuant to Minn. Stat. §325D.45, Plaintiffs seek individually and on behalf of all others similarly situated, all available remedies under law, including, but not limited to, actual damages, injunctive relief, costs, and attorneys’ fees.

COUNT IX

Violations of the Washington Consumer Protection Act, Wash. Rev. Code. Ann. §§19.86.010, *et seq.* (On Behalf of the Washington Subclass)

153. Plaintiff Stockbridge repeats, realleges, and incorporates by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

154. Whirlpool, Plaintiff Stockbridge and the Washington Subclass are “persons” within the meaning of Wash. Rev. Code §19.86.010(2).

155. Whirlpool is engaged in “trade” or “commerce” within the meaning of Wash. Rev. Code §19.86.010(2).

156. The Washington Consumer Protection Act (“WCPA”) makes unlawful “[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce.” Wash. Rev. Code §19.86.020.

157. Over the course of Whirlpool’s business, Whirlpool intentionally or negligently concealed and suppressed material facts concerning the true “self-cleaning” ability of the AquaLift Ovens. Whirlpool knew or should have known that it was deceptively advertising the Ovens as “self-cleaning.” In failing to disclose its deceptive practices, Whirlpool knowingly, intentionally, and/or negligently concealed material facts about the Ovens and breached its duty not to do so.

158. Whirlpool thus violated the WCPA, at a minimum, by: (i) making direct statements or causing reasonable inferences about the Ovens that had the tendency to mislead consumers; (ii) engaging in advertising concerning the Ovens which had the tendency to mislead consumers; and (iii) failing to make clear and conspicuous disclosures of limitations, disclaimers, qualifications, conditions, exclusions or restrictions of the Ovens’ “self-cleaning” ability.

159. Whirlpool compounds the deception by repeatedly asserting to consumers – to the present day – the Ovens can “self-clean” when it knows the Ovens are incapable of doing so.

160. Whirlpool, therefore, intentionally and knowingly misrepresented and continues to misrepresent material facts regarding the Ovens with intent to mislead Plaintiff Stockbridge and the Washington Subclass.

161. Whirlpool knew or should have known that its conduct violated WCPA.

162. Whirlpool was under a duty to Plaintiff Stockbridge and the Washington Subclass to disclose its deceptive advertising practices because Whirlpool was in a superior position to know the true facts about its representations of the Ovens “self-clean” labeling, and Whirlpool failed to disclose the deceptive nature of the labeling to Plaintiff Stockbridge and the Washington Subclass.

163. Whirlpool’s unfair or deceptive acts or practices were likely to, and did in fact, deceive reasonable consumers, including Plaintiff Stockbridge and the

Washington Subclass about the true cleaning efficacy of the Ovens and the true value of the Ovens.

164. Plaintiff Stockbridge and the Washington Subclass suffered ascertainable loss and actual damages as a direct and proximate result of Whirlpool's misrepresentations and its concealment of and failure to disclose material information about the Ovens.

165. Plaintiff Stockbridge and the Washington Subclass who purchased the Ovens either would have paid less for the Ovens or would not have purchased them at all if they had known the Ovens could not "self-clean" as advertised.

166. Whirlpool's violations present a continuing risk to Plaintiffs as well as to the general public. Defendant's unlawful acts and practices complained of herein affect the public interest.

167. Pursuant to Wash. Rev. Code §19.86.090, Plaintiff Stockbridge and the Washington Subclass seek an order enjoining Whirlpool's unfair and/or deceptive acts or practices, damages, punitive damages, and attorneys' fees, costs, and any other just and proper relief available under the WCPA. Because Whirlpool's actions were willful and knowing, damages should be trebled.

COUNT X

Violations of the Georgia Fair Business Practices Act, Ga. Code. Ann. §10-1-390, *et seq.* (On Behalf of the Georgia Subclass)

168. Plaintiff Parker repeats, realleges, and incorporates by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

169. At all relevant times, Plaintiff Stockbridge and the Georgia Subclass are “persons” within the meaning of Ga. Code Ann. §10-1-392(24).

170. The Georgia Fair Business Practices Act (“GFBPA”) declares “[u]nfair or deceptive acts or practices in the conduct of consumer transactions and consumer acts or practices in trade or commerce” to be unlawful, including but not limited to “(i) representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have”; (ii) “[r]epresenting that goods or services are of a particular standard, quality, or grade ... if they are of another”; and (iii) “[a]dvertising goods or services with intent not to sell them as advertised[.]” (Ga. Code. Ann. §10-1-393(b)).

171. Whirlpool violated the GFPBA in the following ways:

(a) Deceptively representing to Plaintiff Parker and the Georgia Subclass that the Ovens could “self-clean” when the Ovens are incapable of self-cleaning;

(b) Falsely advertising the Ovens as “self-cleaning” to Plaintiff Parker and the Georgia Subclass when the Ovens are incapable of “self-cleaning”;

(c) Failing to warn or disclose to consumers, including Plaintiff Parker and the Georgia Subclass that the Ovens cannot “self-clean”;

(d) Failing to reveal a material fact – that AquaLift does not function as advertised – the omission of which tends to mislead or deceive consumers, and which fact could not reasonably be known by consumers; and

(e) Making a representation of fact or statement of fact material to the transaction – *i.e.*, that AquaLift has the capability to “self-clean” the inside of a Whirlpool oven in less than one hour – such that a person reasonably believed AquaLift could “self-clean” when it was not capable of self-cleaning.

172. Whirlpool willfully and knowingly engaged in the deceptive trade practices described above and knew or should have known that these practices were deceptive and in violation of the GFBPA.

173. The facts that Whirlpool misrepresented and concealed were material to the decisions of Plaintiff Parker and the Georgia Subclass to purchase the Ovens. Plaintiff Parker and the Georgia Subclass would not have purchased the Ovens if they had known the Ovens could not self-clean as advertised.

174. Whirlpool intended for Plaintiff Parker and the Georgia Subclass to pay for the Ovens in reliance upon Whirlpool's deceptive and misleading "self-clean" advertising for the Ovens.

175. As a direct and proximate result of Whirlpool's violations of the GFBPA, Plaintiff Parker and the Georgia Subclass have suffered injury-in-fact and/or actual damages.

176. Plaintiff and the Georgia Class are entitled to recover damages and exemplary damages (for intentional violations) per Ga. Code. Ann. §10-1-399(a).

177. Plaintiffs also seek an order enjoining Whirlpool's unfair, unlawful, and/or deceptive practices, and any other just and proper relief available under the GFBPA per Ga. Code. Ann. §10-1-399.

178. On March 24, 2017, Plaintiff Parker sent a letter complying with Ga. Code. Ann. §10-1-399(b). Because Whirlpool failed to remedy its unlawful conduct within the requisite time period, Plaintiff Parker seeks all damages and relief to which Plaintiff Parker and the Georgia Subclass are entitled.

COUNT XI

Violations of the Georgia Uniform Deceptive Trade Practices Act Ga. Code Ann. §10-1-370, et seq. (On Behalf of the Georgia Subclass)

179. Plaintiff Parker repeats, realleges, and incorporates by reference the allegations contained above, other than those made in the preceding Counts, as though fully stated herein.

180. Whirlpool, Plaintiff Parker, and the Georgia Subclass are “persons” within the meaning of Georgia Uniform Deceptive Trade Practices Act (“GUDTPA”), Ga. Code. Ann. §10-1-371(5).

181. Under the GUDTPA, a person engages in a deceptive trade practice when, in the course of his business he:

(a) “Represents that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have”;

(b) “Represents that goods or services are of a particular standard, quality, or grade or that goods are of a particular style or model, if they are of another”;

(c) “Advertises goods or services with intent not to sell them as advertised”; or

(d) “Engages in any other conduct which similarly creates a likelihood of confusion or of misunderstanding.” (Ga. Code Ann. §10-1-372 (5)(7)(9)(12)).

182. Whirlpool violated the GUDTPA in the following ways:

(a) Deceptively representing to Plaintiff Parker and the Georgia Subclass that the Ovens could “self-clean” when the Ovens are incapable of self-cleaning;

(b) Falsely advertising the Ovens as “self-cleaning” to Plaintiff Parker and the Georgia Subclass when the Ovens are incapable of “self-cleaning”;

(c) Failing to warn or disclose to consumers, including Plaintiff Parker and the Georgia Subclass that the Ovens cannot “self-clean;”

(d) Failing to reveal a material fact – that AquaLift does not function as advertised – the omission of which tends to mislead or deceive consumers, and which fact could not reasonably be known by consumers; and

(e) Making a representation of fact or statement of fact material to the transaction – *i.e.*, that AquaLift has the capability to “self-clean” the inside of a Whirlpool oven in less than one hour – such that a person reasonably believed AquaLift could “self-clean” when it was not capable of self-cleaning.

183. Whirlpool willfully and knowingly engaged in the deceptive trade practices described above and knew or should have known that these practices were deceptive and in violation of the GUDTPA.

184. The facts that Whirlpool misrepresented and concealed were material to the decisions of Plaintiff Parker and the Georgia Subclass to purchase the Ovens. Plaintiff Parker and the Georgia Subclass would not have purchased the Ovens if they had known the Ovens could not self-clean as advertised.

185. Whirlpool intended for Plaintiff Parker and the Georgia Subclass to pay for the Ovens in reliance upon Whirlpool's deceptive and misleading "self-clean" advertising for the Ovens.

186. As a direct and proximate result of Whirlpool's violations of the GUDTPA, Plaintiffs and the Georgia Subclass have suffered injury-in-fact and/or actual damage.

187. Plaintiff Parker seeks an order enjoining Whirlpool's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the GUDTPA. (Ga. Code. Ann §10-1-373).

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs respectfully pray for a judgment in their favor and in favor of the Class and Subclasses as follows:

A. Determining that this action is a proper class action, certifying Plaintiffs as Class representatives under Rule 23 of the Federal Rules of Civil Procedure and appointing Robbins Geller Rudman & Dowd LLP as Class Counsel;

B. Awarding temporary, preliminary, and permanent declaratory, injunctive, and other equitable relief, including, but not limited to, enjoining Whirlpool from continuing its false, deceptive, and misleading advertising campaign for AquaLift;

C. Ordering Whirlpool to engage in a corrective advertising campaign;

D. Awarding Plaintiffs and the Class damages, including statutory and punitive damages, and interest thereon;

E. Awarding disgorgement of Whirlpool's revenues to Plaintiffs and the other Class members;

F. Directing Whirlpool to identify, with this Court's supervision, victims of its conduct and to pay them restitution;

G. Awarding Plaintiffs attorneys' fees and costs; and

H. Providing any and all further legal and equitable relief as this Court may deem just and proper.

JURY DEMAND

Plaintiffs respectfully demand trial by jury on all issues so triable.

EXHIBIT 5

Frequently Asked Questions

What is AquaLift™ self-clean technology?

How does it work?

How do I use AquaLift™ self-clean technology?

It takes just a few steps. After removing all racks and accessories from the oven cavity and wiping excess soil up, simply:

Pour 16 ounces (2 cups) for electric range, or 14 ounces (1-3/4 cups) for gas, of filtered or distilled water onto the bottom of an empty AquaLift™ self-clean technology enabled oven and close the door.

Press “Clean” then “Start” to begin the 40 minute cycle. (Cycle time includes cleaning and cool down). When the cycle is complete, a beep will sound. Press “Cancel” to end.

Immediately after the cycle is complete, remove residual water and loosened soils with a sponge or dry cloth.

How is AquaLift™ self-clean technology different?

Oven Cleaning Quick Reference Guide

AquaLift™ Technology is an innovative cleaning solution that is activated with heat and water to release baked-on spills from the oven interior in less than 1 hour. This new cleaning technology is a low-heat, odor-free alternative to traditional self-cleaning options.

STEP 1

REMOVE all racks and accessories from the oven cavity and wipe excess soil. Use the scraper to remove additional easily-removed soils.

STEP 2

POUR 2 cups (16 oz) of distilled or filtered water onto the bottom of the empty oven and close the oven door.

IMPORTANT: Do not use cleansers, chemicals or other additives with the water.

STEP 3

PRESS CLEAN then press START.

Cleaning action loosens baked-on residue from the oven bottom.

Allow 40 minutes for cleaning and cool down. Some condensation will form on the window. When the cleaning cycle is complete, a beep will sound. Press CANCEL to end.

STEP 4

REMOVE the residual water and loosened soils with a sponge or soft dry cloth immediately after the cycle is complete.

Remove remaining soils with a non-scratch scrubbing sponge or plastic scraper.

Additional cleaning cycles may be run to help remove stubborn soils.

STEP 5

CLEAN the oven door and walls to avoid baked-on soil. Refer to the User Instructions for additional information.

IMPORTANT: The use of chemicals, including abrasives and commercial oven cleaners, or metal scouring pads may damage the oven interior.

Use regularly to clean oven spills

For additional information, refer to the User Instructions.

For assistance with AquaLift™ Technology, call 1-877-258-0808, or visit our website at <http://whr.pl/aqualift>.

Helpful Tips

Cleaning Your Ceramic Glass Cooktop

Clean your cooktop after each use with ceramic glass cooktop cleaner and apply with approved cooktop cleaning pads. Scrape off sugary spills while the cooktop is still warm. You may want to wear oven mitts while cleaning the cooktop.

Remove stubborn stains with Cooktop Cleaner, Scraper and Cleaning Pads available in the Cooktop Care Kit (not included).

Do not allow spills and stains to remain on the cooktop over night. Do not clean with steel wool, abrasive powder cleaners, chlorine bleach, rust remover, or ammonia as they will damage the glass. Razor scraper edges will not scratch the glass when used properly at a 45 degree angle to the surface.

Cooktop Glass

The surface cooking area will glow red when an element is on. It may cycle on and off to maintain the selected heat level. Portions of the element may cycle on and off at different times on some elements. This is normal.

The Warm Zone element area will not glow red when cycling on.

Oven Odor

There may be some odors the first few times you use your range. This will go away after the oven is used a few times. To eliminate these odors, it is recommended that you run the Bake cycle at 400°F (204°C) for 30 minutes prior to cooking for the first time.

Oven Preheat Time

The standard time necessary to preheat your oven to 350° (177°C) is 10 to 15 minutes. Factors that have an impact on preheat times are: room temperature, starting oven temperature, and the number of oven racks. Unused oven racks can be removed prior to preheating your oven to reduce the preheat time.

Convection

During convection cooking, the bake, broil and convection elements cycle on and off in intervals to maintain the oven temperature, while the fan circulates the hot air.

If the oven door is opened during convection cooking, the fan will turn off immediately. It will come back on when the oven door is closed.

AquaLift™ Technology Cleaning

Some condensation will form on the oven window during the cleaning cycle. This condensation will evaporate within 30 minutes.

During the AquaLift™ Technology cleaning cycle, some steam will come out of the bottom of the console. This is normal and part of the cleaning cycle.

Make sure that the oven is level to ensure water is evenly distributed on the bottom of the oven cavity. Adjust the leveling feet as instructed in the Installation Instructions.

Remove heavy spills before starting the cleaning cycle. Heavily soiled ovens may require a second cleaning cycle.

For assistance with AquaLift™ Technology, call 1-877-258-0808, or visit our website at <http://whr.pl/aqualift>.

For additional information, refer to the User Instructions.

Frequently Asked Questions

What is AquaLift™ self-clean technology?

How does it work?

How do I use AquaLift™ self-clean technology?

How is AquaLift™ self-clean technology different?

Why was AquaLift™ self-clean technology developed?

This solution was developed to directly address consumer dissatisfaction with traditional high-temperature self-clean ovens and to provide them an alternative cleaning solution.

What are the key benefits of using AquaLift™ self-clean technology?

How often should I use AquaLift™ self-clean technology?

What ovens have AquaLift™ self-clean technology?

EXHIBIT 9

Frequently Asked Questions

What is AquaLift™ self-clean technology?

How does it work?

How do I use AquaLift™ self-clean technology?

How is AquaLift™ self-clean technology different?

Why was AquaLift™ self-clean technology developed?

What are the key benefits of using AquaLift™ self-clean technology?

SAVES TIME: The cleaning process takes under one hour compared to the average 3-6 hours of traditional self-cleaning ovens.

NO ODOR: Since AquaLift™ self-clean technology uses water to clean, it avoids the traditional chemical odors associated with traditional oven cleaning.

LESS HEAT: The oven temperature required for best cleaning is 200° compared to 800° required with traditional self-cleaning options.

How often should I use AquaLift™ self-clean technology?

What ovens have AquaLift™ self-clean technology?

#

2-Level Warm Zone

Keeps food warm until it's ready to serve. Two temperature settings offer increased oven flexibility.

2-Level simmer

Ensures steady simmering of foods such as soups and sauces. Two temperature settings offer increased burner flexibility.

4-Level SheerClean™ Direct Feed Wash System

This feature helps you get sparkling dishes every time. Water is channeled to the back and top of the dishwasher, powerfully cleaning from four different angles. Wash water is also kept clean, helping keep dirty water off your dishes.

4-Way Venting

Increases the number of installation options in the home. Select dryers can be installed with venting out the back, the floor or the sides

6-Point Suspension System

Shock absorbers, springs and electronic controls help redistribute the load automatically and minimize movement of the wash drum during the spin cycle. The result is less noise and vibration for laundry without disruption

6th Sense™ Technology

Whirlpool brand's exclusive package of intuitive technologies that sense and manage what was once beyond your control.

[Back](#)

a

ABS Grind Chamber

Impact -resistant ABS copolymer grind chambers are lightweight yet extraordinarily tough. ABS material is temperature and warp-resistant, with a smooth surface that does not trap particles that can cause odor.

ADA Compliant

Whirlpool® offers several appliances that meet the standards of the Americans with Disabilities Act (ADA).

AccelerCare™ Drying System

This system senses how fast the load is drying, how hot the air should be, and when clothes are dry. It automatically stops the cycle to save time and energy, as well as to prevent fabric damage and shrinking.

Accu-Chill™ Temperature Management System

Exclusive Whirlpool brand 6th Sense™ technology adds built-in sensors to your refrigerator to measure the internal temperature and activate the compressor only when necessary to conserve energy.

AccuBake® temperature management system

Whirlpool® brand's exclusive 6th Sense™ technology uses a sensor to monitor oven temperature to deliver consistent baking, even on multiple racks.

AccuDry™ Drying System

Measures moisture and temperature levels to reduce over drying and automatically stop the cycle when the load is dry. Dryers with the AccuDry™ system use 10% less energy than Whirlpool® dryers equipped with the AutoDry™ system (electric dryers only).

AccuSimmer® burner/element

Produces a gradual, gentle heat that is perfect for melting chocolate or simmering sauces.

AccuSimmer® cycle

Quickly boils liquids, then burner automatically reduces the heat to a delicate simmer to avoid splatters.

AccuWave® power system

Evenly cooks, defrosts, reheats, softens and melts with microwave's constant, gentle heat. Thaw chicken without cooking the edges and reheat sauce without splatters.

Adaptive Wash Cycle

Dual sensors determine the size of the dishwasher's load and the dirtiness of the dishes, then automatically select the appropriate cleaning level and cycle duration to save time and water.

Adaptive Wash Cycle

Up to 11 different adaptive wash actions, from tumbling to cradling, adapt to the cleaning needs of each load. These adaptive wash actions provide a combination of powerful cleaning and gentle fabric care, handling everything from heavily soiled jeans to delicate silks

Add-A-Garment Indicator Light

This light serves as a reminder that you can put clothes in the washer for the first eight minutes of the cycle, and they'll still receive the same effective cleaning.

Adjustable door storage

Gives you the flexibility to store beverages anywhere in the refrigerator door by moving bins where and when you need them. [See also EZ-Tote® door bins.](#)

Adjustable split rack

Remove the oven rack insert to make room for large items like a turkey or attach it to make a full rack. The insert can also be used on the counter as a cooling rack.

Adjustable-time self-cleaning system

Oven allows for adjustment of the self-clean time in 15-minute intervals, according to your needs.

Advanced Vibration Control™

Gap dampers and springs to minimize movement of the wash drum during spin cycle. Plus, enhanced software adjusts load distribution reducing vibration and noise.

Anti-Escape Valve

Prevents detergent from escaping through the drain hose during the wash cycle. More detergent is kept in the wash basket for optimal cleaning performance.

AnyWare™ Plus Silverware Basket

Find space for dishes and pots of all different sizes with a dishwasher basket that can be situated in three different places. Put it on the front of the rack or in the door for 100 percent usable rack space, or use it in the bottom rack for maximum flexibility.

AquaLift® Self-Clean Technology

Get your oven clean in less than an hour with odor-free, low temperature AquaLift® technology. This exclusive coating on the interior activates with water and heat, allowing moisture to detach soils from underneath so food and debris easily wipe away.

Armor Tub Interior

This gray plastic interior is available on select dishwasher models and helps reduce the appearance of stains to keep the unit looking clean longer.

Auto Load Sensing System with Triple Spray Technology (TST)

This washer feature automatically determines the correct water level for the load size, and Triple Spray Technology evenly sprays clean water on your clothes to provide a thorough rinsing.

Auto Soil Sensor

This feature optimizes every cycle for reliable cleaning results. It measures soil in the wash water to determine how dirty dishes are, then adjusts the dishwasher's cycle accordingly. The Auto Soil Sensor recalibrates the load after 250 cycles for maximum performance.

AutoDry™ System

Automatically sense when clothes are dry and stops the cycle to save energy.

Automatic Anti-Jam

The compactor's compression ram automatically reverses to prevent jamming when the door is opened during operation.

Automatic Water Levels

Regulates the amount of water based on the size of the load. Only the amount needed to clean is used, increasing efficiency and helping the environment.

Automatic defrost system

Refrigerators with this system include a timer, a limit switch and a heater that melts away frost so you don't have to take everything out of your freezer to melt built-up ice.

[Back](#)

b

Batch Feed

This feature lets you use the kitchen disposer even if a wall switch isn't available. Closing the auto-start lid will begin operation.

Bridge element

Increases cooking options via a 700-watt bridge that connects two burners' heating elements. Evenly heat large or oblong pans more easily on the cooktop.

[Back](#)

C

CEE Tier III Qualified

Based on the Consortium for Energy Efficiency qualified product listings—with Tier III being the most efficient. These appliances help save resources, and energy, and may qualify for rebates from local utility companies.

CEE Tier III Rated

Based on the Consortium for Energy Efficiency qualified product listings—with Tier III being the most efficient. This model features advanced water & energy savings and may qualify for rebates from local utility companies.

Care Control Temperature Management

Adjusts the cold and hot water inlets to reach temperatures that are warm enough to dissolve detergents. Water is kept from overheating to help reduce shrinking and/or color bleeding.

Clean Boost Deep Clean Options

These options penetrate deep into fabric fibers, breaking down and dissolving stains without pre-treating. Select models add steam enhancement for even better cleaning.

Clean Washer Cycle

Deep-fills the washer to clean area that low-water systems don't typically reach. All it takes is one cup of bleach. Or, for an even deeper clean, use Affresh® Washer Cleaner.

CleanRelease® non-stick interior

Reduces cleanup effort because of the oven's non-stick interior—an industry first. No special cleaning solutions are required.

Clear humidity controlled crisper

Helps you preserve the freshness of your favorite fruits and vegetables with controlled humidity levels in the clear, extra-deep crisper. Select side-by-side refrigerators feature the largest crispers in the industry among leading brands.

Clear temperature controlled meat pan

Helps you preserve the freshness of your meat by allowing cool air from the freezer to enter the meat pan at the level you select.

Continuous-Feed Operation

Our continuous-feed disposer operation means no more jamming, no more waiting. Food is reduced to fine cuttings and whisked down the drain without the need to pause and check for clogging.

Control Bake

This baking mode keeps the broil element turned off, preventing the tops of your food from overcooking, so pies and turkey come out just right.

Control Lock

Disables buttons on the control panel to help prevent unwanted starting or stopping the dishwasher.

Control lock

Disables the range's control panel to avoid unintended use or other changes to your cooking settings.

Convection conversion

Removes the guesswork from preparing your favorite dishes. Automatically converts standard times and temperatures to the convection oven equivalent.

Convertible exhaust hood

Fits flush under the cabinet and slides out easily to vent cooking odors. When no longer needed, slide it back in and out of the way.

Convertible ventilation system

Provides added hood installation flexibility by venting cooking odors outside or recirculating them, depending upon your preference.

Custom Broil

Allows you to set your preferred broiling temperature in 5-degree increments. High heat is best for grilling meats, while low heat is ideal for delicate tasks.

[Back](#)

d

Deep Clean Wash System

Combines two powerful technologies for optimal results. The Anti-escape valve ensures the maximum concentration of detergent is used, while Care Control temperature management keeps wash water warm enough for detergent enzymes to work effectively.

Delay Bake

Lets you program the oven to begin cooking at a pre-set time. Prepare food for baking when it's most convenient for you and have dinner ready according to your schedule.

Delay Wash

Sets the washer to begin cleaning up to 18 hours later, during off-peak hours when utility rates may be lower or when unloading the washer is more convenient.

Direct Inject Wash System

Penetrates stains and pre-treats soils with a concentrated burst of detergent. The wash cycle begins after the entire load has been treated.

Downdraft vent system

Pulls steam, smoke and odors downward and outside to help clear kitchen air. Conveniently built into select cooktops

Dual & Triple radiant elements

Provides the space-saving advantage of having two or three elements in one to handle various sizes of cookware. The inner ring is perfect for slowly simmering stock pots or quickly boiling water in small pans. The larger outer rings evenly distribute heat to large and extra-large pots and pans for better results.

[Back](#)

e

ENERGY STAR® qualified

Meet or exceed government standards to help conserve natural resources and save money on utility bills.

EZ-2-Lift™ Adjustable Upper Rack

Easily accommodates larger items in your dishwasher with an upper rack that adjusts two inches up or down.

EZ-Tote® door bin

Allows you to move condiments or other items directly from the refrigerator door to the table. Built-in handles and multiple placement options for storing the bin keep door storage flexible and convenient.

EZ-View™ lighting

Provides illumination above the range according to your preference with three brightness settings, including a night-light option. Bulbs change out easily when a replacement is needed.

EasyView™ extra-large oven window

Provides better visibility of the oven interior with an extra-large window. Monitor cooking progress without opening the door, keeping oven temperatures steady and undisturbed.

Eco Boost™ Option

This option uses a lower temperature and increases spin speed on select models to provide excellent cleaning and reduce your overall energy use.

Eco Cycle

This cycle provides our dishwashers' most efficient washing. This eco-friendly cycle uses the least amount of energy possible while still delivering exceptional cleaning performance

Eco Monitor

Allows you to see how the cycles and options you choose will affect your overall energy savings in both the washer and the dryer.

Eco Normal Cycle

Conserve resources while doing your laundry. This drying cycle uses up to 40 percent less energy when paired with a Duet® washer compared to a conventional top load pair.

Eco Washer Cycles

Get excellent cleaning performance and use up to 26 percent less energy with the Eco Heavy Duty and Eco Whitest Whites cycles.* *Compared to the regular Heavy Duty and Whitest White cycles.

Energy Save mode

Similar to the sleep mode on a computer, the Energy Save feature uses less energy compared to ranges without Energy Save. It can be activated to turn off the display after 5 minutes of the range not being used. Press any button and the display becomes active again.

Enhanced Touch-Up Steam Cycle

Use steam to reduce wrinkles from a full load of clean, dry fabrics in 20 to 40 minutes.

EvenAir™ Convection

A fan evenly circulates air, providing a consistent oven temperature for uniform browning, even baking and faster roasting.

[Back](#)

f

Fabric Sense™ Wash System

Get customized care and cleaning for your clothes. This feature uses sensors to set the optimal wash temperature, cycle time, and agitation speed for your load.

Family Capacity™ microwave

Uses a sunken turntable and bi-level cooking rack to offer increased flexibility and space for large or multiple dishes. Select racks can accommodate up to four full-size dinner plates.

FanFresh™ Option with Dynamic Venting Technology™

Keep your clean clothes fresh and free from odors for up to ten hours with the exclusive Dynamic Venting Technology™. This feature circulates air in the washer after the cycle ends, allowing you to wash now and dry later

Fast Cool option

The Fast Cool option quickly lowers the refrigerator's temperature at the push of a button. Select Fast Cool after filling your refrigerator with groceries to quickly cool fresh food.

Fast Fill dispensing system

Uses a high-flow water valve to deliver chilled, filtered water from your refrigerator without the wait. Combined with a dispenser area that's 50% larger in size, plus a slide-out tray and rotating faucet, the entire system fills any size container twice as fast as compared to Whirlpool® models without Fast Fill (See also Measured Fill).

Fast Freeze

Drops the freezer's temperature as low as it can go in the shortest amount of time. Activate Fast Freeze just before adding large amounts of unfrozen food.

Fast Ice

Drops the freezer temperature for a full 24 hours to increase ice production by up to 20%.

Fish burner

An elongated central burner that can accommodate oval-shaped pans and other longer cookware. Ideal for cooking large whole fish or other oversized dishes on the range top.

Flex Choice™ Simmer element/burner

This dedicated fifth cooktop burner keeps cooked food warm and frees up other burners for additional meal preparation.

Fresh Hold®

Fresh Hold® option uses a built-in fan and tumbling action to keep clothes fresh. Some models can wash and dry a small load overnight.

Fresh Spin™

An option available in select front load washers that tumbles clothes every 13 minutes for up to six hours after the cycle's end. This helps to help keep wet clothes fresh, even if you don't move them to the dryer right away.

FreshFlow™ air filter

This smart air filter is up to 15 times more effective than baking soda in reducing common food odors. Replace the filter every 6 months for optimal performance.

Full-width, cast-iron grates

Offers a smooth design for easy cleaning by hand or in the dishwasher. The grates cover the entire cooktop surface, creating the flexibility to place pots and pans anywhere, while the smooth satin finish resists wear and tear.

Fully Integrated Electronic Controls

Hidden control panel provides a sleek exterior while preventing unwanted cycle changes or accidental operation.

[Back](#)

g

Glass Xpress™ Cycle

This convenient dishwashing cycle washes glassware or lightly soiled items in just 30 minutes.

[Back](#)

h

Heavy-duty Roller Rack

Heavy duty roll out racks feature full extension glides on ball bearings that slide out smoothly for easy access to large meals.

Hidden bake element

Simplifies cleanup with the bake element hidden beneath the oven floor, leaving a smooth interior surface that is easy to wipe clean.

High-speed coil element

Heats up quickly to provide high temperatures for boiling and frying. Range's chrome drip pans below catch spills for easy cleanup.

Hot surface indicator

Illuminates when the cooktop surface is still hot to the touch—even after the heating element has been turned off.

[Back](#)

i

In-Door-Ice® dispensing system

Moves the Ice Bin inside the freezer door, creating extra space on the top shelf for more of your favorite foods. Store up to 8 more frozen pizzas. Also features a removable ice bucket.

Induction technology

Some ceramic electric cooktops use an electromagnetic current that produces heat when it interacts with iron-based cookware, resulting in faster, more responsive cooking with increased energy savings.

[Back](#)

k

Key Lock

The removable key is required to turn the compactor's start knob - a great choice for households with children.

Kids Menu

Cooks a variety of child-friendly food with preprogrammed microwave cycles that are activated by the simple push of a button. With menu selections like hot dogs and chicken nuggets, children can easily prepare their own pre-game dinners or after-school snacks.

l

LP Convertible

Several ranges, ovens and dryers can be converted from natural gas to a liquid petroleum (propane) fuel source.

[Back](#)

m

MaxWave™ cooking system

Microwave energy is released from multiple points inside the oven cavity. Food is cooked evenly, eliminating cold centers or overdone edges.

Measured Fill

Allows you to select the exact amount of filtered water - in ounces, cups, or liters - that you need. The dispenser will fill the container and automatically shut off when complete. Available as part of the Fast Fill dispensing system on select models.

Melt/Soften cycles

Microwave gently melts foods such as chocolate without cooking (Melt Cycle); gently softens food such as butter without melting (Soften Cycle).

MicroEtch™ spill control shelf

The industry's most shelf space on a single shelf among leading brands! This industry-exclusive innovation gives you 25% more usable shelf space to store 12 more soda cans on each shelf. Removing the frame around each shelf helps create wall-to-wall storage and makes cleaning inside the refrigerator easier than before. Microscopic etching helps prevent leaks from spreading.

Microwave steamer

Works in tandem with the steaming function to conveniently steam foods such as rice, vegetables and fish with fresh, pleasing results.

Modular cooktop

Allows you to customize the cooking surface according to your needs with gas burners, grill modules and griddle modules.

Moisture Sensor Control

Measures the dampness of clothes as they tumble in the dryer. Sensors automatically turn off the cycle when clothes are dry.

Most Used cycle

Saves time by "remembering" and activating your most frequently used microwave Velos® SpeedCook cycle with the simple press of a button.

[Back](#)

NSF® Certified Cycles

Eliminate 99.9 percent of certain household bacteria. The Sanitary cycle on select washers uses an internal heater to bring water to a temperature hot enough to sanitize without bleach.

n

NSF® Certified Sani Rinse Option

Dishwashers with this option eliminate 99.9 percent of food soil bacteria, as certified by NSF International.*

New PUR® water filtration system

Save up to \$600 a year compared to the cost of bottled water. The improved filter design is more compact, easier to replace and reduces 33% more contaminants from your refrigerator's dispensed water.

NightQuiet™ Option

This option uses a lower spin speed to further reduce operational sound to run quieter when you need it. This is a handy option for those whose laundry rooms are located closer to main living areas.

[Back](#)

O

One touch bake and broil

Automatically sets the oven to 350°F when the "Bake" button is pushed and 500°F when the "Broil" button is selected.

Oven Hold Warm/Warm Hold

Uses low heat to keep food warm inside the oven or microwave, so you can keep completed dishes from getting cold while you work on the rest of your meal.

Oxi Dispense Option

Enhances whitening performance with an eco-friendly alternative to bleach. An automatic dispenser distributes the oxygenated additive at the appropriate time, sending oxygen through the load to brighten fabrics.

[Back](#)

p

PUR® water filtration system

Reduces contaminant from household water, giving you chilled, filtered water from your refrigerator for up to 6 months. Filters are easy to reach and replace.

Pop-up downdraft vent

Retracts when not in use. Variable hood speed fans make adjusting the ventilation easy for every situation.

Power Clean™ Wash System

Use five levels of dishwashing power to sweep food particles to a hard-food disposer and self-cleaning filter for exceptional cleaning performance.

PowerScour™ Option

Scour away baked-on foods without soaking or scrubbing. This dishwasher's 36 powerful targeted spray jets will take care of it. You can simultaneously clean a wide variety of items, from casserole dishes to delicate glassware — all without using an additional drop of water.

Power™ burners

Generate the high heat needed for rapid boiling, searing and frying with burners that offer up to 17,000 BTUs.

Precise Clean™ cleaning system

6th Sense™ technology tracks how long it has been since the last self-clean cycle and suggests just the right cycle time, so the oven's self-cleaning cycle only lasts as long as necessary for optimal cleaning. No harsh chemicals or cleaners are required.

Precision Dispense (Plus)

Penetrates stains and pre-treats soils with a concentrated burst of detergent. The wash cycle begins only after the entire load has been treated. Precision Dispense Plus adds the ability to release oxygenated additives for better cleaning performance.

Preheat countdown timer

Keeps track of how long the oven will take to reach the desired baking temperature with a display that counts down the required time or temperature.

[Back](#)

q

Quick Refresh Steam Cycle

Tumbles small loads in the dryer, letting steam technology relax wrinkles and reduce odors. In just 15 minutes, clothes go from lying there to ready-to-wear. Select dryer models allow you to refresh up to 12 garments in one cycle.

Quick Wash Cycle

Clean small, lightly soiled loads in less time. Plus, increased spin speeds extract more water for faster dry times.

Quiet Dry Noise Reduction Systems

Keep operational sounds inside the dryer and out of living areas with sound-absorbing materials around the drum. Escalating levels of sound reduction are available.

Quiet Partner™ Sound Packages I thru V

Keep the peace in your kitchen. Our Quiet Partner™ dishwashers are quieter than many kitchen sounds, such as the pop of microwave popcorn, the buzz of an electric razor, or the sizzle of bacon frying.

Quiet Spin Technology

Ideal for second floor laundry rooms with great out-of-balance performance and vibration control. Quiet Spin Technology's unique suspension system makes it all possible.

Quiet Wash Noise Reduction Systems

Keep operational sounds inside the washer and out of living areas with sound-absorbing materials around the wash basket or drum. Differing insulation combinations are available, from Quiet Wash to Ultra Quiet Wash Plus.

[Back](#)

R

Rapid Boil element

A more powerful radiant element burner brings liquids to a boil more quickly and provides cooking flexibility by accommodating various sizes of cookware.

Rapid Preheat

Preheats the oven 40% faster for electric ranges and 20% faster for gas ranges to achieve a temperature ideal for single rack baking.

Recessed cooktop

Provides a more aesthetically pleasing profile by lowering the level of the grates.

Resource Saver™ Dishwasher

Clean a full load of dishes using 1/3 less water and energy compared to dishwashers manufactured before 2000. This feature provides a thorough cleaning first in the upper rack and then the lower, which reduces the amount of water used overall. These eco-friendly CEE Tier I dishwashers are the most efficient we've ever created.

Resource Saver™ refrigerator

The industry's most efficient refrigerators in their respective classes earn a CEE Tier 3 rating. Each one exceeds federal standards by 30% and uses less energy than a 40-watt or 60-watt light bulb.

[Back](#)

S

Sabbath mode

Overrides the oven's automatic shut-off function, keeping it active for hours of uninterrupted cooking, making it possible to use the oven on the Sabbath without turning it on.

Sani Rinse

Sanitizes dishes by eliminating 99.999% of bacteria. NSF® Certified.

Schott Ceran® eco-friendly ceramic glass cooktop

This eco-friendly cooktop is manufactured without the release of hazardous metals into the Earth.

Sealed burners

Cleans up quickly after cooking is complete. No gap between the cooktop and these burners makes for a smooth surface that's easy to clean.

SheerClean™ Direct Feed Wash System

Get sparkling dishes every time. This smart system channels water up and out of the back and top of the dishwasher to powerfully clean from five different angles. It keeps wash water clean, and no central tower means more space for dishes, pots, and pans.

Smooth Spin™ Technology

Minimizes movement of the wash drum during spin cycles. Reduced noise and vibration are the result, making installation on an upper floor possible.

Speed Wash Cycle

Runs a full dishwasher cycle in just one hour - that's less than half the time of other wash cycles.

SpeedCook technology

Cuts cooking times up to 47% compared to traditional ovens. Microwave technology works with halogen and quartz light energy to grill steaks and bake brownies with real oven results.

SpillGuard™ cooktop

Helps contain messes and makes cleanup easier with the raised-edge design.

SpillGuard™ glass shelf

Helps contain spills and simplifies cleanup, preventing liquids from leaking onto shelves below. Some models feature shelves that are adjustable and slide out, providing easy access to items stored in the back of the refrigerator.

Staged cooking

Allows you to custom program multiple power levels and cooking durations without keeping "watch" over the microwave. Ideal for dishes requiring temperature changes mid-cooking, like frozen entrees.

Stainless Steel Wash Drum/Basket

Resists odors, rust and chipping. The smooth surface helps protect delicate fabrics from snagging during wash cycles.

Steam Technology

Naturally cleans and refreshes clothes. In the washer, steam breaks down and dissolves tough stains without pretreating. With the push of a button, the dryer combines mist with heat to create steam to relax wrinkles and refresh dry clothes.

SteamClean option

Spot cleans the oven floor 9X faster than a traditional self-cleaning cycle* using only 1 1/4 cups of water—no harsh chemicals or cleaners needed. Used periodically to clean light spills on the bottom of the oven, it keeps the oven clean and reduces the need for frequent self-clean cycles.

[Back](#)

t

Tap touch controls

The touch interface brings allows direct access to refrigerator functions and its sleek appearance enhances the appeal of any space.

Temperature management system enabled by 6th Sense™ Technology.

Exclusive Whirlpool brand 6th Sense™ technology in this temperature management system adds built-in sensors to your refrigerator that automatically adjust cooling to return food to the desired temperature in half the time.

TimeSavor™ Plus true convection cooking

Uses a fan plus a third heating element in the back of the oven to distribute hot air more efficiently to seal in flavor and juices. Cut roasting time compared to traditional thermal-bake ovens.

TimeSavor™ convection cooking

Uses a fan in the back of the oven to distribute hot air more efficiently to seal in flavor and juices.

Triple Spray Technology (TST)

Automatically determines the correct water level for the load size in the washer. TST evenly sprays clean water on the load, providing outstanding rinsing effectiveness.

TruCapture® ventilation system

Hood's system removes cooktop smoke, steam and odors from the front two burners with a powerful 4-speed fan and unique, sloped design that vents out the top instead of the front of the unit. Whirlpool brand's most efficient ventilation system.

TumbleFresh™ Option

Activates after the wash cycle is finished and rolls clean clothes periodically to help prevent wrinkles from setting in. Clothes stay fresh without having to transfer them to the dryer immediately.

[Back](#)

W

Warm Zone element

Prevents food from cooling while the rest of the meal is being prepared. This burner's low-powered (20–100 watt) fifth element provides added flexibility and convenience.

White LED lighting

This lighting system found in select Whirlpool Gold® models casts a more natural light on the contents of your refrigerator so food looks as it should instead of reflecting the blue hues found in other lighting systems.

Whitest Whites Cycle

Raises water temperatures and releases bleach or an oxygen-based cleaner at the optimal moment to enhance whitening performance. Featured on washers with an automatic bleach and/or Oxi dispenser.

Wrinkle Shield™ Plus Option (up to 140 Minutes)

Tumble your clothes every five minutes after the dryer cycle is complete to help prevent wrinkles from setting into clean, dry fabrics.

[Back](#)

X

Xtra Roll Action™ Plus Agitator

This feature lets you double your wash load. The Xtra Roll Action™ Plus Agitator ensures all laundry is rolled to the bottom of the wash basket where cleaning takes place, effectively cleaning twice the average load size as a standard agitator.

[Back](#)

y

Y-connector

The industry's first direct water installation method connects Whirlpool brand steam dryers to the washer inlet hose. There's no need to add water manually before starting a steam cycle.

6.4 Cu. Ft. Freestanding Electric Range with AquaLift® Self-Cleaning Technology

4.4

541 Reviews

BASE MSRP
\$949.00

Whether it's dinner for two or a family of four or more, our largest capacity freestanding electric range has the space and performance you need to cook all of your favorites. With 6.4 cu. ft. and fan convection cooking, you'll be able to bake on any rack with flavorful results. The counter depth range's cooktop features multiple FlexHeat™ dual radiant elements that expand to match the size of the pan you're using and a Warm Zone radiant element to keep completed dishes warm. At the end of the meal, this large oven's easy wipe ceramic glass cooktop offers hassle-free cleanup, while AquaLift® self-cleaning technology delivers odor-free oven cleaning without chemicals in only 50 minutes¹.

AVAILABLE COLOR OPTIONS

Black-On-Stainless - WFE540H0ES

FEATURES

5.8 cu. ft. Front-Control Gas Stove with Fan Convection

4.4

295 Reviews

BASE MSRP
\$1,749.00

Leave unnecessary meal prep behind with the 5.8 cu. ft. Front Control gas stove that fits your kitchen and delivers delicious results. Fan convection cooking helps you cook tastier roasts and bake bread with just the right texture in less time than non-convection ovens. You'll be able to skip the preheat and cook frozen favorites faster in this 5-burner gas stove with Frozen Bake™ technology. And thanks to the FIT system, it's easy to upgrade to a full-depth slide-in range made to fit in your existing kitchen cutout. When it's time for cleanup, AquaLift™ self-cleaning technology helps you wipe away messes in your slide-in gas stove without harsh chemicals or odors.

AVAILABLE COLOR OPTIONS

Stainless Steel - WEG730H0DS

FEATURES

Top Features

5.8 Cu. Ft. Capacity

The 5.8 cu. ft. oven has room to bake and roast holiday dishes, so there's always enough space to handle even your largest meals.

Frozen Bake™ Technology

Frozen Bake™ technology cooks frozen foods faster² by eliminating the need to preheat the oven. Just select the food type, temperature and cook time listed on the frozen item's package and the oven will start customizing. Now you can cook frozen pizza 31% faster¹, and even lasagna, chicken nuggets, fries and pies can get from the oven to the table in less time.

Full-Depth Front-Control Range with the FIT System

Upgrade to a full-depth front-control range that fits seamlessly in your kitchen without the hassle of remodeling thanks to the FIT system.

Additional Features

Fan Convection Cooking

With fan convection cooking, a fan in the back of the oven distributes hot air more efficiently to seal in flavors and juices. Now you can cook tastier roasts and bake bread with just the right texture and flavor.

AccuBake® Temperature Management System

The AccuBake® temperature management system's built-in sensor monitors oven temperature and the cooking elements to deliver consistent, delicious results every time.

AquaLift® Self-Cleaning Technology

Get odor-free cleaning without harsh chemicals in only 50 minutes. AquaLift® self-cleaning technology uses only water and low heat to help remove baked-on foods from the bottom of the oven.

SpeedHeat™ Burner

Generate the high heat needed for rapid boiling, searing and frying with burners that offer 15,000 or 17,000 BTUs.

Rapid Preheat

Put dinner on the table faster with Rapid Preheat, which uses the bake and broil elements to heat the oven quickly and efficiently. Ideal for single rack baking, this option saves time with 21% faster preheating.

Full-Width, Satin-Finish Cast-Iron Grates

Cast-iron grates cover the whole cooking surface, giving you the flexibility to place pots and pans anywhere on the cooktop. The grates are dishwasher safe, and their satin finish resists wear and tear.

My Advanced New Self-Cleaning Oven Needs A Lot Of Help To Clean Itself

By [Laura Northrup](#) February 8, 2013

In for more cleaning.

Susan's new Kitchenaid gas range is pretty nice, but she writes that exciting advancements in self-cleaning oven technology aren't all they're cracked up to be. Whirlpool's [Aqualift](#) self-

cleaning system seemed to be a technological advance comparable to [see-through dishwashers](#), but she reports that her oven only cleans the bottom center, and not the sides or the corners. You know, the parts that you want your self-cleaning oven to take care of for you.

Update: [Sears saved the day!](#)

She writes:

I have a 30 day old Kitchen Aid convection gas range. Love how it cooks.

HOWEVER, their “Aqualift” cleaning technology is a rip AND entirely misleading.

If you think you’re getting a cool new oven with cool new cleaning technology, THINK AGAIN!

It does a lovely job of cleaning the bottom center of the oven, But NO cleaning around the perimeter OR the side walls.

So... every time you want to clean your cool new oven, you’ll be scrubbing it yourself!!!

DON'T PANIC!

We are currently testing a new commenting system. Want to help? Request an invite.

We asked Susan to send along some photos, and she obliged.

The attached photos show the interior of the oven, which went from clean/new to this after cooking 1 time at a high temperature (chicken) – and AFTER 2 cleaning cycles.

Whirlpool/Kitchen Aid advised using their cleaning product, “Affresh”. It took me 1/2 hour to rub out about 5 inches of stain using that product.

Unbelievable that my ancient Whirlpool bottom-of-the-line oven, with the old high temp cleaning system, required only a damp cloth wipe afterwards, and went to the recycling dump cleaner than my new oven is today!

That’s very sad, especially if the oven cooks beautifully. The whole point of self-cleaning ovens was supposed to be that we wouldn’t have to spray stuff inside and spend hours scrubbing. If it’s any comfort, **appliances don’t seem to last very long these days**, so Susan will be shopping for a new range before she even knows it!

The oven pan is cheaply made. Horrible surface. Not easy to clean. Circular with 1" lip is fine. Wire thing fits inside fine. The pan itself is tarnished and may rust out over time. Should be able to make cookies on it but it is in too poor a shape.

The knobs on this range are made plastic on metal posts. The first knob wore and broke within the first year of using the range. The ceramic top range is slow to heat and then superheats once cooking begins. The oven temps are way variable and cooking times are way off from recipes. I have ordered two new knobs at the cost of almost \$40 and I know that the other two should be replaced as they will break any day. I use my range nearly every day and thought that KitchenAid was a good brand when I bought it. I am sorry to say that I do not recommend that anyone buy this brand right now. Maybe they will improve but I think that they are making their money on replacement parts.

We have had this range for 6 years. If you check the service calls, 3 have been for the oven not reaching maximum temperature. Each service call is close to or more than \$200.00. The temperature works for a while and then returns to 259 degrees. Never been fixed properly. Now we have an error F2E1, service call \$125.00. The repairman said we have an error F2E1 and we would have to order a new keyboard. Really \$125.00 to tell us what we already knew. Now, to make matters worse he said this part, estimated cost \$500.00, may not correct the problem and further work/parts would be needed and he wouldn't know until he tried the new part. The most frustrating part is he said the keyboard part could not be returned if further work was necessary thus increasing the price and that couldn't be determined until he started the work! So, we have decided to buy a new gas range and a new fridge and obviously neither one will be a KitchenAid.

I have purchased KitchenAid stove the latest model and the top glass cracked within 6 Month of the purchase and I have called KitchenAid and they told me that they will not cover the cooktop. I am not sure what the warranty is for. We do have a lot issues with Kitchen product in the house. I would recommend that do not buy kitchenAid products as the products are expensive and issues with quality and reliability.

We bought a new KitchenAid gas range Model in 2014. The model# is KGRS505XSS. Within 1 year, one knob got stuck in off position. We had to pay \$150 to service appliance person to get that fixed. Then

(<https://www.consumeraffairs.com/>)

less 1 year later a different knob has been stuck in off position. This is completely random and happens when we're not even operating [Menu](#) ▶ knob. An amateur layperson cannot fix it. For the 30 years that we have been owning other gas ranges and operating it in similar home type situations, this has never happened to us. This KitchenAid unit is defective OR this could be a basic design flaw. Beware of this type of problem and do NOT buy KitchenAid for this reason.

Buyer Beware! My partner and I bought a \$6,000 KitchenAid 36-inch dual-fuel range about 12 years ago. Since then, the oven has failed three times, the last time for good. When I called the manager of the expensive appliance store where we bought it, Cocoplum, in Essex Junction, VT, he told me that we had "a lemon" and went on to say that the company was no longer any good.

The problem, according to him, is that the high temperatures of the self-cleaning oven (which we have not used often) "do not play well" with the complex electronics of the stove. Bottom line: after 12 years, we have had to plunk down \$7,000 for a new stove, this time a Thermador with gas only. There is a class-action lawsuit being brought against the company in New York, and other reviews online confirm our expensive bad experience.

This is probably the worst oven I've ever had. It take 20 minutes for it to heat up to 425 degrees and just as long for any other temp. The noise it makes is annoying. Why they put the fan in the oven is beyond me. I wish I was told that it was noisy and slow! It gets hotter as you bake also. I would not buy another one.

Provided by contractor - 6 burner stove top, large oven. Gas range, electric oven - the preferred method of most cooks - at least the ones that are getting up there in age! Great size oven so when whole family gets together - over 20 and adding - it is big enough to accommodate all dishes - top with 6 burners is big enough to let 2 people cook comfortably - the more the merrier!

Kitchenaid Gas free standing range. I always thought Kitchenaid was a dependable brand. I believe this range cost us \$1700. I liked the [Menu](#) > had convection oven and that the grates on top covered the entire top so no matter what size pan or griddle you used it did not wobble. This range turned out to be the worst range I have ever owned! The repair man knew us by name including our dogs! The other terrible thing about it is we had to order this range and had to pay in advance of receiving it. Purchased at Westar in Tucson Arizona. The range did not come in for 5!!! Months.

AND to make matters worse our warranty started from the day we ordered it! Kitchenaid policy! I went on facebook and wished I had done that before the purchase because there were literally hundreds and hundreds of complaints. When I suggested we all get together and start a class action law suit Kitchenaid blocked me from posting on their wall. I will NEVER buy a Kitchenaid again. My advice would be stay away from Kitchenaid. They are not what they used to be. You pay alot of money for nothing!

I now research completely before I buy any appliances. I take my time, I ask around. Sometimes the less expensive brands are 100% better. It took so long to get this range that after my complaining weekly (because every week they said it would be in that week) they finally gave me a GE use in the meantime since I had NO range. The GE they loaned me was a \$700 range but after finally getting the Kitchenaid I realized the GE ran circles around the KA.

Brenda of Oakland, CA on
March 11, 2016

Satisfaction Rating

I bought this range during a kitchen remodel some months ago. While it is a good-looking range, it is dangerously easy to turn the knobs on without noticing. If you lean against the knobs, I'd even say brush up against them, they turn on with no flame, and you end up with gas escaping until somebody smells it. My spouse has no sense of smell, so it's usually me that notices. I'd say this happens weekly at least. (You also have to be very careful not to lean on the control panel on the top of the stove, as that will turn on the ovens.) Overall, as I said, a nice looking range but this is a design flaw that so far KitchenAid have refused to acknowledge. When I contacted them about it, they told me I could buy bushings to prevent this happening - so why do they sell bushings if they don't think it's a problem? Very disappointed.

Bought a kitchen high end gas double over stove and refrigerator. Thought it was best. Boy was I wrong. Was 4 years ago November, first the paint on bottom oven started to crack and peel. Call CS and was offered a 700 to go toward a new one which I paid 2500 for in the first place. Since then the top oven doesn't always work and when opening the top oven door it falls off. We are older so it's not been abused. Still looks new but junk. Going to go with LG or Samsung next. I am done with anything KitchenAid. They do NOT stand by their product at all.

Stove - YKERS303BSSO: The coating on the control panel is peeling and the lettering is part of this coating, this is going to affect the readability of the knobs in future if we cannot get this resolved. Since we bought this stove in June 2014 should be a warranty on this type of thing happening? We always use only mild dish soap and a soft cloth to clean it. Sent an email to

(https://media.consumeraffairs.com/files/rstoves-ovens_55262.jpg)

<http://www.whirlpoolappliances.ca> twice, second time included photos was told both times, that they recommend calling into their Customer Service Department at 1-800-807-6777 to have this issue resolved. They'll probably tell us to change the control panel, which will probably cost 1/3 of what a brand new stove would cost. Also, the oven inside window has water/steam stains, how do we get them clean?

Apparently when you buy KitchenAid top of the line range (KDRU783VSS), it does not have the auto shut off baking function. It just basically alerts you when the time is up like the timer. Does turn on when delay time is used, but you have to manually shut it off. What a crock. I'm glad Whirlpool bought them out. Maybe they will terminate KitchenAid. They used to be good. Nothing but crap now. I'm sure to leave a review. Also bought the french door fridge and it would throw ice around your glass and end up on the floor. We got a replacement and it did the same thing. We finally had to upgrade so it would stop doing that. Now I can't get the water filter to reset on the new one. We bought the whole kitchen including microwave and dishwasher. So far the last two are doing fine. Stay away from kitchen-headache!! Buy something else. Anything else.

KitchenAid freestanding induction range model KIRS608bss, purchased new, 4/12/13 3 months later the oven stopped working. I bake a lot so I knew when my baked products were taking 20 minutes longer than normal. I called for service and the first 2 times the tech literally said that all oven temperatures vary, this is to be expected! By the 3 call my oven started blinking message across the stovetop panel. They finally replace the computer system and told me I no longer had a warranty. At

https://media.consumeraffairs.com/files/rstoves-ovens_53657.jpg

(<https://www.consumeraffairs.com/>)

this point my range was 4 months old.. This same model although the oven is working the cleaning part is not. I have tried multiple time but the water does not get hot enough or steam long enough to clean the oven.

(https://media.consumeraffairs.com/files/ranges-stoves-ovens_53660.jpg) [Menu](#) ▶

To make matters worse, the front glass panel has so many grease stains in between the two glass panels that I'm embarrassed to have people in my kitchen as it appears I have never cleaned the glass.. I was told the only way it can be cleaned is to remove the screws and bolts inside, clean the inside of the panels then replace. The technician also said it's a waste of time as those streaks will come back the first time you use your oven and each time you remove the screws the tightness of the door panel loosens and heat will escape..

We have a Kitchenaid Superba stove and oven model KGRT607HWH6. It was in our house when we moved in 2004. It has a glass backsplash. Three years ago the backsplash exploded with my 10 year old twin sons and a teenage friend and myself standing within three feet of it. We are lucky we were not hurt. I think the pots cooking on the stove may have been touching the backsplash and it just got too hot. But, what a stupid design for a stove top! The repairman did order a new backsplash for \$100. For years I would find tiny pieces of glass stuck in corners and crevices in my kitchen. I guess I should be ashamed to admit it, but I have never used the self-cleaning feature and the oven is quite dirty. I started to look for instructions on-line, but, after reading all the complaints I am scared to try the self-cleaning feature. The instructions say to not use a commercial product. Not sure what I should do.

(<https://www.consumeraffairs.com/>)

We have had our KitchenAid KGRS505X oven for less than 3 years and it has broken down twice. First time only after a month which **Messu** > under warranty. The 2nd was a couple weeks shy of three years. It is costing us \$300 for a one year service warranty so we can get it repaired. Reasonable expectation for an oven of this cost would be 10 years of trouble-free service. So, at this rate I will have purchased this appliance twice in the expected 15 years of service. I can't tell you how much I regret buying this piece of garbage.

Under no circumstances would I purchase the K-A double wall oven. Woe and pity to those reviewers who are stuck with one of these. I purchased the first one back in 2001, very excited about the great features. Within 3 years, the self-cleaning program failed 3 times, the entire motherboard once... Glad I bought the extended warranty. I had to argue with K-A/Whirlpool to finally get a replacement that supposedly had the bugs fixed. Not so; the self-cleaning cycle again twice blew out the entire oven(s). What was I offered this time? A percentage of my original purchase price to be used toward another of the same model? Why on earth would I pay for or even want another of the same failing product?

After several repairs for the same issue, K-A told me they would no longer fix the ovens if the self-cleaning problem happened again. So, for the past 5 years, I have resorted to the old cleaning method (for fear of blowing the units). Now I am in the process of a kitchen remodel. Believe it or not, most of the retailers are recommending Kitchen-Aid, how dare they? I have investigated many brands of medium to high end quality and price. I recommend the GE Profile or Cafe series for both performance, worry free use and fair pricing. (NO, I do not work for GE!) FYI- The K-A tech told me the company has known about the self-cleaning blowout for years. Cheaper to fix on warranty or charge the customer that correct the problem! Let the buyer beware!

Consumer Increased Rating!

(https://media.consumeraffairs.com/files/reviews/kitchenaid-stoves-ovens_51371.JPG)

KitchenAid (Maytag) came through for me on the third range delivered. For the record, the first range was defective, probably the thermostat, and the second range was dented so that the gas line could not connect. I'm happy now with a working range, and it's a terrific range.

Morgana of Nevada City, CA on Jan. 2, 2016

Original Review

I hate to write a poor review, and I hope that later I'll be able to update this to a more positive review. I ordered a KitchenAid gas range, KSGG700ESS on December 21, 2014. I have natural gas. My range was delivered on 12/21 and at first I was thrilled. The stove burners were marvelous, the grates across the top heavy and perfect. The stove top was easy to clean. The installation guys were great. But, the oven never heated above 190 degrees and my kitchen smelled like gas. I called Home Depot, and KitchenAid said that they would deliver another stove.

A week went by without a delivery date for the stove replacement so I started phoning Home Depot. After 3 days of nagging I had a new delivery date: January 2, 2016. When the new stove was installed, these installers were a different crew, and their attitude was very negative. I asked them to wait while the oven was tested, and they gave me excuses and left. The new oven wouldn't even light, and again I smelled gas. By this time I was thinking that it wasn't the stove but something at my place. Researching online brought up a Kitchenaid repair manual for self-igniting stoves, so my husband and I went through the procedures for testing, step-by-step.

(<https://www.consumeraffairs.com/>)

We pulled out the stove and checked our valve. We checked the polarity of the outlet. We removed the oven base plate and used a handheld lighter to try to light the gas in case the issue was air in the lines. Finally we used a flashlight to look under the stove where the stove port connects to our gas port. There, we found the problem. The area was dented, and the ports could not, could never, connect. We had noticed that with this second range the bottom drawer was higher on one side than the other. The entire frame of this second range is twisted. So back I go through Home Depot to request a replacement for the replacement range. This time Kitchen Aid was less accommodating, stating that the problem MUST lie with us. Home Depot's hands are tied until KitchenAid makes some decision or arrangement. I'm waiting for a resolution on this issue.

KitchenAid double wall ovens/ WALL OVEN- ELE BI 30 - My LOWER oven (the one not used except on holidays) went out on me on CHRISTMAS as I'm cooking a prime rib (at 500 degrees). The ovens have only been installed for a year! Got an error message asking for probe temperature. Wasn't using the probe although I do have the ability to use it. Checked the manual and found I did everything right.

I then ended up with an under cooked prime rib for 13 guests. Thanks for that! Then I tried to clean the damned thing since it hadn't cleaned well after Thanksgiving (I usually try to do this when we are in bed because the fumes are so awful). Guess I know why it didn't clean! This time after waiting till everyone left, I opened the windows (glad it's a warm December) and the oven wouldn't clean. Got an ERROR message this time of "E3F3". Heck if I know what it means. They were able to schedule a service appointment quickly but if they have to order parts, then I have to have another service appointment.

All I know is, I've got an oven that doesn't work during the holidays (I'm cooking for NY Day too). I called the extended warranty number and sat on hold for 42 minutes. THIS AFTER HAVING SPENT NEARLY 2 MONTHS TRYING TO GET MY BUILT IN KITCHEN AID DISHWASHER FIXED THAT HAS ONLY BEEN IN USE FOR 6 MONTHS! It needed an entire new drum. Nice since it already damaged my NEW cabinets and NEW floor in my NEW kitchen. No

(<https://www.consumeraffairs.com/>)

offer to fix the damage they caused even though they finally fixed the dishwasher. KitchenAid used to be really good appliances. NOT MORE. I will avoid them in the future!

The KitchenAid Double Oven KODE500ESS is advertised as an Even Heat True Convection with Even Heat Preheat. The machine is attractive with its huge viewing windows, it's highly polished finish, its commercial style handles, and blue enamel interiors. The electronics are elaborate. You are able to adjust almost every function of the oven should you wish to so, down to alarm sound loudness, and calibrating the oven without a technician nearby.

However, this oven is not without fundamental flaws. The engineering is deficient in crucial areas: the temperature sensors are located near the top broiler unit, a unit which is used in the preheat cycle resulting in unreliable preheat readings; the heat release vent is located at the top near the electronics components, which could be affected by the extreme temperatures, such as those used in the cleaning cycle, ultimately causing an oven computer crash.

We chose this oven based on the many positive reviews and have had the oven for 6 months. Even after talking with KitchenAid representatives and two repairmen, we have yet to feel comfortable with the ovens ability to function properly. First, the preheat operation is worthless due to the location of the sensor. When the preheated indicator sounds after 8-10 minutes, the oven is probably 20-30 minutes away from the achieving the desired heat, should it ever be attained.

Second, the highly emphasized Even Heat claim is questionable. Once attained, the temperature can, by design, fluctuate. This we understand and have no problem with fluctuations, unless the variations are large. We have experienced 50-degree swings. We have agonized with uneven cooking in many directions: dishes done on the sides, unfinished in the middle; dishes browned on one corner, not on the others; when two dishes in same oven baked at same temperature, both requiring same number of minutes, one will be done before the other. The repairmen state there is nothing they can do to fix these problems.

(<https://www.consumeraffairs.com/>)

This is not a baker's oven. It is not even a novice's oven. It certainly is not as functional as our previous ones. It is unreliable, untrustworthy [Menu >](#) and we wish this one were not ours. If KitchenAid planned to put an extremely inferior product on the market prematurely at an exorbitant price, they have exceeded their expectations.

Helpful? Yes No

Andria of Itasca, IL on Dec. 27, 2015

Satisfaction Rating

So I will start out by saying that I did not read the negative reviews before purchase. This was not my first oven purchase and should have done more homework. The all the positives were so POSITIVE! So, that being said, my oven is about 6 weeks old. Yesterday for the first time, I tried out the self-cleaning feature. It ran well for a few hours then completely went out. Nothing. I tried everything with the power and fuses but nothing. I have been trying to get someone to help me but I can't reach anyone. Sears repair won't touch it. I will call again on Monday to KitchenAid again.

But seeing all of these poor reviews it is making me very nervous. I will have to say that this is a piece of junk. The glass on the inside is stained and gross. I will update this complaint again after KitchenAid gets back to me. But this is crazy. If consumer affairs knew about this problem with the fan and cleaning cycle, why is are they allowed to sell this crap? Class action, I want in. Should have never purchased a KitchenAid.

My KitchenAid oven sucks! This is now the 3rd time I have a problem with the self-cleaning "upgrade" in my oven. The thermostat fails with the heat of self-cleaning. This time, however, the main keypad is fried. Almost \$500 just for the part, not counting labor and install. Thanks, KitchenAid, for delivering a product that is only successful in earning you more money! I could not be any more disappointed in their complete lack of responsibility in standing behind a product for which they make so much money. Brand new two years ago, and I continue to have mounting expenses for an appliance that was touted as being wonderful.

Helpful? Yes No

christine of Show Low, AZ on
Dec. 11, 2015

Satisfaction Rating

I have always owned KitchenAid appliances. We thought they were the very best. I purchased a new stainless steel electric oven. The first time I cleaned it a fuse was blown. The oven has to be removed from the wall to fix it. I then realized that every time I used the self-cleaning it would blow the same fuse. After about 6 times I asked the repair man what could be causing this to blow and he said, "I see this all the time so don't use your self-cleaning and it won't happen." Why buy self-cleaning if you cannot use it?

So I used it again before Thanksgiving and another repair man from another company came out and had to order the fuse so no oven for Thanksgiving. I told him something must be causing the fuse to blow with the extreme heat cleaning the oven. He told me the same thing the other repairman said, "Don't clean it." I have owned a double KitchenAid oven in the past that was wonderful and never had a

(<https://www.consumeraffairs.com/>)

problem. My other appliances are KitchenAid but after paying all this money for what I thought was one of the best I will never buy KitchenAid again. [Menu](#) ▶

I have had this stove for 5 years. It is "stainless steel" but the top griddle area has all rusted! Also, when I used the self clean program it fried the entire control panel which was expensive to replace even under warranty as they did not cover the service charge and it took 2 months to receive the part. I had a repeat of this problem again, so the panel needed to be replaced. I now have to "steam clean" my oven which does not work effectively! Also, measuring the oven temperature is NEVER close to the temperature on the display panel. I would never buy another KitchenAid stove again. The fan is very loud as well. I use my microwave as my oven instead of using this stove. Expensive and poor quality!

We bought our oven in 2008 and paid about \$1500. Immediately noticed that every time we'd cook it would smoke furiously. Called the place we bought it from and were shunted back and forth between sales and repair people. Then we noticed that it was getting dirty - like super filthy with thick residue everywhere that could not be scrubbed, so decided to use the self-clean setting. I left the house and returned an hour later and the entire house was covered in smoke. Dog was literally choking, and cat had holed up in the basement. Had to open every door and window to ventilate. Called the place, we bought it and got the same run-around.

We're not a wealthy family so this oven has been our ONLY oven since we purchased it and it's a daily battle. The door has fallen off, the board has been compromised, the stove top is awful to clean and can't keep an even temperature. Every time we use the oven we end

(<https://www.consumeraffairs.com/>)

up having to open the doors and windows. Total nightmare. Surprised no one has sued KitchenAid since it's apparent they're aware of these issues. Read the reviews online and realized that this was a thing with KitchenAid ovens in particular.

KDRS483VSS - DO NOT BUY KITCHENAID RANGES!! They don't know how to repair them and their policy is not to replace them but to repair them. I am talking about an \$8000 dual fuel range that I have waited years to purchase only to find out that once it was delivered the only thing working properly was the gas top. This is a very classy looking expensive piece of JUNK metal. The hinges on the

(https://media.consumeraffairs.com/files/ranges-stoves-ovens_46038.jpg)

large oven don't pull the door closed enough to turn off the oven light and you have to press the door in to turn light off. I now have no working ovens at all and this was through the Thanksgiving Holidays. No one cared!!! The oven shows several error codes and now just does nothing. I thought that KitchenAid was a reputable company but that is not the case. This is a known problem with these units. After many complaints still no results!!

Very Poor Aqua Clean on new Kitchen Aid KSGB900ESS oven. Used the oven to cook a cheesecake. Some loss of

(<https://www.consumeraffairs.com/>)

liquid resulted in the bottom of the oven. Used the aqua clean 3x, (very poor results). Ran the oven to 500 deg for 2 hours and then Aqua clean 3x. No change in cleaning results. Bar keeper's friend used and still not cleaned off. I used all the OEM cleaning scrapers and scrubbers that came with the new oven and the recommended practices in the ops manual, without any luck. It looks like the Aqua clean might be effective on something very soft, but not with normal burnt on material. Submitted a note to KitchenAid service to see what they have to say.

Phil of Huffman, TX on Nov. 25, 2015

Satisfaction Rating

On Nov 18, 2015, repair person finally showed up with the part to fix the oven. Had to replace entire display module. Based on our experience with the oven, we are hoping we do not experience the same issues with the KitchenAid microwave and dishwasher that we had installed at the same time as the oven.

Phil of Huffman, TX on Nov. 14, 2015

Original Review

We had a new KitchenAid double oven model KODE500ESS installed on Oct 22, 2015. On Nov. 3, 2015, the unit quit working with a display error message. Called KitchenAid and scheduled repair to be done on Nov. 6, 2015 but when the repair person arrived, said part had to be ordered and would be back on Nov. 13, 2015. Then on Nov. 12, 2015, we were told that the part had to come from the factory. And the repair company had no way of tracking a part that came from the factory and could not tell us when they would be back to repair. At this point, we have a new KitchenAid piece of junk that has been out of service for a long period than it has been in service.

(<https://www.consumeraffairs.com/>)

If KitchenAid really cared about their customers, they would have replaced the complete oven by now and not dragged this [Menu](#) on for so long.

Expert Review

ConsumerAffairs
Research Team

The ConsumerAffairs Research Team believes everyone deserves to make smart decisions. We aim to provide readers with the

most up-to-date information available about today's consumer products and services.

KitchenAid has been an iconic name in household appliances since its founding in 1919 and the introduction of its flagship automatic mixer. It began producing cooking appliances in 1985.

Product selection: KitchenAid's line of cooking appliances is one of the largest in the industry, giving buyers a wealth of choices.

Freestanding options: KitchenAid's selection of freestanding appliances provides an array of options for buyers designing cooking islands and other non-traditional kitchen layouts.

Heating options: KitchenAid maintains one of the industry's largest selections of options for heating technologies.

Robust support: The company's online support options are easy to access and provide a wealth of information and replacement parts.

Traditional quality: KitchenAid's maintains that its tried-and-true quality is attributed to its long experience in the industry. The brand frequently eschews technology-driven special features in favor of dependable durability and use.

Best for Users cooking for one, users cooking for families and users cooking for businesses.

Sharon of Moab, UT on April 18, 2016

Purchased the oven in summer 2015. Very disappointed in the AquaLift Self-Cleaning oven. Absolutely useless. Does absolutely nothing and I end up cleaning the oven by hand. As a senior citizen, this is uncomfortable; I have injured my leg in the process and now feel I must wipe the oven down after each use. I was so looking forward to having a nice clean oven at all times and it's not happening. This is of no value to me.

EXHIBIT 17

Shelley of Winnipeg, MB on April 7, 2016

I HATE, HATE, HATE the aqua lift clean feature. It's awful. The bottom came somewhat clean but cook bacon and the sides and top are filthy and the aqua lift can't clean that. I don't know how this ever made it past the thought process stage to become a "thing" but it needs to go away. I'm quite cranky right now as I've just spent two hours scrubbing my oven while reaching past the oven door that doesn't come off because it's a "self-clean oven." This is what I have to look forward to for the next 10 years until it dies and I can get a new oven? What a joke!!

Janice of Stittsville, ON on April 1, 2016

We bought a new stove from Lowe's in 2015 which is a Whirlpool with an AquaLift self-cleaning function. This function is totally useless. We have tried it several times and it does not remove the grime from the oven. We did not even have a very dirty oven. It doesn't clean the sides at all and the bottom is still dirty. I complained to the store and they told me the AquaLift function should be used every time the oven has been used. They recommend that I use a spray for the oven (which is porcelain) and scrub off the dirt. Give me back my old self-cleaning oven with the high heat. This new technology doesn't work.

Ann of Griffin, GA on March 4, 2016

Whirlpool Gold Series gas oven with Aqua Lift. Very unhappy with this oven. Cons: Aqua Lift technology doesn't work AT ALL (manual cleaning required); stove top hard to clean; 2 front gas burners are "super" burners which is fine for boiling water, but too hot for regular cooking. Would be better to have one super burner in the middle or back but two upfront is way too hot for regular cooking, even on lowest setting. Was going to use spray cleaner but cannot on convection ovens. In a bind what to do except scrub with Brillo. Anyone used Brillo?

Irene of Yonkers, NY on Feb. 23, 2016

Whirlpool gas range Model#wfg10h0ah1 with aqua lift technology. This is the biggest ripoff that was ever done to me. It say self clean, not it cleans and then you clean. This is fraud plain and simple. I am handicapped and made it very clear to the salesperson that it had to be self cleaning. 4 times I did the clean cycle and I was in shock, I called repair, I thought the self clean was broken. However this is the line they give you over and over, that it's not broken. "This is working the way it was designed to work." So they made a range that is self cleaning, but no it doesn't do that. For 899.99, I did not deserve to get duped like this.

EXHIBIT 21

Susan of Brooklyn, NY on Sept. 24, 2015

Like so many other reviewers I am totally dissatisfied with my KitchenAid Gas Range Model KGRS202BSS. I second the reviews by Gary of Tonawanda, NY on May 20, 2015 (and others) that the AquaLift Self Clean is not effective and that the black stove top stains, but primarily I totally agree with his comment about how the heat vents out and heats up the handles. This was also the comment of Sharyn of Pearl River, NY on July 2, 2015 (who I would like to thank for the tip about requesting the black knobs which I intend to do).

This range is TERRIBLE. It becomes a literal sauna in my kitchen when I try to cook using the stove top and/or the oven. Everyone who comes to my home comments on it. And this is despite the fact that I have a fan above the oven which is vented to the outside. I take care of my 2 year old grandson, and I live in fear of him burning himself since the knobs are obviously within his reach. He has definitely learned about the concept of HOT. I purchased this range from PC Richards, and they have sent 3 different servicemen out, only to tell me that's the way it is! Unbelievable. I just visited my friend who has a kitchen much smaller than mine, and her new Maytag slide in gas range did not produce the sauna effect that my KitchenAid range does. DON'T BUY KITCHENAID. YOU'LL REGRET IT.

KITCHENAID

My Advanced New Self-Cleaning Oven Needs A Lot Of Help To Clean Itself

By [Laura Northrup](#) February 8, 2013

In for more cleaning.

Susan's new Kitchenaid gas range is pretty nice, but she writes that exciting advancements in self-cleaning oven technology aren't all they're cracked up to be. Whirlpool's Aqualift self-cleaning system seemed to be a technological advance comparable to

[see-through dishwashers](#), but she reports that her oven only cleans the bottom center, and not the sides or the corners. You know, the parts that you want your self-cleaning oven to take care of for you.

Update: [Sears saved the day!](#)

She writes:

*I have a 30 day old Kitchen Aid convection gas range.
Love how it cooks.*

*HOWEVER, their "Aqualift" cleaning technology is a rip
AND entirely misleading.*

DON'T PANIC!

We are currently testing a new commenting system. Want to help? Request an invite.

If you think you're getting a cool new oven with cool new cleaning technology, THINK AGAIN!

It does a lovely job of cleaning the bottom center of the oven, But NO cleaning around the perimeter OR the side walls.

So... every time you want to clean your cool new oven, you'll be scrubbing it yourself!!!

We asked Susan to send along some photos, and she obliged.

The attached photos show the interior of the oven, which went from clean/new to this after cooking 1 time at a high temperature (chicken) – and AFTER 2 cleaning cycles.

Whirlpool/Kitchen Aid advised using their cleaning product, “Affresh”. It took me 1/2 hour to rub out about 5 inches of stain using that product.

Unbelievable that my ancient Whirlpool bottom-of-the-line oven, with the old high temp cleaning system, required only a damp cloth wipe afterwards, and went to the recycling dump cleaner than my new oven is today!

That’s very sad, especially if the oven cooks beautifully. The whole point of self-cleaning ovens was supposed to be that we wouldn’t have to spray stuff inside and spend hours scrubbing. If it’s any comfort, **appliances don’t seem to last very long these days**, so Susan will be shopping for a new range before she even knows it!

Get ready for rubber gloves and oven cleaner. It does not work. Consumer reports says it doesn't work, but I bought before reading reviews. I want to get rid of mine. They are sending me a special oven cleaner for this piece of junk so what good is this self cleaning oven that needs a special oven cleaner? I will never again buy American.

I bought A Whirlpool range convection, self cleaning and I'm very furious too because the self cleaning, after several time of cleaning, which the last one I let it go for 4 hours, it didn't clean anything at all. My old GE of 30 years used to come out spotless. It has been over a year already, twice the technician came out and there was nothing he could do. We bought 5 years extended warranty and Sears told us there is nothing they can do. I still have to try calling the manufacturer, hoping they'll give me some satisfaction. It really sucks. We should be more further ahead with technology. Now I don't know who to trust anymore.

kimba56

I, too, unfortunately purchased this awful oven. It is uncleanable! I bake frequently, and any form of grease splatter is not removable from the sides and back. Wrote to the company and all they did was tell me to follow the instructions that came with the range! Do they think I'm stupid? I am very angry. Any advice that can be passed along regarding how I can clean it, or how to make the company responsible for this lousy oven, would be greatly appreciated.

I was also dumb enough to buy this range. I've had it one year. Have written complaints to Maytag and Whirlpool. I received phone calls from some underpaid know nothing who treated me as if I'd never cleaned an oven before.

For Whirlpool/Maytag to call this "self-cleaning" is false advertising and they need to make it right with me or I will not purchase another product from them ever again!

I have this horrible range and it is a piece of garbage. It might as well not even have a self cleaning feature. It does not work. Cleaning the glass top of the stove is also very difficult. It was a total waste of money, Maytag doesn't care and won't do anything about it. DO NOT PURCHASE ONE. There is also little to no storage space in the drawer. There is not one good thing I can say about this stove. Not one.

EXHIBIT 33

**Robert Reid**

We had the Whirlpool recommended technician from Appliance Mechanics (425-212-9076) out on 12/29 and he verified that the Aqua-Lift is working as designed (meaning what??). However that doesn't solve the problem with the promises that were made regarding how well this technology is supposed to work. It can't be cleaned with conventional cleaners and the bottom is stained from food that never came up after the cleaning and scrubbing per Whirlpool's instructions. I have sent 4 emails to Whirlpool customer service and never heard back. What we are requesting is that since that Whirlpool is promoting this as the next best thing and not performing up to our (and anyone on the internet who has this technology) expectations, we are requesting that Whirlpool replace the oven with one comparably priced that has conventional cleaning capabilities

Follow-up: I finally got in touch with Whirlpool after 4 emails and posting on Facebook. It seems that they respond when you post on social media. I was requesting a replacement oven with conventional self cleaning and after much back-and-forth I was informed that because the technician reported that the oven was functioning correctly that they could not give me a replacement. Their reason being that a continually dirty oven had nothing to do with function but was a cosmetic issue. The CS rep was "kind" enough to offer me a bottle of the Affresh cleaner. Don't fall for the AquaLift hype.

I just tried the Aqualift feature and am on the thrid cycle now. So far only the bottom part has gotten clean and the sides are still greasy. Hate this feature. Had I known how horrible it was I would have never bought it. I am also not happy with the glass top as that too is difficult to keep clean. This is the first time I have used the Aqualift feature and it was right after grease was spilled from a meatloaf pan. If anyone is looking to buy a stove with this feature don't.

SOS: Self-cleaning oven wasn't, so Madison woman promised refund

 [madison.com/wsj/news/local/ask/sos/sos-self-cleaning-oven-wasn-t-so-madison-woman-promised/article_f6c982e9-613f-5a24-a269-add0ef1af186.html](https://www.madison.com/wsj/news/local/ask/sos/sos-self-cleaning-oven-wasn-t-so-madison-woman-promised/article_f6c982e9-613f-5a24-a269-add0ef1af186.html)
CHRIS RICKERT crickert@madison.com

June 4, 2018

The only ingredients Barb Behnke was supposed to need to cook up a clean oven were a little water, a sponge, 200 degrees and 40 minutes.

Instead, she ended up needing more than six months, an assist from SOS and a different oven.

Behnke, of Madison, considers herself a pretty tidy cook, and she expects the products she buys to perform as advertised. So she was miffed when she discovered that the self-cleaning feature on her new Maytag oven didn't.

According to Maytag's manufacturer, Whirlpool, the oven's AquaLift self-cleaning technology was developed in response to customer dissatisfaction with traditional self-cleaning, which works by raising the oven's temperature to as high as 800 degrees for several hours.

AquaLift, by contrast, relies on about two cups of distilled water, a much lower temperature and much less time to loosen baked-on grime that supposedly can be sponged away.

This was not Behnke's experience, and she emailed SOS 15 photos of her still-dirty oven after five consecutive cleanings, along with one showing a sponge mangled from her attempts to remove the still-baked-on grime.

"I have had numerous phone calls and emails to Maytag," she wrote SOS on April 11. "They told me to try it more than once. Then they blamed me that I ran it with drips in there."

She said she also had multiple visits from Maytag service techs, one of whom told her Maytag realized AquaLift isn't working and would be discontinued. In fact, in August 2016, attorneys filed a federal class-action lawsuit against Whirlpool contending AquaLift was a bust and Whirlpool has admitted as much.

SOS reached out to Whirlpool, Maytag, Grand Appliance and TV in Sun Prairie where Behnke bought the oven, and Maytag's PR firm, Ketchum, in early May and was rewarded with two phone calls from the Whirlpool executive offices.

Long story short: Whirlpool would have preferred to replace her oven with a different Maytag, but Behnke couldn't find one she liked, so it's refunding her \$894.64 for the AquaLift oven.

'Subscription' fee refunded

SOS had similar luck getting a \$69.95 refund for Madison grandmother Louise Goldstein, who pays for her granddaughter from out of state to attend the Jewish Federation of Madison's Camp Shalom.

The problem was the third-party firm the federation uses to process camp payments. When the granddaughter was signed up last year, Active Network also signed her grandmother up for a yearlong membership in its Active Advantage program, which provides discounts on products and event registration fees.

Goldstein disputes Active's characterization of the membership as an "opt-in" opportunity — where the customer formally agrees to the subscription — rather than an "opt-out" opportunity — where the customer has to formally reject the subscription to avoid automatic enrollment and charges.

She said Active refunded the \$79.95 she was charged for Active Advantage this year, but was holding firm on keeping 2017's \$69.95 fee — at least until SOS stepped in and the \$69.95 quietly showed up as a credit on her credit card statement.

EXHIBIT 39

SOS: Whirlpool promises 'buybacks' of self-cleaning ovens that don't

 [madison.com/wsj/news/local/ask/sos/sos-whirlpool-promises-buybacks-of-self-cleaning-ovens-that-don/article_c5e3601b-09b3-5cc7-b4b2-338f510fa108.html](https://www.madison.com/wsj/news/local/ask/sos/sos-whirlpool-promises-buybacks-of-self-cleaning-ovens-that-don/article_c5e3601b-09b3-5cc7-b4b2-338f510fa108.html)
CHRIS RICKERT crickert@madison.com

July 9, 2018

Whirlpool told SOS last week that it will buy back three more of its AquaLift self-cleaning ovens that some unhappy customers say don't, in reality, clean themselves.

SOS' June 4 column about Barb Behnke's seven-month quest to return her AquaLift model was seen by at least one person having the same trouble getting the low-temperature technology to work, and one who didn't want to risk it.

"I've spoken to Sara, Whirlpool consumer care representative; Megan, a Whirlpool resolution specialist; Benjamin, a resolution leader; Tina, a resolution leader supervisor, and have had no movement or help from Whirlpool," Jan Rohde of Madison emailed on June 11. "I was told the stains are cosmetic and that Whirlpool would send a me a free cleaning kit! This is not acceptable!"

David Haas of Prairie du Sac bought his AquaLift model in 2016 and hadn't yet tried the self-cleaning feature, but after seeing the June 4 column decided he wanted to return the oven. A third person was interested in getting in on an AquaLift-related class-action lawsuit against Whirlpool and considering whether to go through with trying to get a replacement oven.

According to Whirlpool — whose brands include Maytag, Amana and KitchenAid — AquaLift's self-cleaning technology was developed in response to customer dissatisfaction with traditional self-cleaning, which works by raising the oven's temperature to as high as 800

degrees for several hours. AquaLift, by contrast, relies on about two cups of distilled water, a much lower temperature and much less time to loosen baked-on grime.

That has not been the experience of many AquaLift customers, however.

According to the notes from a June 7 service call on Rohde's oven, a Diamond Factory Service technician found that "when customer cleaned unit with the aqua lift clean cycle (it) did not remove baked on stains. Per whirlpool this is a cosmetic issue and is not covered. Unit is functioning correctly. Whirlpool agreed to cover service charge."

It also agreed to cover more than that after SOS sent the three most recent complaints, en masse, to Whirlpool representatives on June 19. Haas, for example, got a phone call June 20 from Whirlpool executive office lead Curtressa Bolton, who followed up with an email the same day saying, "I am honoring the offer to issue a refund on the Maytag Range, for the full retail value and the sales tax."

And here's Whirlpool media representative Cean Burgeson in a July 2 email to SOS:

"All of those additional three customers you forwarded to us have been contacted by our customer service team and are in the process of having buybacks completed."

SOS will follow up to determine the exact timing, amount and scope of Whirlpool's AquaLift recompense.

SOS: Bill collector called off in wake of failed washing machine repair

 [madison.com/wsj/news/local/ask/sos/sos-bill-collector-called-off-in-wake-of-failed-washing/article_70fdad7a-732e-520a-9a74-a58df96abc5a.html](https://www.madison.com/wsj/news/local/ask/sos/sos-bill-collector-called-off-in-wake-of-failed-washing/article_70fdad7a-732e-520a-9a74-a58df96abc5a.html)
CHRIS RICKERT crickert@madison.com

August 27, 2018

In the end, Mike and Jackie Shivers' 15- to 20-year-old washing machine could not be saved, so it was only fair that Sears Home Services refunded the \$482.56 it charged them for trying to save it.

Less fair was the \$270 bill the Shiverses got five months later from a collections agency.

Mike, 83, said a support rod inside the old Kenmore failed, causing the tub to bang against the machine's innards during the spin cycle. Three technicians from Sears Home Services — the retailer's in-house repair service — gave up on getting it to spin smoothly again after they found that the tub itself was cracked.

The Shiverses bought a new washing machine and figured that was the end of it until early July, when they got a bill from a collections agency for \$270 it said they owed Sears.

Mike said the couple spent considerable time on the phone with the collections agency and Sears disputing the charge, but after being "outsourced to India," "we realized it was a hopeless situation" and contacted SOS.

On Aug. 9, SOS contacted two Sears officials, Jesse Liszka and Larry Costello, who have been helpful in the past, and Mike said that early in the week of Aug. 13, he got a call from Dana Shoulders of Sears' Texas office saying that the bill had been erased and to contact her directly if he had any other problems.

SOS got an emailed statement from Liszka saying "the satisfaction of our members is our top priority" and that the "erroneous bill" had been zeroed out.

The mix-up stemmed from “a systems/billing error that has been corrected,” she said.

SOS rocks

The April 9 SOS column about an 86-year-old Waunakee woman who wanted delivery of her USA Today was the inspiration for a new song by Madison indie-pop band Woodrow. The band wrote “\$19.95” as part of a contest by Madison’s Triple M radio station, 105.5 FM, in which contestants could write a song based on a newspaper story.

“Companies these days don’t really treat you like they used to,” intones Woodrow lead singer Connor Brennan. “USA Today will pay for what you put her through.”

The track, part of Woodrow’s new EP, “Ice Cream for Breakfast,” can be downloaded at the State Journal website. A release party, with actual ice cream, is planned for Thursday at the High Noon Saloon, 701 E. Washington Ave.

AquaLift, continued

Since SOS helped a Madison woman obtain a refund for a Maytag-brand self-cleaning oven that didn’t clean itself, it has received about a dozen other complaints about Whirlpool-made ovens with the allegedly faulty AquaLift technology.

SOS has forwarded all of them to Whirlpool, and over the last two weeks got word of two other belatedly compensated customers. Kathleen Gamoke of Stoughton said the company had her oven picked up on Aug. 17 and she was issued a refund of \$1,318. David Haas of Prairie du Sac got a \$523.52 refund for his AquaLift model on Aug. 16.

SOS: Samsung refrigerator refund — doubled, not cubed

 [madison.com/wsj/news/local/ask/sos/sos-samsung-refrigerator-refund-doubled-not-cubed/article_21e47f4f-78be-504d-bdbe-d0dc6e807dbc.html](https://www.madison.com/wsj/news/local/ask/sos/sos-samsung-refrigerator-refund-doubled-not-cubed/article_21e47f4f-78be-504d-bdbe-d0dc6e807dbc.html)
CHRIS RICKERT crickert@madison.com

September 3, 2018

Niem Allen figured if SOS can help one southern Wisconsin woman with a faulty refrigerator, it can help another.

She was right.

Allen, of Albany, contacted SOS after a friend gave her a clipping of the column's July 30 edition, which recounted the tale of a Stoughton woman whose Samsung refrigerator couldn't keep a chill.

Allen's Samsung could keep a chill — and then some. What she thinks was a leak in the freezer's ice maker was causing the unit's ice tray to freeze to the freezer's innards.

Plus, she said, the thing wouldn't give her cubes, only crushed.

Allen said that for the first half of May, Samsung tried to find a local technician to come out and fix the fridge, which was only 5 months old.

"I preferred to keep the refrigerator if I can get somebody to fix it," she said.

That effort failed, Allen said, so Samsung offered to buy it back on May 18.

"They say they're going to send me a check and never did," Allen said, and as of July was told "it's still in process."

Allen, 68, got in touch with SOS on July 31, and SOS contacted Samsung later that same day.

On Aug. 1, Allen got an email from Alicia Laing, of Samsung's Office of the President, apologizing for her hassle and promising her check would arrive in seven to 10 business days.

It did, for \$1,896.89, on Aug. 10, Allen said.

Laing did not respond when asked what led to the mix-up. A Samsung spokesman, Zach Dugan, said in a statement that the company "will carefully review Ms. Allen's experience in an effort to constantly improve our processes."

Whirlpool, continued (again)

Jo Kiesow, of Sun Prairie, wrote on Aug. 25 to say Whirlpool replaced her AquaLift-equipped oven with a new double oven that retails for \$1,849 but only cost her an extra \$375.

Kiesow is among the nearly 20 Whirlpool customers whose stories SOS has been forwarding to the company. AquaLift is a low-heat self-cleaning feature that, in the experience of the customers, doesn't work.

"The only self-cleaning ovens were very simple models or a double oven which was much more expensive than the one we have," Kiesow writes. "They offered us a double oven for \$375 more or they would refund our money. We chose the double oven because it was a very expensive model and I have always wanted a double oven."

SOS: UW Health changes course, decides one co-pay for two ER visits is plenty

 [madison.com/wsj/news/local/ask/sos/sos-uw-health-changes-course-decides-one-co-pay-for/article_826e413e-306d-56ab-941e-c466188be6d2.html](https://www.madison.com/wsj/news/local/ask/sos/sos-uw-health-changes-course-decides-one-co-pay-for/article_826e413e-306d-56ab-941e-c466188be6d2.html)
CHRIS RICKERT crickert@madison.com

September 17, 2018

May 15 turned into a long night for Madison Far East Siders Clement and Marilyn Pittz after Clement, 83, began suffering from leg pain and had to be shuttled among three UW Health facilities.

“It was a terrible night. It was exhausting,” Marilyn recounted.

The subsequent billing fiasco was just the icing on the cake.

The Pittzes went first to UW’s East Side urgent care clinic, where Marilyn said a physician told them they needed a higher level of care than was available there and gave them the choice of going to either UW Health at The American Center on the Far East Side or University Hospital on the Near West Side.

The American Center was closer, so that’s where they went, only to be told when they got there that it also didn’t have the care Clement needed.

So it was on to University Hospital on the other side of town, where Marilyn said they would have gone to begin with had they known that’s where they’d end up.

Then the bills came. Out-of-pocket expenses for the Pittzes were a \$10 co-pay for the urgent care clinic and two \$75 co-pays for emergency room visits at University Hospital and The American Center.

Pittz has no objections to making co-pays for medical visits chosen or required by her or her husband, but she noted that it was the physician who (wrongly) said Clement could get the required care at The American Center, and so she figured she should be responsible for only one of the two \$75 co-pays.

She explained this to UW Health Patient Relations, to no avail.

"The charges for your visit are appropriate and we cannot interfere with the contractual agreement you have with your insurance carrier," Patient Relations coordinator "Maureen" wrote in a July 30 letter that does not provide her last name.

For this billing predicament, the second time proved to be the charm.

SOS asked UW Health spokeswoman Lisa Brunette if Marilyn had a point.

"She does have a point," Brunette wrote back the next day, Aug. 30. "We agree that under these circumstances only one co-pay should have been charged and we will remove one of the \$75 co-pays."

If Patient Relations hadn't been sympathetic, Marilyn said her husband's regular vascular and heart physician took an interest.

She said he asked for paperwork related to the billing dispute and told her "we need to improve things; you shouldn't have to go through all this all night."

Whirlpool refund

Jan Rohde's monthslong dispute with Whirlpool over her not-so-self-cleaning self-cleaning Whirlpool oven is coming to a close.

On Sept. 3, she wrote to say she'd received a \$1,410 refund for the oven, including taxes.

SOS has fielded some 20 complaints from Whirlpool customers upset that Whirlpool's low-heat AquaLift self-cleaning technology doesn't work. Attorneys are also seeking class-action status for a suit against Whirlpool claiming the technology doesn't work.

Re: *Ray and Kris Angerman v. Whirlpool Corporation*

Dear Ms. Scott:

We represent Plaintiffs Ray and Kris Angerman ("Mr. and Mrs. Angerman"), Minnesota residents who acquired Whirlpool Corp.'s Whirlpool Electric Range, model number WFE540H0AW0 (the "Oven") with AquaLift™ self-clean technology ("AquaLift") in Hastings, Minnesota.

We write on behalf of Mr. and Mrs. Angerman to make a demand for damages and injunctive relief for violations of the Magnuson-Moss Warranty Act ("MMWA"), statutory express and implied warranty claims, pertinent consumer fraud statutes of their state of residence, and other common law claims. Mr. and Mrs. Angerman contend that Whirlpool violated express and implied product warranties, the MMWA, and their state consumer protection statutes by falsely representing the functions and capabilities of the Oven's AquaLift technology.

This pre-suit letter echoes the complaints and notice regarding the ineffectiveness or inoperability of AquaLift that was relayed: (a) directly to Whirlpool; (b) to Whirlpool through its authorized retailers; and/or (c) to Whirlpool through its authorized repair agents and representatives. Whirlpool has failed to disclose to Mr. and Mrs. Angerman, and misrepresented, that the Whirlpool AquaLift technology would not, could not, and does not work as warranted and advertised. Whirlpool violated and continues to violate the statutes and common law referenced above by engaging in the following practices:

- (a) Representing that the Whirlpool Ovens with AquaLift technology have characteristics and benefits which they do not, *i.e.*, that the AquaLift technology effectively self-cleans the Whirlpool Ovens, and otherwise works as advertised;
- (b) Representing that the Whirlpool Ovens with AquaLift technology are of a particular standard, quality, or grade, which they are not, *i.e.* that the AquaLift technology effectively self-cleans Whirlpool Ovens, let alone, in less than one hour as promised in Whirlpool's advertising;

Ms. Jessica Scott
March 24, 2017
Page 2

- (c) Advertising or marketing the AquaLift Whirlpool Ovens with the intent not to sell the products as advertised;
- (d) Representing that the Whirlpool Ovens with AquaLift have been supplied in accordance with previous representations, when they have not; and
- (e) Failing to warn or disclose to purchasers of the Whirlpool Ovens that the AquaLift technology would not, could not, and does not work as advertised.

Based on information obtained as of the issuance of this letter, Whirlpool features the AquaLift in the marketing or advertising of the Whirlpool Ovens, encompassing approximately 87 different Whirlpool-manufactured ovens to consumers, under multiple brand names. Whirlpool distinguishes these ovens by highlighting and stressing AquaLift, as a key feature and critical attribute, noting that the AquaLift is an “exclusive” technology, is “first of its kind,” and was developed to directly address consumer dissatisfaction. What is more, Whirlpool seeks to induce or persuade consumers to purchase the Whirlpool Ovens through advertising slogans, which include, but are not limited to: (a) “Get odor-free cleaning without harsh chemicals in only 50 minutes”; (b) “When it’s time for cleanup, AquaLift self-cleaning technology helps you wipe away messes in your slide-in electric range or gas stove without harsh chemicals or odors”; and (c) “At the end of the meal, this self-cleaning oven’s AquaLift self-cleaning technology delivers odor-free oven cleaning without chemicals in only 50 minutes.”

AquaLift has failed to, and does not, perform as advertised and warranted by Whirlpool. Accordingly, Mr. and Mrs. Angerman, individually and on behalf of all other similarly situated consumers who purchased a Whirlpool Oven, hereby demand that Whirlpool rectify the actions described above by immediately ceasing its misleading advertising and marketing campaign and engaging in a corrective campaign to inform consumers of its use of illegal advertising. Additionally, on behalf of themselves and all others similarly situated, Mr. and Mrs. Angerman hereby demand that Whirlpool provide complete monetary relief to them because of the AquaLift’s failure to perform as advertised and warranted, and that Whirlpool provide full restitution and disgorgement. Mr. and Mrs. Angerman hereby demand further that Whirlpool agree to be bound by its legal obligation and to give notice to their of its intent to do so.

We await your response.

Very truly yours,

/s/ Mark S. Reich

Re: *Paula Stockbridge v. Whirlpool Corporation*

Dear Ms. Scott:

We represent Plaintiff Paula Stockbridge ("Ms. Stockbridge"), a Washington resident who acquired Whirlpool Corp.'s Kitchen Aid Electric Range, model number KSEB900EBL (the "Oven") with AquaLift™ self-clean technology ("AquaLift") in Tacoma, Washington.

We write on behalf of Ms. Stockbridge to make a demand for damages and injunctive relief for violations of the Magnuson-Moss Warranty Act ("MMWA"), statutory express and implied warranty claims, pertinent consumer fraud statutes of her state of residence, and other common law claims. Ms. Stockbridge contends that Whirlpool violated express and implied product warranties, the MMWA, and her state consumer protection statutes by falsely representing the functions and capabilities of the Oven's AquaLift technology.

This pre-suit letter echoes the complaints and notice regarding the ineffectiveness or inoperability of AquaLift that was relayed: (a) directly to Whirlpool; (b) to Whirlpool through its authorized retailers; and/or (c) to Whirlpool through its authorized repair agents and representatives. Whirlpool has failed to disclose to Ms. Stockbridge, and misrepresented, that the Whirlpool AquaLift technology would not, could not, and does not work as warranted and advertised. Whirlpool violated and continues to violate the statutes and common law referenced above by engaging in the following practices:

- (a) Representing that the Whirlpool Ovens with AquaLift technology have characteristics and benefits which they do not, *i.e.*, that the AquaLift technology effectively self-cleans the Whirlpool Ovens, and otherwise works as advertised;
- (b) Representing that the Whirlpool Ovens with AquaLift technology are of a particular standard, quality, or grade, which they are not, *i.e.* that the AquaLift technology effectively self-cleans Whirlpool Ovens, let alone, in less than one hour as promised in Whirlpool's advertising;
- (c) Advertising or marketing the AquaLift Whirlpool Ovens with the intent not to sell the products as advertised;

Ms. Jessica Scott
March 24, 2017
Page 2

- (d) Representing that the Whirlpool Ovens with AquaLift have been supplied in accordance with previous representations, when they have not; and
- (e) Failing to warn or disclose to purchasers of the Whirlpool Ovens that the AquaLift technology would not, could not, and does not work as advertised.

Based on information obtained as of the issuance of this letter, Whirlpool features the AquaLift in the marketing or advertising of the Whirlpool Ovens, encompassing approximately 87 different Whirlpool-manufactured ovens to consumers, under multiple brand names. Whirlpool distinguishes these ovens by highlighting and stressing AquaLift, as a key feature and critical attribute, noting that the AquaLift is an “exclusive” technology, is “first of its kind,” and was developed to directly address consumer dissatisfaction. What is more, Whirlpool seeks to induce or persuade consumers to purchase the Whirlpool Ovens through advertising slogans, which include, but are not limited to: (a) “Get odor-free cleaning without harsh chemicals in only 50 minutes”; (b) “When it’s time for cleanup, AquaLift self-cleaning technology helps you wipe away messes in your slide-in electric range or gas stove without harsh chemicals or odors”; and (c) “At the end of the meal, this self-cleaning oven’s AquaLift self-cleaning technology delivers odor-free oven cleaning without chemicals in only 50 minutes.”

AquaLift has failed to, and does not, perform as advertised and warranted by Whirlpool. Accordingly, Ms. Stockbridge, individually and on behalf of all other similarly situated consumers who purchased a Whirlpool Oven, hereby demands that Whirlpool rectify the actions described above by immediately ceasing its misleading advertising and marketing campaign and engaging in a corrective campaign to inform consumers of its use of illegal advertising. Additionally, on behalf of herself and all others similarly situated, Ms. Stockbridge hereby demands that Whirlpool provide complete monetary relief to her because of the AquaLift’s failure to perform as advertised and warranted, and that Whirlpool provide full restitution and disgorgement. Ms. Stockbridge hereby demands further that Whirlpool agree to be bound by its legal obligation and to give notice to her of its intent to do so.

We await your response.
