Product Description

Better Brain Children's Gummies : Omega 3, 6, 9 Essential and DHA are just what you need to improve and facilitate the overall health and well-being of your little ones.

* This gummy provides 2 types of omega that human **CANNOT** produce (have to get it by food sources). Plentiful intake of the omega-3 fat DHA (docosahexaenoic acid) is **essential**. It assists in for Brain Developments, Heart Health, and Vision. Our **Gluten Free, Vegetarian Formula** has a citrus flavor and is designed for kids 2 years and older.

* The boosting your child's intake of DHA as an infant and into the school-age years may be a simple way to generate measurable improvements in their brain function.

* Low DHA Levels May Impact Reading, Memory and Behavior. The studies involved children aged 7-9 who had below-average reading scores. In these kids, low levels of DHA and other omega-3 fats were associated with poor reading, memory and behavioral problems.

* Previous studies have also found children with **ADHD** and related behavior/learning disabilities are more likely to have low omega-3 fat levels that could benefit from supplementation. Omega-3s Found to Alter and Boost Brain Function.

* **Sixty** percent of your brain is made up of fat. DHA alone makes up about 15 percent to 20 percent of your brain's cerebral cortex. It's found in relatively high levels in your neurons – the cells of your central nervous system, where it provides structural support.

FDA Disclaimer: These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Natural alternatives to medication to treat child's attention, mood, and behavior challenges.

" There is a significant amount of research about Omega-3 fatty acids and various childhood symptoms and conditions, particularly attention, mood, and behavior issues. Most studies show that children with these conditions experience symptom improvement when they receive Omega-3 supplementation. Research has also demonstrated that many of these children have abnormally low levels of Omega 3's when compared to the general population, making it an appropriate target for supplementation."

WE ARE ALL DIFFERENT!

" It generally takes many months of increased Omega-3 intake for the full benefits to be achieved. Many people notice improvements more quickly than that – some within a few weeks. When using this strategy it is important to stick with it even if symptom improvements are not immediately recognized. While this article has focused primarily on the benefits of Omega-3's for reducing mental health symptoms, it is worth noting that there are numerous benefits for physical health as well. Omega-3's are vital for supporting heart health, reducing inflammation throughout the body, and supporting blood pressure regulation to name just a few. Increasing Omega-3 intake through food and supplements is an excellent way to improve the health of the entire family."

Noticeable difference!

October 18, 2018

Verified Purchase

We tried this for my son who has ADHD as an alternative to prescription meds. We noticed a markable difference in his ability to focus on school work and have more self control. We have been using them for a year now and decided to stop to see if he still needed them - his behavior went right back to how it used to be before we started with these gummies!! So we will definitely keep using them!

My boys loved it!

April 14, 2019

Verified Purchase

Good product for young kids. My boys (both age 10) went through it like candy. Slightly on the expensive side, but the quality and flavor was great.

Really does help focus

March 11, 2018

Verified Purchase

These are little miracle vitamins! It really surprised me how much these make a difference in daily concentration. I bought them for myself and they really do work. The yellow ones are very slightly sour, but not bad, and the texture is soft and easy to chew and swallow.

So far so good

September 11, 2017

Verified Purchase

I purchased for my daughter who has symptoms of ADD but is not medicated. She is also an extremely picky eater. She loves the taste of these gummies and takes them no problem. They also seem to help her stay focused more at school. Please be aware that the daily serving is 3 gummies and there are 60 in a bottle. Unfortunately \$20 worth only last 20 days so they are quite pricey.

Edna B

A supplement that taste like candy with benefits

May 24, 2017

Verified Purchase

Omeegas are pretty important for many functions of the body. Unfortunately the way our food is grown and processed these days its pretty hard to get enough of it through what we eat. This is a great supplement for kids as it does taste like candy with the benefits of the omegas. Even the picky eaters will like these gummies.

I love the fact that they are like candy and good ...

April 29, 2017

Verified Purchase

I have an Extremely picky eater!! I got them for her and she loves them...she even asked me if she can take them this am!! I love the fact that they are like candy and good for her and I feel good knowing she is taken care of.

She loves it so much I had to reorder!

Kids take willingly! Taste Great!

January 21, 2018

Verified Purchase

Rating as 5 star because it's finally a DHA that I don't have to fight with my kids to take. They think they are getting candy dots. I've tried every kid's brand possible and this is the only one I've found that tastes good and not like vomited rotten fish.
