After an Unprecedented Win Streak, America's #1 Weekly Trade Expert Now Says…

"77 Winning Trades in a Row… *But We're Not Done Yet!*"

See below to find out how YOU can get his next recommendation…
Set to go live **Monday, March 29**

When financial news outlets want to make sense of what's going on in the markets…

They go to this man: Mr. Alan Knuckman.

FOX NEWS

Why? Because he's been down on the trading floor of Chicago *for over 30 years*.

Meaning *no one* has their finger on the pulse of the market like Alan Knuckman.

But what you WON'T hear on his numerous daily TV appearances…

Is this:

Recently, Alan recommended *77 winning closed trades in a row* across all 4 of his publications.

All closed within one single month.

With not a single loser closed out in-between!

Scroll here to see more!

Just take a look:

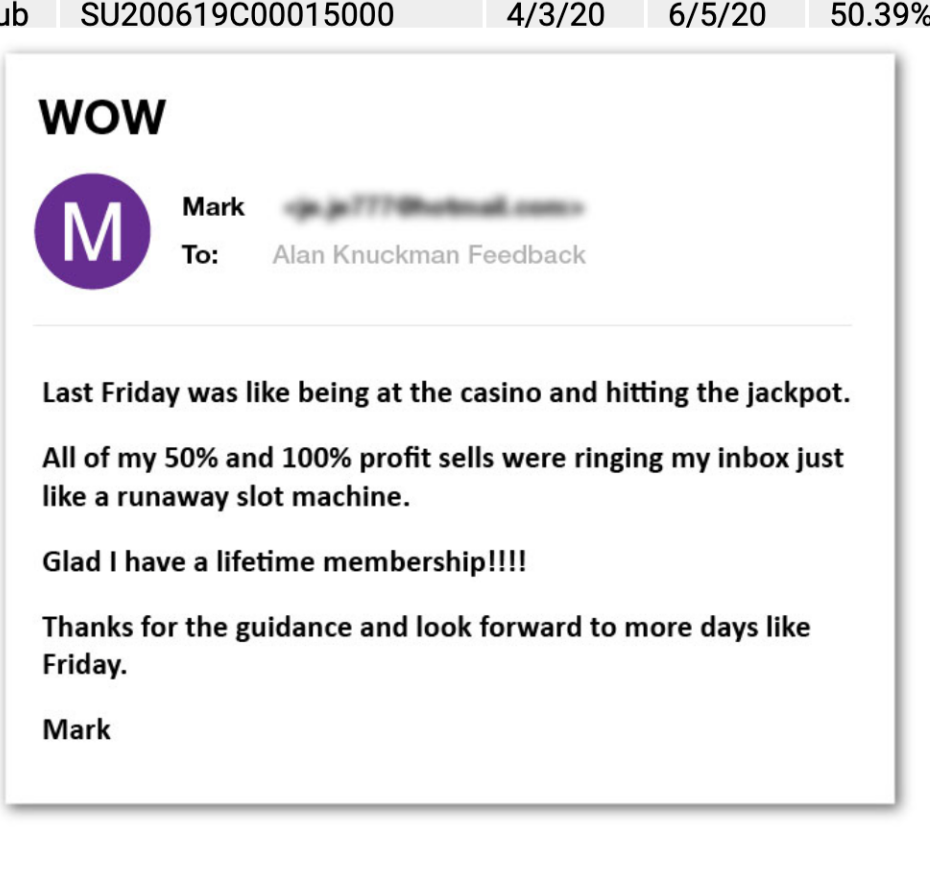
***"First half/second half" refers to the fact that Alan always recommends his readers lock in profits on half of their trade for a 50% gain, and then aim to close the last half for a 100% gain.**

****Only one half of trade closed out within streak time frame.**

Between May 18th and June 17th, Alan sent the readers of his 4 publications a collective 77 winning trade alerts in a row.

In fact, one day, there were so many winning trade alerts through one of his publications, one of his followers sent him this email:



WOW

Mark
To: Alan Knuckman Feedback

Last Friday was like being at the casino and hitting the jackpot.

All of my 50% and 100% profit sells were ringing my inbox just like a runaway slot machine.

Glad I have a lifetime membership!!!!

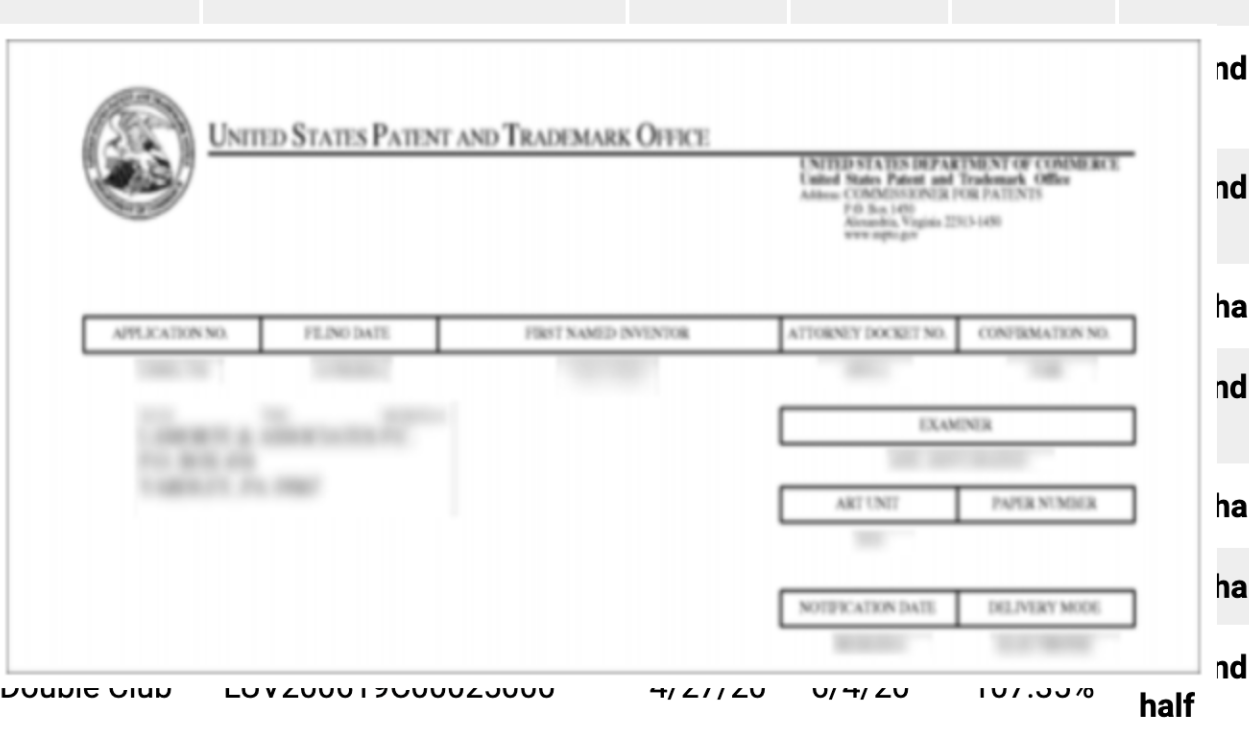
Thanks for the guidance and look forward to more days like Friday.

Mark

But he says this is *just the beginning!*

How can Alan be so confident?

It all has to do with this piece of paper…



UNITED STATES PATENT AND TRADEMARK OFFICE

This piece of paper represents a trading secret so powerful, Alan has earmarked over $1.3 million for it.

The same secret that helped him nail 77 wins in a row across all 4 of his publications.

And during one of the most volatile markets we've ever seen.

So stick around…

Because in 10 seconds, Alan Knuckman himself will tell you all about this trading breakthrough, including…

- How a $1.3 million deal helps him target trades that could reach 100% wins for readers of one of his publications, *Weekly Wealth Alert*…
- REAL trades he's sent his readers of *Weekly Wealth Alert*…
- And how YOU can get your hands on his next *Weekly Wealth Alert* trade recommendation set to go live this Monday, **March 29**

Folks…

Here's Alan Knuckman…

ALAN KNUCKMAN

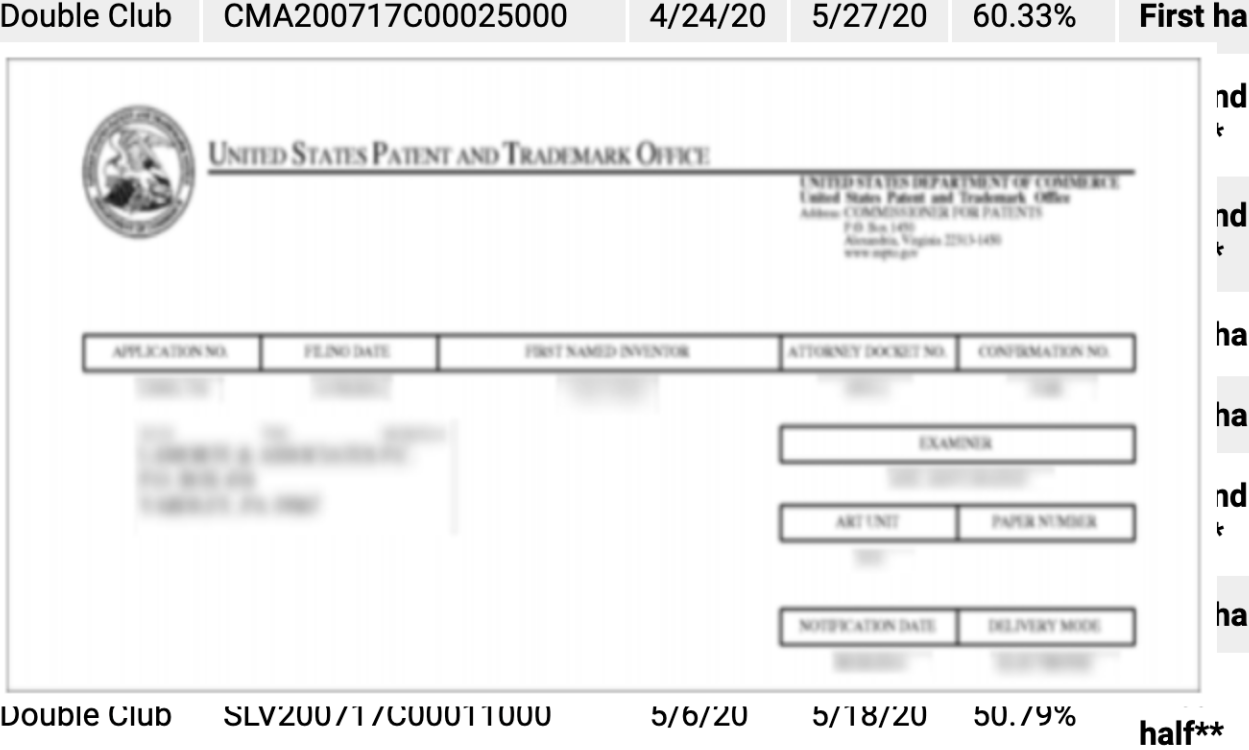
Hi, I'm Alan Knuckman.

I'll fully introduce myself in just a moment.

But right now I want you to look at this piece of paper I'm holding in my hand.

It's patent application #D0365193.

It was filed with the U.S. Patent and Trademark Office to protect the invention of a powerful market indicator…



UNITED STATES PATENT AND TRADEMARK OFFICE

As far as I know, it's the ONLY indicator in the world that can potentially tip you off about impending big market news…

BEFORE the news becomes public.

I call it the "weekly payday indicator."

Because it gives you the chance to get into BIG trade opportunities…

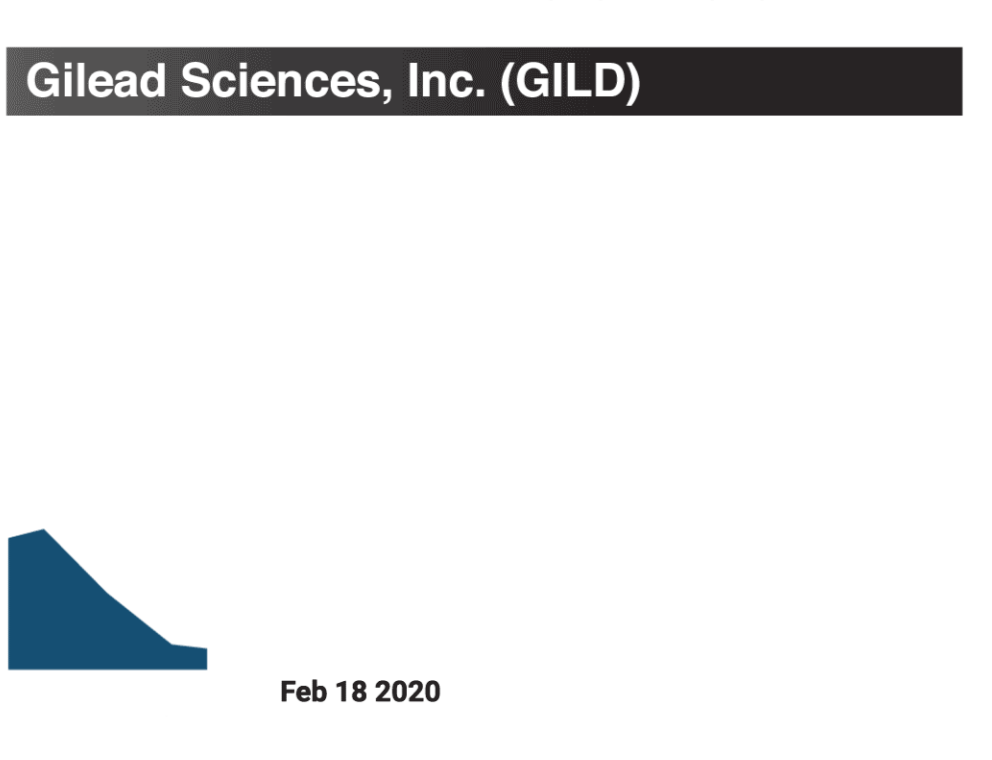
Every.

Single.

Week.

And it couldn't be easier.

Simply get in when I see the indicator spike…



Wait for a possible groundbreaking announcement to be published…

Then potentially cash out with a big payday.

I promise you've NEVER seen anything quite like this. And I'll prove it to you in the next two minutes.

Because while this message could send shockwaves through Wall Street…

It could also unlock some of the most impressive gains you'll ever see.

Readers from across my research services have written in to tell me…

> `Made 140% on TGT - In June 3rd, out June 4th! $1,160 profit overnight!`

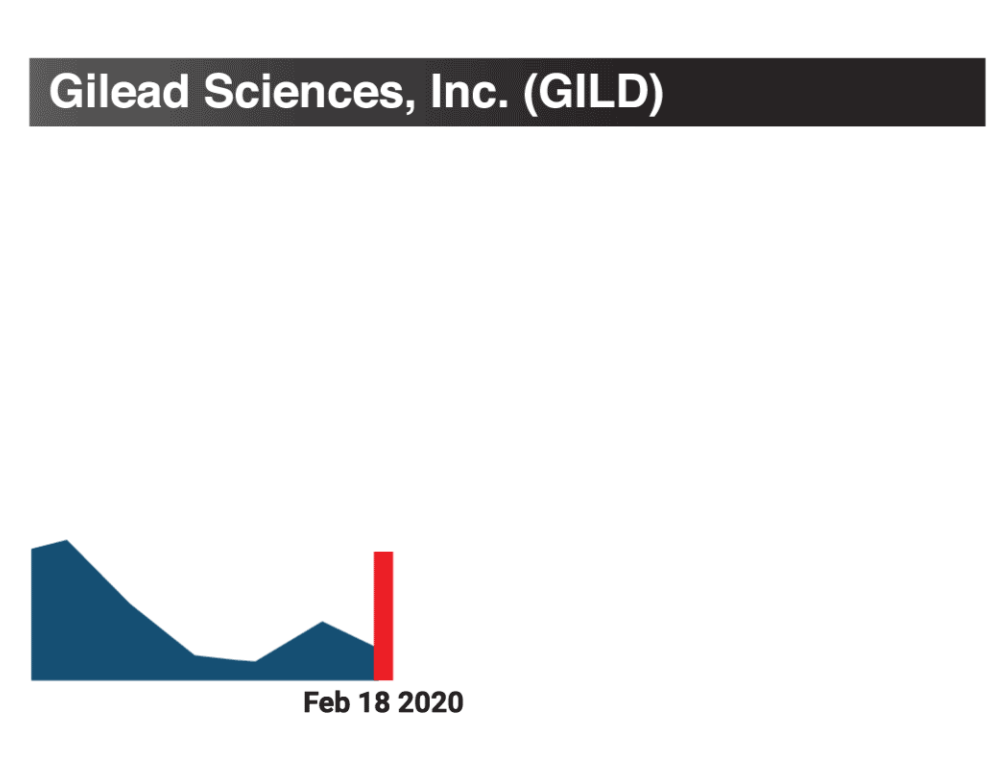
> `"250% in just 3 days! WOW!!!"`

> `"I bought on November 1st and cashed out on November 6th with $30,000 (a $20,000 profit) Thanks for the recommendation!"`

For example, look what happened with health care company, Gilead Sciences this past February.

For months shares had gone nowhere…

Then the weekly payday indicator… or the WPI, for short… registered a spike on February 18.

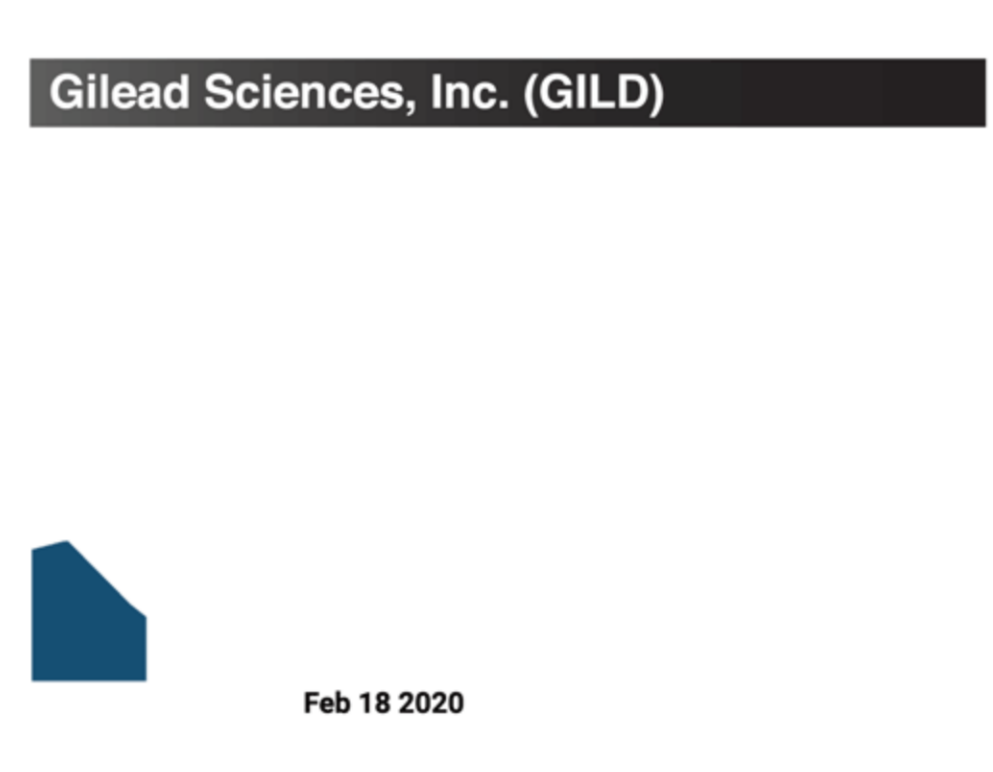


That day, I sent out an alert to my readers…

And six days later… BOOM!

A senior official from the World Health Organization reported that Gilead's experimental drug may be the best bet for a coronavirus treatment.

Shares SKYROCKETED.



Three days after my "buy alert," my readers had the chance to lock in a quick 49% gain…

Then after the WHO's announcement…

My readers saw the other half of their options trade spike to 155%!

In just six days!

Now keep in mind…

NO ONE was supposed to know about the news before it was public.

People only found out about it *after* the World Health Organization made the announcement.

In other words, it should have been IMPOSSIBLE for everyday investors to profit from this announcement.

But incredibly, the WPI "knew" something was about to happen in Gilead…

And it would have tipped me off about impending BIG news…

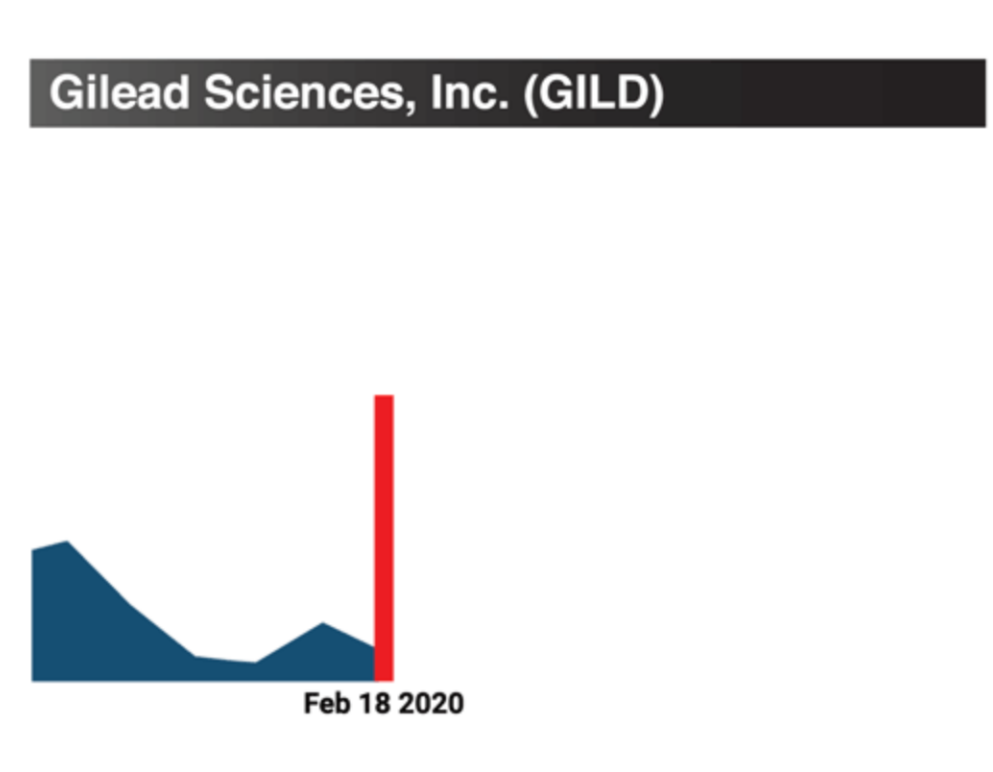
Exactly SIX days in advance.

Giving you the opportunity to collect a BIG gain in mere days using my strategy!

Isn't that exciting?

Imagine investing $1,000 on a Tuesday, when the WPI first registered the spike…

And walking away with a grand total of $2,025 on the following Monday with a 102% gain!



6 Days Later
$1,000 turns into…
$2,025

That's the power of the weekly payday indicator…

It can allow you to target a big payday…

Week after week.

All by predicting big news before it actually happens.

And it's easy enough to use, even if you've never placed an options trade in your life…

Get in when I see the spike…

Then get out when the potential news hits the public…

It should go without saying though…

No one can perfectly predict the markets. Investing carries risk, and you should never bet more than you can afford to lose.

But with the speed of this strategy, I'm showing you with some of our top-performing examples, that there is no need to tie up your hard-earned money in the volatile markets.

And no need to suffer through market crashes.

Simply by looking at these spikes…

You can get ahead of big market news BEFORE it becomes public…

I'm talking about getting ahead of…

- Mergers and acquisitions news…
- Surprise earnings announcements…
- Food and Drug Administration (FDA) approval of a new drug…

And any UNEXPECTED news that might trigger a jump in the stock…

News that only insiders can possibly know about.

Yes, I realize this is an unfair advantage…

But it's also 100% legal.

And It's the ONLY Way I Know for the Little Guy To Get IN on Big Market Moves… *Before They Happen!*

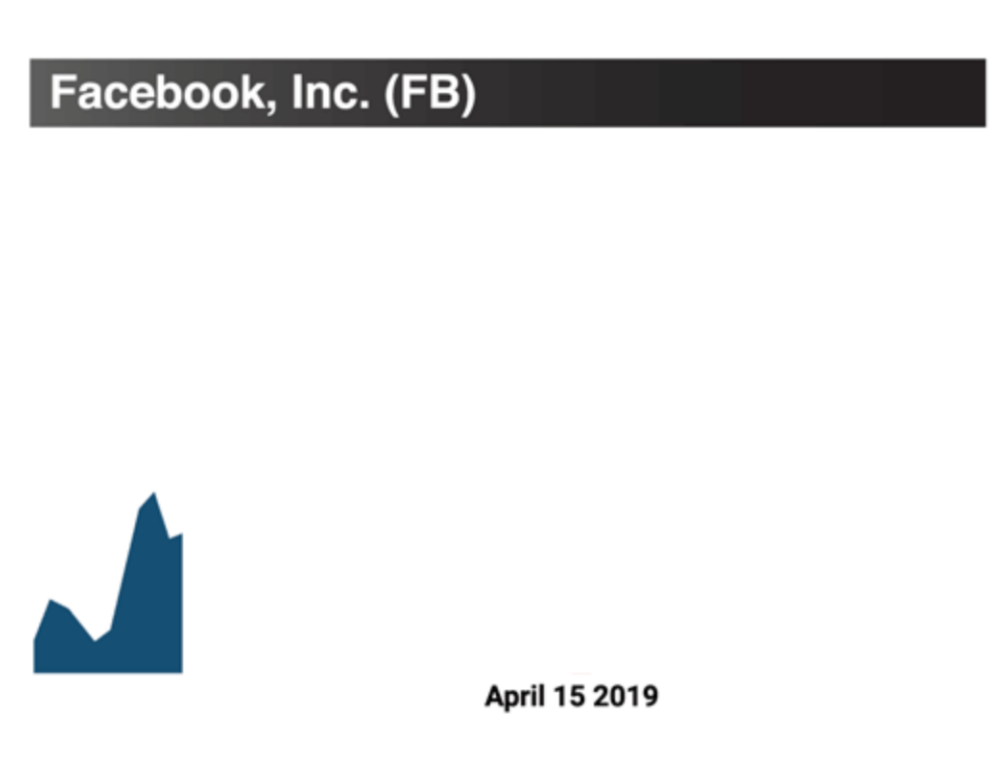
Just look what happened with shares of Facebook last year…

April 15, 2019, seemed just like any other day for the company…

Nothing special was going on.

But behind the scenes, something unusual happened that day…

The WPI registered a spike! Take a look…



Then, just 10 days later something incredible happened…

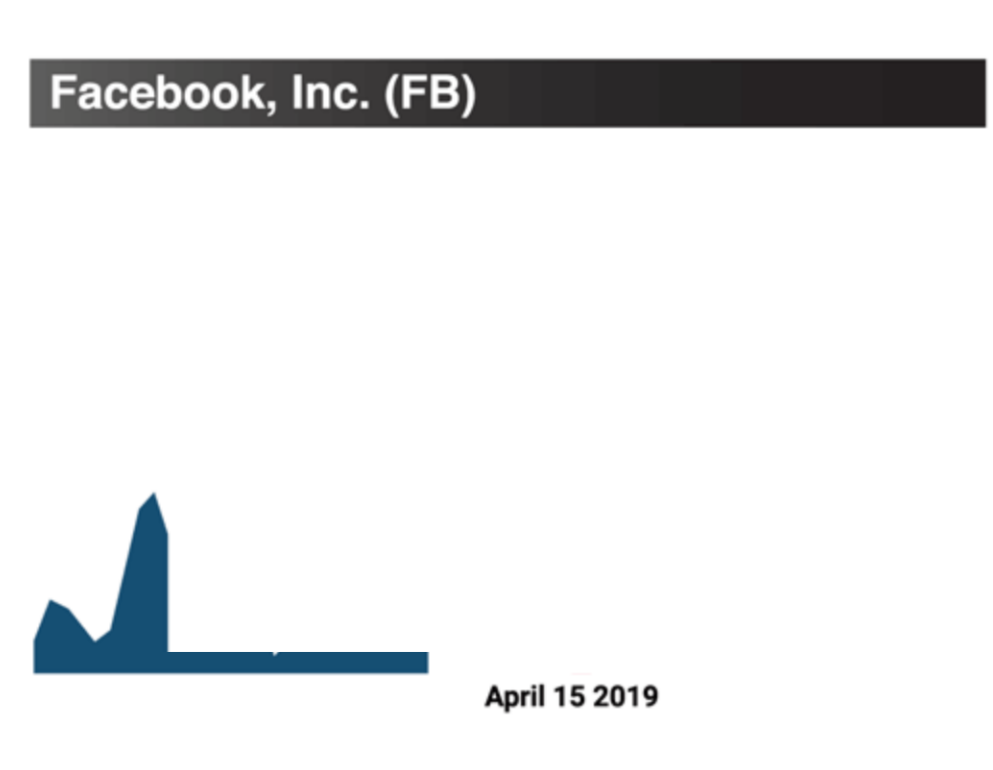
It was announced that Facebook had beaten ALL Wall Street estimates on sales, monthly active users and average revenue per user in their quarterly earnings call…

INVESTING

Facebook shares surge as Wall Street analysts rave over earnings: 'What a start to 2019'

As soon as the earnings were released, shares of Facebook instantly skyrocketed…

Catching everyone in the market by surprise.



I mean, unless you worked for Facebook…

There was no way of knowing this would happen.

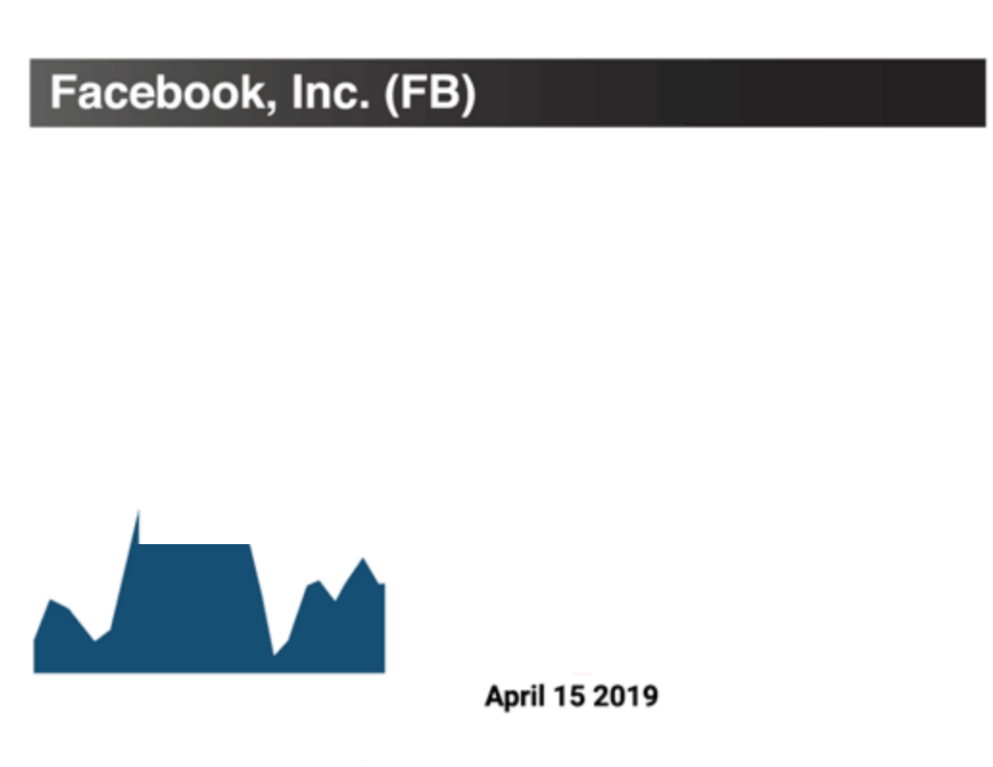
But for reasons that will become clear soon…

It was like the WPI "knew" something big was about to happen…

And when the spike appeared on Monday April 15th, I sent an urgent "buy alert" to my readers…

Then… Just a month and 2 days later…

My readers had the chance to lock in an options gain of 81%!



Turning every $1,000 into a total of $1,807.

32 Days Later
$1,000 turns into…
$1,807

Do you see now why I call this the weekly payday indicator?

Simply get in each week when you see the spike…

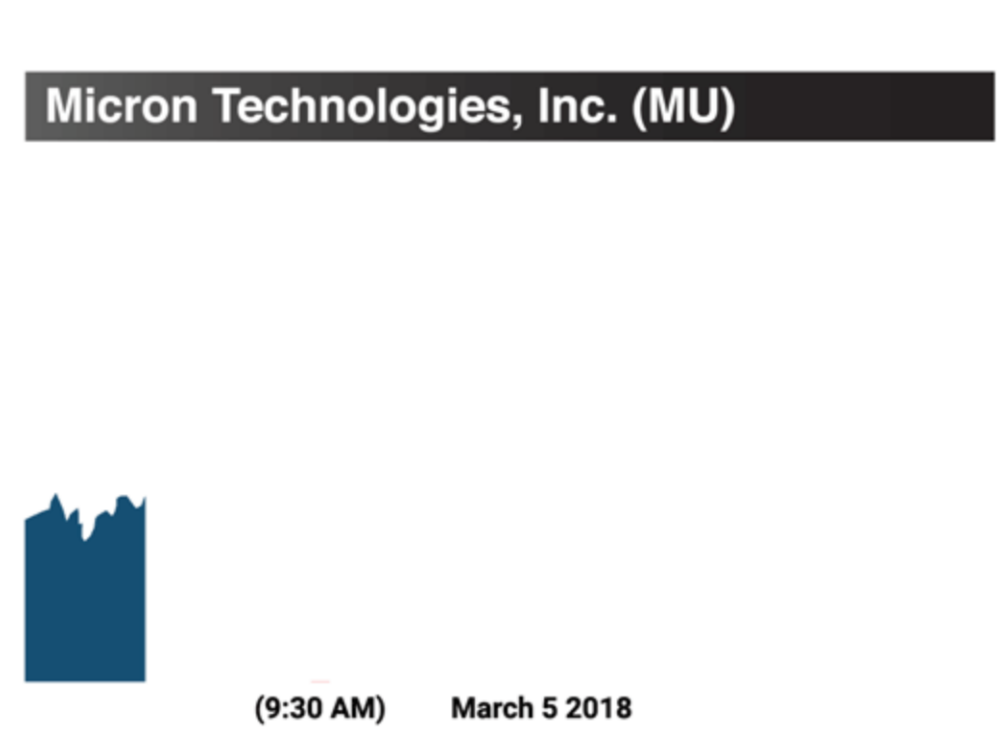
And potentially cash out with a gain in about 30 days on average.

You're in.

You cash out.

Sometimes You Can Literally Be In and Out With Your Money in Just One Day!

For example, on March 5, 2018 the WPI registered a spike for shares of Micron Technology…



Once again, at that time there was not much going on with the company…

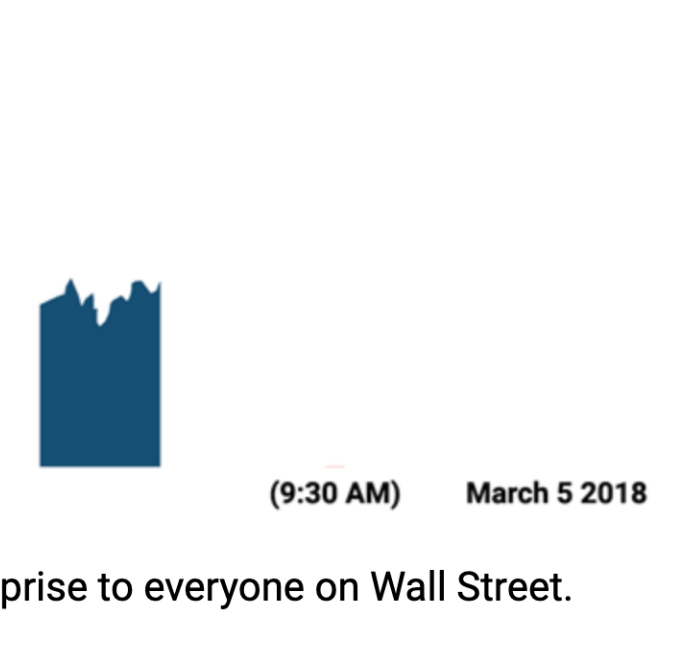
Shares had actually been left for dead after trading sideways for months.

But on the morning of March 5th, I sent a "buy alert" to my readers…

And the very same night something amazing happened…

A famous stock analyst put out a major BUY recommendation.

And shares exploded higher.



This was a surprise to everyone on Wall Street.

But again, the WPI "knew" something big was about to happen…

And for anyone who had gotten my buy alert…

You could have turned that surprising news into a big payday…

Locking in gains of 50% in mere *hours on only half the options trade*…

And then closing out the rest of the trade for 111% gains the very next day!

Isn't that amazing?

I'm talking about investing $1,000 on March 5…

And walking away with a grand total of $1,808 the very next day! A gain of 81%!

Just 1 Day Later
$1,000 turns into…
$1,808

Of course, not all gains will happen this fast.

On average, we are looking at a hold time of just 30 days.

And when you combine the WPI with the power of **options contracts…**

There's an opportunity for you to target a big payday every week.

If you're hesitant about options, or have never heard of them before, I'll explain more about them in just a moment.

And why you're in very good hands when it comes to these kinds of trades.

But first…

Imagine What Life Would Be Like When You Have the Chance To Target BIG Trades… Every Week!

Simply get in when I see the spike…

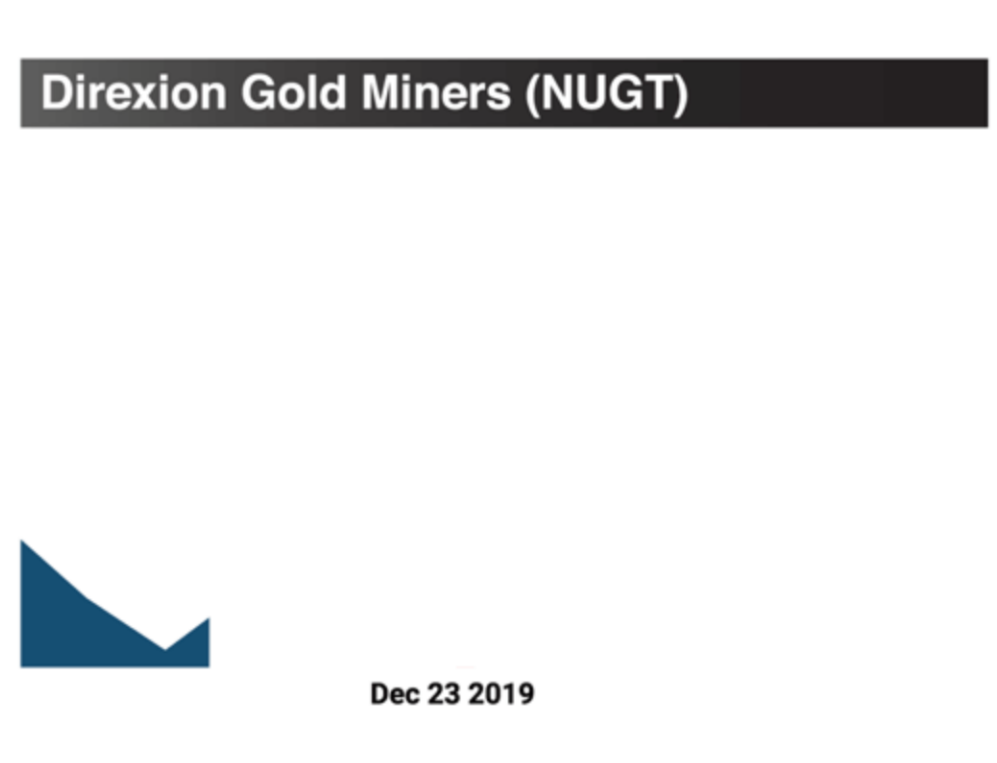
Get out a few days later with the potential for a big payday!

Just look what happened with shares of Direxion Gold Miners.

The WPI registered a spike on December 23 2019.

Three days later… BOOM!

You could have turned $1,000 into a grand total of $1,750!



Same thing happened with internet giant Twitter.

On July 1st the WPI registered a spike.

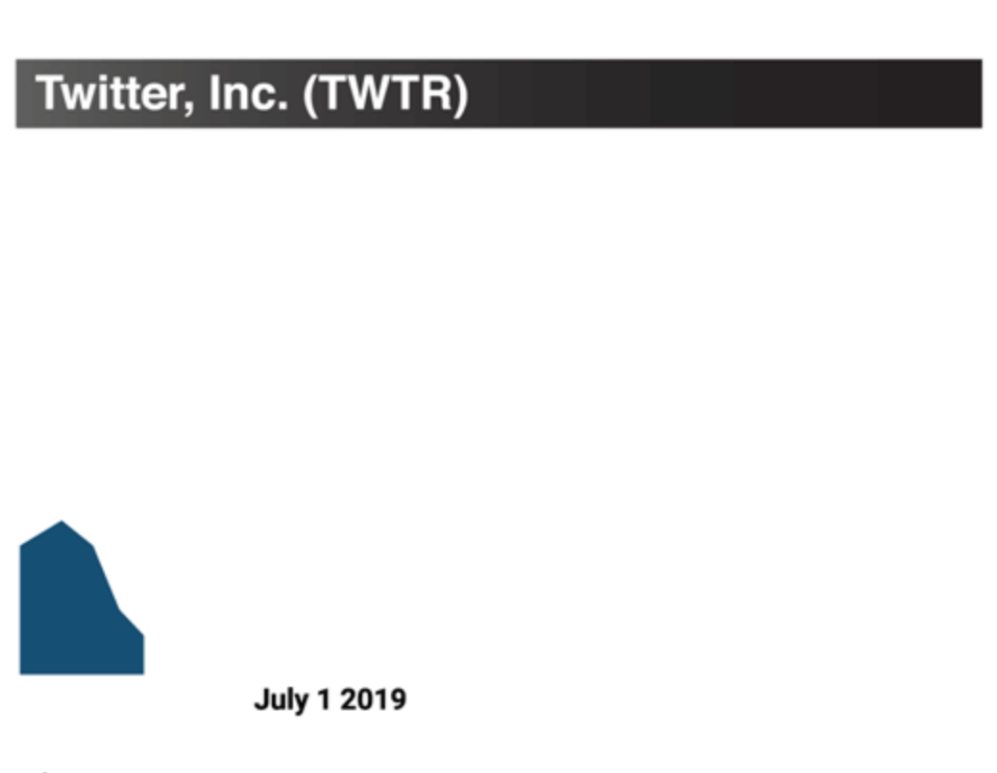
Only 2 weeks later… BOOM!

I told my readers to close out half their trade for a 50% gain.

And just 12 days after that… They were able to lock in a 100% gain on the rest!

Starting with just $2,500…

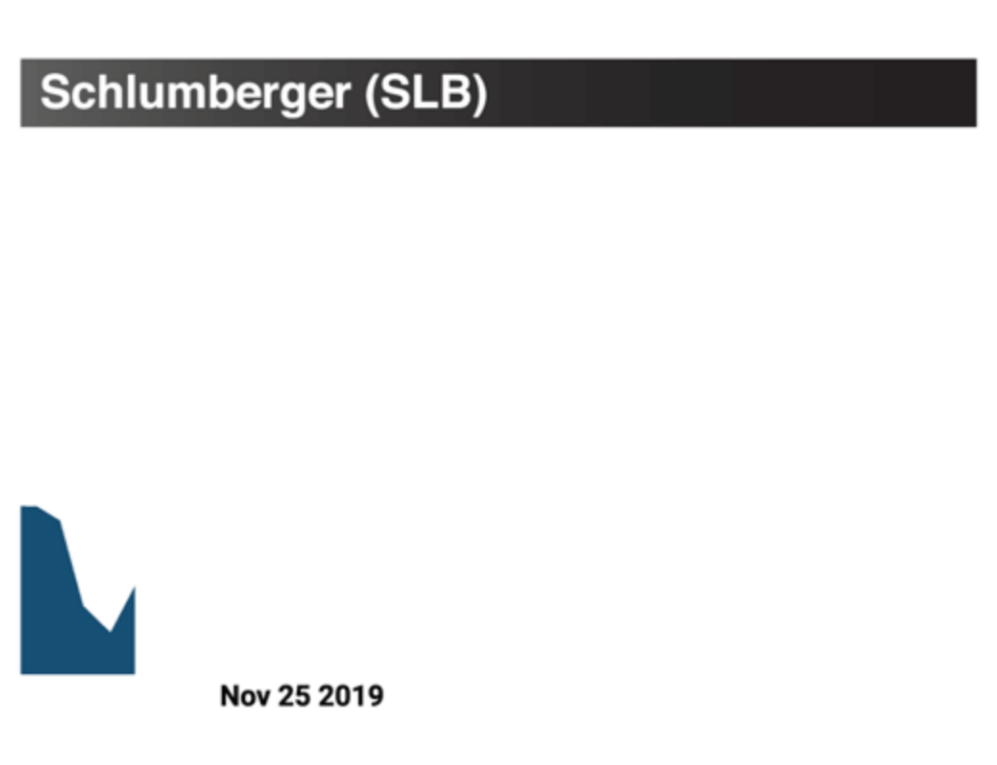
You could have walked away with a grand total of $4,375!



On November 25, for example…

The WPI also registered a spike for Schlumberger…

Seventeen days later, and BOOM!



Can you imagine if that happened to you?

With that extra cash you could spend during your golden years, you could do more of the things you love…

Remember, because you're in and out in an average of 30 days…

You don't tie up your money in the markets long term.

And as you might know… In the long term, the house always wins.

But when you're in and out in 30 days on average, with my win rate of 53%...

YOU can become the house!

Of course, keep in mind, these are some of my best performing recommendations. Not every play will turn out like this.

While options give you the chance to "supercharge" your investment, there's also the chance you could lose it all as well.

And let me tell you this…

If You've Had Problems With Other Indicators or Trading Systems in the Past… It's NOT Your Fault

That's because every other system on earth that I'm aware of is based on price data.

They only trigger a "buy" signal when the price changes... AFTER the big moves.

By the time you get in, it's already too late.

The breakthrough WPI indicator you're about to see is totally different…

It's a powerful way of making money.

It's all about getting AHEAD of everyone else…

And having the chance to collect a BIG payday!

That's why it's protected by U.S. Patent Application #D0365193.

Ask yourself…

Of all the other systems you've tried before…

How many of their creators went through the legal process…

The time invested…

And huge fees it takes to file a patent?

Here's a Different Way to Think About This

Imagine someone has just lit a match…

And think about what happens to the match in the next few moments.

Because that's how valuable information flows in the marketplace.

When there's new information about a big event…

An acquisition… FDA approval… earnings surprise, etc…

Only a handful of people know about it…

People who are directly involved with the situation.

They're holding a match that has just been struck.

The information they have is red hot.

Then the information starts to leak out…

The insiders start passing the burning match to others…

First to people close to the insiders…

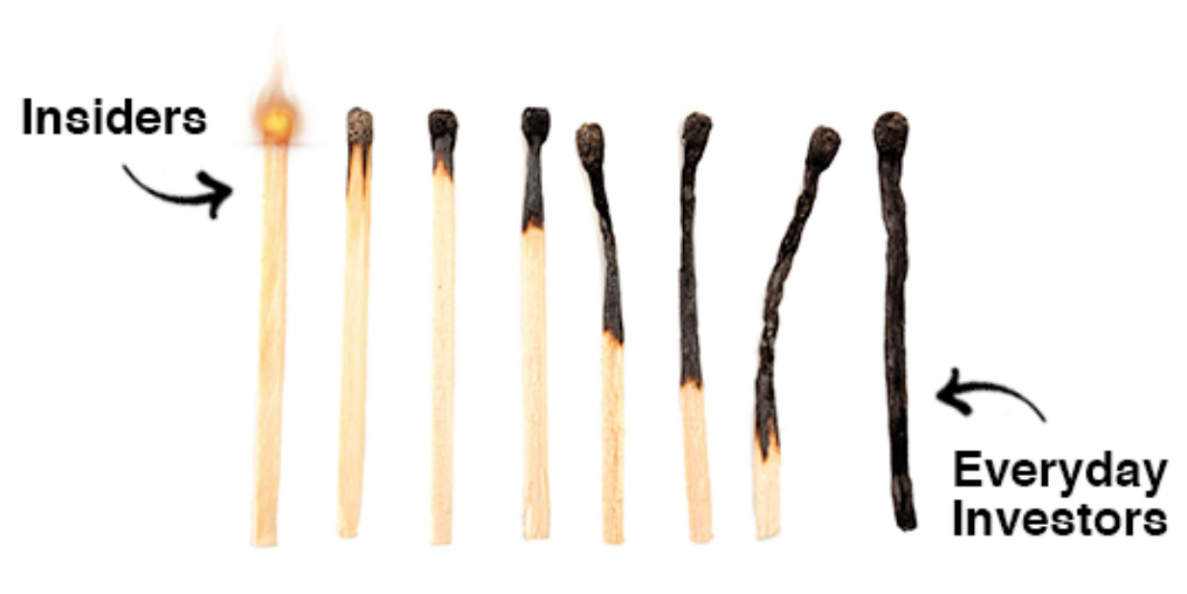
Maybe friends and family members…

Then to brokers… and to CNBC and other news outlets…

By the time a public announcement is finally made…

The match is completely burned.

There's nothing else left.



The information is worthless…

Because the stock has already popped…

And the big money has already been made.

It's simply too late to profit from the news.

Remember that famous line from the movie *Wall Street*…

When trader Gordon Gecko said…

"You're either on the inside or the outside"?

Well, everyday investors like you have always been "on the outside"…

We only got the burned stick.

I'm sure you've noticed this too, right?

Only insiders with access to special information were able to profit from those BIG one-day moves.

The little guy was simply left out of those big gains.

That rigged game ends today.

After 16 Years of Secrecy, The Power of This Patented Indicator Is Finally Available to Everyday People Like You

Again, as I mentioned earlier, my name is Alan Knuckman.

I started my trading career in 1991, when I joined the Chicago Board of Trade right out of college.

And I've spent the last 30 years on the trading floor…

Working through the ranks… from being a runner, phone clerk and broker…

All the way up to becoming a professional trader…

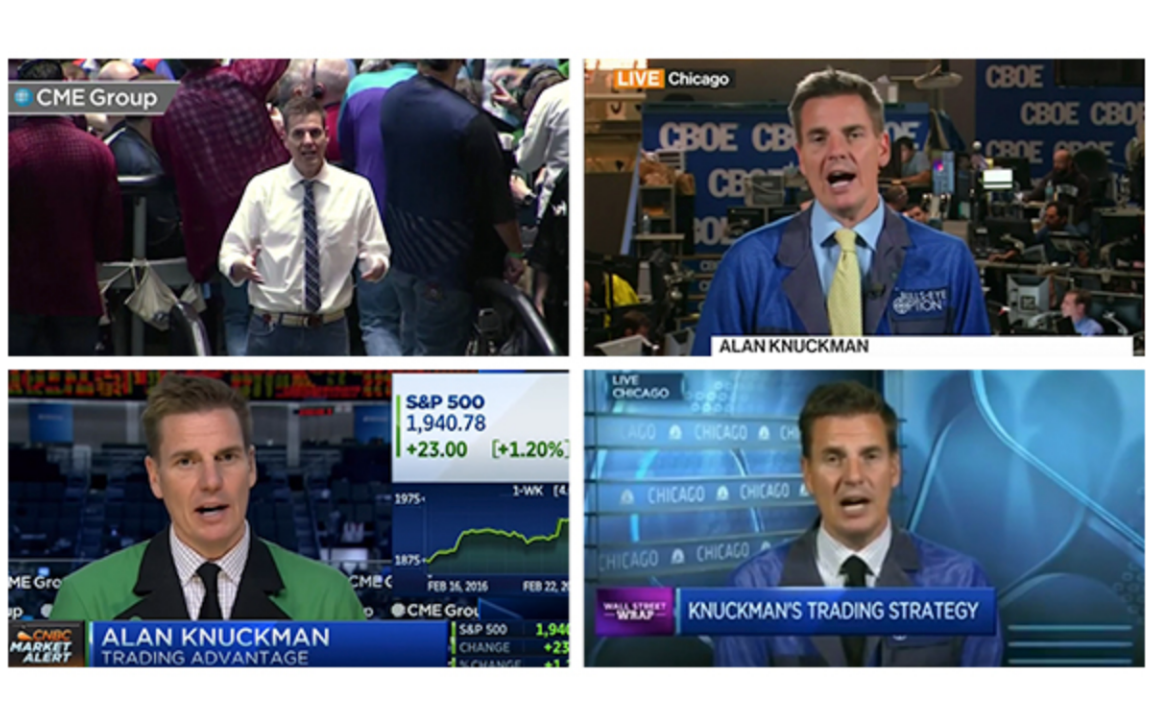
And a member of the Chicago Board of Trade…

Where I traded my own account on the floor…

And competed with the world's best traders.

You might have seen me on Bloomberg, CNBC, Fox Business and other major financial news…

Where I'm frequently invited to share my views on the market.



But here's the thing…

I've never talked about this patented indicator on national television…

Not even with my own family members.

And the reason is simple…

This was confidential information I wasn't allowed to share with anyone…

Let me explain…

An Indicator Cloaked in Secrecy for 16 Years

You see, I didn't develop this indicator myself.

I was just lucky enough to be at the right place at the right time.

My lucky day came a couple of years ago…

When I was teaching moneymaking strategies to everyday investors at a trading seminar.

During the event, I met another instructor called Mike (name changed for privacy reasons).

Like myself, he was a professional trader…

And during the cocktail hour, he told me about a proprietary indicator he started developing around 16 years ago…

One that could help tip him off about big market news BEFORE it became public.

I was skeptical at first.

After all, I spent 30 years working in the heart of the largest options exchange in the world…

And I had never heard anything like that.

But then he showed me all the proof you're about to see…

His patent application…

And chart after chart after chart… proving the indicator worked.

I was intrigued…

But What Really Blew Me Away Was the Results of His "Beta Test"

You see, Mike had already shared his secret with a small group of 432 beta testers back then.

Like I mentioned before…

This was such an exclusive group that it was more likely for you to be struck and killed by lightning…

Than to be accepted into this beta test group.

But here's what's important…

These beta testers are everyday folks just like you…

And the results had been amazing.

He even showed me a small sample of dozens of "thank you" notes he had received…

Notes like this one from Paul Gertz…

> "The [WPI] is simple and it's working… Made about $2,300 or 230% in ten days and I'm still just learning how to use [the power of] it."

Or this note from Sara Sanders:

> "Using the indicator, 9 out of 10 trades have been correct for me. The advantage you have in winning the trade is SO MUCH greater than just guessing/hoping!!"

Or Fiona Hunter, who says:

> "Got a 60% gain in 9 days. Easy money!"

And Hye-Min Jang said:

> "You need to put in the work, but once you learn it, it's like having a crystal ball!"

Another beta tester, Devon McMannis reported…

> "I made $2,080, or 160% ROI in a single day. I don't know how it can get better."

Now these are some extraordinary stories from people who were navigating the WPI all alone on their own…

They didn't have a veteran trader like me picking the best trade opportunities with expert analysis.

But could you imagine if even one of these gains happened to you?

Keep in mind, their results are not a part of Weekly Wealth Alert's track record. They just used the same strategy that I have access to. **My track record boasts an average hold time of 30 days and an average gain of 5.55%.** , if we saw 5.55% every month for a year, Which, if we saw 5.55% every month for a year, equates to an average annualized return of 67.5%! *Crushing some of the best hedge fund managers on the planet!*

But Mike's "beta test" turned me from skeptic into believer…

It Showed Me the WPI Can Find the Chance at MASSIVE Returns… Each and Every Week

And yet, despite Mike's amazing beta test results, I simply couldn't share this information with anyone.

You see, I became good friends with Mike, the creator of the indicator…

Me and Mike, the Inventor of WPI

I not only joined his beta test group…

But he also brought me into his "inner circle"…

And asked me not to share this with anyone.

I couldn't blame him.

If you discovered something as powerful as this indicator…

Wouldn't you keep this to yourself and make a fortune?

For the sake of our friendship, I kept this secret to myself for years.

But there was something that always bothered me…

As someone who didn't grow up with a silver spoon in my mouth…

I knew it wasn't fair for the insiders to get richer…

While the rest of us feed on the table scraps in the markets.

That single fact ate away at me year after year…

Mike's indicator was the only thing I'd ever found that actually leveled the playing field…

So I made it my mission to convince Mike to open this indicator up to more everyday Americans.

I worked on him…

And worked on him…

Finally, for reasons that will become clear soon…

I convinced him to let me share it with my readers.

In fact…

You're Only Reading This Because of a Licensing Agreement Worth an Estimated $1.3 Million

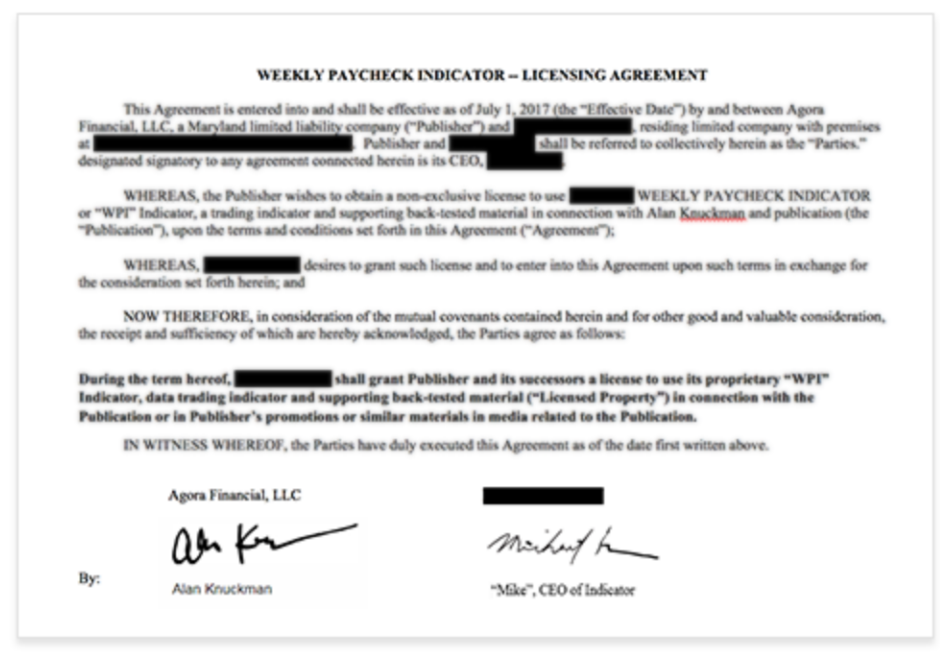
Mike only had two conditions in granting me this exclusive license…

We don't reveal his real identity

We don't share this with anyone else (because he doesn't want this patented indicator to gain publicity)

I agreed to those terms.

And we even signed a licensing agreement worth an estimated $1.3 million.
Take a look…



WEEKLY PAYCHECK INDICATOR – LICENSING AGREEMENT

This Agreement is entered into and shall be effective as of July 1, 2017 (the "Effective Date") by and between Agora Financial, LLC, a Maryland limited liability company ("Publisher") and [redacted], residing limited company with premises at [redacted]. Publisher and [redacted] shall be referred to collectively herein as the "Parties." designated signatory to any agreement connected herein is its CEO, [redacted].

WHEREAS, the Publisher wishes to obtain a non-exclusive license to use [redacted] WEEKLY PAYCHECK INDICATOR or "WPI" Indicator, a trading indicator and supporting back-tested material in connection with Alan Knuckman and publication (the "Publication"), upon the terms and conditions set forth in this Agreement ("Agreement");

WHEREAS, [redacted] desires to grant such license and to enter into this Agreement upon such terms in exchange for the consideration set forth herein; and

NOW THEREFORE, in consideration of the mutual covenants contained herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

During the term hereof, [redacted] shall grant Publisher and its successors a license to use its proprietary "WPI" Indicator, data trading indicator and supporting back-tested material ("Licensed Property") in connection with the Publication or in Publisher's promotions or similar materials in media related to the Publication.

IN WITNESS WHEREOF, the Parties have duly executed this Agreement as of the date first written above.

Agora Financial, LLC

[redacted]

By:

Alan Knuckman

"Mike", CEO of Indicator

Thanks to this agreement…

I'm the ONLY person in the world who can tell you…

Exactly everything you need to know…

To have a shot at pocketing the BIGGEST and FASTEST gains you'll ever see.

How fast are we talking?

Let me show you how my readers have done…

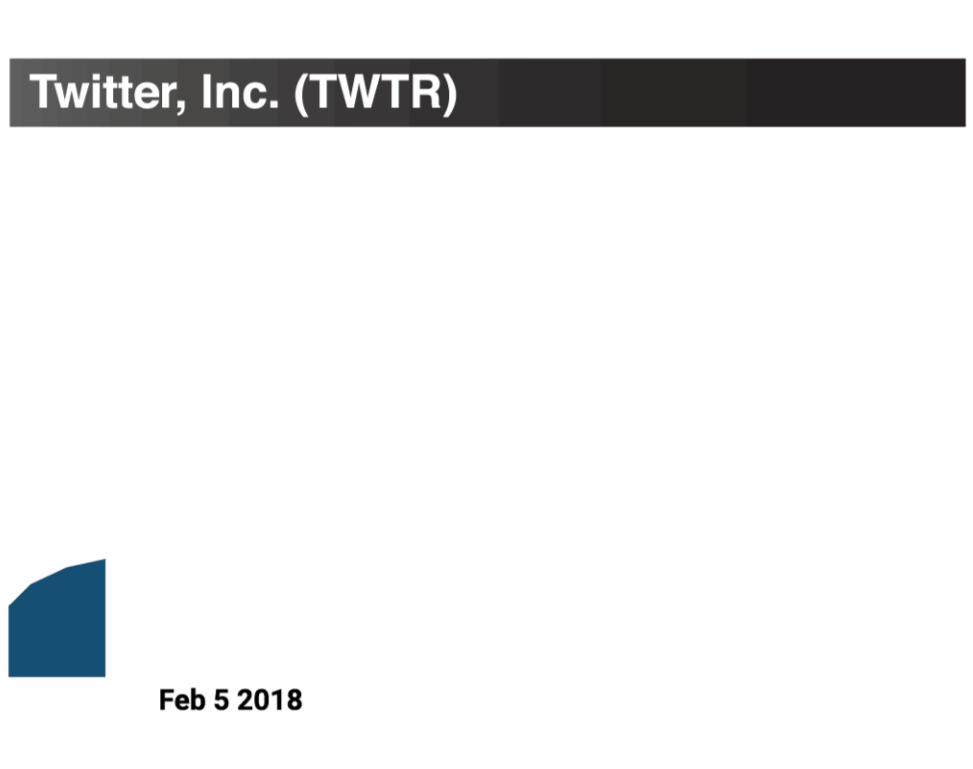
Because If You Can Get Into a Trade Just BEFORE a Major Public Announcement… You Can Make a Fortune in Lightning-Fast Speed

In February 2018, there was nothing exciting going on with Twitter.

In fact, shares had been going nowhere for the past couple of months…

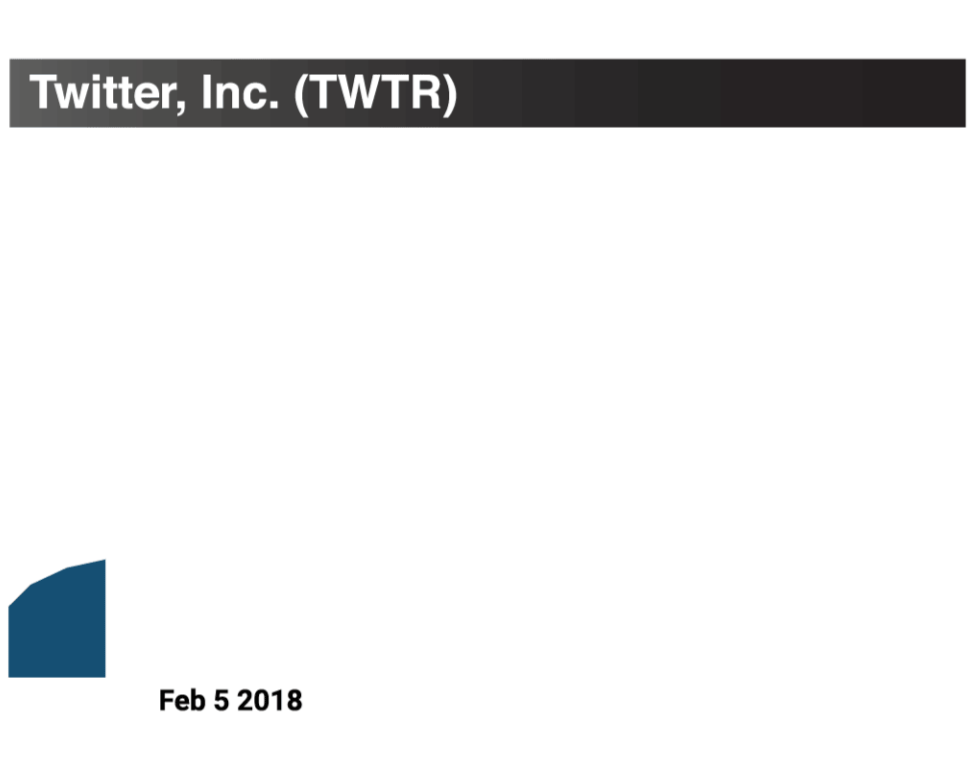
Then seemingly out of the blue…

The WPI registered a spike on February 5. Take a look…



Just three days later… BOOM!

It was announced that Twitter absolutely CRUSHED their earnings.

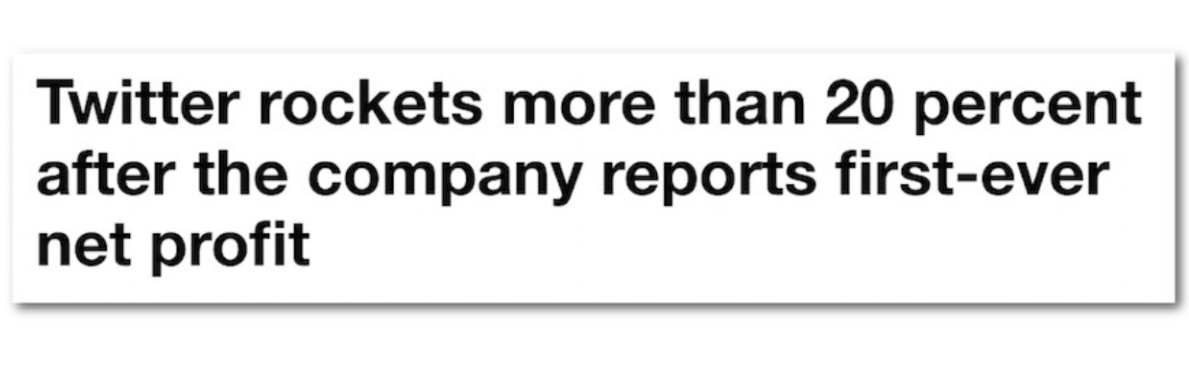


Twitter broke the news on February 8 at 7 a.m.…

By then, it was already too late for everyday investors to profit from the BIG one-day move…

That's because shares exploded in an instant… before the markets were even open.

As CNBC reported:



Twitter rockets more than 20 percent after the company reports first-ever net profit

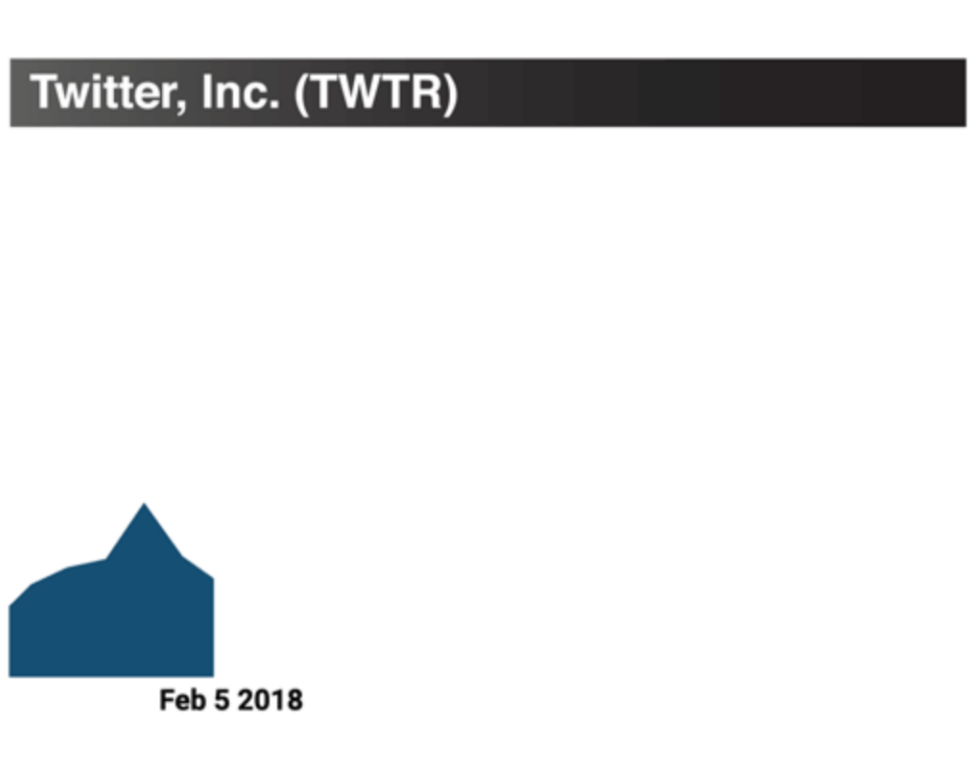
By the time everyday investors heard the news, the match was already burned.

But had you used my insights from the WPI like my readers at the time had the chance to do, you would have had plenty of time to take a position…

You'd have struck when the match was red hot.

Because the indicator registered a spike three days BEFORE the public knew about the news.

And using my strategy, you could have locked in a windfall of 195%. A truly exceptional gain for our track record.



In other words, had you invested $2,500 on February 5, when the spike appeared…

You could have cashed out with a BIG payday of $4,875 in just 18 days. *Straight profit!*

18 Days Later
$2,500 turns into…
$4,875

Double your initial capital to $5,000, and now you're walking away with a total profit of $9,750… in just eighteen days.

All this from a move that NOBODY could have predicted.

Only insiders knew this earnings beat was going to take place.

And yet, this indicator "knew" something big was coming.

Isn't that amazing?

Get In When I See a Spike… Wait for the News to Break… Then Get Out… Potentially With a BIG Payday!

It couldn't be easier.

There's no need to risk your money in long-term trades that go nowhere. **With my options recommendations, the maximum potential loss is the full premium paid to purchase the options contracts.**

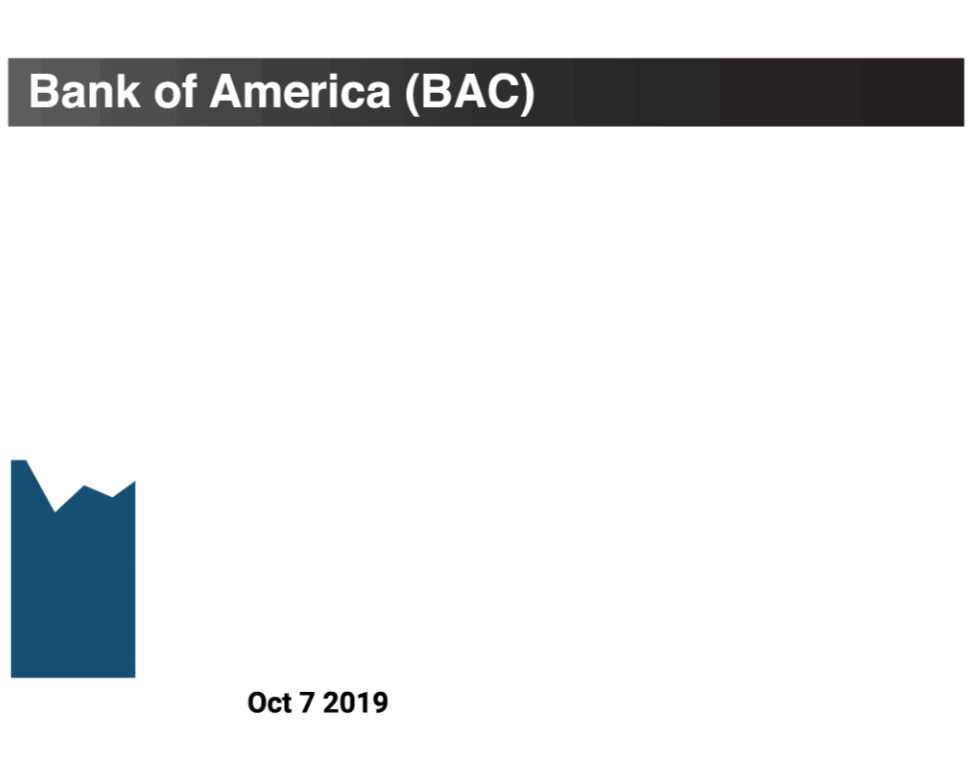
And remember…

This can work with any type of unexpected BIG news…

For example, shares of Bank of America also had been going nowhere for months.

Once again, there was no big news about the company at the time.

Then on October 7, 2019 the WPI suddenly registered a spike. Take a look…



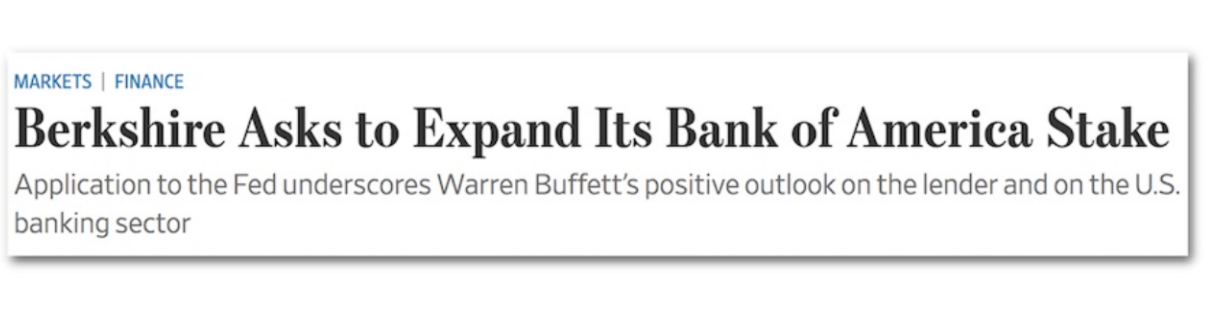
Bank of America (BAC)

Was something big about to be announced?

Unless you were an insider, it was impossible to know for sure.

But then just eight days later, something BIG did happen.

On October 15 at 8:32 p.m., *The Wall Street Journal* published the following headline:



MARKETS | FINANCE

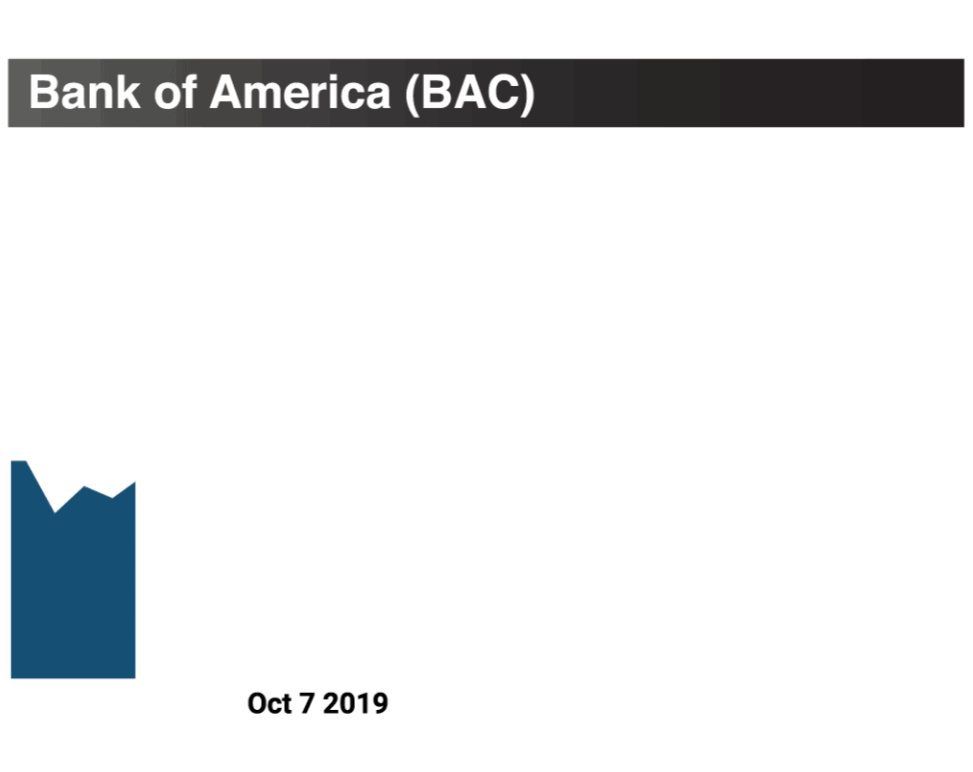
Berkshire Asks to Expand Its Bank of America Stake

Application to the Fed underscores Warren Buffett's positive outlook on the lender and on the U.S. banking sector

It was announced that the greatest investor of all time, Warren Buffett, was trying to expand his company's stake in Bank of America.

Shares exploded higher.

And most everyday investors missed out on this move.



Bank of America (BAC)

But had you followed the WPI…

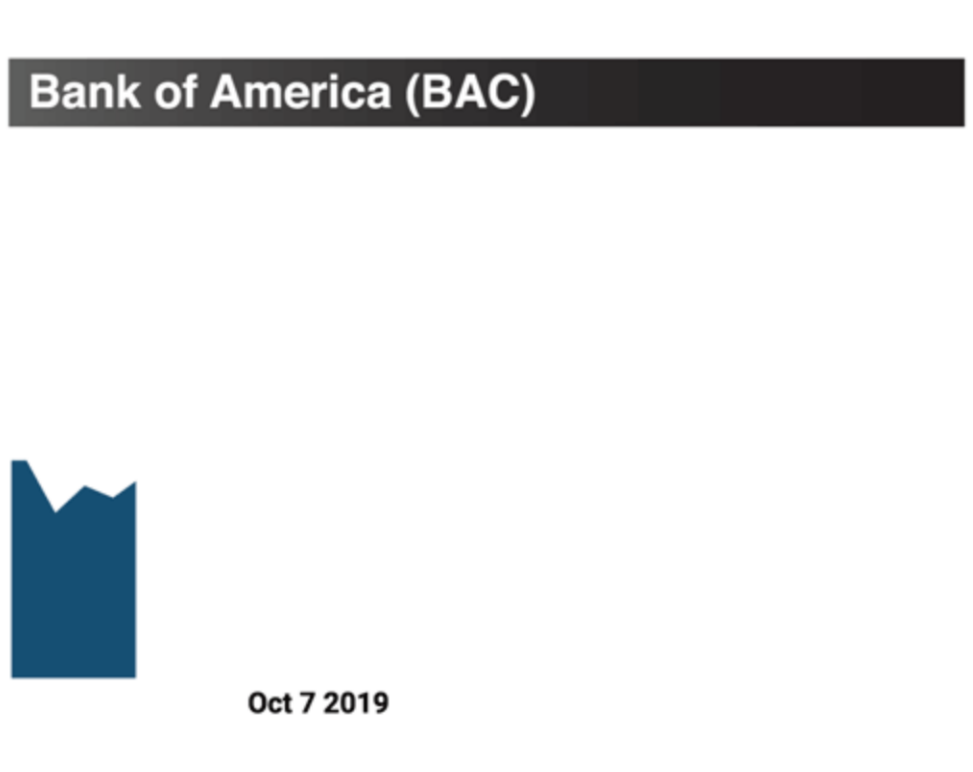
You'd have had red-hot information…

And you would have known eight days in advance that something big was likely about to happen.

And once again, if you were following my recommendations…

You could have locked in a 50% gain on half of your play when the news broke…

And watched the second half of your trade hit 100% another 10 days after that!



Bank of America (BAC)

That's pretty cool, right?

My readers think so too…

Simply get in when I see a spike…

Then potentially cash out with a big payday!

All while cutting your long-term market risk exposure.

Of course, no method in the world can be 100% guaranteed, no matter how good its record… You're still risking your initial investment, even with options.

The market can turn on a dime as I'm sure you know.

But that's exactly why we aim to get in and out so quickly! (Less than a month in any one trade on average)

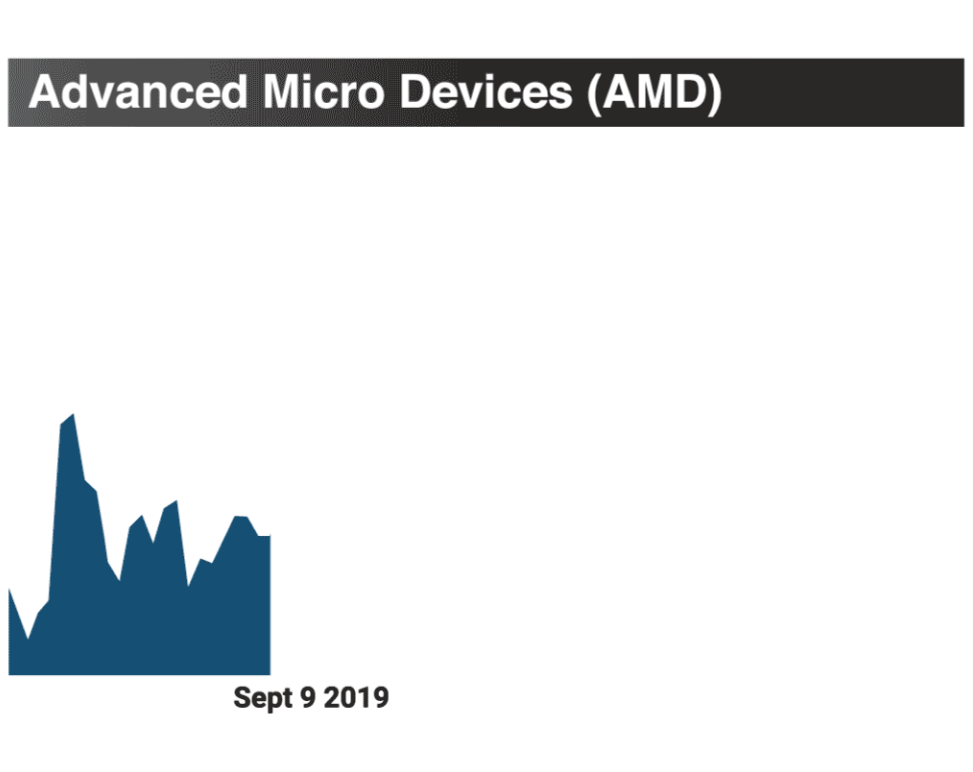
Here's one more example…

Shares of Advanced Micro Devices had been going nowhere for months…

And analysts were calling for a steep bearish sell-off.

Put simply, there was no reason for anyone to buy this company.

But then on September 9, the WPI registered a spike.



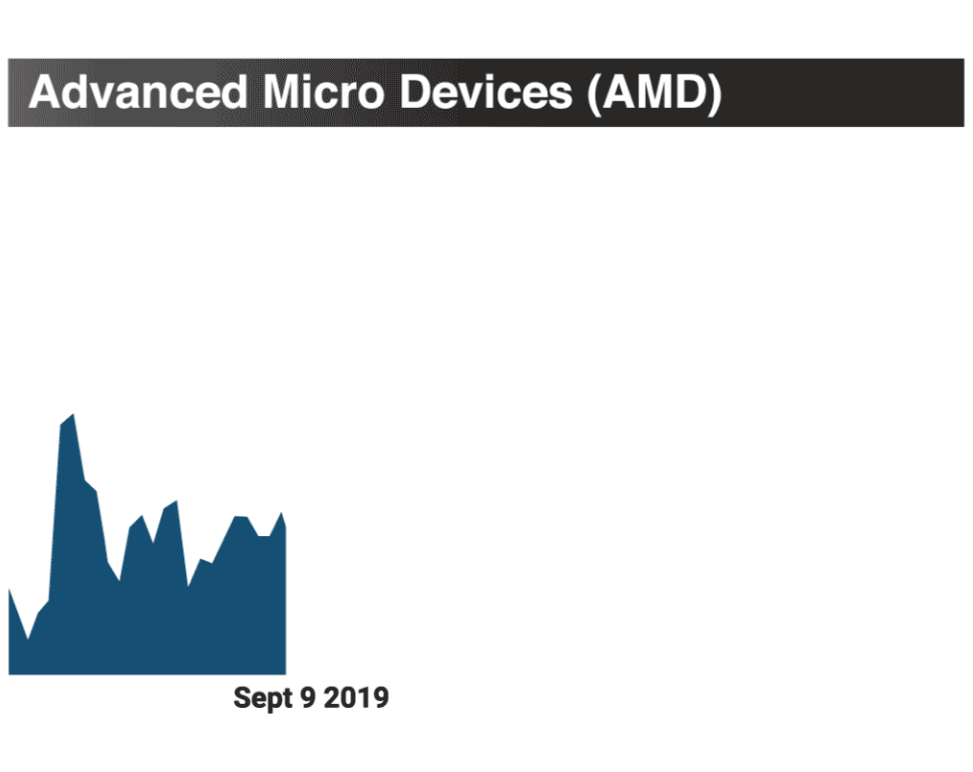
Advanced Micro Devices (AMD)

As you can tell by now, that meant something BIG could happen.

Sure enough…

A few weeks later the company surprised investors.

It was reported that AMD had the best quarter of revenue since 2005… nearly 15 years prior.



Advanced Micro Devices (AMD)

By the time the news was announced

It was too late for the everyday investor to catch this specific move.

The match was already burned.

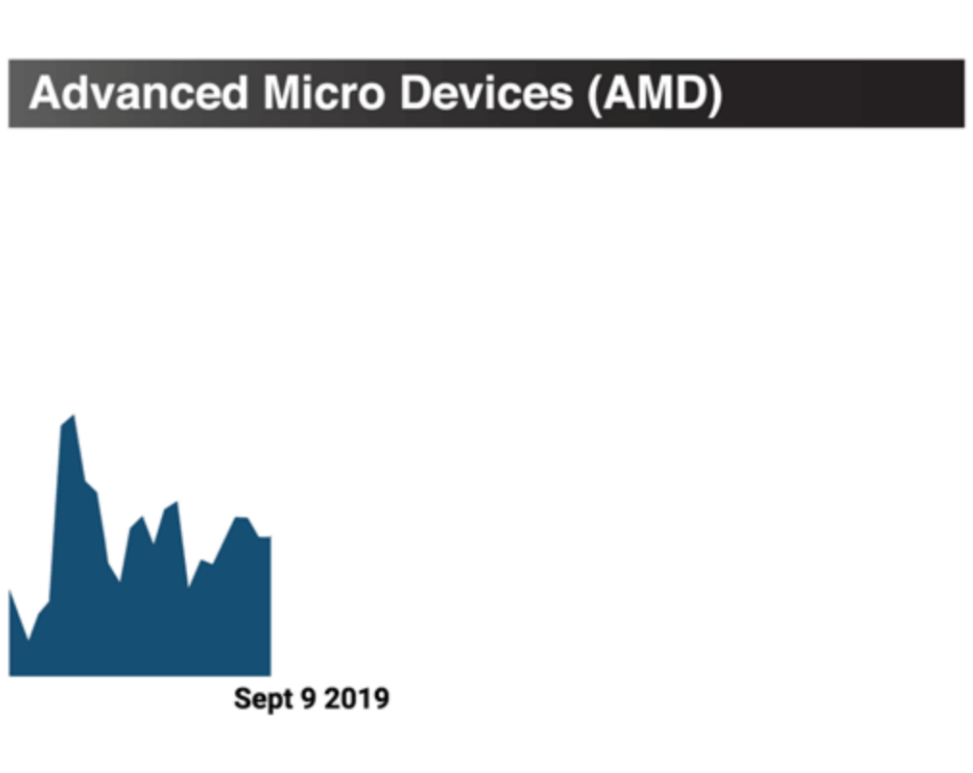
But had you followed my strategy…

Got in when I said to get in…

And got out when I told my readers to close out the last half of this trade…

You could have nearly DOUBLED your money with a 75% gain…

In just a matter of weeks! 57 days in all.



Advanced Micro Devices (AMD)

With my strategy, I like to recommend partial plays, aiming to close half of any position for 50% and then 100% or more with the remaining position.

Which is exactly what happened with AMD!

And it was all possible with the WPI.

Can you see now why this patented indicator is such a revolutionary tool?

The little guy finally has a chance to profit from these kinds of big moves…

The kind of moves that have been making insiders rich for years…

University of Southern California Professor Confirms: Wall Street Insiders Have a Clear Advantage Over the Little Guy

You see, we've all suspected that Wall Street was rigged against everyday investors…

But it's worse than we thought…

Kenneth A., from the University of Southern California, has published some shocking evidence!

His research shows that corporate insiders tend to tell family members and friends about upcoming corporate events.

And these insiders and people in their network place trades…

BEFORE you and I hear the news from CNBC or read it in *The Wall Street Journal*.

After analyzing 1,139 of those insider tips, he concluded:

- **Insiders earn substantial returns by trading in advance of specific corporate events…**
- The average return from the date of the original leak to the official announcement of the event is 34.9% over an average holding period of 21 trading days.

The same research also shows that insiders invest a median of about $200,000…

And walks away with a median *$72,000 per trade.*

Imagine how much money YOU could make if you had the foreknowledge of

- Mergers and acquisitions…
- Results of clinical trials…
- Regulatory announcements…
- Earnings results…
- CEO turnovers…
- And any big corporate event that might trigger a MONSTER one-day move.

That's exactly how these insiders make a quick fortune…

$72,000 per trade!

While they walk away with a fortune…

By the time you and I hear the news…

The match is usually already completely burned.

And unless you're a part of that insider network, there's no way for you to participate.

Does that seem fair to you?

Of course not!

The cards are clearly stacked against the "outsiders".

And that's why I'm so excited to share my research and the power of the WPI with you today.

It's the Only Way for the Little Guy to Level the Playing Field… and It's 100% Legal

As you've seen so far, there's ONLY one way to capture those BIG surprising moves…

You'd have to be "in" the trade BEFORE the news becomes public.

And since we're not insiders, there's ONLY one way I know for us do that… by using the WPI.

It's a one-of-a-kind indicator that allows me to track what insiders and people with special information are doing with their money…

In real time.

You see, a lot of these insiders are sophisticated traders who bet their money in the options markets…

Where they can use leverage to make the BIG money… in a matter of days.

Of course, when they place those trades they don't announce it anywhere.

A poker player would never reveal his hand.

But what if there's a way for YOU to know exactly what they're doing with their money?

While they don't reveal their trades, they do leave a trace behind in the options market…

And That's Where the WPI Comes In…

It uses a secret formula that tracks unusual behavior in the *options* market.

Of course, I can't reveal the entire formula here…

That's buried in the patent application files only.

But here's a simple way to look at it…

The indicator uses three main variables…

WPI =

X*Options Volume + Y*Open Interest

+ Z*Implied Volatility

#1 – Options volume (the number of options contracts traded that day)

#2 – Open interest (the number of contracts traders are currently holding)

#3 – Implied volatility (how much traders expect the stock to move in the coming weeks)

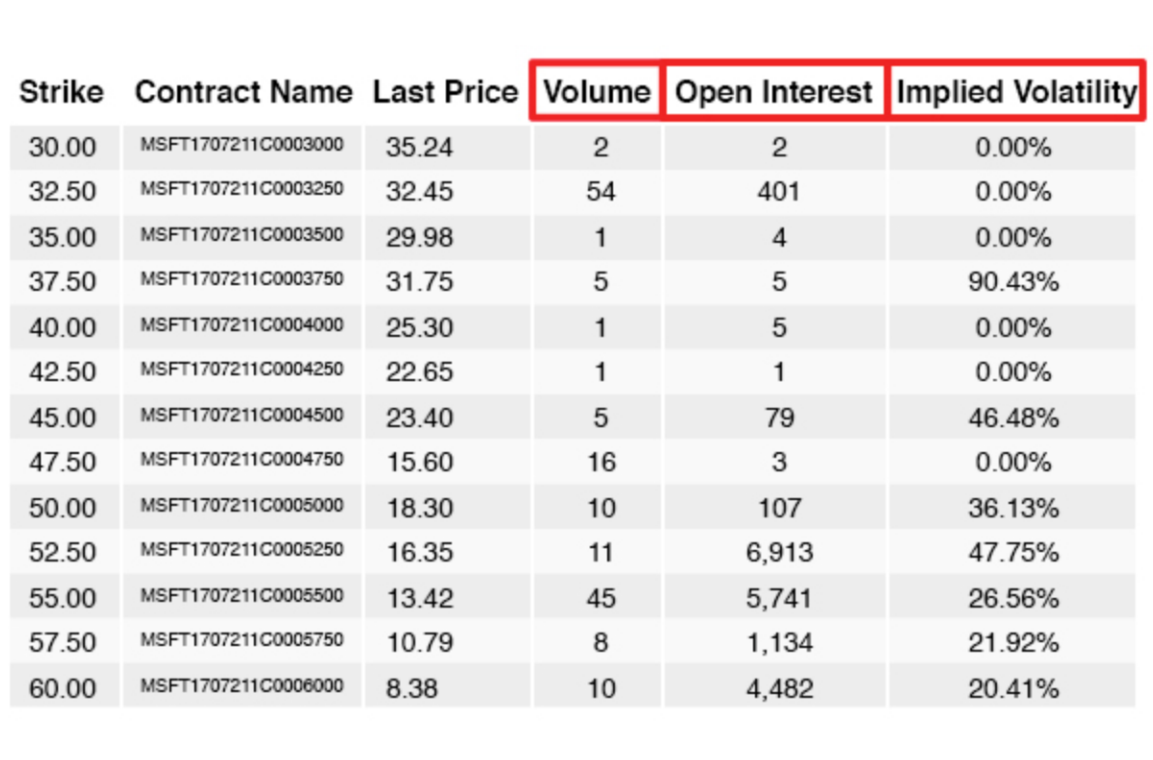
I know this sounds like mumbo jumbo…

But trust me… you don't even need to understand any of that in order to potentially profit.

That's because the WPI calculates everything for you.

Let me use shares of Microsoft as an example to show you how it works.

Traders call this "the options chain" for Microsoft.



Strike	Contract Name	Last Price	Volume	Open Interest	Implied Volatility
30.00	MSFT170721C0003000	35.24	2	2	0.00%
32.50	MSFT170721C0003250	32.45	54	401	0.00%
35.00	MSFT170721C0003500	29.98	1	4	0.00%
37.50	MSFT170721C0003750	31.75	5	5	90.43%
40.00	MSFT170721C0004000	25.30	1	5	0.00%
42.50	MSFT170721C0004250	22.65	1	1	0.00%
45.00	MSFT170721C0004500	23.40	5	79	46.48%
47.50	MSFT170721C0004750	15.60	16	3	0.00%
50.00	MSFT170721C0005000	18.30	10	107	36.13%
52.50	MSFT170721C0005250	16.35	11	6,913	47.75%
55.00	MSFT170721C0005500	13.42	45	5,741	26.56%
57.50	MSFT170721C0005750	10.79	8	1,134	21.92%
60.00	MSFT170721C0006000	8.38	10	4,482	20.41%

It shows dozens of different options that are available…

Each with their own market data.

Notice the three columns on the left show their volume, open interest and implied volatility.

While this information is available to the public…

Most people have no idea how to use that data.

We're talking about thousands of data points.

And this is just for one stock.

Now multiply those thousands of data points by 3,671…

Because that's how many U.S.-listed companies there are out there.

And now we're literally talking about billions of data points.

That's the raw data the WPI uses to identify unusual activity in the options market.

The algorithm picks up when the options data moves out of its normal range.

For example, it might be normal to see an open interest of 6,000 or so contracts for Microsoft.

But if that suddenly jumps to 40,000 in one week, that might trigger a spike on the WPI.

Simply put, when the WPI registers a spike…

It means for some reason…

Sophisticated traders who might have insider information are betting heavily on the company.

That's how it can tip me off about BIG moves before they happen.

Because the truth is…

Someone somewhere knows about corporate events BEFORE you and I hear about it on the news.

And if you're still wondering how that's even possible…

Researchers from New York University might have the answer…

Research From New York University Has Confirmed the Predictive Power of Options Activity

Menachem B., from New York University, and two fellow researchers, examined option trading volumes 30 days BEFORE acquisitions news in the U.S.

After analyzing data for a 16-year period, he noticed:

> "For the target companies, we document pervasive directional options activity, consistent with strategies that would yield **abnormal returns to investors** with private information."

In plain English, he's saying you can make a ridiculous amount of money if you can spot this abnormal options activity…

Because it can allow you to potentially spot major news BEFORE the public knows about it.

And that's exactly what the WPI does.

But it's not just acquisitions…

Research from a now Stanford professor has confirmed unusual options activity can also predict surprising earnings announcements.

After examining the predictive power of options volume, Professor Lee concluded:

> "Option market activity increases by more than 10% in the four days before quarterly earnings announcements. We show that **the direction of this preannouncement trading foreshadows subsequent earnings news**."

In other words, by tracking options activity…

You can position yourself to profit BEFORE the earnings are made public!

Of course, no strategy times things perfectly 100% of the time. And there's always risk involved with any investment.

But this is the ONLY way I know of even having a chance at catching those big, surprising moves… week in and week out with a **53% win rate.**

It's really a shame this powerful indicator had remained a secret for so long…

But if you've missed out before, please don't beat yourself up.

Because today that all changes…

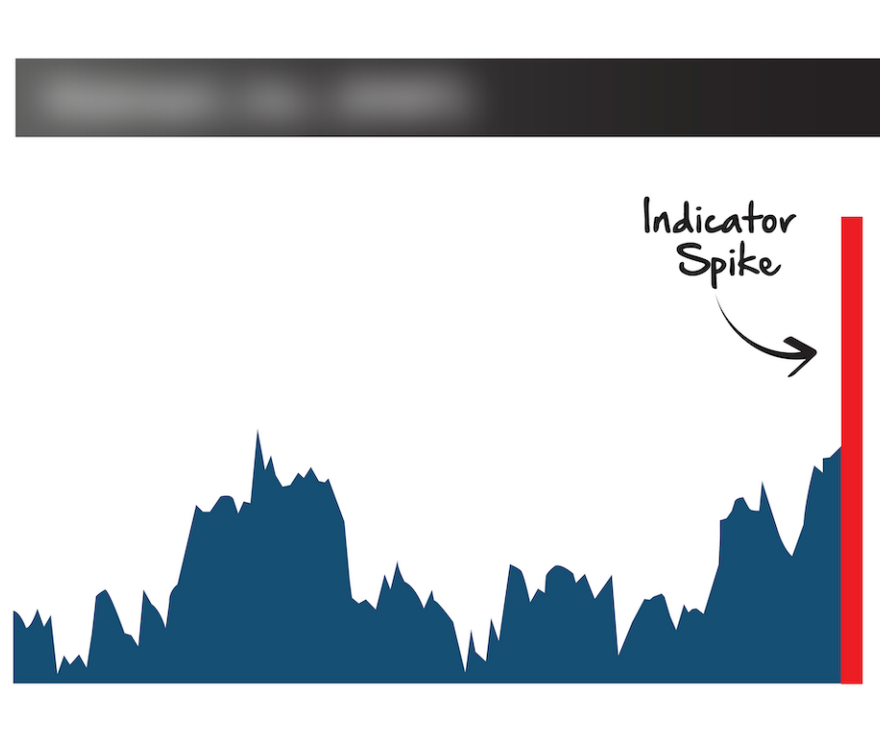
Starting right now… there are opportunities like these every single week for you…

As a matter of fact…

The WPI Has Just Registered a Spike… Get In Now Before You Read About It in the News

You see, the WPI has just registered a spike on one of the hottest companies around.

Take a look…



[redacted]

That means there's unusual activity in the options market…

And that someone somewhere could know something BIG is about to happen to this company…

It's time to get ahead of everyone else.

There's no time to waste.

To help you get started…

I'd like to send you a secure email with all the information you need to potentially make a fortune from this new WPI spike.

The subject line of the email will be:

Your Ticket to a Potential 155% Return in the Coming Weeks

In a moment, I'll show you how to get this E-mail in your inbox ASAP.

Then by this time next week, you could be looking at a massive payday.

Of course, I don't have insider information on this company…

So I can't tell you exactly what might happen…

What kind of news they might release…

Or when the big move might happen.

All we know is the WPI picked up unusual trading activity…

And, with the help of my analysis, I expect there could be some BIG announcement as early as tomorrow…

If that happens, this opportunity will be gone FOREVER.

Which is why I'd like to rush you this secure email right now.

And there's more…

Because this email is just a small part of a bigger project…

A project that started with that licensing agreement I mentioned earlier.

Here's How I Convinced My Friend Mike to Sign a Licensing Agreement

You see, Mike is considering launching his own hedge fund based on the WPI.

But once his fund is up and running, it will NOT be designed for everyday folks like you.

You'll have to be an accredited investor, with a net worth more than $1 million…

And like many hedge funds, he could charge 2% of assets and 20% of annual returns in investment fees.

What that means is that if you give Mike $500,000…

And he returns 100% during the year by using his patented WPI indicator…

You'll pay him $110,000 in fees alone.

$110,000 in fees!

Like I said… it's NOT designed for everyday investors.

That's when it dawned on me…

What if I could use the WPI to help everyday people make a fortune in the market…

While Mike used it for his high net worth clients?

I immediately called Mike to ask him…

Now, as you can probably imagine… Mike's a capitalist…

So everything comes down to a price.

After negotiating, we settled on an agreement that could cost us an estimated $1.3 million in licensing fees.

But it'll be worth every penny…

Because Now I'm One of the ONLY People in the World Who Can Use This Indicator…

And share the results with a small group of readers.

Specifically, Mike asked me to share this with no more than 1,000 people today…

Because he doesn't want the world to know about this.

Today we're opening the doors for 1,000 new members to my weekly research service, *Weekly Wealth Alert*.

Here's how *Weekly Wealth Alert* works…

STEP 1: First, every Monday I will be using the weekly payday indicator to identify unusual options activity across the U.S. markets…

STEP 2: I'll do my own analysis of each opportunity and find the one that could hand you the BIGGEST payday.

STEP 3: Finally, I'll send you an email every Monday with the exact instructions on how to profit… the exact setup, what options trade to make and when to take your profits, along with my analysis.

Because of the terms of our licensing agreement…

Weekly Wealth Alert is the only place where we make these options recommendations available.

So far the success has been astonishing…

Here's What Current Readers Are Saying About *Weekly Wealth Alert:*

> "Made 130% on half of my FB position in 10 Days" — ***Henry Ratcliffe***

> "I really enjoy your letters and hope you continue for a very long time. I am retired and this is the investment letter I've been looking for." — ***Ron Pfeiffer***

> "Made over 70% on TWTR in one day!" — ***Shoshanna Grayson***

> "Made a profit of $1,703 (207%!) on INTC!" — ***Eddie Barstow***
>
> *(We closed out this recommendation after 16 days for a 49% gain, but our reader didn't tell us how long they held theirs to get a 207% gain. We also don't know how much the reader invested, but we estimate this would have required a $822.70 starting stake.)*

> "Made over 200% ($22,000 in profit!) on Twitter! Thank you Alan!" — ***Mitch Ferris***
>
> *(Reader didn't specify time frame, but we recommended a partial play on Twitter with the first half of their position being closed out for a 225% gain in only 3 days.)*

> "The editor, Mr. Knuckman not only gives great recommendations but he portrays himself to me as someone who trully cares about us "non-wallstreeters" and strives hard to try and help us make some money." — ***Carl Horowitz***

> "For me, so far every trade has been successful and I've invested in about 14 trades. I've told my friends that I believe I finally found someone who cares. Even though I don't have a lot of extra to invest, I believe I'm on my way up. I've invested in a lot of other programs and because of Weekly Wealth I'm smiling once again. I even signed up for the Lifetime Subscription. Thank You!" — ***Jerry Eastwich***

> "My first trade… I made 200% in only 8 Days!" — ***Greta Niesz***
>
> *(This reader saw an exceptionally large gain, much larger than our own recommendation, which may be influenced by the fact that she entered her trade on a different day than recommended. Based on our recommendation, readers saw the chance at a 24.68% gain closed out on 5/10/18.)*

> "Made $1131 in two weeks on Twitter on a $1500 investment, a 75% return!" — ***Sophia Juniper-Grundy***

> "Alan Knuckman, you're amazing. At first I almost passed you up because I thought you were arrogant! Now I see you just have a confidence that I really like. I'll be honest, I belong to other newsletters and nothing compares. Keep up the good work Alan" — ***Richard Statler***

> "Before *Weekly Wealth Alert*, my trading account was down 77%. Then I came to know about your newsletter and after 4 months… It's up 171%! Thank you for everything" — ***Don Trouveau***

These are real people just like you…

Who are already collecting big paydays thanks to my research and the power of the WPI.

You can get started just a few minutes from now by becoming a subscriber of *Weekly Wealth Alert*.

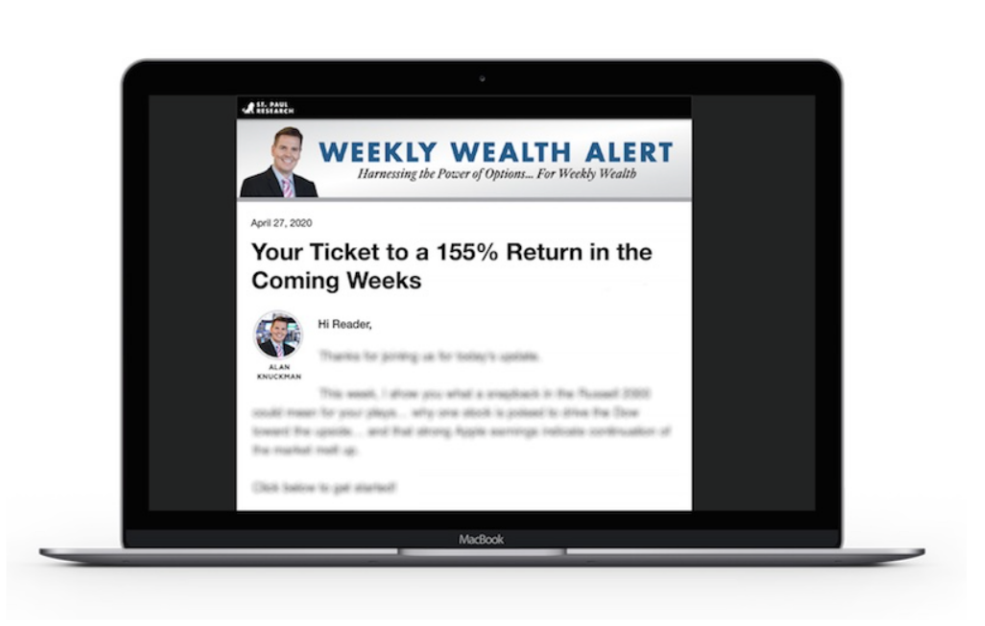
And to help you get started, I'll also send you a FREE report called ***The Weekly Wealth Alert Handbook.***

WEEKLY WEALTH ALERT
Harnessing the Power of Options… For Weekly Wealth
THE WEEKLY WEALTH ALERT HANDBOOK
ST. PAUL RESEARCH

It should take you less than 30 minutes to read it. Inside, you'll find…

- Why my strategy can actually be more profitable than how most people trade stocks.
- How to use the WPI strategy in your online brokerage account…
- How to make these kinds of trades within your Individual Retirement Account (IRA)…
- How to follow every single trade recommendation without risking a penny of your own capital on actual investments...

Of course, I'll also immediately send you the secure email I promised…



WEEKLY WEALTH ALERT
Harnessing the Power of Options… For Weekly Wealth
Your Ticket to a 155% Return in the Coming Weeks
Hi Reader,
MacBook

With the subject line of:

Your Ticket to a Potential 155% Return in the Coming Weeks

Remember, the WPI has just registered a spike for this company.

Do insiders know something big is about to be announced?

It's time to jump in… before potential news hits the public.

Inside this email, you'll find all the details on how to open this trade…

My analysis…

And how to take advantage.

Everything I've mentioned so far is yours FREE… as soon as you become a member of *Weekly Wealth Alert*.

What does a subscription normally cost?

Let me ask you this…

Imagine getting insights from the power of an exclusive patented indicator that gives you the chance to collect a BIG payday…

How much would that be worth to you?

Before you answer…

Remember, we're talking about a research service that allows you to get ahead of big potential news BEFORE it gets released to the public.

And like I showed you earlier…

Mike could charge his high net worth hedge fund clients a potential $110,000 or more in annual fees.

Also remember… I agreed to the $1.3 million licensing fee…

So there's a ton of money wrapped up in this project.

But don't worry…

Weekly Wealth Alert won't cost anywhere near $1 million… or $55,000… or even $11,000 to get started…

Because we've specifically designed this with you in mind… to level the playing field.

That's why we're working as a group to spread the costs of this licensing agreement over the fast-acting people who are watching this presentation today…

I'll give you all the details of this special offer in a moment…

First, I understand you might still have some questions about our strategy…

I've tried to anticipate the most common ones. Let me answer them right now.

Question #1: "Does this strategy involve buying stocks?"

Answer: You're welcome to buy stocks. But in order to maximize your potential gains, we've paired the WPI with an options strategy .

I have no doubt you could make a nice profit if you simply buy shares of companies following a spike in the WPI.

But if you want the chance to collect the big paydays…

You'll need to use something I briefly mentioned earlier…

Options.

It's a financial instrument that maximizes the profits of fast-moving opportunities.

Now, I need to be clear when it comes to options…

Because these often-misunderstood financial tools can be an absolute game changer when it comes to maximizing your wealth.

People will often say, "I've never used options."

Or…

"I just don't understand them."

But let me tell you something.

Options are extremely easy to use…

Because of how cheap they can be…

You can risk less to make more…

And have explosive profit potential.

In fact, *Investopedia*, the popular investment education website, says,

> "When used correctly, [options] offer many advantages that trading stocks and ETFs alone cannot."

And Fidelity Investment says that options are more advanced tools that…

> "…can help investors limit risk, increase income, and plan ahead."

And placing an options trade is so simple… you're done in less than 20 seconds!

These are get-in, get-out plays…

With short-term explosiveness.

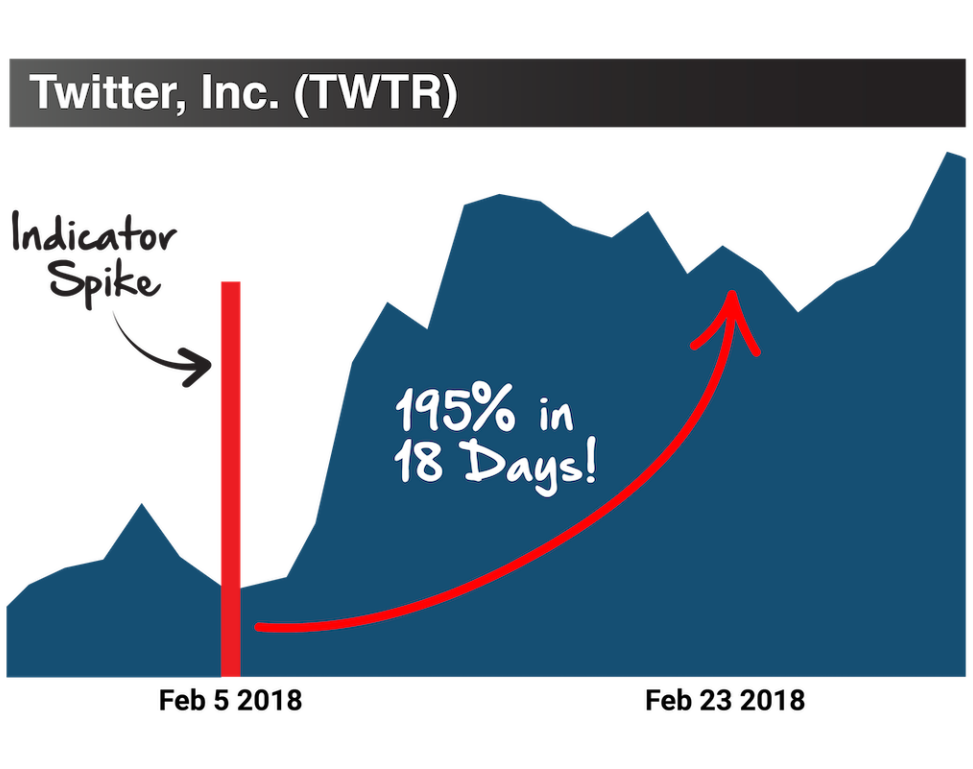
Even better…

Compared to the price of stocks…

These contracts cost almost nothing.

That means you can get started with the same amount of shares for a fraction of the price…

For instance, remember the Twitter trade earlier that netted my readers a 195% gain?



If you bought 100 shares of stock, it would've cost you $2,513…

Yet with options, you're buying control over 100 shares…

So with my options recommendation, my readers could've paid as little as $325 for one Twitter options contract!

But what I really like about these options contracts is their potential to make YOU rich.

By showing you how you could collect BIG paydays… faster than you thought possible! 30 days on average!

It's truly a match made in heaven…

With the predictive power of the WPI…

My research and analysis…

And these impressive contracts…

You're set up to potentially see some of the fastest gains of your life. Which brings me to the next question…

Question #2: "What if there's no big news after the spike?"

Answer: No worries. You could still make money. Of course, this indicator doesn't work 100% of the time.

There's no such thing, so **never bet more than you can afford to lose.**

Because along with the WPI, I use other strategies to increase your odds of winning…

Such as only recommending trades that have already been moving up.

With a set time frame of when we're in, and the latest you can expect to get out.

You'll never have your money tied up for very long.

All the details of our strategy are inside *The Weekly Wealth Alert Handbook*.

This is yours FREE… as soon as you subscribe to *Weekly Wealth Alert*.

Just keep in mind Mike asked me to open this to only 1,000 members today.

I have to honor that request.

Oh, and here's something I forgot to mention…

If you're one of the lucky 1,000 subscribers today, I'll send you THREE special gifts…

Bonus #1: The Weekly Wealth MASTER CLASS

VIDEO Series

Just to make your transition into *Weekly Wealth Alert* even easier...

I've recorded a series of in-depth "master class" videos.

So even if you're new to trading and options, don't worry about it!

This series of videos will show you step by step, in an easy-to-follow format, exactly how options work and how to trade them.

I'll break down everything I look for in a big trade…

My complete strategy…

And how YOU can even pick the best trades on your own.

You'll discover everything you need to know to get started making money with options right away.

Including…

- **How to get started with trading, even if you know nothing about stocks, options or finance at all…**
- **A complete, simplified breakdown of my "veteran level" trading outlook and principles…**
- **A walkthrough of what it takes to get permission to trade options from your brokerage account…**
- ***And MORE!***

And you'll get complete access to all of these videos at no extra charge when you subscribe to *Weekly Wealth Alert* today.

But this training is only the tip of the iceberg when it comes to a *Weekly Wealth Alert* subscription...

Bonus #2: Weekly Videos Directly From the Trading Floor

WEEKLY Videos

Remember the burning match?

If you're getting information from CNBC or *The Wall Street Journal*, the match is already completely burned.

It's too late to profit.

That's why every week I'll also do something very special for you…

I'll send you a short video that I'll be recording directly from the trading floor in Chicago. (When it's open…)

Trust me, when you're rubbing shoulders with top traders on the floor…

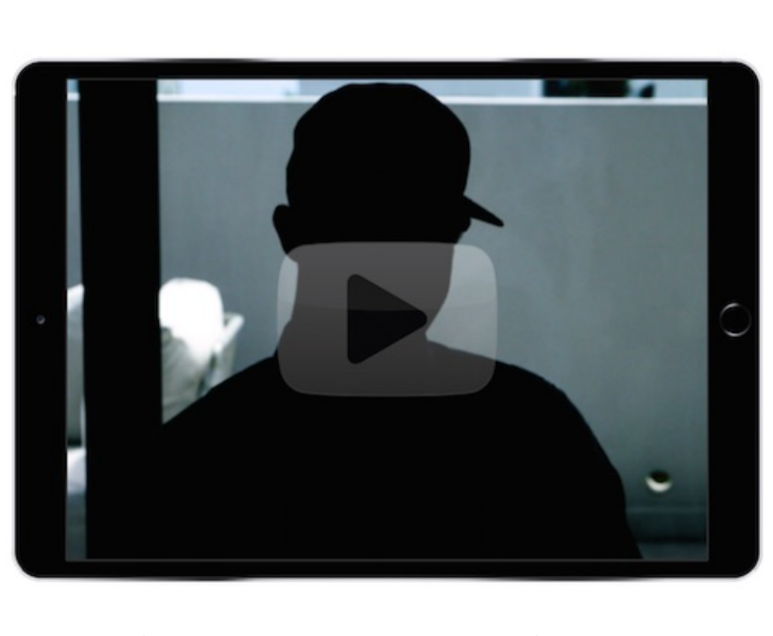
You tend to bounce ideas off of experts all the time.

I'll be sharing my insights with you every week… to help put you ahead of the crowd.

Others have paid me thousands to make these kinds of videos.

But as a member of *Weekly Wealth Alert*, these will be yours… FREE.

Bonus #3: Caught on Camera: My Exclusive Conversation With Mike



I recently sat down with Mike (the creator of the WPI) in an undisclosed location to discuss details about the indicator.

And he agreed to go on camera…

He only asked me to hide his identity and change his voice.

So I hired a production team to make that happen.

And I'd like to send you this exclusive video… FREE of charge.

In this 30-minute conversation, we covered everything you need to know to before using the power of this indicator right away.

You'll hear directly from the man who developed the indicator.

Just to recap…

Here's everything you'll get once you become a member:

Email ALERTS

- ✓ **A New Trade Recommendation EVERY Monday:** Every Monday, I'll recommend a new option contract. My analysis will walk you through everything you need to know to potentially collect a big payday.
- ✓ **FREE Video Training - *The Weekly Wealth MASTER CLASS:*** A detailed series of videos designed to walk you through how to trade, as well as my three-step system for picking TRADES.
- ✓ **Weekly Video Straight From the Trading Floor:** Every week, I'll report on any potential moneymaking information I get from other traders on the floor. Of course, none of this will be insider information. But it might be information you won't get anywhere else.
- ✓ FREE video ***Caught on Camera: The Exclusive Interview***

- ✓ FREE video ***Caught on Camera: The Exclusive Interview***
- ✓ FREE first-recommendation email, with the subject line of ***Your Ticket to a Potential 155% Return in the Coming Weeks***
- ✓ FREE guide ***The Weekly Wealth Alert Handbook***
- ✓ **Urgent Anytime Profit-Taking Alerts:** When it's finally time to take gains, we'll blast out an urgent email – telling you exactly what to sell, for what potential gain. It couldn't be easier.
- ✓ **Regular Model Portfolio Updates:** Whenever something important happens, we'll send you a recap of our open plays and what to do with them.

And remember…

Clients might have to pay as much as $110,000 in annual fees to gain access to the power of the WPI through Mike's hedge fund one day.

With *Weekly Wealth Alert*, the published price is just $3,000 for my research.

And consider this…

One BIG Winning Trade Alert Alone Could be Nearly Enough to Pay for Your Annual Subscription

Just look what happened with my Weekly Wealth Alert readers:

Terrence Ryan, whose results I showed you earlier, made a 140% gain on Target in one day, and walked away with a total of $1,160 profit *overnight!*

Eddie Barstow said he made a 207% gain with INTC, walking away with $1,703 in profit from one trade… *(This reader didn't tell us how long he held the play for, but we recommended our readers enter this trade on 4/02 and exit the trade on 4/18 with a 49% gain. That's a 16 day window!)*

And Rhonda Doménica. took home $1,131 in two weeks off a single $1,500 investment!

(These are some exceptional examples and don't represent the average gain. **The track record boasts an average hold time of 30 days and an average weighted gain of 5.55%**, or an annualized average gain of 67.5%, better than some of the best hedge fund managers!)

For that reason, the regular price of $3,000 is already an incredible deal.

But I understand you don't fully know me yet.

And that I need to earn your trust first.

So I'm going to do two very special things for you right now…

The first is UNPRECEDENTED.

Due to the State of the Market… I Am Going To *Slash* the Entry Fee

Until spots are unavailable…

I am offering a subscription to this service at a substantial discount.

To be clear…

This is NO marketing gimmick.

This is my TOP-tier research service….

A service that my subscribers normally pay thousands of dollars for.

And with the results my subscribers have seen, they are more than happy to pay the standard fee!

However…

We are practically giving away this service for one simple reason…

Right Now, You're Facing the Market Opportunity of a LIFETIME!

At this very moment, we're seeing more money being pumped into the economy than *ever before…*

Which is creating a once-in-a-lifetime opportunity in the markets.

And for anyone who reaches out to grab it, the gains we could see in the next few months alone could be staggering.

You see, the Federal Reserve has cranked up the printing presses - And they show no signs of slowing down.

In March 2020, when the Fed was just starting out, The New York Times reported:

> The New York Times
>
> ***The Fed's Message: The Money-Printing Presses Are Fired Up and Ready to Go***

And then in June, CNBC reported that out of the $2.3 TRILLION the Fed said it could pump into the economy…

Only $143 billion had been unleashed so far.

> **"The Fed said it could supply the economy with $2.3 trillion. It hasn't come close so far"**
>
> *— CNBC*

Meaning there's still over $2 trillion ready to flood the market any day…

And TIME Magazine reported…

> "Many analysts credit the market boom largely to the Fed's actions."
>
> ***— TIME***

So whether you agree with it or not…

One thing we've always said on the trading floor is…

"Don't Fight The Fed!"

The "big pump" is happening right before our eyes.

And I believe that anyone who acts right now, at this very moment…

Will be in position to ride this market pump all the way up.

And if you follow me, you'll also be armed with the tools to navigate whatever comes next!

So, to make sure no one's left behind on this generation trading opportunity…

My publisher has agreed to lower the price substantially.

For this reason alone…

I expect spots to be filled by the end of the day.

And while I am sure this is going to ruffle the feathers of my current top-level subscribers…

I am working on something that will make sure they are MORE than taken care of.

But even though the price is extremely discounted in today's special offer…

You still get everything a top-tier subscriber would normally receive.

So there is something else I want to do for you.

Let's cover that right now…

My Special Profit Guarantee

Aside from offering you a deeply discounted price…

I want to offer you a special guarantee to make sure you are completely thrilled with *Weekly Wealth Alert*.

If you choose to subscribe for a full year today…

We guarantee that our model portfolio will give you the chance to double your money at least 20 times over the next year.

If we don't…

Simply give our Baltimore-based team a call, and we will issue you a FULL refund.

It's only fair. If I don't deliver, you shouldn't pay.

That's how confident I am on this indicator.

But I fully expect you to be more than satisfied.

It's the only way I know of legally getting ahead of potentially big news… before the public even knows about it.

Like I showed you today, using the WPI you could have collected the following top paydays…

(All Partial Trades)

- ✓ 155% on Gilead –6 days
- ✓ 102% on Schlumberger –1 month
- ✓ 111% on Micron –in one day
- ✓ 127% on Facebook –10 days
- ✓ 100% on ConocoPhillips –four days
- ✓ 225% on Twitter –three days

***And you could have collected each of these in just a few days! These are some of our best performing gains and are significantly higher than the typical gain.

Look, you've seen all the charts…

You've seen the academic research…

You've seen how much money some of my readers have already made with the power of this patented indicator…

And I proved to you that the ONLY way to capture those big one-day surprising moves is to be "in" the trade before the news…

And I showed you that the WPI is the ONLY indicator I know of that can help you do that.

I've given you a special offer…

And if you subscribe for a full year, a performance guarantee that fully covers the price today.

With all of that being said…

Now it's time for a decision.

You could become one of the lucky 1,000 members who will join *Weekly Wealth Alert* today.

Once the 1,000-member cap is reached, we'll have to shut this offer down today.

And because of how truly life changing I believe *Weekly Wealth* Alert could be for regular folks…

And the market opportunity of a lifetime sitting right before your very eyes…

We're hell-bent on getting this message in front of everyone we can.

So I expect today's 1,000 spots to fill up fast.

Sorry, but these are the terms of my agreement with Mike.

So you better act fast… while spots are still available with this ridiculous offer.

I realize that will probably ruffle the feathers of most people.

But I have a feeling you are NOT "most people."

Most people are content with table scraps…

And most people only dream about getting rich…

But they NEVER make it happen.

They retire on Social Security… and pray their benefits are enough to cover their basic living costs.

Since you've read this letter so far, I think you're NOT "most people."

I'm trying to get the power of this indicator in the right hands…

And I think you're one of them.

SUBSCRIBE NOW

You Can Review Your Order Before it's Final

If I'm right and you're still with me, I want you to get started immediately.

The WPI has just registered a spike…

The next payday could be just around the corner…

It could happen as early as tomorrow.

The only question is…

Will you get in before the big move…

Or will you pass this up and let someone else take advantage in your place?

Now's your time to level the playing field…

Now you have a shot at making the fastest gains you'll ever see in an average of 30 days…

To get started, simply click the "Subscribe Now" button that you see below.

Hitting this button does not obligate you to anything.

You'll just be directed to another page, where you can review all the details of this special offer.

Click here to get started today.

All the best,

Alan Knuckman
Editor, *Weekly Wealth Alert*
November 2020

P.S. Mike asked me to limit the number of subscribers to 1,000 today. These are first come, first served. Once we reach that cap, we'll have to shut this offer down. Since we're advertising this message everywhere we can, I suspect today's spots will get filled fast. Don't waste any time. **Click here now to join *Weekly Wealth Alert* today**… and have a shot at collecting a big payday… starting as early as next week.
