Do it. Buy them right now. Don't wait; do it.

I took this in preparation for two certification exams (Network+ and Security+). After hearing recent changes to both exams has drastically lowered the first-time passing rate, I admit I was shaking in my boots just a teency bit. I'm fully confident that these pills not only aided in my ability to study on my own accord (something I've ALWAYS had trouble with), but it has kept me alert and quick-witted in the

classroom and just general day-to-day life. I am proud to say that out of a class of eight, I was the only one to pass both tests on the first attempt. You can chalk it up hard work and focus, and I completely agree. However, I know for a fact I would have had a much harder time keeping target had I not given these a shot, and I will continue to support this product as I have experienced nothing but positive results.

Helped with Memory and Mood

February 1, 2018

Verified Purchase

I have almost finished my first bottle, and I have notice that my cognitive function is definitely better. I'm not struggling to remember words as much, and I seem sharper in general. More surprising, I've noticed my anxiety has gone down lately and I feel much more calm and relaxed. I didn't really put the two together until I happened to read that Brain Boost improves mood on the bottle. It's definitely helping. I'll be buying another bottle.

Brain Boost Really Worked For Me!!!

August 20, 2017

Verified Purchase

I was having trouble remembering things. I shopped on Amazon and found Brain Boost... I have been on it now for three weeks and I most certainly feel much more clear headed than I have for a very long time!! I plan on continuing to use this product as it has really made a difference in my life so far!

It works!

September 25, 2016

Verified Purchase

The very first day I was more focused. I could work for hours on a project without drifting to something else. I have also noticed that I am remembering little things better. Like remembering why I walked into the kitchen. I haven't had any undesirable effects. Just can actually remember things now. It has really helped me be more productive at work.

Take my honest opinion for what its worth...

It is my opinion, that Brain Boost does aid in memory retention. As a 40something year old adult, I found myself needing to memorize LARGE memory chunks of complex information at a time, with EXACT syntax and verbiage. We all know when we get to a certain age, shifting gears and diving into new subject matter can be a challenge. Learning it and being able to recite it word for word perfectly seems to be an impossibility. I was shocked to not only be able to do that, but to be able to do it with relative ease.

I had issues 30 years ago when I was in school. I was hyperactive and nothing held my attention. Learning was difficult. Doctors put me on all kinds of medication. Later this was called ADHD, and is a common known issue that effects both kids and adults. It makes learning a challenge.

This does not cure me from having a wondering mind, but I am fairly well focused and I have been able to

The fog has lifted

August 27, 2017

I am about to start my second bottle and will soon be ordering my third. I would have to say that... Bright – Clear – Focused – A bit more alert ... comes to mind when describing the results of Brain Boost. I look forward to taking it each morning. Brain Boost gives me that bit of clarity of mind and allows me to get on with my day, without the fog I have apparently been living in. Thanks Brain Boost!

Brain Boost Works!

June 16, 2017

Verified Purchase

My husband has TBI and has trouble with his memory and with his brain feeling sluggish. I found Brain Boost and with the good reviews I read I thought Why not? He has been taking it for 2 months and he really sees and feels a difference in his memory and sluggishness. He isn't even taking the maximum dose. I will definitely be ordering more and trying it myself. Thanks Brain Boost!
