Product description

Starting in our early adulthood, our brains begin a slow deliberate cognitive decline as they begin to accumulate “plaques and tangles.” Percepta is the world’s first nootropic targeted to prevent and reduce “plaques and tangles” in the normal aging brain. Developed by two renowned brain aging researchers: Dr. Alan Snow, Founder & CEO of Cognitive Clarity Inc., and former Research Associate Professor of Pathology at University of Washington. He holds 340 issued patents and has received 18 National Institute of Health grant awards. Dr. Rudolph Tanzi, Co-founder and Chief Scientific Advisor, and Professor of Neurology at Harvard University. Dr. Tanzi co-discovered all three familial Alzheimer’s genes. In 2015, he was named “TIME Magazine Most Influential People in the World” and has co-authored best sellers “Super Brain”, “Super Genes”, and most recently “The Healing Self”.

The recommended time in which you will see any improvement

August 19, 2018
Verified Purchase **Early Reviewer Rewards** [\(What's this?\)](#)

Am following Harvard speakers' recommendation to use this along with several other supplements for 90 days. We are at about day 40 and have seen no noticeable improvement to the dementia of a family member.

Improve your brain clarity, focus and attention span!!

August 1, 2018
Verified Purchase

I've taken Percepta for 5 months now. After the first 4 months, my supply ran out so I was without it for a couple weeks till I could order more. I didn't appreciate the effect it had on me until I stopped taking it. My ability to focus and feel "clear-minded" is markedly better when I'm taking Percepta everyday. My memory seems to be better too. When I wasn't taking it I felt as though I had a slight brain fog, and that thinking clearly didn't come as easily. I've started taking it again and the benefits I've described have returned. I'm sold that this product really works to keep your mind clear and that your ability to focus and hold attention is improved!

Feeling Good

Relief for 'Post Concussion Syndrome' symptoms

April 21, 2019

Verified Purchase

I have had multiple brain injuries and traumas caused by playing sports, accidents, etc. I am very sensitive, and in general, my body reacts very quickly to new supplements. In the case of Percepta, it took less than a week for me to have better access to my memories, old and new. I have taken Percepta for only a couple of weeks and I am very impressed with the results I get so far. I am looking forward to seeing how sustainable my newfound access to memories will last; I suspect that if I continue to take Percepta I should continue to get the excellent results I am experiencing. I take a myriad of supplements to support my health and my brain, I sleep long hours, I eat a completely clean diet, I juice green/red/yellow and orange vegetables daily, I practice meditation and I exercise; the only new supplement I added to my regiment is Percepta, therefore I know that the positive results I get come from this product. I do not write reviews very often, however, Percepta deserves all the accolades it can get. This is the only brain supplement I have tried that helps me achieve better memory recollection, and helps reduce my 'Post Concussion Syndrome' symptoms. Thank you for reading my review and good luck to all of you who are seeking to keep and/or recover your healthy brain.

Kirk L

My Memory is Much Better!

September 26, 2018

Verified Purchase

Percepta has significantly reduced the number of times I "blank" on something - when I know that I know something but can't immediately recall it (like a word, a name or where I left something). When this still occasionally happens (very rarely now), the time to recall is much faster than it used to be. I'll keep taking it.
