

**UNITED STATES DISTRICT COURT  
EASTERN DISTRICT OF LOUISIANA**

TALISE ALEXIE, individually and on  
behalf of herself and all others similarly situated,

CASE NO.: 2:20-cv-00828

Plaintiff,

CLASS ACTION

v.

JURY TRIAL DEMANDED

EVENFLO COMPANY, INC.,

Defendant.

\_\_\_\_\_ /

**CLASS ACTION COMPLAINT**

Plaintiff, Talise Alexie (“Plaintiff”), by and through the undersigned counsel, on behalf of herself and all others similarly situated, brings this Class Action Complaint against Defendant, Evenflo Company, Inc. (“Defendant” or “Evenflo”), and in support alleges, upon information and belief and based on the investigation to date of her counsel, as follows:

**INTRODUCTION**

1. Every parent remembers the first drive home from the hospital with a newborn baby. Leading up to that big day, parents purchase what they believe to be a safe car seat, spend even more time ensuring that the car seat is properly installed in their vehicles, and then proceed to drive home at a cautious speed of approximately 12 miles per hour.

2. As children grow and develop, so do their needs with respect to car seats. The American Academy of Pediatrics (“AAP”) recommends that infants and toddlers ride in rear-facing car seats as long as possible, until they reach the top height or weight limit allowed by

the car seat manufacturer.<sup>1</sup> In recent years, car seat manufacturers have created seats that allow children to remain rear-facing until they weigh 40 pounds or more, which means that most children can remain rear-facing past their second birthday. *Id.* When children outgrow the allowable height and weight limitations of their rear-facing car seats, they transition to forward-facing car seats featuring harnesses. *Id.* Again, the AAP recommends that children ride in forward-facing car seats with harnesses as long as possible, until they reach the top height or weight limit allowed by the car seat manufacturer. *Id.* Many forward-facing car seats with harnesses accommodate children up to 65 pounds or more. *Id.* Once children reach the top height or weight limit allowed by the forward-facing car seat manufacturer, they graduate to a belt-positioning booster seat (which does not feature a harness) until the vehicle's lap and shoulder seat belt fit properly, which is typically when children are at least 4 feet, nine inches in height and are 8 to 12 years old. *Id.*

3. While the type and size of a child's car seat may change over time, the one constant is parents' commitment and determination to ensure the safety of their children. To this end, parents with children of every age strive to identify and purchase safe car seats from reputable manufacturers. Since the average parents are not in a position to conduct their own safety testing, in order to make informed purchasing decisions, they must rely on the marketing, labeling, and representations of car seat manufacturers regarding the safety of a given car seat and its appropriateness for children of a specific age and/or size. But what happens when a car seat manufacturer puts profits before child safety and misrepresents the safety or suitability of its car seats? This is the situation in the instant case.

<sup>1</sup> <https://www.aap.org/en-us/about-the-aap/aap-press-room/Pages/AAP-Updates-Recommendations-on-Car-Seats-for-Children.aspx> (last visited March 4, 2020).

4. Evenflo has manufactured, marketed, distributed, and sold car seats since 1995.<sup>2</sup>

On its website and car seat packaging, Evenflo claims that “Safety is our #1 priority.”<sup>3</sup>

5. Evenflo’s website includes a page entitled “Our Promise On Safety,” wherein

Defendant states:

To us, it just doesn't get much more important than delivering products that help keep your little ones safe. We're parents just like you are so we build products that we would trust and use for our own children. That's why we rigorously test all of our products again and again. Every bounce, twist, turn and latch is tested to make sure our products are safe, durable and comfortable.

Evenflo tests all of our car seats to energy levels approximately twice that of the federal crash test standard. Additionally, our engineers developed the Evenflo Side Impact test protocol, which simulates the energy in severe 5-star government side impact tests conducted for automobiles.<sup>4</sup>

6. The Big Kid booster seat (“Booster Seat”) is one of several car seat models manufactured, marketed, and sold by Evenflo.

7. Defendant offers five models of the Booster Seat: the 2-in-1, the Amp 2-in-1, the LX 2-in-1, the Sport, and the Essential.<sup>5</sup> According to Defendant’s website, the price range for

---

<sup>2</sup> <https://www.evenflo.com/about/about-us.html> (last visited March 4, 2020).

<sup>3</sup> <https://www.evenflo.com/car-seats/> (last visited March 4, 2020).

<sup>4</sup> <https://www.evenflo.com/safety-learning/promise-on-safety.html> (last visited March 4, 2020).

<sup>5</sup> <https://www.evenflo.com/car-seats/> (last visited March 4, 2020).

the three models is \$39.99 to \$44.99. *Id.* To date, Defendant has sold more than 18 million Booster Seats.<sup>6</sup>

**Amp 2-in-1 Model**

**2-in-1 Model**

**LX 2-in-1 Model**

**Sport Model**

---

<sup>6</sup> <https://www.propublica.org/article/evenflo-maker-of-the-big-kid-booster-seat-put-profits-over-child-safety> (last visited March 4, 2020).

**Essential Model**

8. The Booster Seat is marketed and sold by numerous nationwide retailers, including Target, Walmart, Kohl's, and Buy Buy Baby, as well as online via Defendant's own website, Amazon, and the websites of the aforementioned retailers.

9. For years, Defendant marketed that its Booster Seat is appropriate for children weighing less than 40 pounds, has been side impact tested, and "meets or exceeds all applicable federal safety standards and Evenflo's side impact standards."<sup>7</sup>

---

<sup>7</sup> [https://www.evenflo.com/car-seats/big-kid/us\\_bigkid.html](https://www.evenflo.com/car-seats/big-kid/us_bigkid.html) (last visited March 4, 2020).

**Packaging states “30-110 lbs.”**

10. To the detriment of parents and children nationwide, Defendant’s marketing of the Booster Seat is deceptive and misleading, as the use of booster seats by children weighing less than 40 pounds is in direct contravention to the safety recommendations of the AAP, and further, there is no federal safety standard or test governing side impact for car seats. Given the absence of any such standard or test, Defendant created its own test – with no basis in safety or science – and then proceeded to consistently give itself a passing grade and market the Booster Seat as “side impact tested.”

11. Contrary to Evenflo’s marketing and safety representations, it has recently been revealed that Defendant has known for a significant period of time that the Booster Seat is not

safe for children lighter than 40 pounds, and that Defendant's own testing confirmed that a child seated in the Booster Seat could be in grave danger in the event of a side-impact collision.<sup>8</sup>

12. Sadly, the real-world repercussions of Defendant's dangerous deception and misrepresentations have been established by the unforgiveable and irreversible aftermath of car accidents involving children weighing less than 40 pounds who were seated in Defendant's Booster Seat during the time of their accidents.

13. If Defendant had been honest and not deceptively misrepresented the very real safety risks posed by its Booster Seat in the event of a side-impact collision, no parent would have ever purchased Defendant's Booster Seat.

14. Plaintiff filed this case in order to address Defendant's deception and misrepresentations in connection with the Booster Seat, as discussed in greater detail below.

### **PARTIES**

15. Plaintiff, Talise Alexie, is a resident and citizen of Slidell, St. Tammany Parish, Louisiana.

16. Defendant, Evenflo Company, Inc., is an Ohio corporation with its principle place of business located in Miamisburg, Ohio. Defendant is a wholly-owned subsidiary of China-based Goodbaby International Holdings Limited and manufactures, markets, and sells car seats and other baby and child-related products. Upon information and belief, Defendant's deceptive conduct originated from its principle place of business in Ohio and was uniformly disseminated nationwide.

---

<sup>8</sup> <https://www.propublica.org/article/evenflo-maker-of-the-big-kid-booster-seat-put-profits-over-child-safety> (last visited March 4, 2020).

### **JURISDICTION AND VENUE**

17. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. § 1332(d) because (1) there are more than one hundred Class Members, (2) there is an aggregate amount in controversy exceeding \$5,000,000.00, exclusive of interest and costs, and (3) there is minimal diversity because Plaintiff and Defendant are citizens of different states. This Court also has supplemental jurisdiction over any state law claims pursuant to 28 U.S.C. § 1367.

18. This Court has personal jurisdiction over Defendant because Defendant does substantial business in this state and within this District, receives substantial compensation and profits from the marketing, distribution, and sale of its products in this District, and has engaged in the unlawful conduct described in this Class Action Complaint within this District.

19. Venue is proper in this District under 28 U.S.C. § 1391(b)(2) because a substantial part of the events or omissions giving rise to Plaintiff's claims occurred in this District.

### **THE DEVELOPMENT OF CAR SEATS**

20. The first child restraint systems were introduced in 1968, and the first child passenger safety law was passed in Tennessee 10 years later.<sup>9</sup>

21. In the late 1970s, the U.S. public's increasing awareness of the high rates of morbidity and mortality for child passengers resulted in rapid proliferation of state laws on the issue.<sup>10</sup>

---

<sup>9</sup> <https://www.sun-sentinel.com/entertainment/sfp-then-and-now-25-years-of-car-seat-safety-20150828-story.html> (last visited March 4, 2020).

<sup>10</sup> Child Passenger Safety Laws in the United States, 1978–2010: Policy Diffusion in the Absence of Strong Federal Intervention, <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3899584/> (last visited March 4, 2020).

22. Between 1977 and 1985, all 50 states adopted one or more laws aimed at reducing harm to infants and child passengers by requiring the use of some sort of child restraint device. *Id.*

23. In the early 1980s, crash testing for car seats became required.<sup>11</sup>

24. Beginning in the 1990s, the National Highway Traffic Safety Association (“NHTSA”), as well as professional associations like the AAP, have developed child passenger safety standards and guidelines that cover a wider range of child passenger safety issues and better protect children from injuries.<sup>12</sup> Among other things, they emphasized the importance of three types of safety practices in protecting child passengers: (1) device-based restraints that are tailored to the age/size of individual child passengers; (2) rear seating, and; (3) seatbelt wearing of minors who have outgrown child restraint devices but are still in need of supervision to comply with seatbelt requirements. *Id.*

25. In the early 2000s, the CDC Task Force strongly recommended that states adopt laws mandating the use of age and size appropriate child restraints. *Id.* Subsequently, the NHTSA and AAP guidelines were updated with similar emphasis. *Id.*

26. The first booster seat law was implemented in 2000, when Louisiana state, and then California, implemented laws requiring booster seats for children over 40 pounds.<sup>13</sup>

---

<sup>11</sup> <https://www.sun-sentinel.com/entertainment/sfp-then-and-now-25-years-of-car-seat-safety-20150828-story.html> (last visited March 4, 2020).

<sup>12</sup> Child Passenger Safety Laws in the United States, 1978–2010: Policy Diffusion in the Absence of Strong Federal Intervention, <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3899584/> (last visited March 4, 2020).

<sup>13</sup> <https://www.sun-sentinel.com/entertainment/sfp-then-and-now-25-years-of-car-seat-safety-20150828-story.html> (last visited March 4, 2020).

27. Specifically, the AAP guidelines are as follows:<sup>14</sup>

Age Group	Type of Seat	General Guidelines
Infants and Toddlers	Rear-Facing Only  Rear-Facing Convertible	All infants and toddlers should ride in a rear-facing seat until they reach the highest weight or height allowed by their car seat manufacturer. Most convertible seats have limits that will allow children to ride rear facing for 2 years or more.
Toddlers and Preschoolers	Forward-Facing Convertible  Forward-Facing with Harness	Children who have outgrown the rear-facing weight or height limit for their convertible seat should use a forward-facing seat with a harness for as long as possible, up to the highest weight or height allowed by their car seat manufacturer. Many seats can accommodate children up to 65 pounds or more.
School-Aged Children	Booster	All children whose weight or height exceeds the forward-facing limit for their car safety seat should use a belt-positioning booster seat until the

---

<sup>14</sup> <https://www.healthychildren.org/English/safety-prevention/on-the-go/Pages/Car-Safety-Seats-Information-for-Families.aspx> (last visited March 4, 2020).

		vehicle seat belt fits properly, typically when they have reached 4 feet 9 inches in height and are 8 through 12 years of age. All children younger than 13 years should ride in the back seat.
Older Children	Seat Belts	When children are old enough and large enough for the vehicle seat belt to fit them correctly, they should always use lap and shoulder seat belts for the best protection. All children younger than 13 years should ride in the back seat.

### **THE DEVELOPMENT OF THE EVENFLO BOOSTER SEAT**

28. Evenflo introduced the Booster Seat in the early 2000s in an effort to compete in the developing booster seat category, which was prompted by certain states requiring school-age children to use such seats until they could fit in regular seat belts.<sup>15</sup> Evenflo’s internal records indicate that the Booster Seat was specifically developed for the purpose of “regaining control in the market” from Graco, which was marketing its booster seat as safe for children at least 3 years old with a minimum weight of 30 pounds and minimum height of 38 inches. *Id.* With this goal in mind, Defendant priced its Booster Seat at \$10 less than Graco’s seat and marketed the

---

<sup>15</sup> <https://www.propublica.org/article/evenflo-maker-of-the-big-kid-booster-seat-put-profits-over-child-safety> (last visited March 4, 2020).

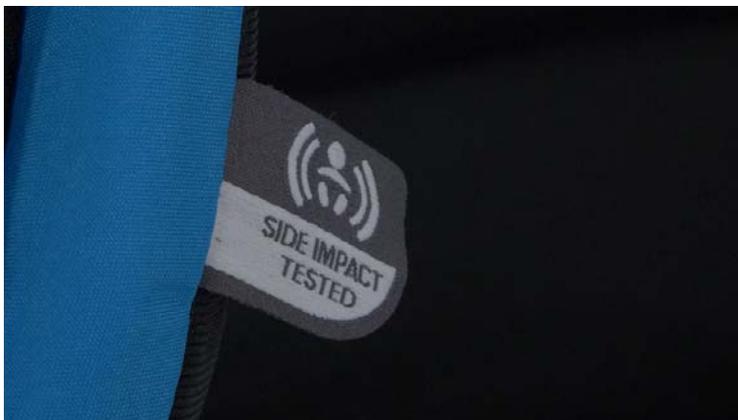

Booster Seat as safe for babies as young as 1 year old with a minimum weight of 30 pounds and no minimum height. *Id.*

29. There is scientific consensus that booster seats do not adequately protect toddlers. To get the full safety benefit in a crash, the adult seat belt has to remain on the strong parts of a child’s body: across the middle of the shoulder and across the upper thighs. Even if toddlers are tall enough for the belt to reach the shoulders, children that young rarely sit upright for long and often wriggle out of position. *Id.* “In contrast, a tightly adjusted five-point harness secures shoulders and hips, and goes between the legs. Harnesses secure children’s bodies so that they are less likely to be ejected and disperse the crash forces over a wider area. There’s a reason NASCAR drivers wear harnesses.” *Id.*

30. Defendant markets, packages, and labels its Booster Seat as “side impact tested.” This claim appears on the product box, and on a permanent tag affixed to the Booster Seat itself.

**Evenflo’s Booster Seat Packaging Features “Side Impact Tested” Claim**

**Label on Booster Seat Indicating “Side Impact Tested”**

31. Clearly, Defendant included the claim of “side impact tested” on the packaging and stitched it onto the product itself to appeal to safety-conscious parents and to indicate to reasonable consumers that the Booster Seat is of a certain quality or standard and has satisfied or surpassed rigorous safety standard. But in reality, the “side impact tested” representation is meaningless at best, and a dangerous deception at worst.

32. The fact is, there is currently no government standard for testing car seat performance in side-impact collision scenarios. Currently, the only government-issued standard crash test involves simulated head-on collisions.<sup>16</sup> Defendant took advantage of this regulatory gap and seized the opportunity to concoct its own side impact testing, the specifics of which have never been voluntarily disclosed to consumers. *Id.* Had the specifics of Defendant’s “side impact testing” been disclosed to consumers, including Plaintiff, they would not have purchased the Booster Seats.

---

<sup>16</sup> Significantly, the lobbying efforts of the car seat manufacturing industry itself caused the further delay of establishing a side-impact safety standard for car seats. *See* <https://www.propublica.org/article/the-car-seat-industry-helped-delay-a-child-safety-regulation-again> (last visited March 4, 2020).

33. Side impact collisions were responsible for more than a quarter of deaths of children under 15 killed in vehicle collisions in 2018.<sup>17</sup> While less common than head-on crashes, side impacts are more likely to result in serious injuries because there is only a door separating the passenger from the intruding vehicle. *Id.*

34. On its website, Defendant communicates through its marketing to consumers that its side-impact testing is rigorous and simulates realistic side-impact crashes. *Id.*

### Safety Testing

At Evenflo, we continue to go above and beyond government standards to provide car seats that are tested at 2X the Federal Crash Test Standard.

- Side Impact Tested: Meets or exceeds all applicable federal safety standards and Evenflo's side impact standards.
- Designed and tested for structural integrity at energy levels approximately 2X the federal crash test standard.
- FMVSS 213: Federal Motor Vehicle Safety Standards for Child Restraint Systems
- FMVSS 302: Federal Motor Vehicle Safety Standards for Flammability of Interior Materials
- CMVSS 302: Canada Motor Vehicle Safety Standard
- CMVSS 213: Canada Motor Vehicle Safety Standard
- Evenflo Temperature Testing: All current Evenflo car seats are tested for product integrity at both high and low temperatures.

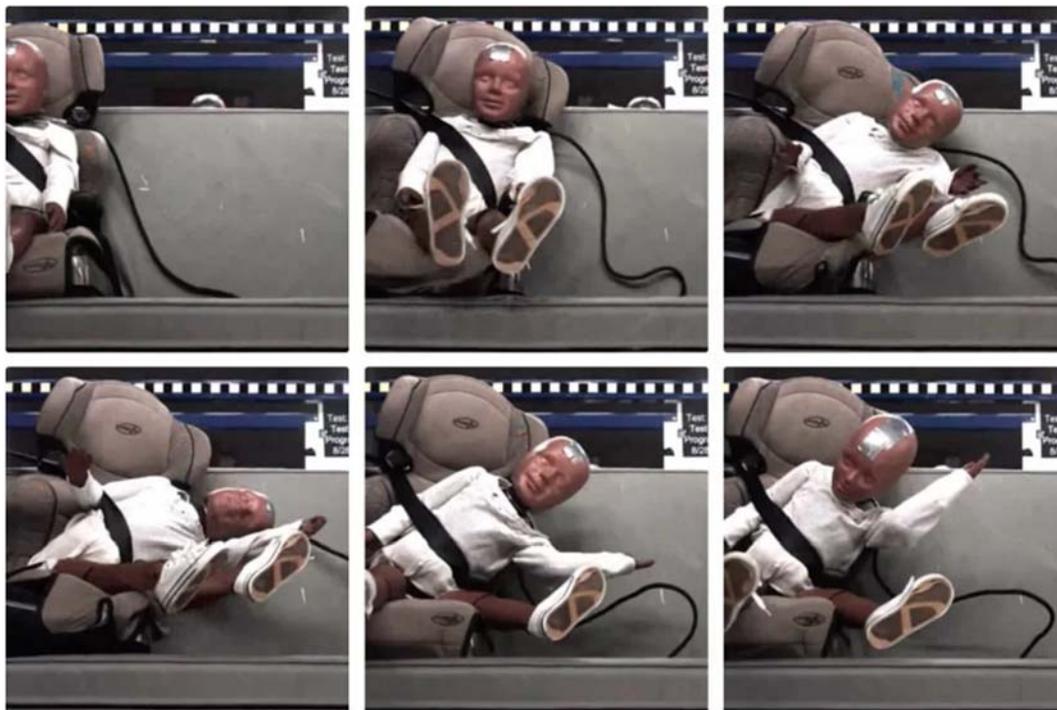

**Evenflo's Website Misleads Consumers to Believe Its Booster Seat Meets or Exceeds Federal Safety Standards for Side Impact Testing as well as Evenflo's Own Side Impact Standards**

---

<sup>17</sup> <https://www.propublica.org/article/evenflo-maker-of-the-big-kid-booster-seat-put-profits-over-child-safety> (last visited March 4, 2020).

35. The truth is that Evenflo's side impact tests were anything but stringent, according to internal company documents. Defendant's tests showed that when child-sized crash dummies seated in the Booster Seat were subjected to the forces of a T-bone collision, they were thrown far out of their shoulder belts. Evenflo's top booster seat engineer would later admit in a deposition that if real children moved that way, they could suffer catastrophic head, neck and spinal injuries or die. *Id.*

36. Videos from the company's side-impact tests show child-sized dummies careening far outside the boundaries of the booster seat, where a child's head, neck and spine would be vulnerable. While the purpose of a seat belt is to distribute the crash forces over the strong bones of the body — the shoulders and hips — the Evenflo test instead showed the belt slipped off the shoulder and wound up taut around the soft abdomen and ribs. In real life, that could cause internal organ damage. *Id.*

**Video of Evenflo Side Impact Tests Show Child-Sized Dummies Thrown Violently Out of Shoulder Belts and Their Heads and Torsos Flying Outside the Seat**

37. Defendant's side-impact collision test videos were shown to Dr. Benjamin D. Hoffman, a pediatrician and lead author of the AAP's car seat recommendations. *Id.* Dr. Hoffman opined that such violent movement at high speed of the dummy in the booster could lead to abdominal, brain and spinal injuries in a real child, including paralysis or death. *Id.* "This looks horrific, and I can't imagine it being in any way shape or form better under real life circumstances," Hoffman said. *Id.*

38. Notwithstanding these horrific, simulated test results, because there is no regulatory standard for side-impact collision testing, Defendant has consistently given its own Booster Seat a passing grade by setting its internal test bar so low that, the only way to fail the test was if the child-sized crash test dummy ended up on the floor or the Booster Seat itself broke into pieces. *Id.*

39. An Evenflo senior technician, Jeremy Belzyt, testified during a deposition that, after each side impact crash test, a technician would complete a form by checking "yes" or "no" as to whether the test showed "dummy retention." *Id.* When asked to explain the meaning of "dummy retention," Mr. Belzyt answered, "It's just did it stay in the seat or did it fall out of the seat and end up on the floor." *Id.*

40. During the aforementioned deposition, Mr. Belzyt was shown each of the following photos from Evenflo's self-conducted side impact tests. In response to each photo, Mr. Belzyt confirmed that each of these would have resulted in a technician checking "yes" on the form for "dummy retention." *Id.* As a result, an Evenflo engineer decided that each of these Booster Seats passed the test. *Id.*

**These Booster Seats Passed Evenflo's Internal Side Impact Testing**

41. According to Belzyt, during his 13 years at Evenflo, he never performed a side impact test on a Booster Seat that was deemed to be a failure. *Id.*

42. Defendant further misleads consumers by claiming on its Booster Seat website, “**Side Impact Tested:** Meets or exceeds all applicable federal safety standards and Evenflo’s side impact standards.”<sup>18</sup> Again, there is no federal safety standard for side impact, thus, it is deceptive for Defendant to indicate that its product has surpassed a nonexistent standard.

43. Notwithstanding the fact that there is no federal safety standard for side impact, Defendant deceptively misrepresented on a website called “The Safety Net” that its “rigorous test simulates the government side-impact tests conducted for automobiles.”

---

<sup>18</sup> <https://www.evenflo.com/car-seats/big-kid/31911431.html> (last visited March 4, 2020).

**Making the Transition – How to Choose a Booster Seat**

٢١ أبريل ٢٠٢٠ الساعة ١٠:٠٦ من

everflo

**the safety net**

with sarah haverstick

There are so many booster seat options on the market it can be hard to know where to start when shopping for this important piece of safety equipment. Here are some tips to make the experience a little easier.

**First - don't transition your child too early.** At a minimum, your child should be 4 years old to use a booster seat. Your child must be mature enough to sit in the booster seat with the seat belt in the proper position – without putting it under their arm, behind their back or slouching.

**Next – make sure your child actually fits in the booster.** Belt positioning booster seats are all about proper seat belt fit. Booster seats are designed to make your child a little taller so they can use the lap/shoulder seat belt, which is made to fit an adult. The lap belt should be low and snug across the hips (not across the belly) and the shoulder belt should cross the chest and shoulder (not the neck and face). Every booster seat fits in every vehicle differently, so ideally, ask the store if you can bring it out to your car to test for fit with your child.

Once you have proper belt fit – there are many other features you can look for:

**Extended Use**  
Combination car seats are forward facing only car seats that allow you to use a harness for your child and then remove the harness to use the seat as a booster. Upper weight limits on the harness will vary. Using a car seat with a higher weight rating for the harness (over 40 pounds) will help delay your child's transition into a booster seat.

**High Back Booster vs. No Back Booster**  
You will need a high back booster if your vehicle does not have a headrest for the seating position that your child will be using (fairly uncommon with most newer vehicles, but more common in older vehicles or pickup trucks). Otherwise, high back boosters are a great option when first transitioning a child to a booster, and are also helpful if your child is prone to napping in the car. No back boosters are great options for travel, or to have on hand in case you frequently car pool with other booster-age kids, since they are compact and easy to store.

**Lower Anchors**  
Combination seats will often allow the use of the lower anchors and tether when the seat is used in booster mode. When used with a booster, lower anchors are not designed to help with crash safety for the child (the seat belt protects the child in a crash – which is why it is important that it fits right). However, the lower anchors do keep the booster seat in the same place. This is helpful when your independent child wants to climb in and buckle the seat belt on their own. The lower anchors are also helpful in keeping the booster seat tied down when not in use so it does not become a projectile in a crash. That way you do not need to remember to buckle the seat in every time it is not in use.

**Side Impact Testing**  
Currently, there is no federal standard for side impact testing of car seats and booster seats. However, the engineers at Everflo have designed the Everflo Side Impact Test protocol. This rigorous test simulates the government side impact tests conducted for automobiles.

**Cool factor!**  
This might not sound as important – but as safety advocates, we know that booster seats have been proven to be more effective than seat belts alone for kids ages 4 through 8. But, we also know that older kids do not want to look (or feel) like babies in the car. To encourage kids to be excited about using boosters, Everflo has added fun colors, cup holders and even lights and speakers in some booster seat models. If possible, bring your child with you when you are shopping for their new seat. Allowing them to help with the decision may make them more interested in using the seat.

44. Equally misleading is Defendant's representation on its website and packaging that its Booster Seat is designed and tested at "2X the Federal Crash Test Standard." *Id.* By not

identifying a particular standard, Defendant misleads reasonable consumers to believe that this is a reference to a federal side-impact standard. As discussed above, there is no such standard.

**Evenflo Modifies, But Does Not Improve the Booster Seat**

45. Beginning in 2007, Defendant began representing that the minimum age on the Booster Seat was 3 and, for the first time, listed a minimum height of 38 inches. *Id.* Evenflo warned that, failure to follow these instructions “can result in your child striking the vehicle’s interior during a sudden stop or crash, potentially resulting in serious injury or death.” *Id.*

46. At no time did Defendant attempt to contact or otherwise communicate to consumers who previously purchased the Booster Seat based on the earlier representations as to the demographic for which the Booster Seat was appropriate.

47. In February 2012, an Evenflo safety engineer, Eric Dahle, recommended to high-ranking Evenflo executives that the company stop selling the Booster Seat for children who weigh less than 40 pounds and increase the age rating to 4 years old. *Id.* Mr. Dahle presented the Evenflo executives with government research regarding the effectiveness of booster seats and advised that children lighter than 40 pounds would be safer in car seats that use harnesses, which would align with Canadian regulations and recommendations from the AAP. *Id.* According to Evenflo’s internal records, marketing executive McKay Featherstone “vetoed” Mr. Dahle’s recommendation on more than one occasion. *Id.* Evenflo refused to heed Mr. Dahle’s advice because doing so would have placed Evenflo at a disadvantage alongside its main competitors, Graco and Dorel. Put simply, Defendant put profits ahead of child safety.

FROM: Featherstone, McKay  
SUBJECT: RE: amp fixtures  
Date: Wednesday, July 25, 2012 9:33 AM

Gregg, why are we even talking about this? It has always been this way in Canada so I don't understand why it is now a big problem that requires a \$30k investment or us to change product. I have looked at 40 lbs for the US numerous times and will not approve this.

**A marketing executive vetoed an engineer's recommendation to stop marketing the Booster Seat as safe for children weighing less than 40 pounds or younger than four years old**

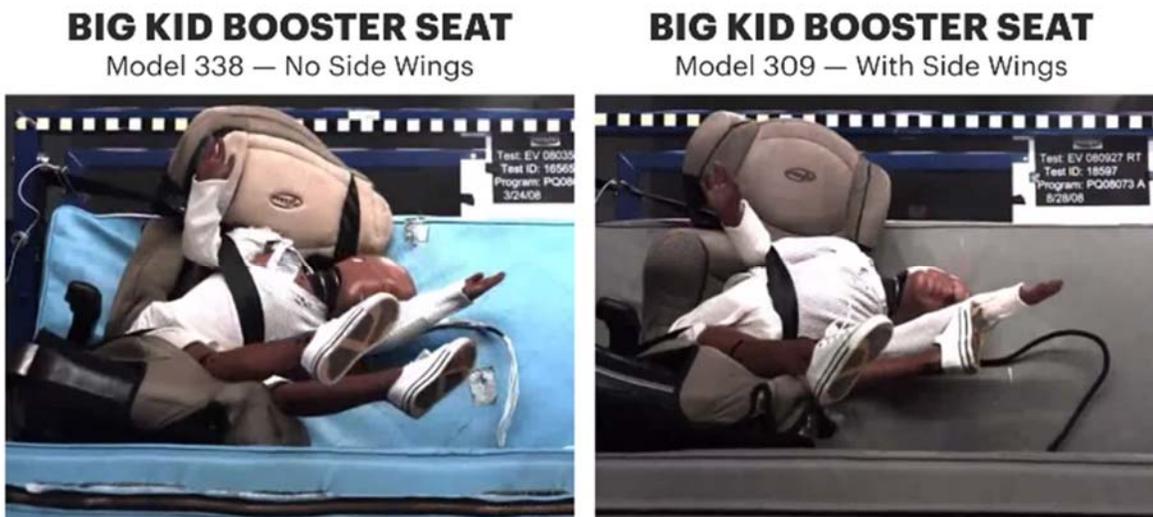

48. Defendant's representations about the safety of its Booster Seat were further contradicted by one of its own project engineers, Joshua Donay, during a 2016 deposition in a case in Duval County Circuit Court in Florida, wherein Mr. Donay testified that he would "not put a 1-year-old in any belt-positioning booster, Big Kid, Graco, you name it. I would keep them in an infant seat." *Id.*

49. Similarly, during a separate deposition in a separate lawsuit, the aforementioned safety engineer, Eric Dahle, testified that not only should a 1 year old never use the Booster Seat, but a 2 year-old should not either. *Id.*

50. By 2008, Graco products were still outselling Defendant's Booster Seat. *Id.* Defendant believed that this was due to a perception issue – specifically, that Graco seats appeared to be safer in terms of providing more side support. *Id.*

51. In an effort to make the Booster Seat look safer, Defendant added side wings that extend from the backrest. *Id.* Defendant's internal documents listed one consumer benefit of the newly added side wings as "increased perceived side protection." *Id.*

52. Videos of Defendant’s internal side impact testing show that, even with the addition of side wings, a child’s head, neck, and spine remain vulnerable to serious injuries. *Id.*

**Video of Evenflo Side Impact Tests Show Child-Sized Dummies Thrown Violently Regardless of Added Side Wings**

53. Indeed, children placed in Defendant’s Booster Seat have been severely and permanently injured, including internal decapitation and paralysis.<sup>19</sup>

54. Consistent with Defendant’s focus on providing the perception of safety, as opposed to providing actual safety, during a 2016 deposition in a negligence case involving the Booster Seat, an Evenflo engineer, David Sander, testified that “We side-impact test our seats, but I don’t think we say that we offer any type of side-impact protection.” *Id.*

55. On February 12, 2020, it was announced that the U.S. House of Representatives’ Subcommittee on Economic and Consumer Policy is launching an investigation of Defendant’s Booster Seat.<sup>20</sup>

---

<sup>19</sup> <https://www.propublica.org/article/evenflo-maker-of-the-big-kid-booster-seat-put-profits-over-child-safety> (last visited March 4, 2020).

### **PLAINTIFF'S FACTS**

56. On or around April 8, 2016, Plaintiff purchased an Evenflo Big Kid Booster Seat to use for her five year-old daughter.

57. Plaintiff paid approximately \$35.83 for the Booster Seat.

58. As a reasonable consumer, Plaintiff perceived Defendant's representations regarding side-impact collision testing as an indication that the Booster Seat had succeeded under rigorous safety testing standards beyond those required by the government when, in fact, it did not.

59. Plaintiff's decision to purchase the Booster Seat was directly impacted by Defendant's representations regarding its supposedly rigorous side-impact collision testing.

60. Had Plaintiff known of the significant safety risks posed by Defendant's Booster Seat, and the low threshold for Defendant giving its own Booster Seat a passing grade regarding side-impact testing, she would not have purchased the Booster Seat for use by her child.

### **TOLLING AND ESTOPPEL OF STATUTE OF LIMITATIONS**

61. Defendant has had actual knowledge for several years that the marketing, packaging, and labeling of its Booster Seat was deceptive and misleading because Defendant's internal and undisclosed side-impact tests confirm that the Booster Seat poses serious safety risks to children, there are no government-issued side-impact safety standards that the Booster Seat could meet or exceed, and Defendant's own side-impact standards and testing are made up and not based on science or safety.

#### **Discovery Rule Tolling**

---

<sup>20</sup> <https://www.propublica.org/article/house-subcommittee-opens-investigation-of-evenflo-maker-of-big-kid-booster-seats> (last viewed March 4, 2020).

62. During the period of any applicable statutes of limitation, Plaintiff and Class Members could not have discovered, through the exercise of reasonable diligence, that Defendant's Booster Seat is unsafe in the event of a side-impact collision.

63. Plaintiff and Class Members did not discover, and did not have knowledge of, facts that would cause a reasonable person to suspect that Defendant's Booster Seat is unsafe in side-impact collision scenarios, or that Defendant's marketing, packaging, and labeling of the Booster Seat as "side impact tested" was false, deceptive, and/or misleading.

64. Until recently, only Defendant had knowledge of the fact that its Booster Seat poses a serious safety risk to children. Plaintiff, Class Members, and the public at-large had no way of obtaining knowledge of this important fact until ProPublica published a robust article exposing these facts on February 6, 2020. While some of the information reported by ProPublica may have been disclosed in connection with earlier, individual litigation, it was sealed by the court or only available via a fee-based access system, such as CM/ECF, which the average person typically does not know how to access or navigate.

65. Plaintiff and Class Members could not have reasonably discovered the true extent of Defendant's illegal conduct in connection with the safety risks posed by its Booster Seat until ProPublica published the aforementioned article on February 6, 2020.

66. For the foregoing reasons, all applicable statutes of limitation have been tolled by operation of the discovery rule.

#### **Fraudulent Concealment Tolling**

67. All applicable statutes of limitation have also been tolled by way of Defendant's fraudulent concealment of its internal side-impact collision testing through the relevant time period.

68. Rather than disclose to Plaintiff and Class Members that Defendant's own side-impact collision testing confirmed that children using its Booster Seat are at risk of serious injury or death, Defendant continued to manufacture, market, and sell the Seat without disclosing this information.

### **Estoppel**

69. At all times relevant to this action, Defendant had a duty to disclose to Plaintiff, Class Members, and the public at-large, the serious risks posed to children by using the Booster Seat

70. Defendant knowingly, affirmatively, and actively concealed or recklessly disregarded the serious risks of posed to children by using the Booster Seat, and persisted with the deceptive marketing of the Booster Seat as "side impact tested."

71. For the foregoing reasons, Defendant is estopped from relying on any statutes of limitations in defense of the allegations raised in this Complaint.

### **CLASS ACTION ALLEGATIONS**

72. Plaintiff brings this action individually and as a class action pursuant to Fed. R. Civ. P. 23(a), 23(b)(2), and 23(b)(3) on behalf of the following Classes:

#### Nationwide Class

All persons residing in the United States who purchased an Evenflo Big Kid booster seat between March 4, 2007 and the present.

#### Louisiana Class

All persons residing in the state of Louisiana who purchased an Evenflo Big Kid booster seat between March 4, 2007 and the present.

73. Excluded from the Classes are Defendant, any entity in which Defendant has a controlling interest, any of Defendant's legal representatives, officers, directors, assignees, and successors, as well as the Judge handling the case, and his or her family members and staff.

74. Plaintiff reserves the right to modify the Class definitions, if necessary, to include additional Big Kid car seat models, additional time periods, and/or other car seats manufactured by Defendant, but bearing different brand names, that were deceptively marketed and misrepresented to consumers.

75. Numerosity: The Members of the Classes are so numerous that joinder of all Members is impracticable. While the exact number of Class Members is presently unknown, it consists of thousands of people geographically disbursed throughout the United States. The number of Class Members can be determined by sales information and other records. Moreover, joinder of all potential Class Members is not practicable given their numbers and geographic diversity. The Class is readily identifiable from information and records in the possession of Defendant and its third-party distributors and retailers.

76. Commonality: Common questions of law and fact exist as to all Class Members. These questions predominate over questions that may affect only individual Class Members because Defendant has uniformly acted on grounds generally applicable to the Classes. These common legal or factual questions include, *inter alia*:

- a. Whether the Booster Seat is unsafe in side-impact collisions;
- b. Whether Defendant knew or reasonably should have known that the Booster Seat was unsafe in side-impact collisions;
- c. Whether Defendant knew or reasonably should have known that the Booster Seat was unsafe in side-impact collisions before marketing, distributing, and selling the Booster Seat to Plaintiff and the Class;

- d. Whether Defendant knew or reasonably should have known that the Booster Seat was unsafe in side-impact collisions after marketing, distributing, and selling the Booster Seat to Plaintiff and the Class;
- e. Whether Defendant concealed from and/or failed to disclose to Plaintiff and Class Members that the Booster Seat is unsafe in side-impact collisions;
- f. Whether Defendant made affirmative misrepresentations regarding the side-impact testing of the Booster Seat;
- g. Whether Defendant made affirmative misrepresentations regarding the safety and appropriateness of the Booster Seat for children weighing less than 40 pounds;
- h. Whether Defendant acted to conceal from Plaintiff and Class Members the standards for its internal side-impact collision testing of the Booster Seat;
- i. Whether Defendant acted to conceal from Plaintiff and Class Members the results of its internal side-impact collision testing of the Booster Seat;
- j. Whether Defendant's conduct was knowing and willful;
- k. Whether Defendant violated the Warranty Against Redhibitory Defects, La. Civ. Code §§ 2520, *et seq.*;
- l. Whether Defendant was unjustly enriched by receiving money in exchange for the Booster Seat;
- m. Whether Defendant should be ordered to disgorge all or part of the ill-gotten profits it received from the sale of the Booster Seat;

- n. Whether Plaintiff and Class Members are entitled to damages, including compensatory, statutory damages, treble damages, and/or punitive damages, and the amount of such damages;
- o. Whether Defendant should be enjoined from marketing, distributing, and selling the Booster Seat; and
- p. Whether Defendant engaged in unfair, unconscionable, or deceptive trade practices in connection with the marketing, packaging, labeling, and/or representations of the Booster Seat.

77. Typicality: Plaintiff's claims are typical of the other Class Members, as all Members of the Class were and are similarly affected by the same deceptive marketing, packaging, labeling, and misrepresentations in connection with Defendant's Booster Seat and Defendant's actionable conduct. In addition, Defendant's conduct that gave rise to the claims of Plaintiff and Class Members is the same for all Members of the Class.

78. Adequacy of Representation: Plaintiff will fairly and adequately protect the interests of the Class because she has no interests antagonistic to, or in conflict with, the Class that Plaintiff seeks to represent. Furthermore, Plaintiff has retained counsel experienced and competent in the prosecution of complex class action litigation.

79. Injunctive/Declaratory Relief: The elements of Rule 23(b)(2) are met here. Defendant will continue to commit the unlawful practices alleged herein, and Class Members will remain at an unreasonable and serious safety risk as a result of the Booster Seat, which Defendant deceptively markets, packages, labels, and misrepresents with respect to its side-impact collision testing. Defendant has acted and refused to act on grounds that apply generally

to the Class, such that final injunctive relief and corresponding declaratory relief is appropriate with respect to the Class as a whole.

80. Predominance: The elements of Rule 23(b)(3) are met here. The common questions of law and fact enumerated above predominate over the questions affecting only individual Class Members, and a class action is the superior method for the fair and efficient adjudication of this controversy. The likelihood that individual Class Members will prosecute separate actions is remote due to the time and expense necessary to conduct such litigation. Serial adjudication in numerous venues is not efficient, timely, or proper. Judicial resources will be unnecessarily depleted by resolution of individual claims. Joinder on an individual basis of hundreds or thousands of claimants in one suit would be impracticable or impossible. Individualized rulings and judgments could result in inconsistent relief for similarly-situated Plaintiffs.

81. Plaintiff knows of no difficulty to be encountered in the maintenance of this action that would preclude its maintenance as a class action.

82. Defendant has acted or refused to act on grounds generally applicable to the Class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the Class as a whole.

## **CAUSES OF ACTION**

### **COUNT I**

#### **Violation of Warranty Against Redhibitory Defects**

**La. Civ. Code §§ 2520, *et seq.***

**(Plaintiff Individually and on Behalf of the Louisiana Subclass)**

83. Plaintiff hereby realleges and incorporates by reference all allegations raised in the preceding paragraphs as if fully set forth herein.

84. Plaintiff brings this cause of action individually and on behalf of the Louisiana Subclass against Defendant.

85. Plaintiff and Louisiana Subclass Members are and were at all relevant times buyers under La. Civ. Code articles 2520, *et seq.*

86. Defendant is and was at all relevant times a seller under La. Civ. Code articles 2520, *et seq.*

87. Defendant engaged in trade or commerce at all relevant times under La. Civ. Code articles 2520, *et seq.* by designing, manufacturing, distributing, advertising, marketing, labeling, offering for sale, selling, and distributing the Booster Seat at issue.

88. Plaintiff and Louisiana Subclass Members purchased Defendant's Booster Seat either directly from Defendant or through retailers, such as Target, Walmart, Kohl's, Buy Buy Baby, and Amazon, among others.

89. Defendant, as the designer, manufacturer, marketer, distributor, and/or seller, warranted that the Booster Seat was fit for its intended purpose as stated above.

90. Defendant, as the designer, manufacturer, marketer, distributor, and/or seller, warranted through the marketing, packaging, and labeling of the Booster Seat that the product was "side impact tested" and that its side impact testing "meets or exceeds all applicable federal safety standards and Evenflo's side impact standards", thereby making it safe, when in fact the warranties are meaningless to the intended safety purposes of the Booster Seat.

91. Defendant, as the designer, manufacturer, marketer, distributor, and/or seller, warranted through the marketing, packaging, and labeling of the Booster Seat that the product was appropriate for children weighing 30 to 110 pounds, as well as for children weighing 40 to 110 pounds, when in fact it is not intended or appropriate for such children as stated above.

92. Each model of the Booster Seat has an identical or substantially identical warranty that indicated the intended purpose, when the Booster Seats are not fit for those purposes.

93. Defendant made the foregoing representations and warranties to all buyers, which became the basis of the bargain between Plaintiff, Louisiana Subclass Members, and Defendant.

94. In fact, Defendant's Booster Seats contain redhibitory defects, as they are not safe in the event of a side-impact collision and because each of the above-described warranties is a false and misleading misrepresentation as to the fitness of the Booster Seats for particular uses.

95. Defendant breached these warranties and/or contract obligations by placing the Booster Seats into the stream of commerce and selling them to consumers, when the Booster Seats are unsafe and pose a significant safety risk to children at the time they enter the stream of commerce. The lack of safety inherent in the Booster Seat renders it unfit for its intended use and purpose and substantially and/or completely impairs the use and value of the Booster Seat.

96. Defendant breached its warranties by selling the Booster Seats, which contain redhibitory defects, are unsafe for use, and cannot be used for their ordinary, intended purpose of protecting children in the event of a side-impact collision. Defendant breached its written warranties to Plaintiff and Louisiana Subclass Members in that the Booster Seats are not safe for their intended purpose at the time that they left Defendant's possession or control and were sold to Plaintiff and Louisiana Subclass Members, creating a serious safety risk to Plaintiff, Louisiana Subclass Members, and their children.

97. Defendant further breached its warranty to adequately repair or replace the Booster Seat despite its knowledge of the defect, and/or despite its knowledge of alternative designs, materials, and/or options for manufacturing safe Booster Seats.

98. Defendant was provided actual and/or constructive notice of the redhibitory defects and breaches of the above-described warranties through the results of its own internal side impact testing, as well as through previous lawsuits against Defendant involving serious and permanent injuries sustained by children while using the Booster Seats.

99. Plaintiff and Louisiana Subclass Members are entitled to reimbursement for the full cost of the Booster Seats due to the above-described redhibitory defects and Defendant's breach of its warranties. Plaintiff and Louisiana Subclass Members are also entitled to recover their attorneys' fees pursuant to the law of redhibition.

100. The aforementioned redhibitory defect renders Defendant's Booster Seat useless or, alternatively, diminishes the usefulness or value of the Seat to the point that Plaintiff and Louisiana Subclass Members would have either paid less or not bought the Booster Seat at all.

101. Plaintiff and Louisiana Subclass Members were damaged by Defendant's uniform misconduct, as they did not receive the benefit of the bargain, lost the Booster Seat's intended benefits, and suffered damages at the point-of-sale, as they would not have purchased the Booster Seats or would have paid less if they had known the truth about the unreasonable safety risk to children posed by the Booster Seats.

## **COUNT II**

### **Unjust Enrichment**

**(Plaintiff Individually and on Behalf of the Nationwide Class and/or Louisiana Subclass)**

102. Plaintiff hereby realleges and incorporates by reference all allegations raised in the preceding paragraphs as if fully set forth herein.

103. Plaintiff brings this equitable cause of action for unjust enrichment, individually and on behalf of the Class and/or Louisiana Subclass against Defendant, as an alternative claim if they are not allowed a cause of action in law.

104. Plaintiff and Class Members conferred a monetary benefit on Defendant when they purchased the Booster Seats at issue, and Defendant had knowledge of this benefit. The average price paid by Plaintiff and Class Members for the Booster Seat was more than \$40.00.

105. By its wrongful acts and omissions described within this Complaint, including the deceptive marketing, packaging, labeling, distribution, and sale of the Booster Seat as “side impacted tested” and concealing side-impact collision test results from consumers, Defendant was unjustly enriched at the expense of Plaintiff and Class Members.

106. Plaintiff and Class Members’ detriment and Defendant’s enrichment were related to and flowed from the wrongful conduct challenged in this Complaint.

107. Defendants have profited from their unlawful, unfair, misleading, and deceptive practices at the expense of Plaintiff and Class Members under circumstances in which it would be unjust for Defendant to be permitted to retain the benefit. It would be inequitable for Defendant to retain the profits, benefits, and other compensation obtained from their wrongful conduct as described herein in connection with the deceptive marketing, packaging, labeling, distribution, and sale of the unsafe Booster Seats.

108. Plaintiff and Class Members have been damaged as a direct and proximate result of Defendant’s unjust enrichment because they would not have purchased the Booster Seats had they known that the Seats pose an unreasonable safety risk to children.

109. Defendant either knew or should have known that payments rendered by Plaintiff and Class Members were given and received with the expectation that the Booster Seats were safe for their intended use and will keep protect children in the event of a side-impact collision, as represented by Defendant in marketing, on Defendants’ websites, and on the Booster Seat

labels and packaging. It is inequitable for Defendant to retain the benefit of payments under these circumstances.

110. Plaintiff and Class Members are entitled to recover from Defendant all amounts wrongfully collected and improperly retained by Defendant.

111. As a direct and proximate result of Defendant's wrongful conduct and unjust enrichment, Plaintiff and Class Members are entitled to restitution of, disgorgement of, and/or imposition of a constructive trust upon all profits, benefits, and other compensation obtained by Defendant for its inequitable and unlawful conduct.

**COUNT III**  
**Fraudulent Concealment**  
**(Plaintiff Individually and on Behalf of the Nationwide Class and/or Louisiana Subclass)**

112. Plaintiff hereby realleges and incorporates by reference all allegations raised in the preceding paragraphs as if fully set forth herein.

113. Plaintiff brings this claim individually and on behalf of the Class and/or Louisiana Subclass.

114. Defendant has a duty to disclose the truth regarding the side-impact safety of its Booster Seat because, *inter alia*, the safety of the seat has a direct impact on the health of the children who use the Seat.

115. Defendant made material misrepresentations, suppression of the truth, and omissions regarding the side-impact safety of the Booster Seat, knowing those representations to be false and misleading, and using the misrepresentations, suppression of the truth, and omissions in order to obtain Plaintiff's and the Class' business as required by Louisiana Civil Code article 1953.

116. Plaintiff and Class Members relied on Defendant's material misrepresentations and omissions regarding the safety of the Booster Seat.

117. Defendant's failure to disclose and suppression of the fact that the Booster Seat was and is unsafe in the event of a side-impact collision was intentional and purposeful. Defendant was aware of the safety risks inherent in its Booster Seat, but intentionally chose not to disclose this material fact to consumers, including Plaintiff and Class Members, in order to entice them to purchase their product over another brand.

118. Defendant's fraudulent concealment of material facts regarding the safety of the Booster Seat, coupled with its deceptive marketing, packaging, labeling, and representations, induced Plaintiff and Class Members to purchase the Booster Seat. Plaintiff and Class Members would not have purchased Defendant's Booster Seat if the truth had been disclosed to them regarding the safety (or lack thereof) of the Seat in the event of a side-impact collision.

119. Plaintiff and Class Members had a reasonable expectation that the Booster Seat they purchased was safe for their children. Defendant should have reasonably anticipated and intended that Plaintiff and Class Members purchased the Booster Seat, in part, based upon such expectations and assumptions, and, indeed, Defendant intended them to do so.

120. Defendant's failure to disclose and omission of material facts regarding the safety risks inherent in its Booster Seat occurred uniformly and consistently in connection with Defendant's trade or business, was capable of deceiving and, indeed, did deceive a substantial portion of consumers, and subject the public to a serious safety risk.

121. Defendant's failure to disclose the safety risks of its Booster Seat had the direct result of concealing material facts from and breaching Defendant's duty to disclose to Plaintiff and the Class.

122. Beyond failing to disclose the aforementioned information, Defendant chose to actively conceal this material information regarding the safety risks posed by its Booster Seat.

123. As a direct and proximate result of Defendant's fraud, concealment, and suppression of material facts regarding the safety (or lack thereof) of its Booster Seat, Plaintiff and the Class have suffered and will continue to suffer actual economic damages outlined above, which they are entitled to recover, in addition to their attorneys' fees pursuant to Louisiana law of fraud.

### **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff, on behalf of herself and all others similarly situated, respectfully requests that this Court:

- A. Certify the Classes pursuant to Rule 23 of the Federal Rules of Civil Procedure;
- B. Name Plaintiff as Class Representative, and her undersigned counsel as Class Counsel;
- C. Award all damages reasonable in the premises to Plaintiff and the Class in an amount to be determined at trial;
- D. Grant reimbursement and restitution to Plaintiff and the Classes and require Defendant to disgorge its ill-gotten gains;
- E. Permanently enjoin Defendant from engaging in the wrongful conduct alleged herein;
- F. Award Plaintiff and the Classes their reasonable litigation expenses and costs of suit, plus reasonable attorneys' fees to the full extent allowed or provided by law;
- G. Award Plaintiff and the Classes pre- and post-judgment interest from the date of judicial demand until paid, at the highest legal rate to the extent provided by law; and
- H. Award such further relief as the Court deems appropriate.

**JURY DEMAND**

Plaintiff demands a trial by jury on all claims so triable.

DATED: March 10, 2020

Respectfully submitted,

**INSTRUCTIONS FOR ATTORNEYS COMPLETING CIVIL COVER SHEET FORM JS 44**

## Authority For Civil Cover Sheet

The JS 44 civil cover sheet and the information contained herein neither replaces nor supplements the filings and service of pleading or other papers as required by law, except as provided by local rules of court. This form, approved by the Judicial Conference of the United States in September 1974, is required for the use of the Clerk of Court for the purpose of initiating the civil docket sheet. Consequently, a civil cover sheet is submitted to the Clerk of Court for each civil complaint filed. The attorney filing a case should complete the form as follows:

- I.(a) Plaintiffs-Defendants.** Enter names (last, first, middle initial) of plaintiff and defendant. If the plaintiff or defendant is a government agency, use only the full name or standard abbreviations. If the plaintiff or defendant is an official within a government agency, identify first the agency and then the official, giving both name and title.
- (b) County of Residence.** For each civil case filed, except U.S. plaintiff cases, enter the name of the county where the first listed plaintiff resides at the time of filing. In U.S. plaintiff cases, enter the name of the county in which the first listed defendant resides at the time of filing. (NOTE: In land condemnation cases, the county of residence of the "defendant" is the location of the tract of land involved.)
- (c) Attorneys.** Enter the firm name, address, telephone number, and attorney of record. If there are several attorneys, list them on an attachment, noting in this section "(see attachment)".
- II. Jurisdiction.** The basis of jurisdiction is set forth under Rule 8(a), F.R.Cv.P., which requires that jurisdictions be shown in pleadings. Place an "X" in one of the boxes. If there is more than one basis of jurisdiction, precedence is given in the order shown below.  
 United States plaintiff. (1) Jurisdiction based on 28 U.S.C. 1345 and 1348. Suits by agencies and officers of the United States are included here.  
 United States defendant. (2) When the plaintiff is suing the United States, its officers or agencies, place an "X" in this box.  
 Federal question. (3) This refers to suits under 28 U.S.C. 1331, where jurisdiction arises under the Constitution of the United States, an amendment to the Constitution, an act of Congress or a treaty of the United States. In cases where the U.S. is a party, the U.S. plaintiff or defendant code takes precedence, and box 1 or 2 should be marked.  
 Diversity of citizenship. (4) This refers to suits under 28 U.S.C. 1332, where parties are citizens of different states. When Box 4 is checked, the citizenship of the different parties must be checked. (See Section III below; **NOTE: federal question actions take precedence over diversity cases.**)
- III. Residence (citizenship) of Principal Parties.** This section of the JS 44 is to be completed if diversity of citizenship was indicated above. Mark this section for each principal party.
- IV. Nature of Suit.** Place an "X" in the appropriate box. If there are multiple nature of suit codes associated with the case, pick the nature of suit code that is most applicable. Click here for: [Nature of Suit Code Descriptions](#).
- V. Origin.** Place an "X" in one of the seven boxes.  
 Original Proceedings. (1) Cases which originate in the United States district courts.  
 Removed from State Court. (2) Proceedings initiated in state courts may be removed to the district courts under Title 28 U.S.C., Section 1441. When the petition for removal is granted, check this box.  
 Remanded from Appellate Court. (3) Check this box for cases remanded to the district court for further action. Use the date of remand as the filing date.  
 Reinstated or Reopened. (4) Check this box for cases reinstated or reopened in the district court. Use the reopening date as the filing date.  
 Transferred from Another District. (5) For cases transferred under Title 28 U.S.C. Section 1404(a). Do not use this for within district transfers or multidistrict litigation transfers.  
 Multidistrict Litigation – Transfer. (6) Check this box when a multidistrict case is transferred into the district under authority of Title 28 U.S.C. Section 1407.  
 Multidistrict Litigation – Direct File. (8) Check this box when a multidistrict case is filed in the same district as the Master MDL docket.  
**PLEASE NOTE THAT THERE IS NOT AN ORIGIN CODE 7.** Origin Code 7 was used for historical records and is no longer relevant due to changes in statute.
- VI. Cause of Action.** Report the civil statute directly related to the cause of action and give a brief description of the cause. **Do not cite jurisdictional statutes unless diversity.** Example: U.S. Civil Statute: 47 USC 553 Brief Description: Unauthorized reception of cable service
- VII. Requested in Complaint.** Class Action. Place an "X" in this box if you are filing a class action under Rule 23, F.R.Cv.P.  
 Demand. In this space enter the actual dollar amount being demanded or indicate other demand, such as a preliminary injunction.  
 Jury Demand. Check the appropriate box to indicate whether or not a jury is being demanded.
- VIII. Related Cases.** This section of the JS 44 is used to reference related pending cases, if any. If there are related pending cases, insert the docket numbers and the corresponding judge names for such cases.

**Date and Attorney Signature.** Date and sign the civil cover sheet.

AO 440 (Rev. 06/12) Summons in a Civil Action

UNITED STATES DISTRICT COURT

for the

Eastern District of Louisiana

TALISE ALEXIE, individually and on behalf of herself
and all others similarly situated,

Plaintiff(s)

v.

EVENFLO COMPANY, INC.

Defendant(s)

Civil Action No. 2:20-cv-828

SUMMONS IN A CIVIL ACTION

To: (Defendant's name and address) EVENFLO COMPANY, INC.
By Serving Its Registered Agent
C T CORPORATION SYSTEM
3867 Plaza Tower Drive
Baton Rouge, LA 70816

A lawsuit has been filed against you.

Within 21 days after service of this summons on you (not counting the day you received it) — or 60 days if you
are the United States or a United States agency, or an officer or employee of the United States described in Fed. R. Civ.
P. 12 (a)(2) or (3) — you must serve on the plaintiff an answer to the attached complaint or a motion under Rule 12 of
the Federal Rules of Civil Procedure. The answer or motion must be served on the plaintiff or plaintiff's attorney,
whose name and address are:

Andrew A. Lemmon
Scott J. Falgoust
LEMMON LAW FIRM, L.L.C.
15058 River Road
P.O. Box 904
Hahnville, Louisiana 70057

If you fail to respond, judgment by default will be entered against you for the relief demanded in the complaint.
You also must file your answer or motion with the court.

CLERK OF COURT

Date:

Signature of Clerk or Deputy Clerk
