Alarming Development: Is the IMF moving in to...

Raid Your Retirement?

You could lose everything you've worked your whole life for...

Dear Reader,

I am Nick Giambruno... senior analyst at Casey Research.

Over the last 30 years, our firm has helped give folks the chance to avoid huge financial disasters...

And warned of mega geo-political shifts before they happened.

We forecasted the fall of the Soviet Union...

9/11...

The dot-com bust...

And the 2008 financial crisis...

Months before each crisis ripped through the life savings of Americans.

We also predicted that Donald Trump would win in 2016.

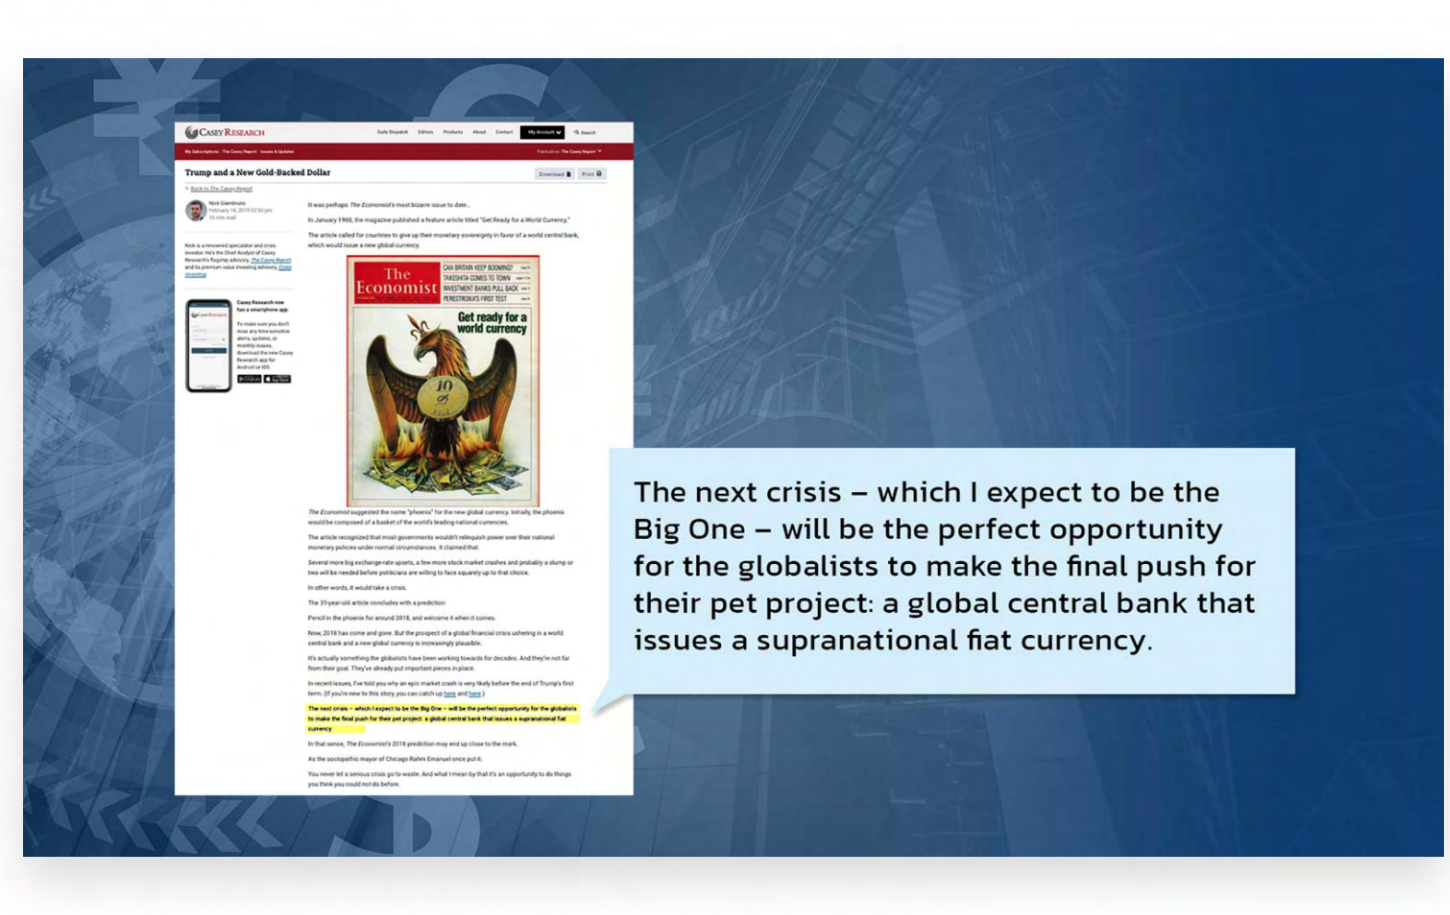
And rigged or not...

We forecasted that Joe Biden would win the presidency.

That's why today's message is the most important one we'll share in our three decade-plus history of forecasting events.

It begins with a stunning prediction I made two years ago, on February 14th, 2019.

Here's what I wrote...



The next crisis – which I expect to be the Big One – will be the perfect opportunity for the globalists to make the final push for their pet project: a global central bank that issues a supranational fiat currency.

Today, two years later, it's no longer a forecast.

That "pet project" is rapidly unfolding exactly as I outlined.

And will bring sweeping changes across America.

If you have any money in the stock market... if you own a home or any other real estate... if you have more than $5,000 in savings...

Please pay attention.

And prepare as soon as possible.

Because, as the world battles the global pandemic...

Global elites at the IMF...

The World Bank...

The UN...

The radical environmentalists...

And the World Economic Forum...

Have engineered a new agenda to "reset" America.

To control your finances and your fate.

Greenpeace International used the words...

"New World Order"

- Greenpeace

When they talked about this "reset."

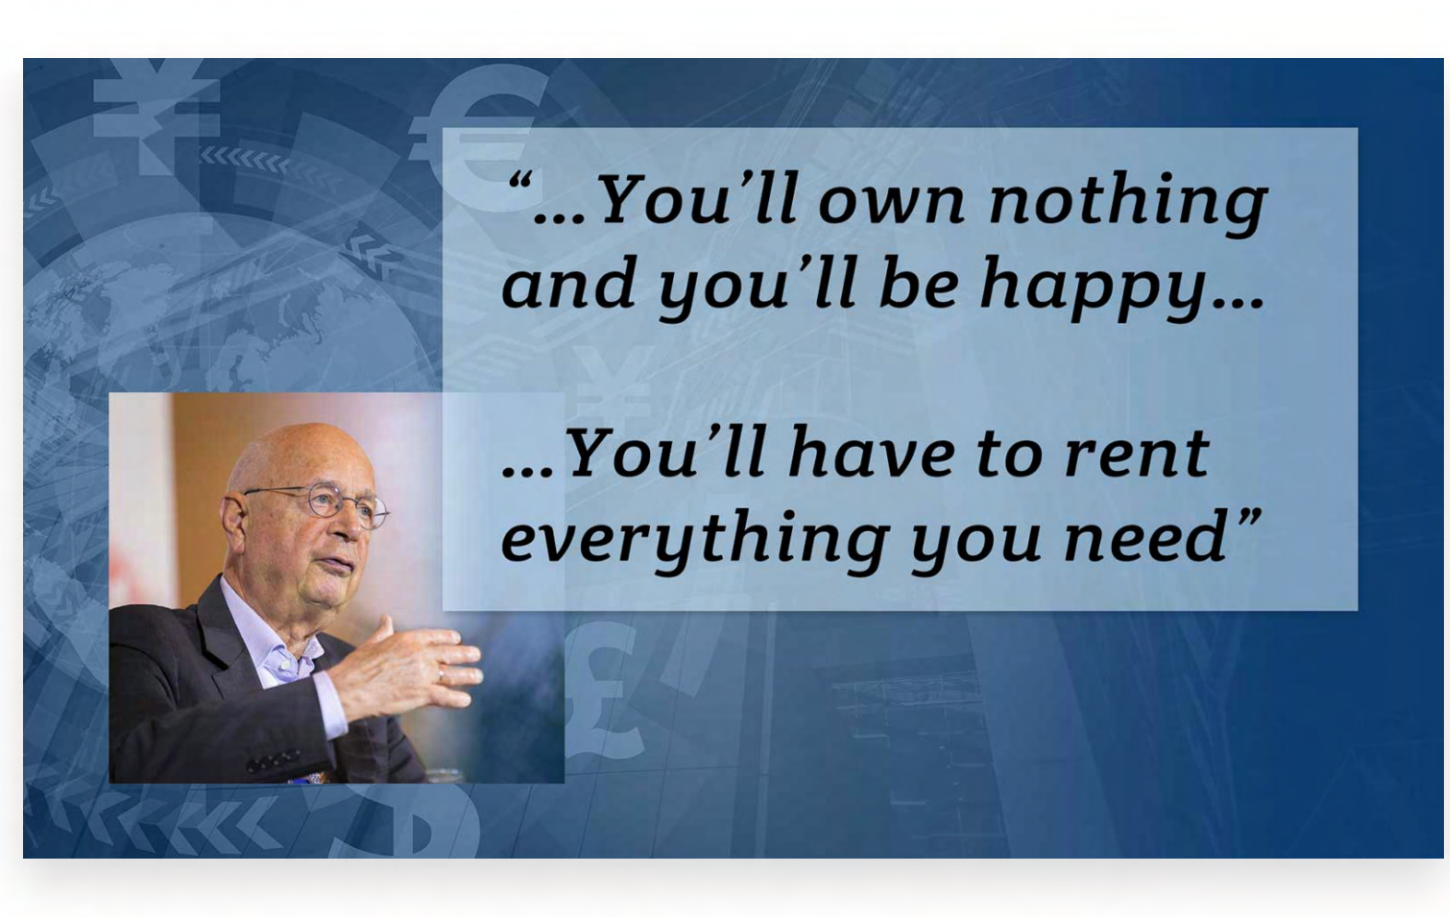
The World Economic Forum is a powerful group that hosts presidents, royals and CEOs at the Davos summit in Switzerland.

They added...

"The current pandemic is a rare window of opportunity to reset our world"

- The World Economic Forum

But here's the most shocking pronouncement made by the World Economic Forum:



"...You'll own nothing and you'll be happy...

...You'll have to rent everything you need"

Is THAT how you imagine your life or your retirement?

Think about what that means for a second.

You'll own nothing...

In other words...

You could be stripped of the right to own property.

And you'll "be happy" about it.

To make matters worse, higher taxes could be forced on hardworking folks to pay for one senseless subsidy after another.

As an article by a writer for *The Washington Times* put it:

"Everything you've worked for — including your freedom — will be taken from you"

- The Washington Times

All under the guise of *"equality for all."*

Look, I value personal and economic freedom.

Since you're still with me, I imagine you do too.

The last thing we want is a faceless bureaucrat telling us how much money we should have...

Which words to use...

What house to live in, or what to eat.

But I'm afraid this dark scenario is here.

Some people will have a hard time believing me.

And yes, I too have been struck by the pace of these events.

But here's what I can tell you...

I believe you still have time to prepare.

That's why I've recorded this message...

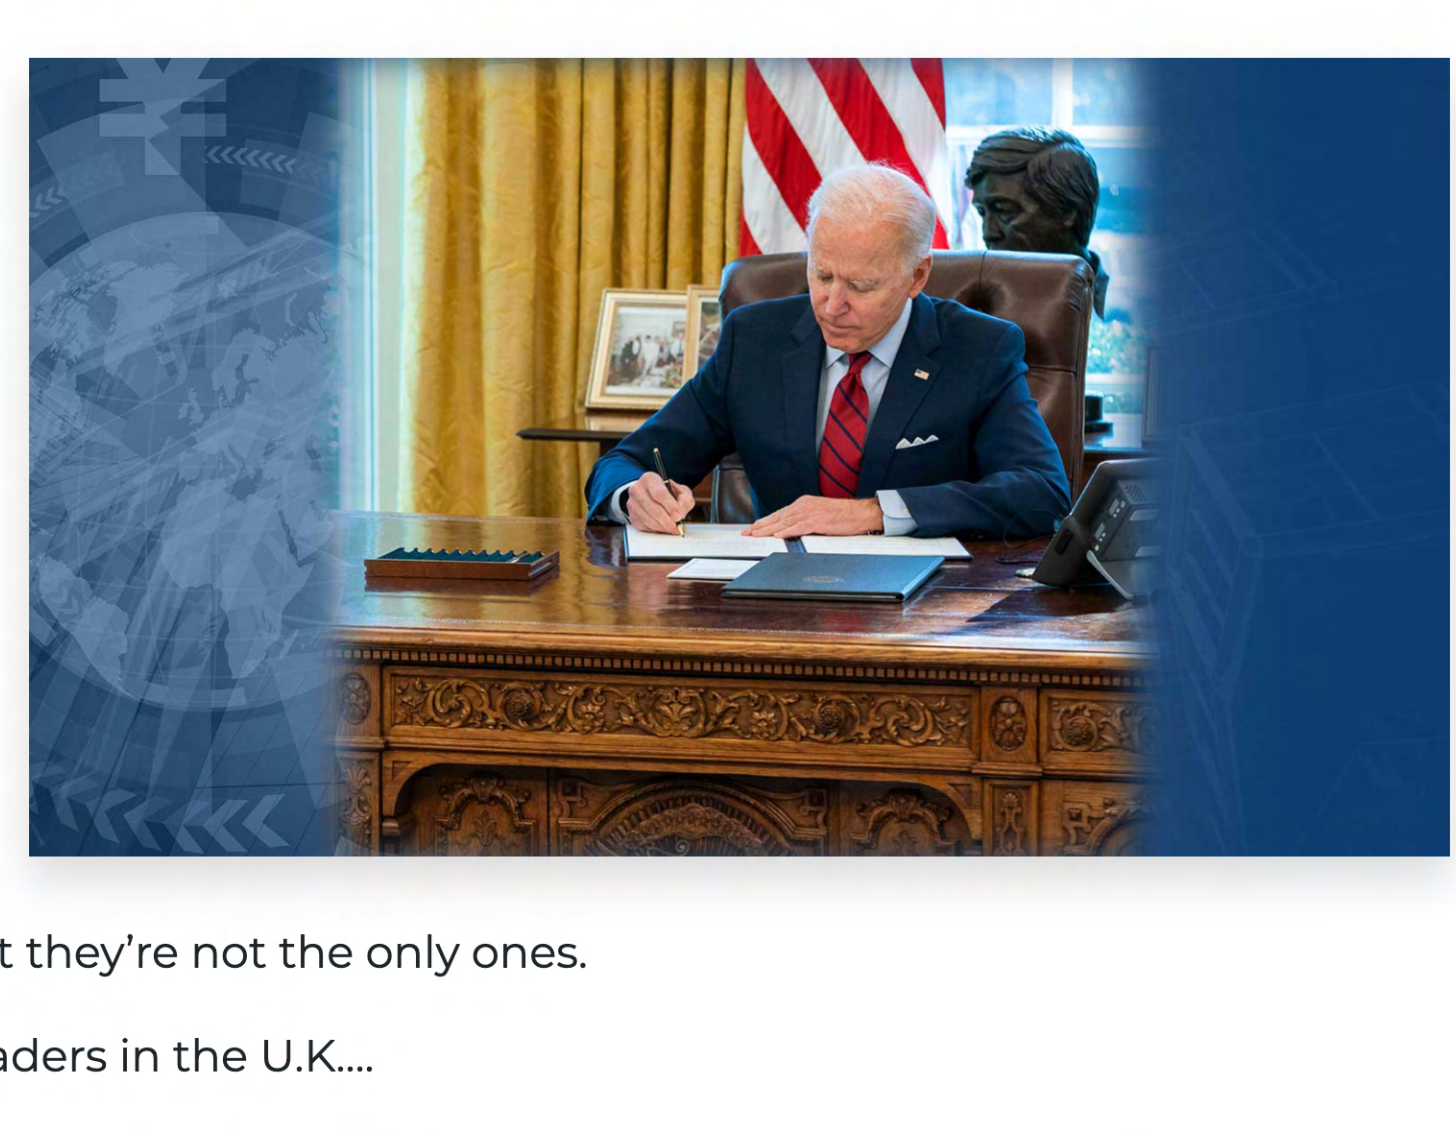
So you won't be caught off guard if events could take a turn.

As I'll show you...

The Democrat-led House of Representatives already passed a historic bill...

To fast-track the "Great Reset."

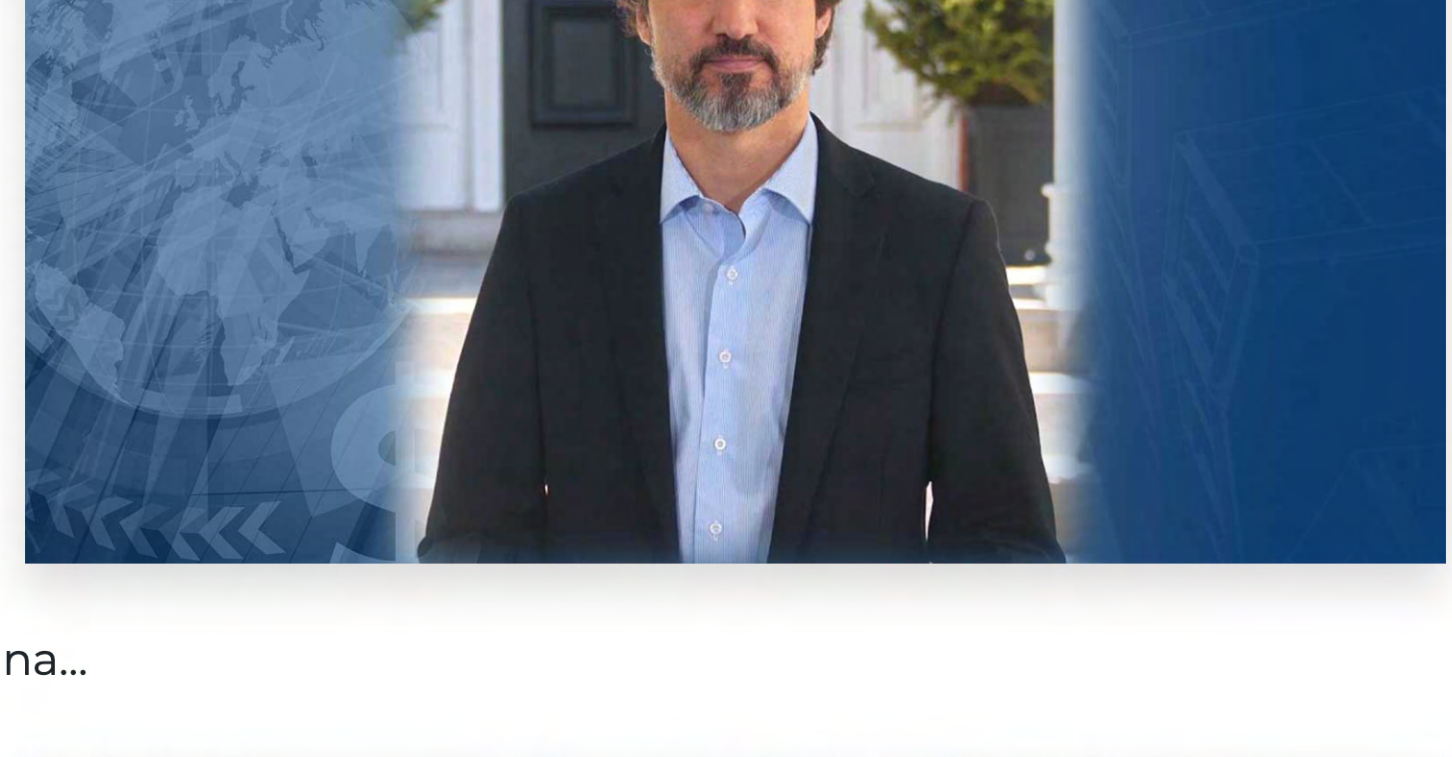
Chances are it could be signed by President Biden soon.



But they're not the only ones.

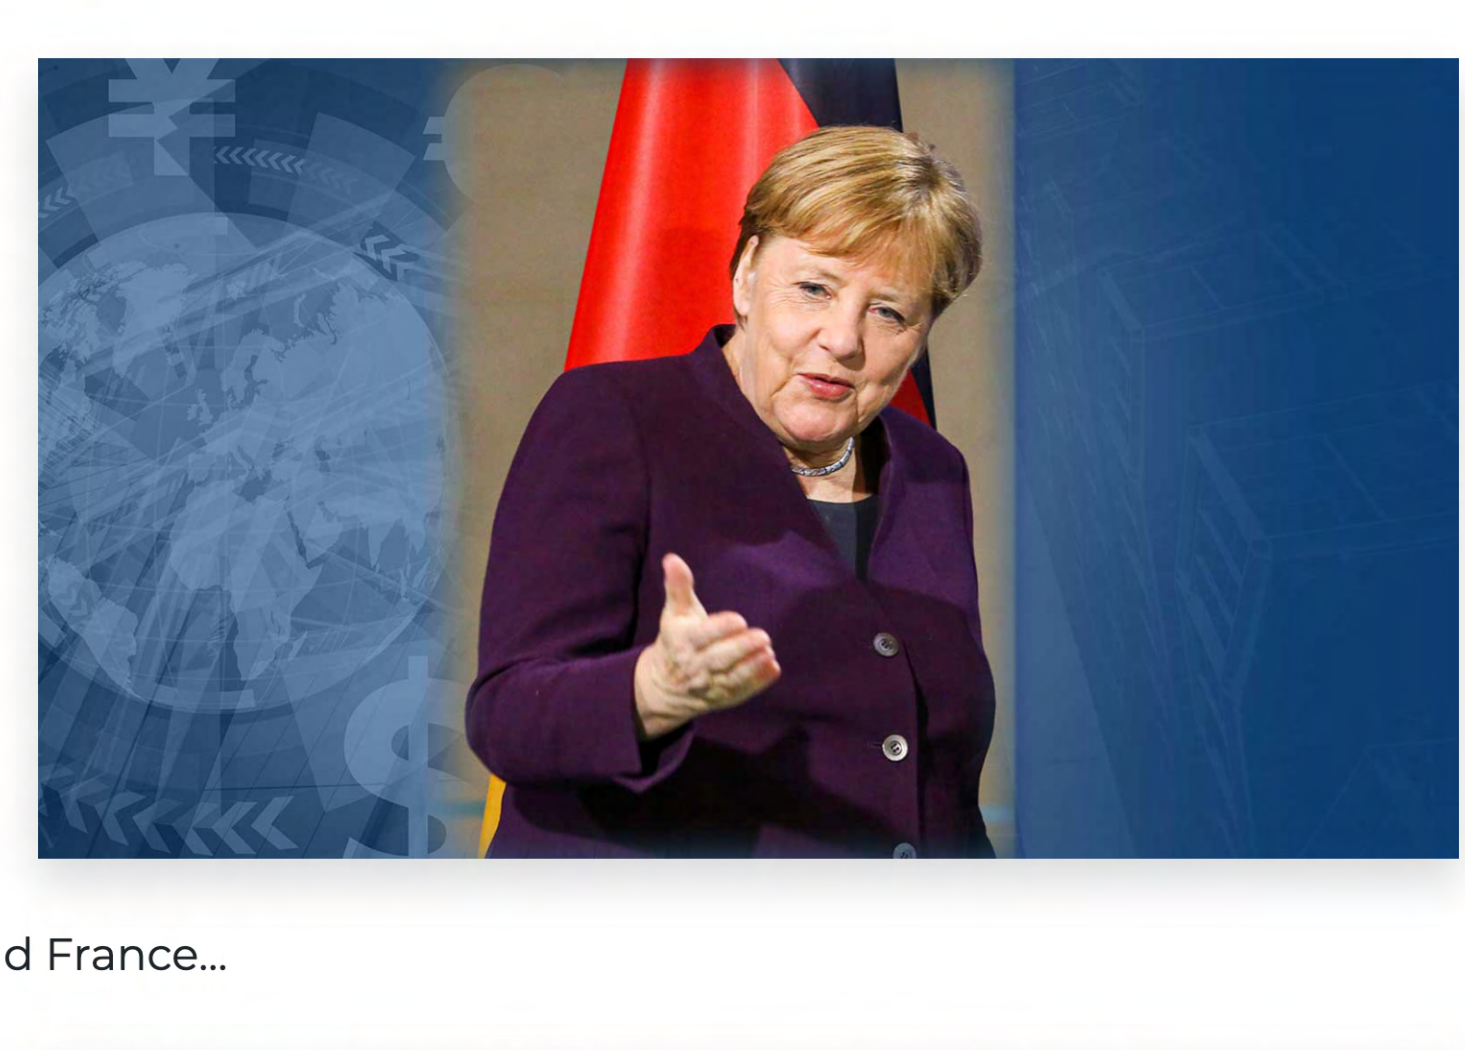
Leaders in the U.K....

Canada...

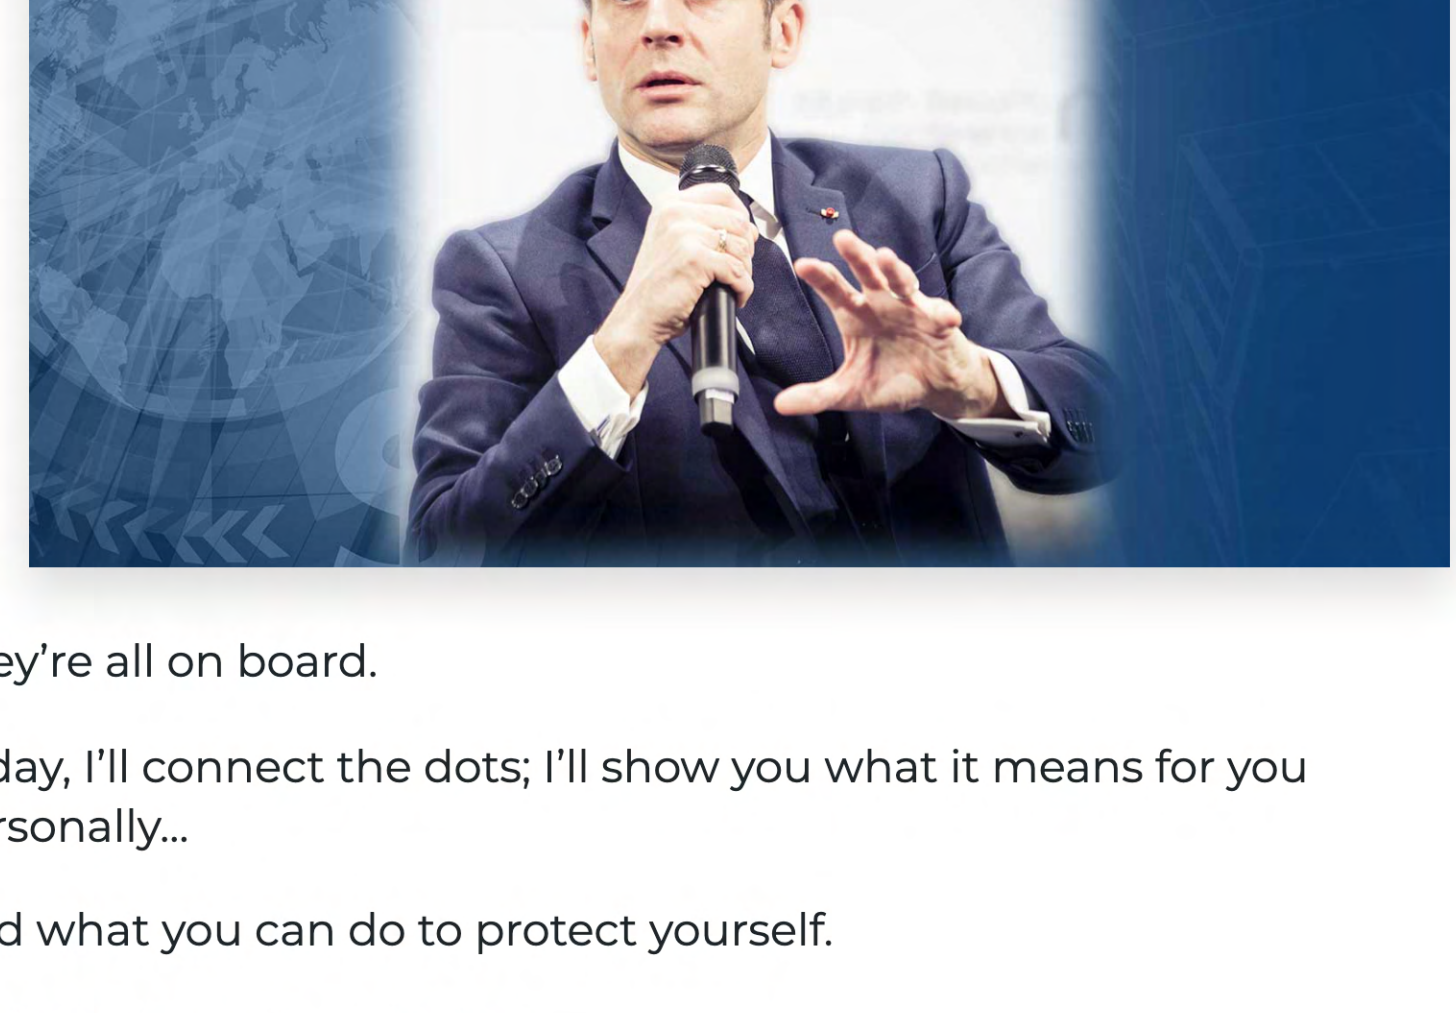


China...

Germany...



And France...



They're all on board.

Today, I'll connect the dots; I'll show you what it means for you personally...

And what you can do to protect yourself.

My hope is you'll act today.

Because it could be your best chance to take matters into your own hands.

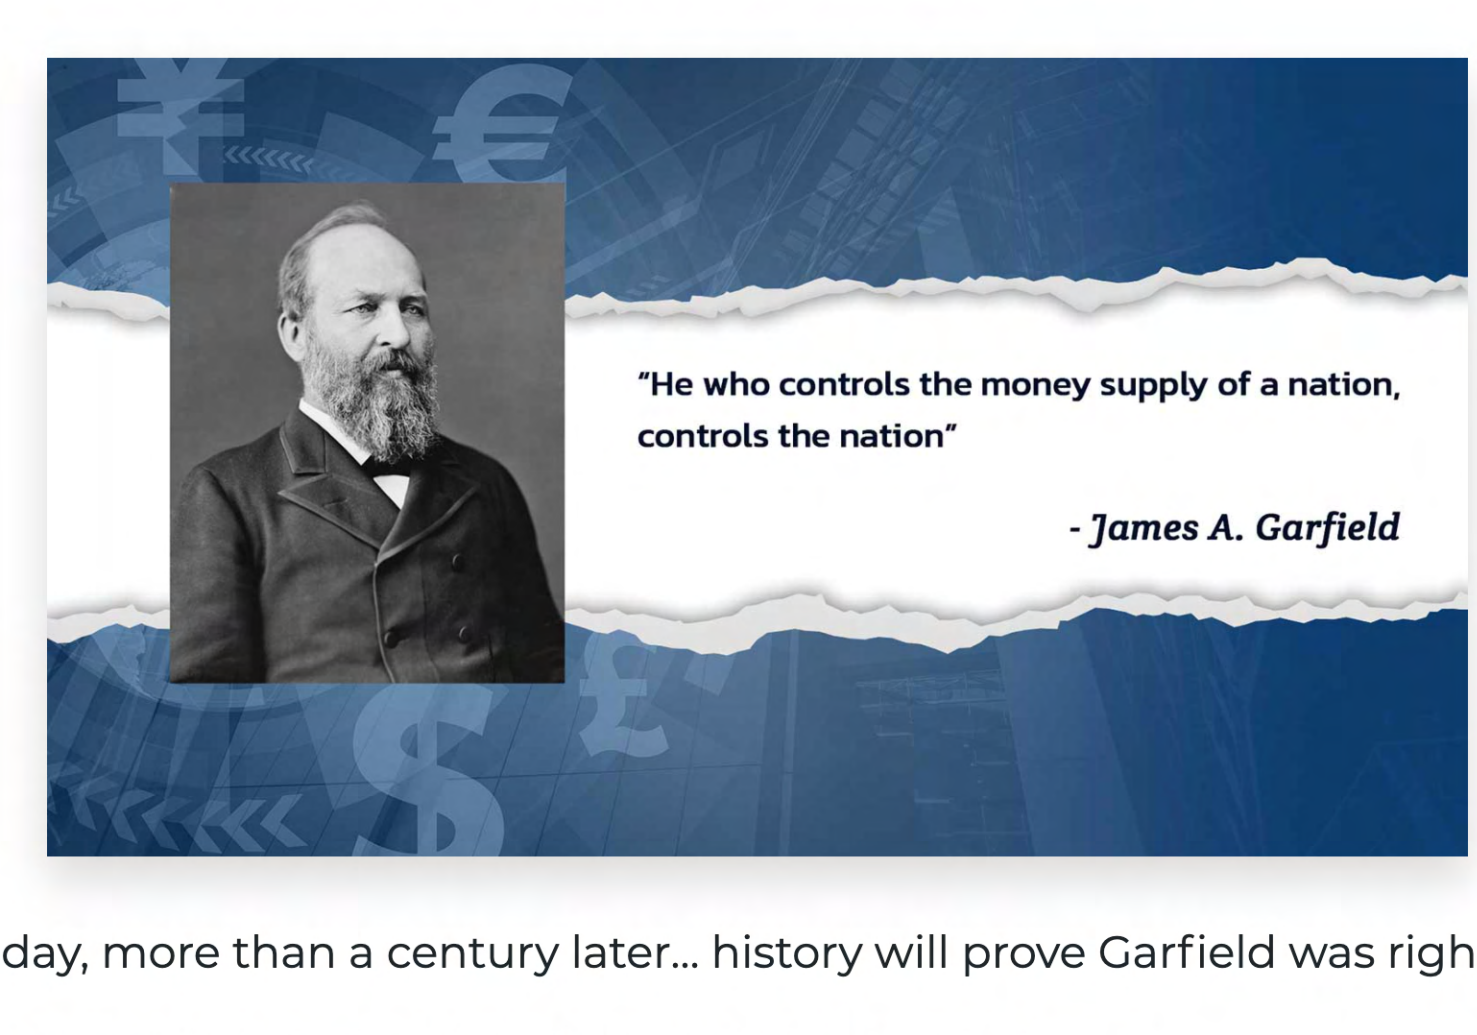
The Great Reset is the Great Deception

So what does this "Great Reset" mean for the average American?

It begins with the money in your pocket...

With America's currency: the U.S. dollar.

James Garfield, the 20th president of the U.S. once said...



"He who controls the money supply of a nation, controls the nation"

- James A. Garfield

Today, more than a century later... history will prove Garfield was right.

My research shows at a major event in the near future...

The IMF and powerful globalists...

Could instantly bring the U.S. dollar's 70-year reign to a screeching halt.

The warning signs are obvious if you know what to look for.

And to be fair, I'm not the only one who's concerned.

Economist Stephen Roach told CNBC he expects a full dollar collapse by the end of this year.

Economist Stephen Roach issues new dollar crash warning

PUBLISHED WED, SEP 23 2020-7:11 PM EDT | UPDATED WED, SEP 23 2020-8:18 PM EDT

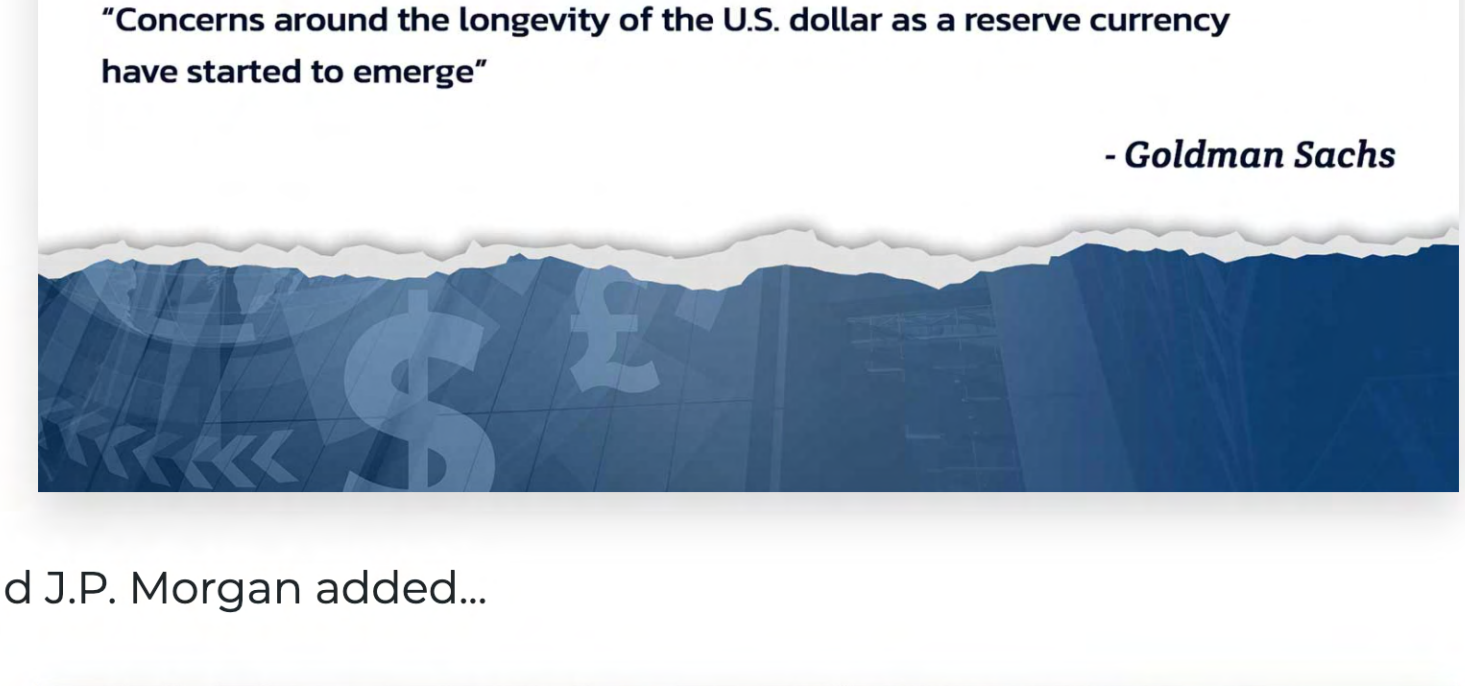
Stephanie Landsman
@STEPHLANDSMAN

Goldman Sachs told its clients:

"Concerns around the longevity of the U.S. dollar as a reserve currency have started to emerge"

- Goldman Sachs

And J.P. Morgan added...



The U.S. dollar could lose its status as the world's dominant currency.

Now, if the big banks are saying these things...

You know they're not sitting on their hands.

After all, they manage hundreds of thousands of retirement accounts.

All of which are priced in dollars. They get paid in dollars too.

But this threat has less to do with the Federal Reserve printing trillions of dollars overnight.

And more to do with an alarming new development.

I believe the IMF ... central bankers, economist, royals, and selected politicians...

They're all using the global pandemic to push for a reset of the entire financial system.

To potentially issue a new global reserve currency.

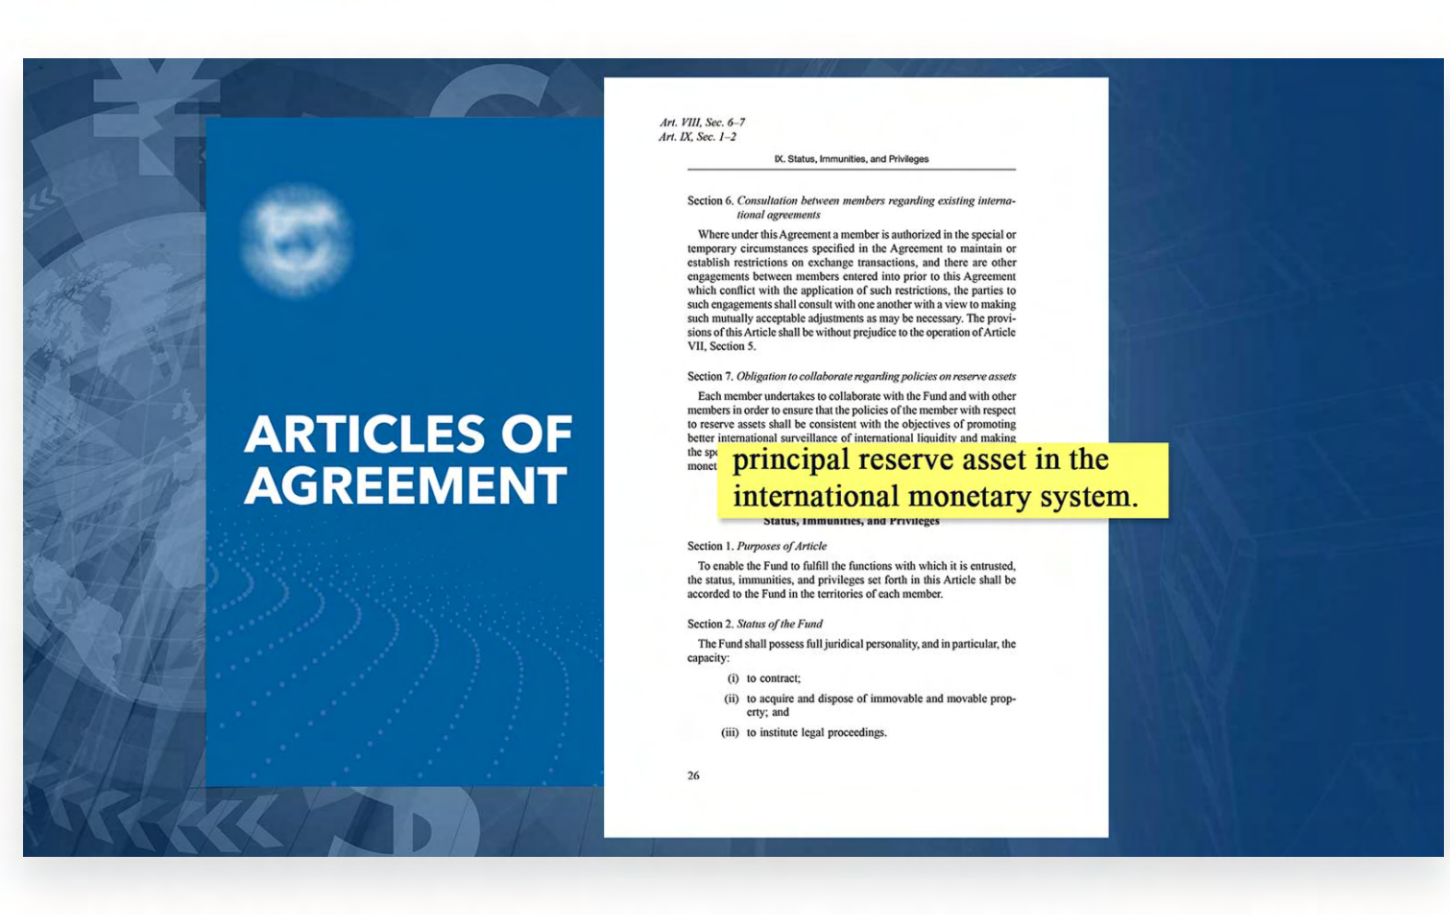
When you look at the facts, it's clear as day.

"New Economy, New Rules"

~The IMF

Take a look at this official IMF document.

See the highlighted portion...



ARTICLES OF AGREEMENT

principal reserve asset in the international monetary system.

It shows this potential new currency could be the *"principal reserve asset in the international monetary system."*

In plain speech, this new currency could replace the dollar.

Chances are you've NEVER even heard of it before.

It's not traded on major exchanges in the free market against the dollar, euro, or the pound.

Yet the Federal Reserve revealed it currently holds $36 billion of this global currency that could soon destroy the dollar.

So do 189 member countries of the IMF...

Including China, Germany, France, Canada, the U.K., and other leading nations.

And very soon, the implications could become clear.

The Value of Your Assets Slashed by 30%?

You may be wondering, why does this matter?

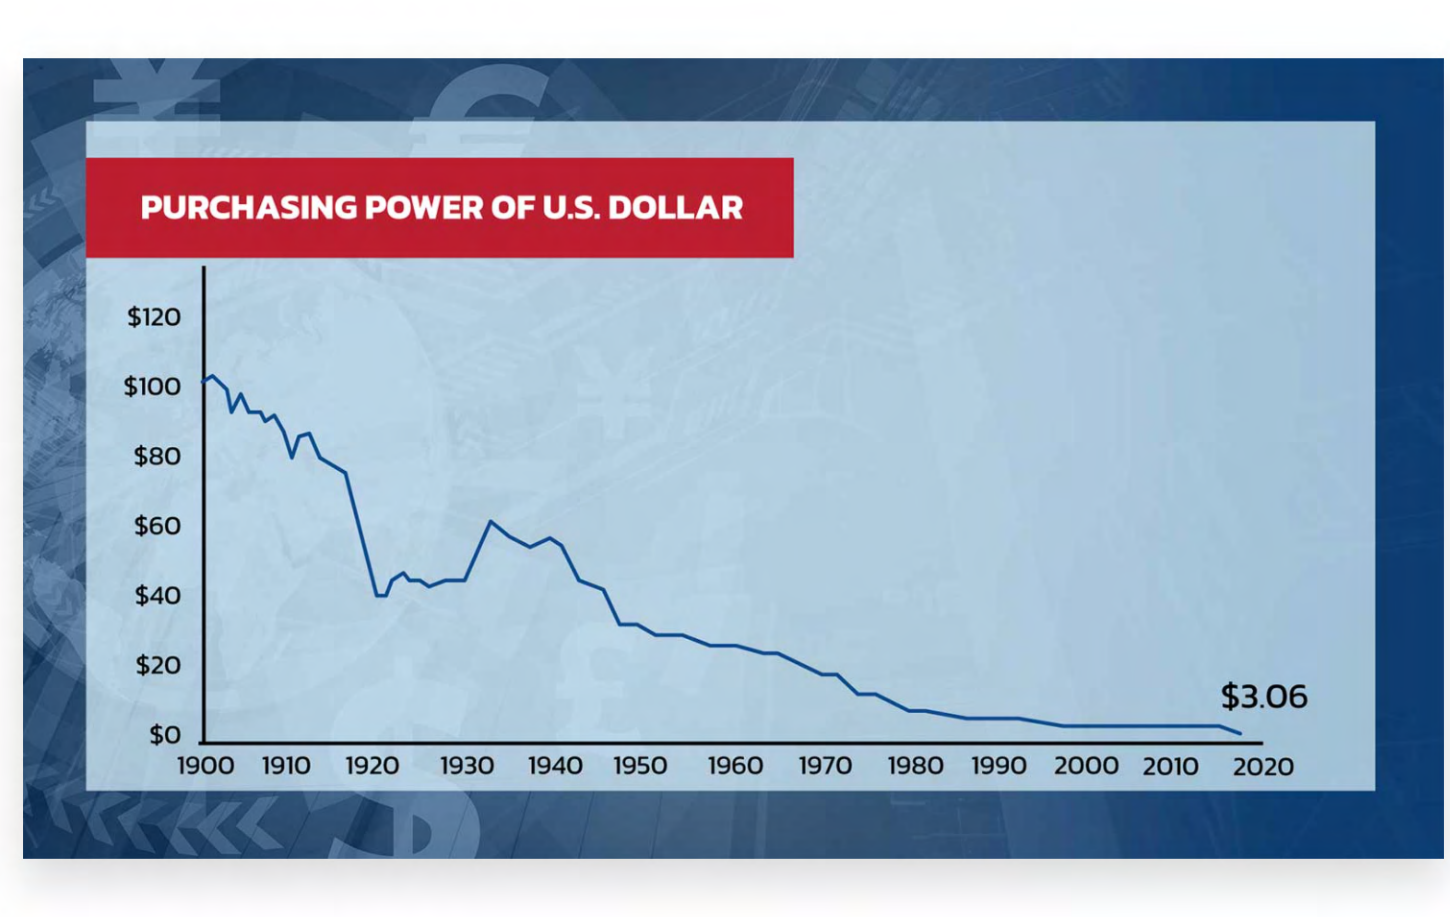
It's simple.

Your savings account, your retirement plan, the value of your home...

And even the food you buy...

It's all denominated in U.S. dollars.

If you're a student of history, you'll know the dollar has lost 90% of its value over the last century.



Yet for 77 years it's been the leading currency in the world.

But finally, in 2021, its days could be numbered.

You've likely heard story after story about the dollar's collapse...

All have been proven wrong or at best, too soon.

But now we know for certain.

If the switch to this new currency plays out as we suspect it could happen...

It will further cut the dollar's value from where it is today...

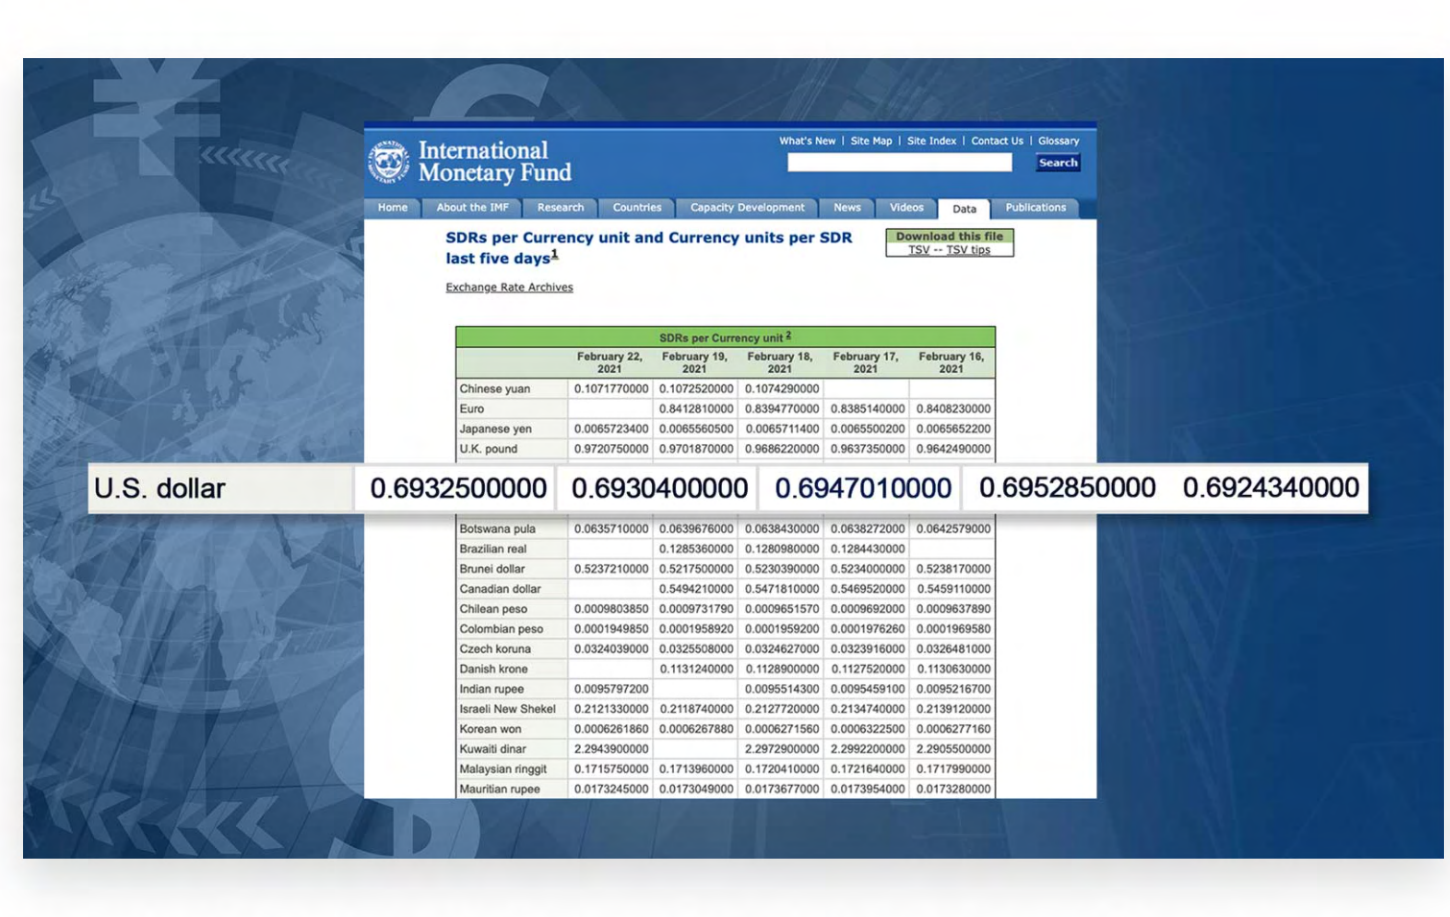
And reset lower against this new currency.

It could have a dramatic effect on your wealth overnight.

Here's why.

The IMF has set the official exchange rate between this currency and the U.S. dollar.

Take a look.



SDRs per Currency unit and Currency units per SDR last five days[1]

SDRs per Currency unit[2]

	February 22, 2021	February 19, 2021	February 18, 2021	February 17, 2021	February 16, 2021
U.S. dollar	0.6932500000	0.6930400000	0.6947010000	0.6952850000	0.6924340000

In plain English, the dollar is valued almost 31% lower than the new currency.

And because your assets, savings, and income are valued in U.S. dollars...

A 31% devaluation of the dollar is like a 31% pay cut.

Imagine just how bad things are for Americans today...

Then think about how much worse it will be...

When the value of your property or savings could be slashed by almost a third.

If your home is valued at $240,000...

It could reset to $165,000, or lower.

If you saved $275,000 in your retirement account...

Expect it to reset to $189,750... the equivalent amount in the new reserve currency.

But there's also another side to the dollar "reset."

A dollar slashed by 31% could create widespread inflation.

We could see basic food prices double, even triple from where they are today.

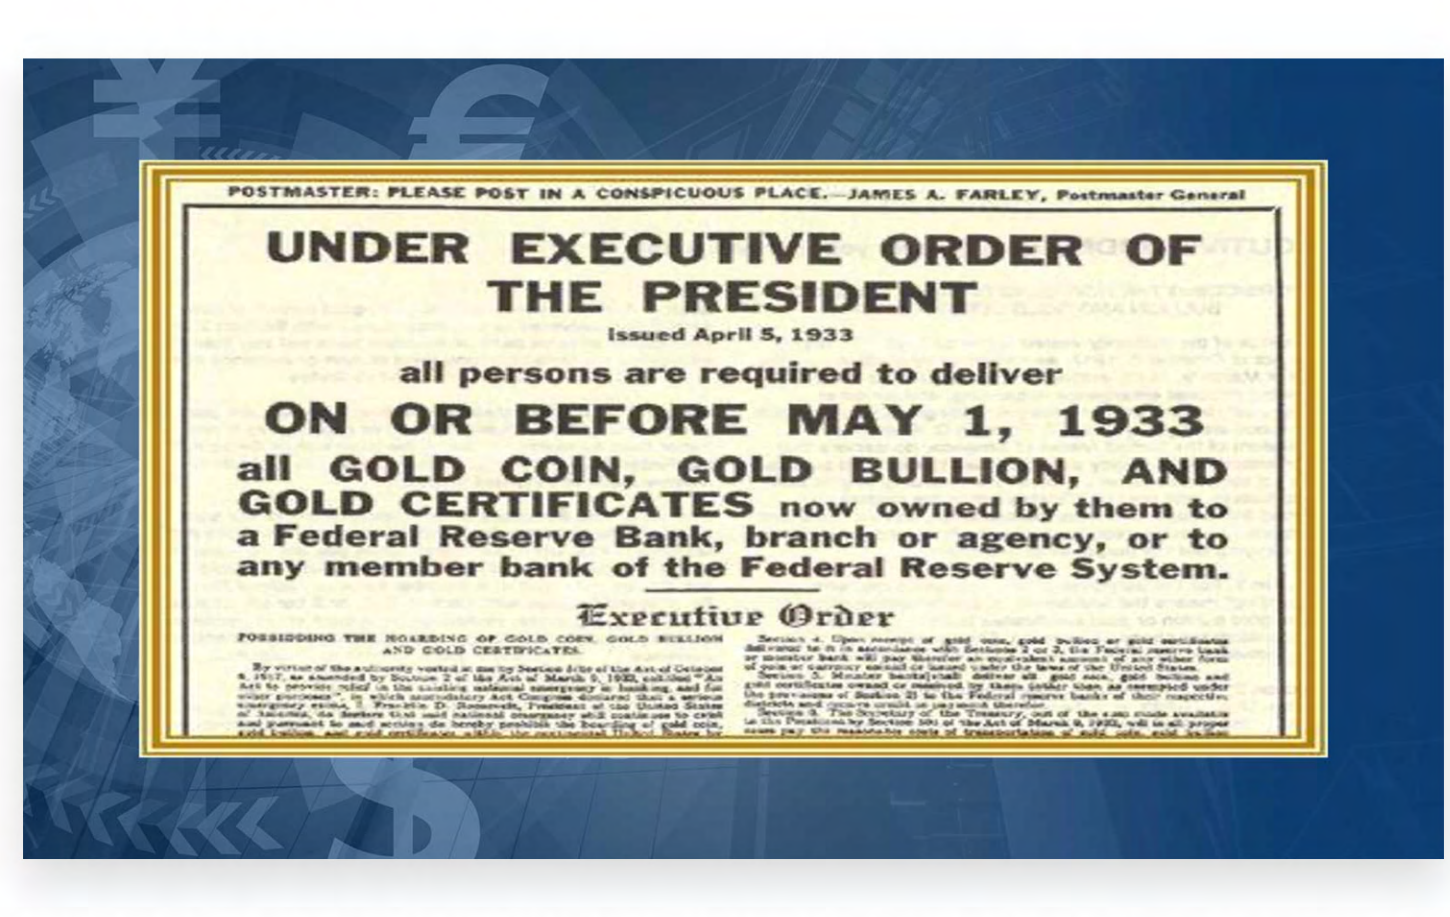
We've seen this before.

During the Great Depression of 1933, half the country's banks failed and 15 million people lost their jobs.

Since the U.S. dollar was backed by gold...

Many people hoarded gold as a means to preserve the little they had left.

But on April 5th, 1933, newly elected President Roosevelt ordered Americans to turn in their gold.



POSTMASTER: PLEASE POST IN A CONSPICUOUS PLACE.—JAMES A. FARLEY, Postmaster General

UNDER EXECUTIVE ORDER OF THE PRESIDENT

Issued April 5, 1933

all persons are required to deliver

ON OR BEFORE MAY 1, 1933

all GOLD COIN, GOLD BULLION, AND GOLD CERTIFICATES now owned by them to a Federal Reserve Bank, branch or agency, or to any member bank of the Federal Reserve System.

Executive Order

FORBIDDING THE HOARDING OF GOLD COIN, GOLD BULLION AND GOLD CERTIFICATES.

Failure to do so would result in a 10 year jail time, or a $250,000 fine.

By May 10th, the government confiscated $300 million in gold coins and $470 million worth of gold certificates.

Then jacked up the price of gold from $20.67 an ounce to $35 an ounce.

It was a major devaluation of the dollar.

All under the guise of restoring "public confidence."

How much do you think the government and the elites made from this move?

Over $4.2 billion in profits.

Meanwhile the U.S. dollar tanked more than 60% against other currencies.

Costing Americans more than half of the little they had left.

Folks who saved their entire life discovered on the eve of their retirement that they had no money left.

Americans couldn't buy food or clothing because the dollar lost its purchasing power.

The government and elites stole their gold PLUS the value of every dollar in their pocket.

It was the biggest wealth confiscation scheme in U.S. history.

But what we're about to see over the next few months could top that.

The dollar is already down 31% against the potential new reserve currency.

But it could get worse.

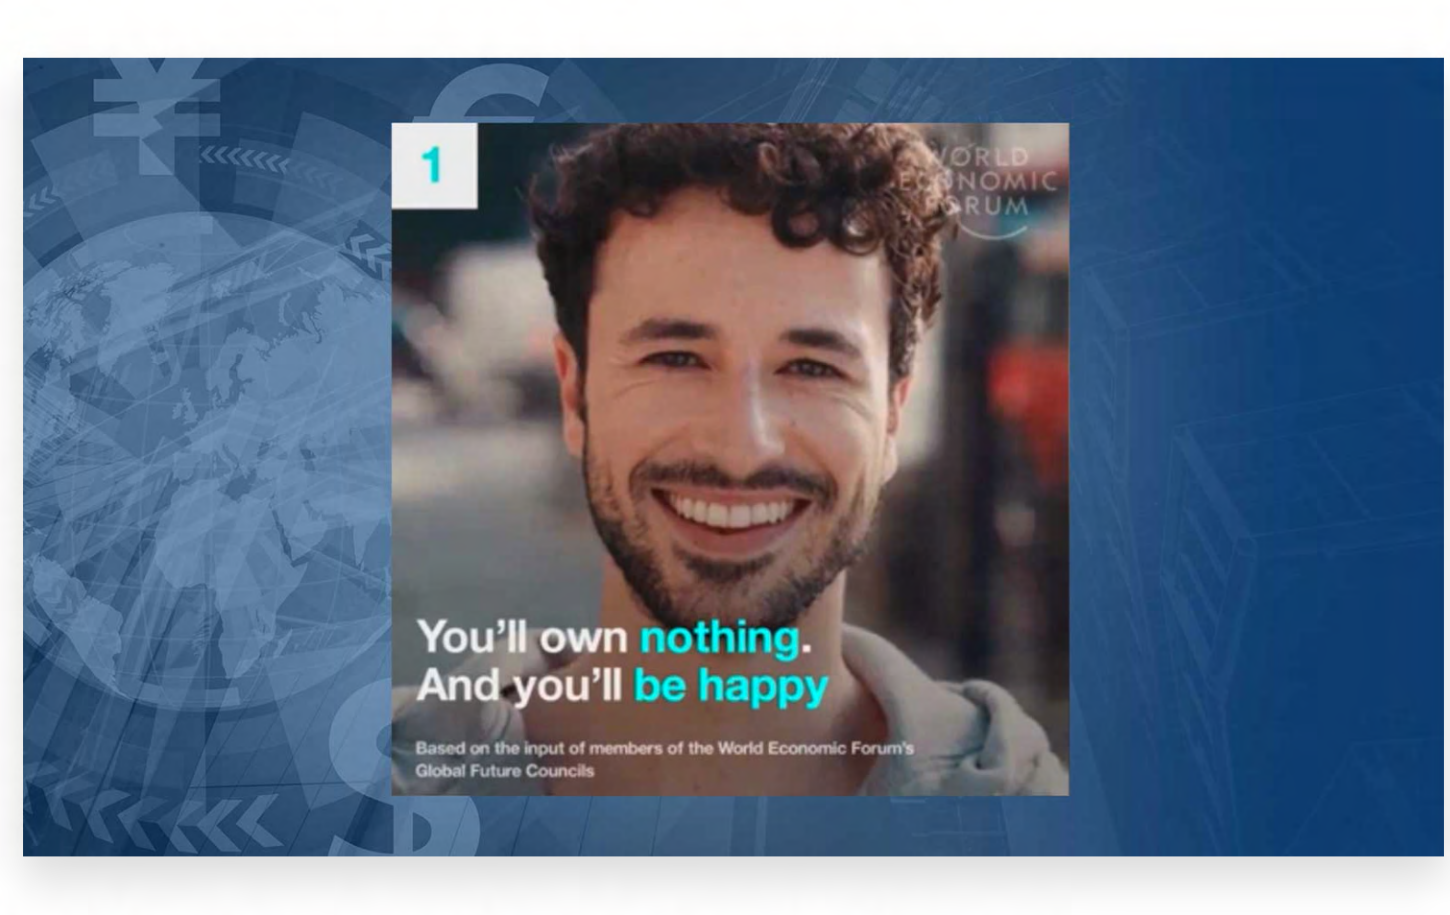
The IMF could further reset the dollar...

Down... 20%...10%... or even 5% of the new currency's value...

Or at any exchange rate they see fit...

And sell the idea as "equality" and "fairness" to everyone.

Remember what the World Economic Forum said...



1
WORLD ECONOMIC FORUM
You'll own nothing.
And you'll be happy
Based on the input of members of the World Economic Forum's Global Future Councils

Which brings me to another startling development...

Americans Could Soon Pay a New "World Tax"

As if devaluing the dollar wasn't bad enough...

As they roll out the new currency...

Official IMF documents reveal, the central planners could further add...

- ✓ A higher income tax and a new wealth tax on Americans. If you have more than $5,000 in the bank, you could be a target.
- ✓ They'll issue a higher property tax. 49 states from California to New York have already begun to hike these taxes.
- ✓ They could also add new estate, inheritance, and gift taxes on assets. That includes jewelry, paintings, or any collections you own even if you make no income from them. If you'll pass on any property to your heirs, that could be confiscated.
- ✓ They could then issue a new World Tax, also called a "solidarity tax" to help battle the pandemic and climate change.

Call it whatever you like... I believe it's just a socialist tax...

Similar to the ones pushed by Bernie Sanders, Elizabeth Warren, and Alexandria Ocasio-Cortez...

Designed to steal the wealth of hard-working Americans.

And you bet the rules won't apply to the bureaucrats.

They'll find loopholes to keep their wealth and property...

While you're forced to part with yours.

I know this all sounds unthinkable.

But I believe the wheels of the "Great Reset" are already turning.

Especially when you consider...

- The U.S. House of Representatives wants to give the IMF the green light to circulate $2 trillion of this new currency.
- Wall Street's biggest financial firms have joined the global elites with a $100 trillion reset agenda.
- Central banks have dumped $100 billion worth of U.S. treasuries and called for the new currency right now.

I believe this is the biggest currency shift we could see in our lifetime.

Legendary investor Jim Rogers, who is also a dear friend recently said...

"Traditionally, the US dollar has been the soundest currency in the world. But the US dollar is coming to the end of its century of dominance, and something else will replace it".

I believe that "something else" is the IMF's new currency.

All unfolding just as I predicted two years ago.

Those who don't take the necessary steps to safeguard their wealth or the little they have...

Could be left behind.

Let me Introduce Myself...

As I said earlier...

My name is Nick Giambruno. I was born and raised in Minnesota.

I am deeply concerned about the future of personal and financial freedom.

Frankly, we're living through a strange time in history.

The old rules – like hard work, perseverance, and economic freedom – don't seem to apply.

Government policies have devalued every dollar you've worked for.

I first noticed this dangerous trend while I worked at the highest level of investment banking in New York and the Middle East.

And it burned every freedom-loving fiber in my body.

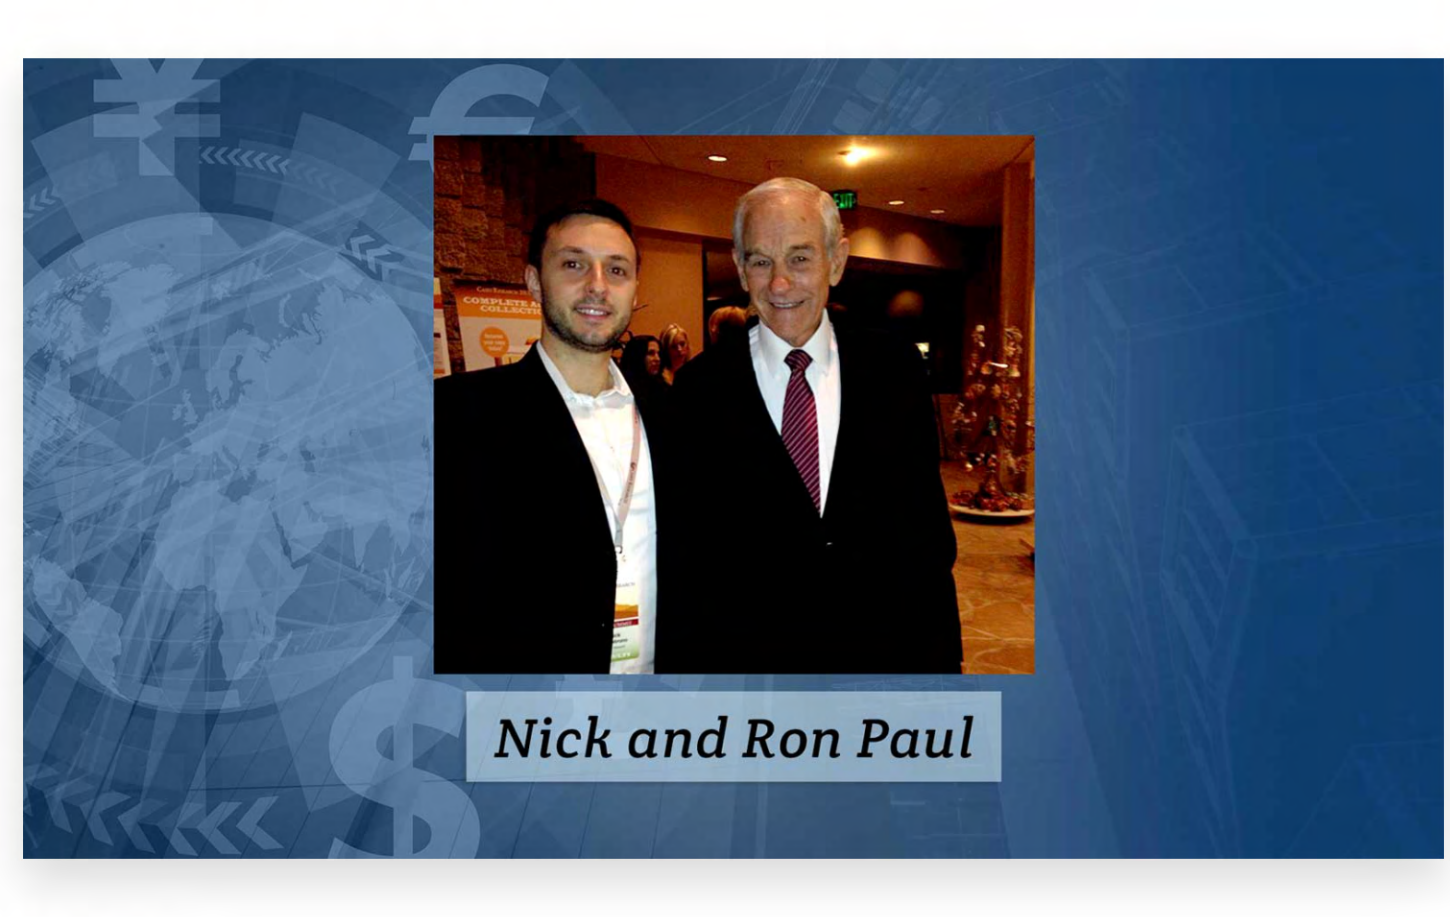
But what happens next could be much more alarming.

It's why I decided to seek the truth...

And befriend some of the smartest and most connected financial thinkers in the world.

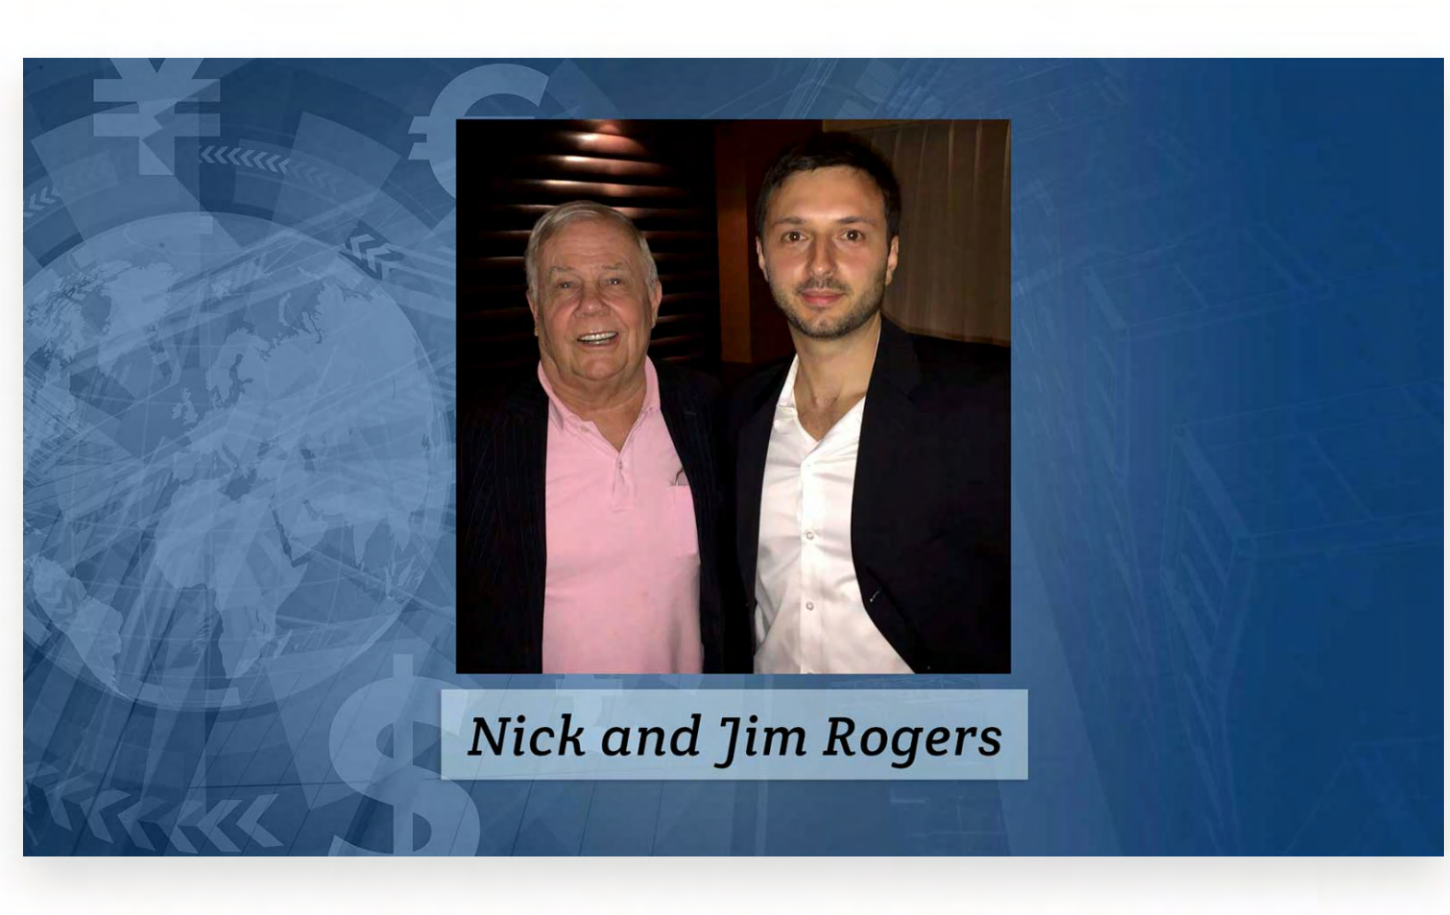
Like Peter Schiff,

Former Congressman Ron Paul.



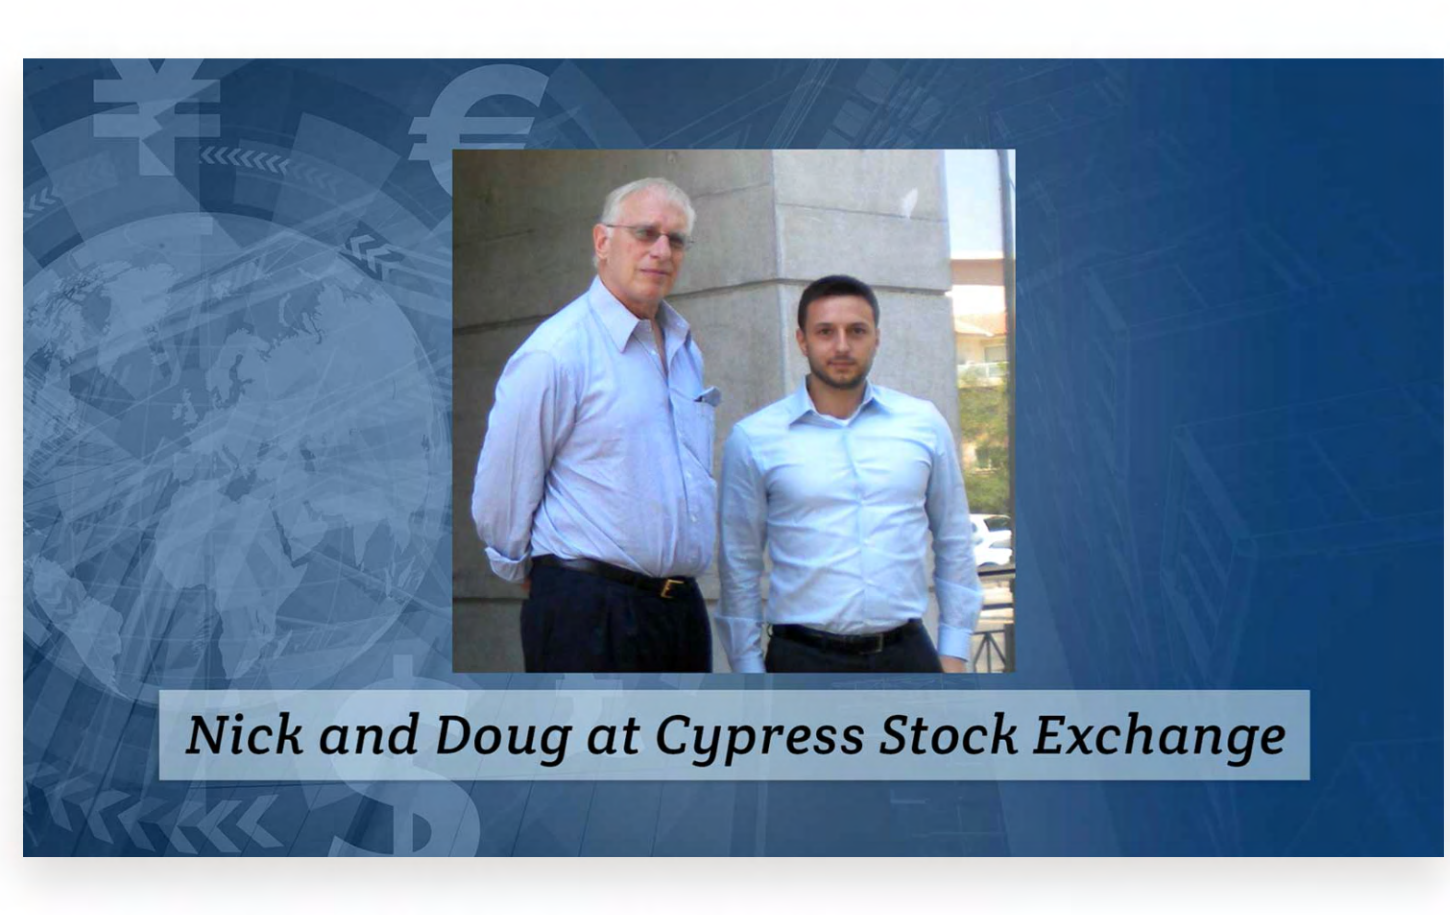
Nick and Ron Paul

Jim Rogers...



Nick and Jim Rogers

And world-renowned speculator and multi-millionaire Doug Casey...

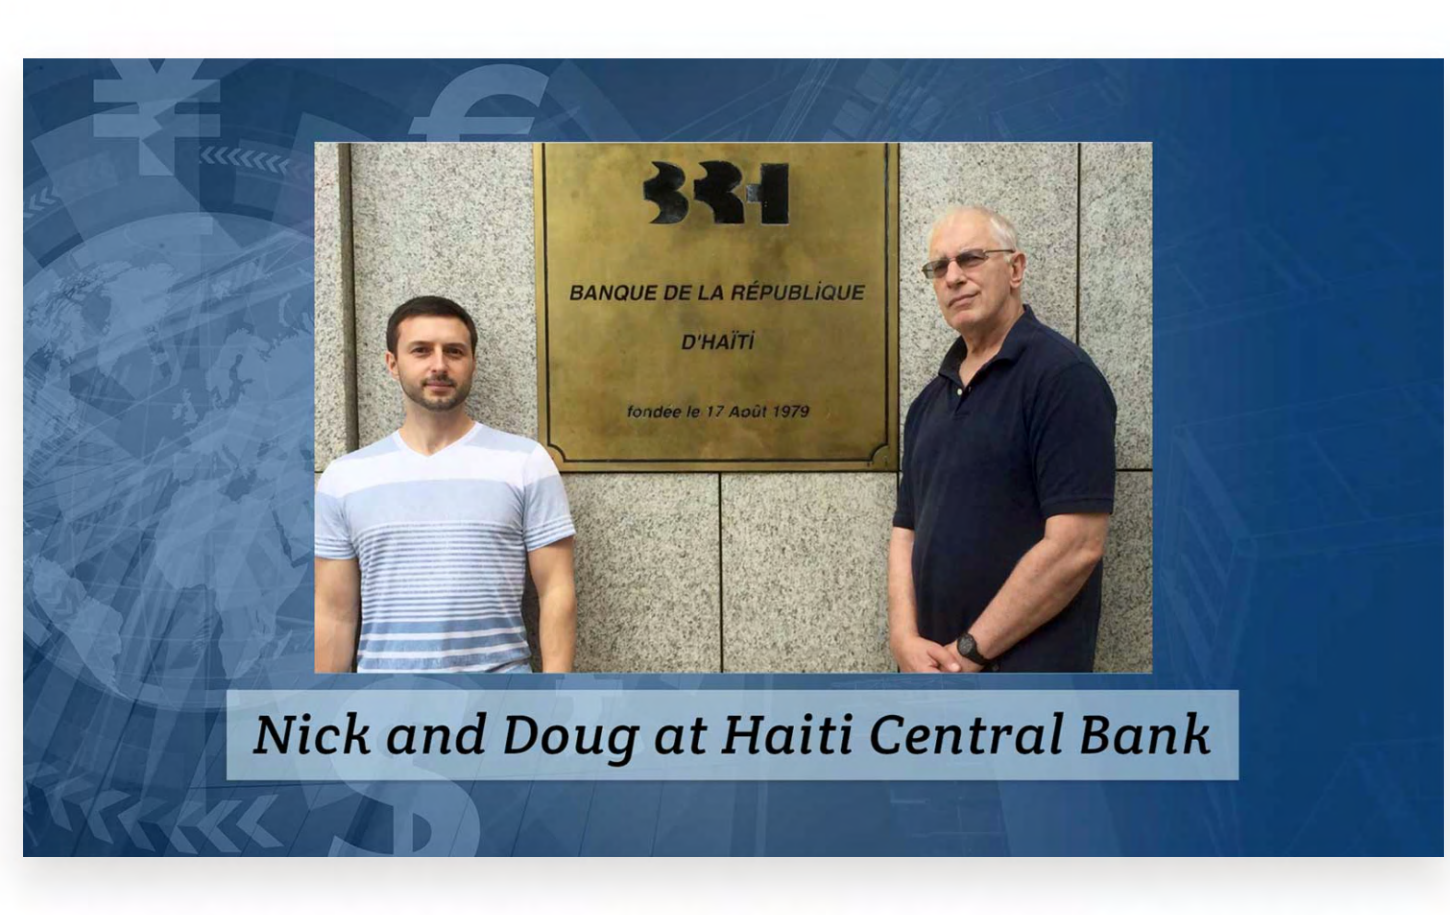


Nick and Doug at Cypress Stock Exchange

Who's now become my personal mentor.

In pursuit of answers, I've travelled to more than 60 countries – including six I've called home.

And I've met with heads of state... central bankers... presidents and prime ministers.



BANQUE DE LA RÉPUBLIQUE D'HAÏTI

Nick and Doug at Haiti Central Bank

My team and I have spent hundreds of man-hours on the ground...

Researching every financial, geopolitical and investment idea, without bias.

That's how we've peered into the future and predict some of the most significant events in history.

Like the 9/11 attacks... the dot-com bust... and the financial crisis of 2008.

And even show our readers how to prosper through these crises.

When you look at the facts...

You'll notice these events only *seem* to happen overnight.

But if you pay attention, there are always early warning signs.

Most people don't have the time or interest to connect the dots.

But it's my life's work.

My hope is you'll take a small sliver of time to pay close attention and prepare.

Because when history is written, there will be two groups of people in America:

Those who were bold enough to take specific protective action today, grow their wealth, and actually prosper through this "reset"...

And those who are left behind.

How can I know for certain?

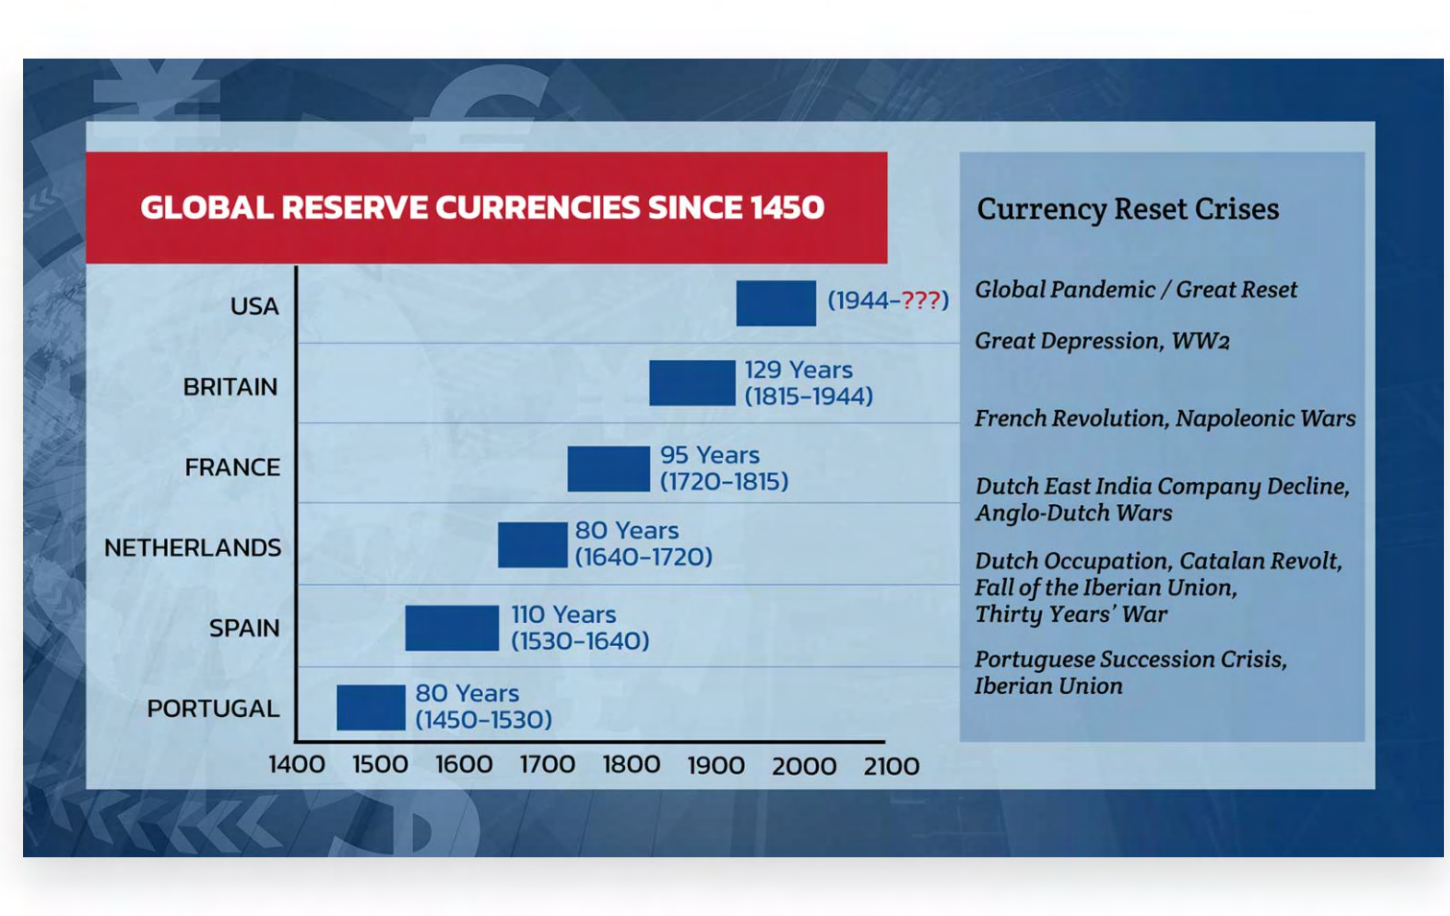
Because I've seen it happen several times before.

Currency Resets Never End Well

History shows that every currency reset since the 14th century occurred during a major crisis.

Like the current coronavirus pandemic.

And each time, the reset inflicted hardship on citizens... and lasted for decades.



For instance, in 1720 the French livre became the reserve currency.

The French had a near century of prosperity.

Then tragedy struck.

The French revolution cost France 2.3 billion livres, a lot of money at the time. Poor people were forced to pay higher taxes than the nobles. Prices ran sky high. Food supplies dried up. And there were bread riots in Paris.

As a result, the world lost faith in the livre.

By the early 1800s, the elites made the British pound the reserve currency.

But history has a way of repeating...

Near the end of World War II, in 1944, Britain and the global economy were a wreck.

It was obvious that the British pound was in trouble.

The Rise and Fall of the U.S. Dollar

Just like today...

Elite bankers, economists, and politicians used a disaster — in this case a major war — to their advantage.

44 nations poured into Bretton Woods, New Hampshire, in the summer of 1944...

To reset the global financial system on a massive scale.

Two things happened.

1. The elites overturned President Roosevelt's policies and returned to the gold standard and sealed the U.S. dollar as the new reserve currency.
2. They created the IMF and the World Bank to "monitor" the financial system.

A huge mistake!

Regular folks looked on in horror as the IMF debased several currencies by double digits over the next decade.

- The French franc (which took over from the livre) fell 30%.
- Argentina, Brazil, Chile, and Bolivia lost 99% of their purchasing power.

The British pound wasn't spared either.

As it lost reserve currency status, it fell 25%.

Inflation skyrocketed 20%, the highest in U.K. history.

Average workers saw their wages and savings wiped out, triggering widespread riots.

Things got so bad in the U.K., they cut the work week down to three days...

To ration basic services like electricity.

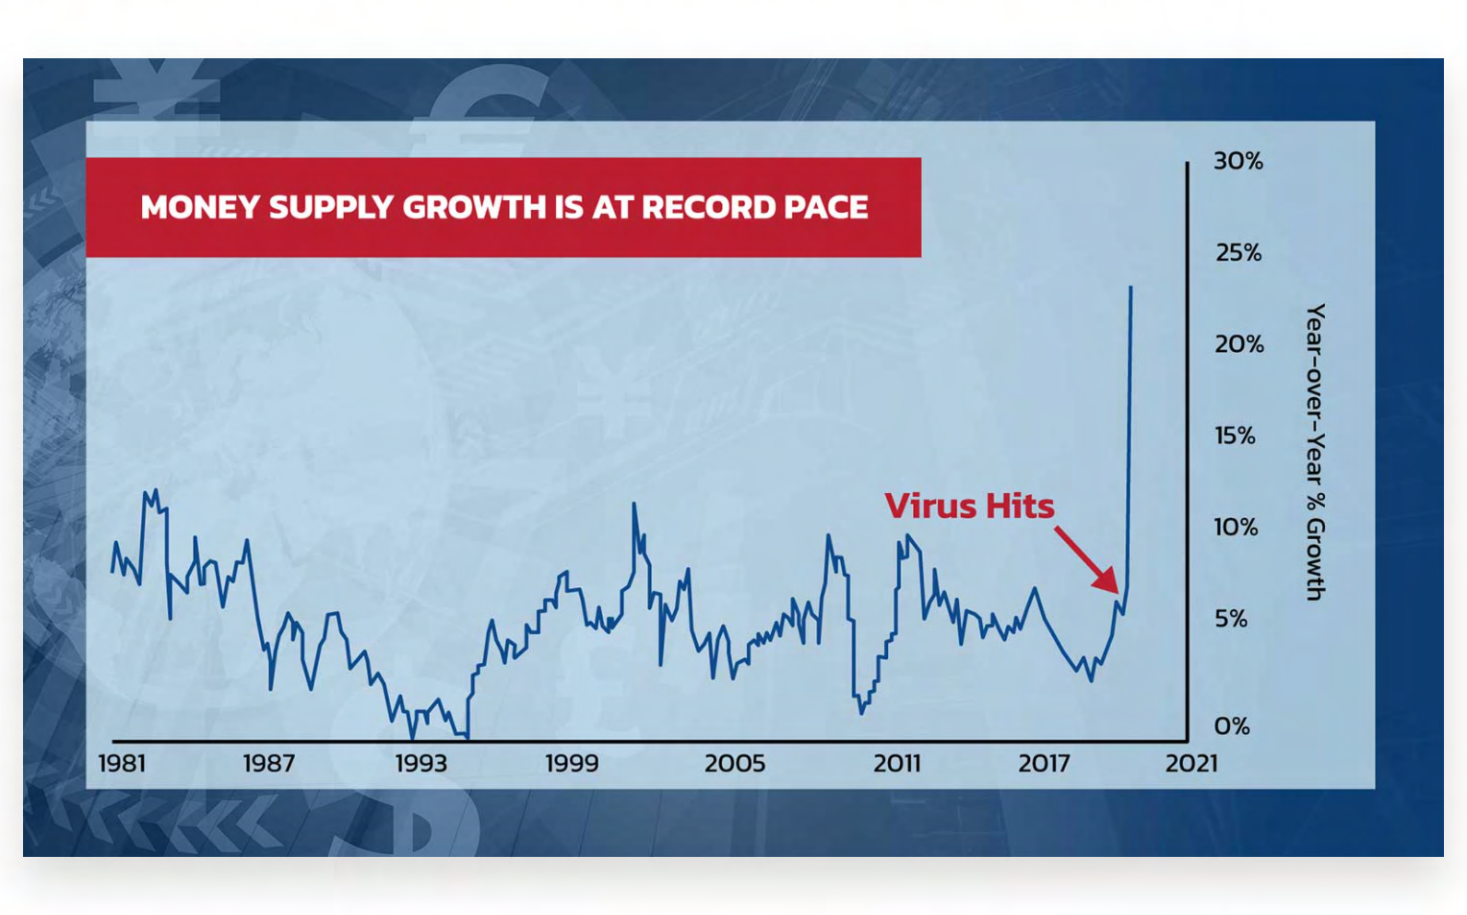
That is what can happen when currencies reset.

And now 77 years... almost a century later, I believe it's happening again.

The Federal Reserve is printing trillions of dollars.

I know it's hard to wrap your head around numbers that big.

But this chart says just how fast the money supply is surging:



The vast majority of folks who have no idea what's happening could soon be blindsided.

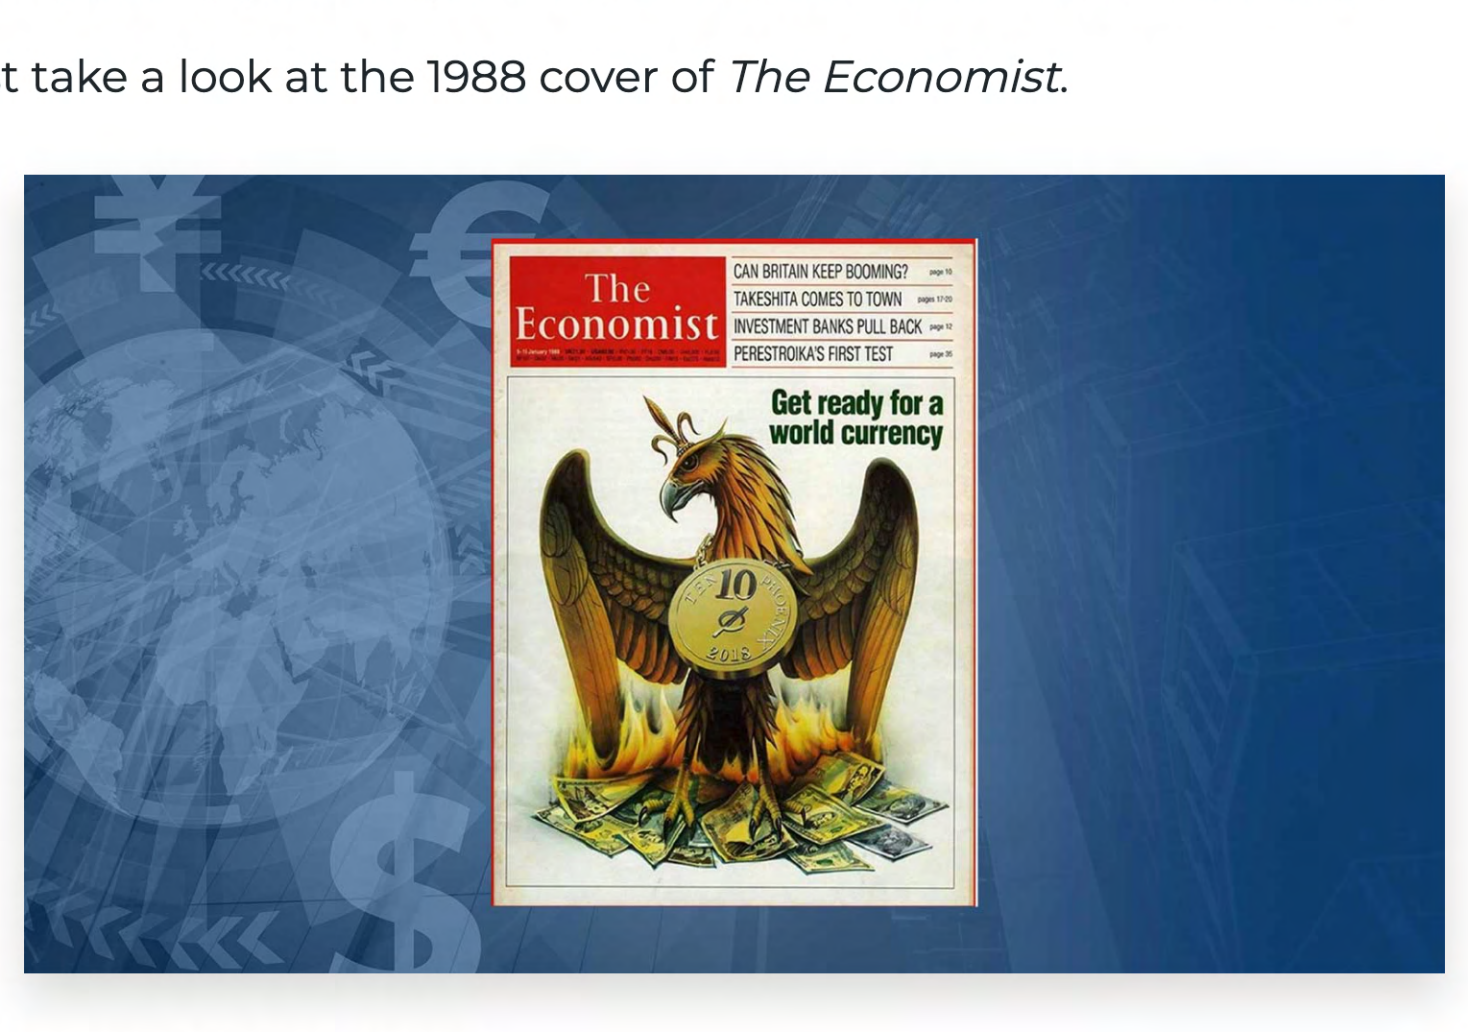
Ready or not... I believe the U.S. dollar is about to meet its fate.

"We Face a New Bretton Woods Moment"

— IMF Managing Director, *Kristalina Georgieva*

You see, for decades the elites at the IMF and in the financial world have been publicly planning to replace the dollar with a new currency.

Just take a look at the 1988 cover of *The Economist.*



Looks very bizarre, right?

But something was missing...

Remember every currency reset occurred during a war, riot, or a pandemic.

All the "powers that be" needed was a global disaster.

Then BOOM!

The coronavirus hit.

A global pandemic was the perfect opportunity.

IMF managing director Kristalina Georgieva wasted no time when she said in a recent broadcast...

"We face a 'New Bretton Woods' moment".

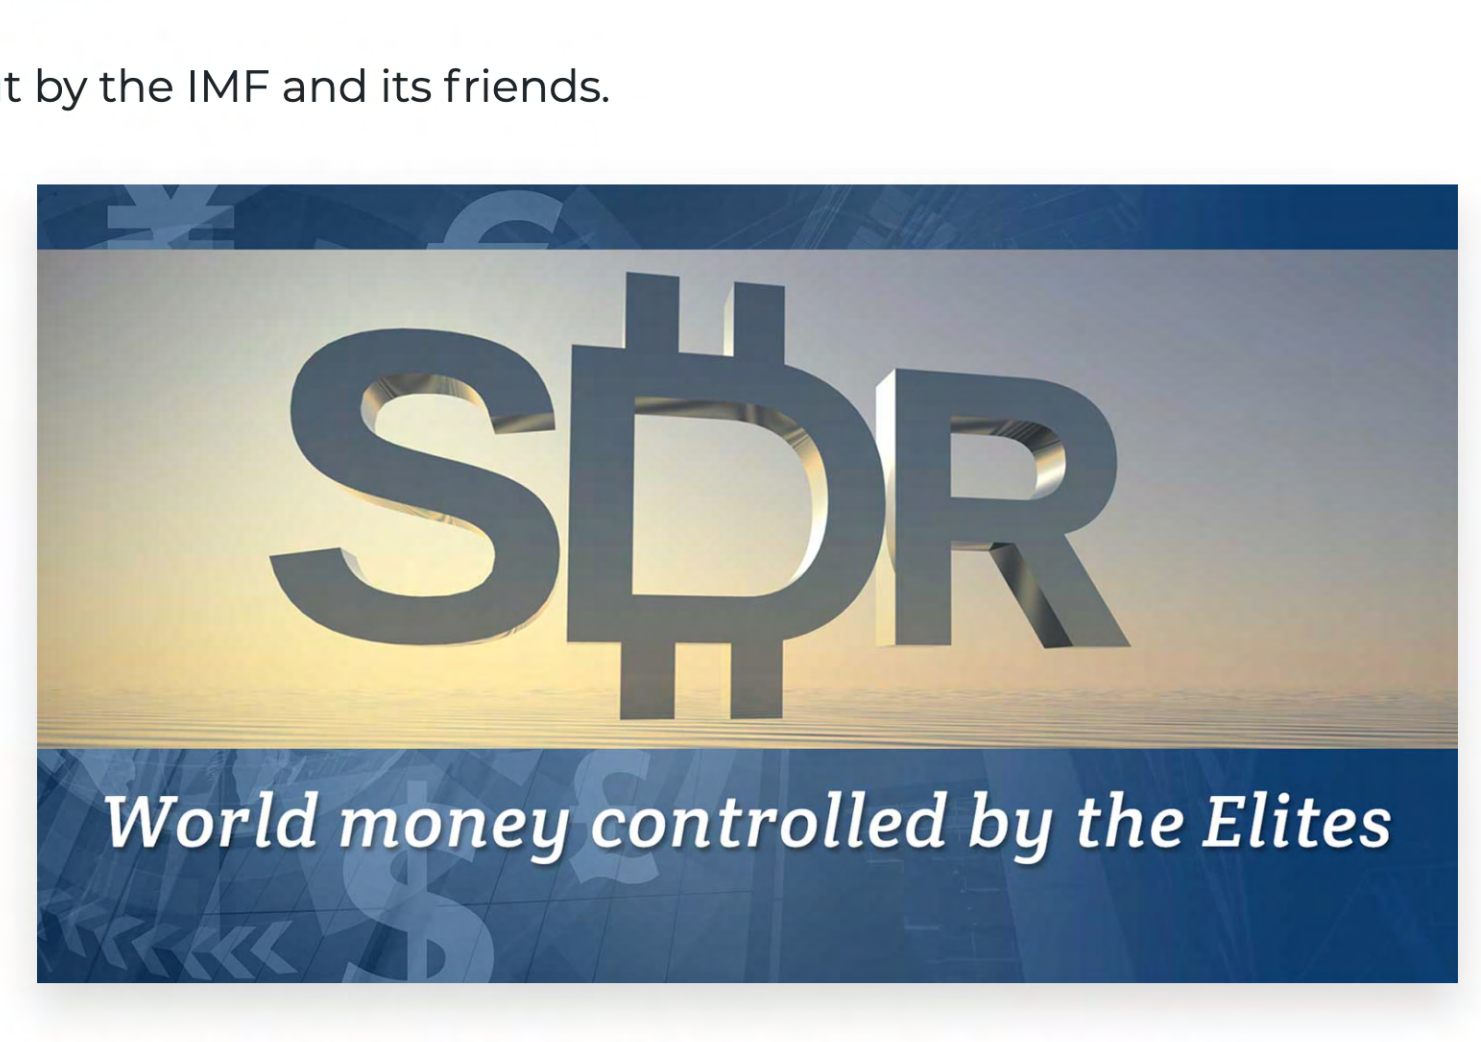
In simple terms...

The Bretton Woods Conference in 1944 gave the U.S. dollar its FINAL dominance...

I believe a "Bretton Woods" moment in 2021 could downgrade and reset it.

Only this time, the reserve currency could not be controlled by one nation...

But by the IMF and its friends.



SDR
World money controlled by the Elites

Look, for half a century, the IMF "printed" its own currency.

They call it *Special Drawing Rights* or SDR.

A very vague name for a currency, you bet.

That's by design.

Most Americans have no idea SDRs exist...

But governments routinely use the SDR as "world money."

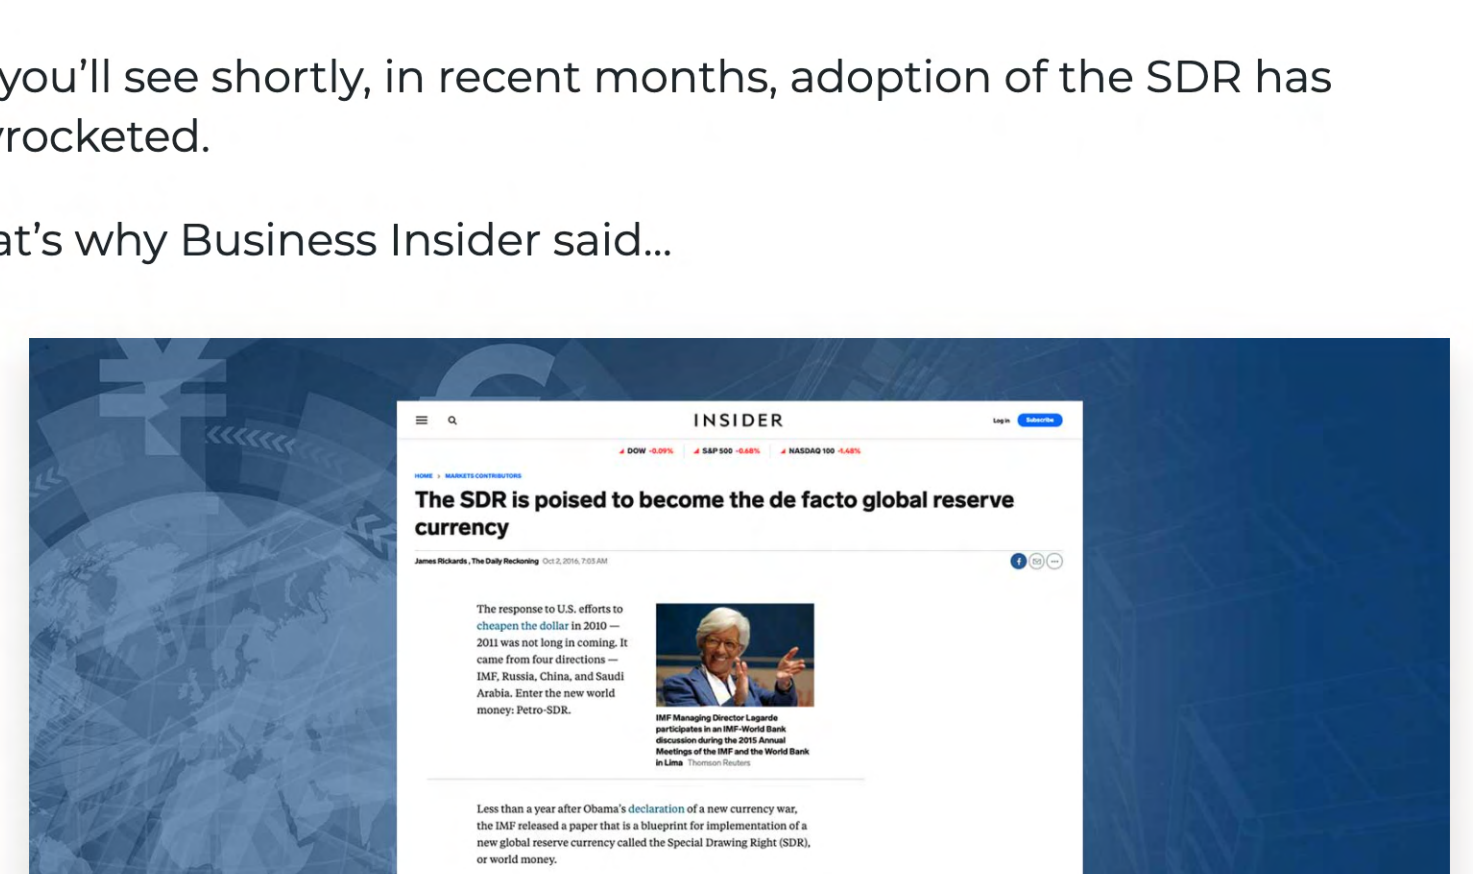
According to official IMF records, they circulated billions of it during past financial crises.

- The IMF pumped out 9.3 billion SDRs during the currency crisis of 1970–72.
- 12.1 billion SDRs during the economic crisis of 1979.
- And a staggering 161 billion SDRs after the financial crisis of 2008...

But I believe that's small potatoes compared to what could happen next.

As you'll see shortly, in recent months, adoption of the SDR has skyrocketed.

That's why Business Insider said...



INSIDER

The SDR is poised to become the de facto global reserve currency

It could downgrade every dollar in your pocket and bank account.

And have dire implications for average Americans.

Let's recap the facts I shared so far...

You'll notice three major forces pushing this dollar reset into high gear.

① The Release of New "World Money"

On July 31, 2020, the Democrat-led House passed a historic bill in the House...

To support the IMF's agenda to print 2 trillion SDRs.

I believe that this was all under the guise of fighting the pandemic.

And it could get signed by President Biden.

But that could be just the beginning. I've seen reports where some economists are calling for 3 trillion SDRs...

That's more than the GDP of Saudi Arabia, Switzerland, and Argentina, combined.

It's 18X the amount of SDRs issued after the 2008 financial crisis.

If the bill is signed it would be the most "world money" the IMF has ever printed...

Just like that – out of thin air.

And all headed into central banks overnight.

One day – sooner than you think – I believe we'll use SDRs alongside the dollar...

To pay for a burrito at Chipotle...

Pay for groceries at Walmart...

Or your savings account, 401(k), and retirement account will be valued in SDRs.

For the first time since Bretton Woods in 1944...

We could witness a great financial shift.

And those who don't prepare could be left cold in the dark.

If there's anything you take from today's message, it should be this:

The elites are moving in with the "Great Reset."

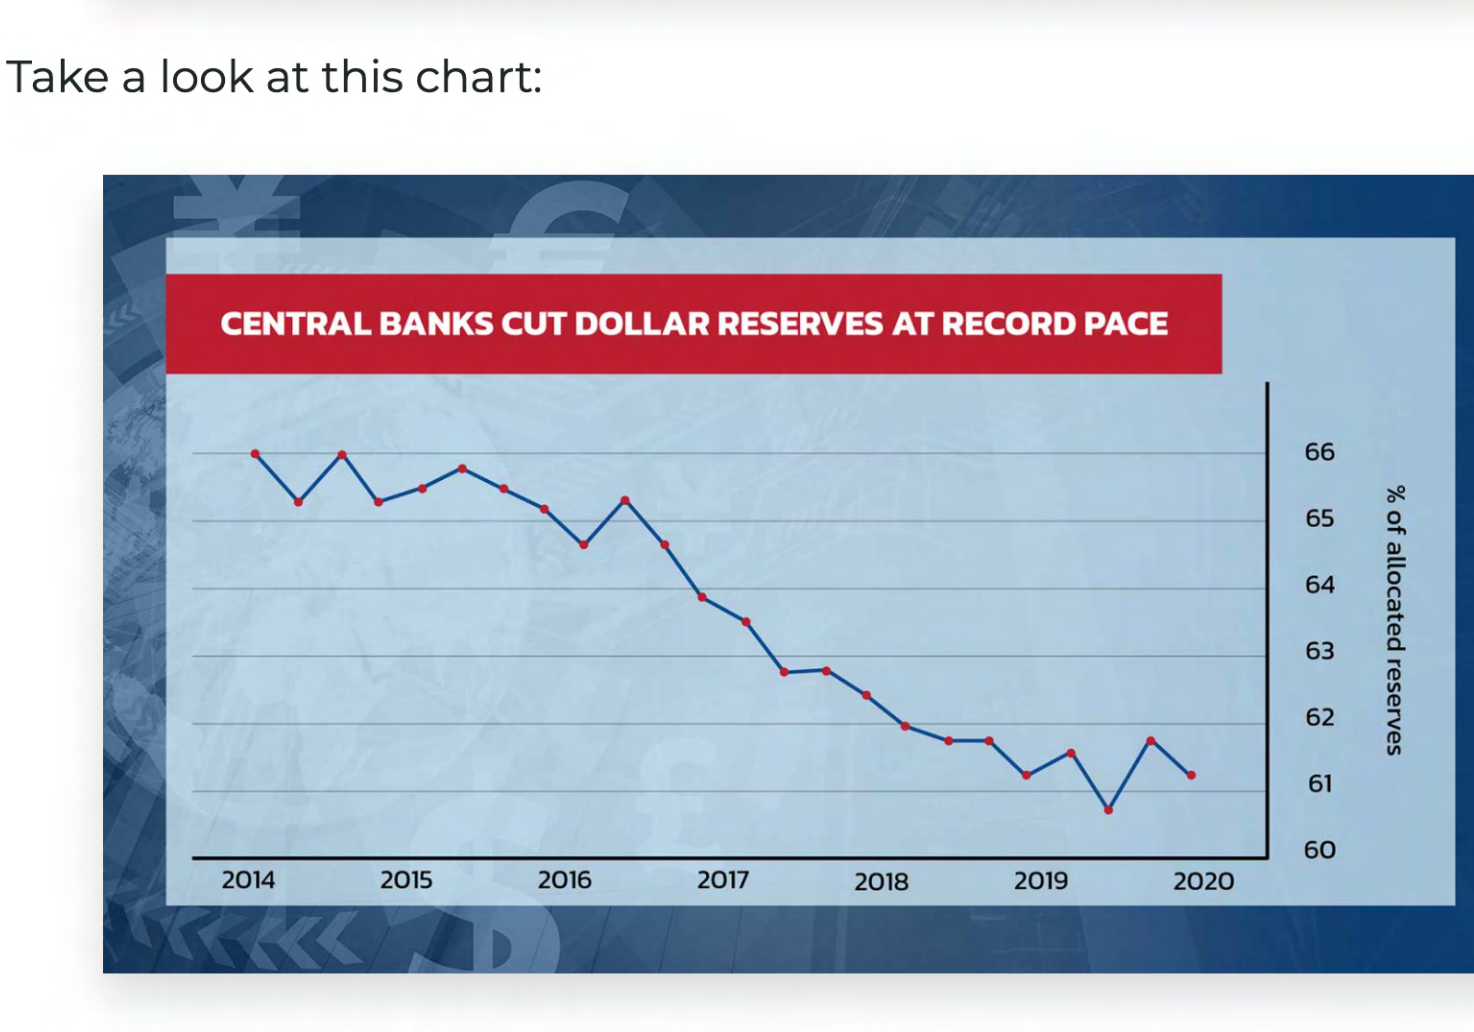
You must act right now to protect your wealth and assets.

Because there's an even bigger force that could ensure the reset happens.

② Central Banks Dumping U.S. Dollars at an Alarming Rate

Central banks have begun dumping U.S. dollars at a frantic pace.

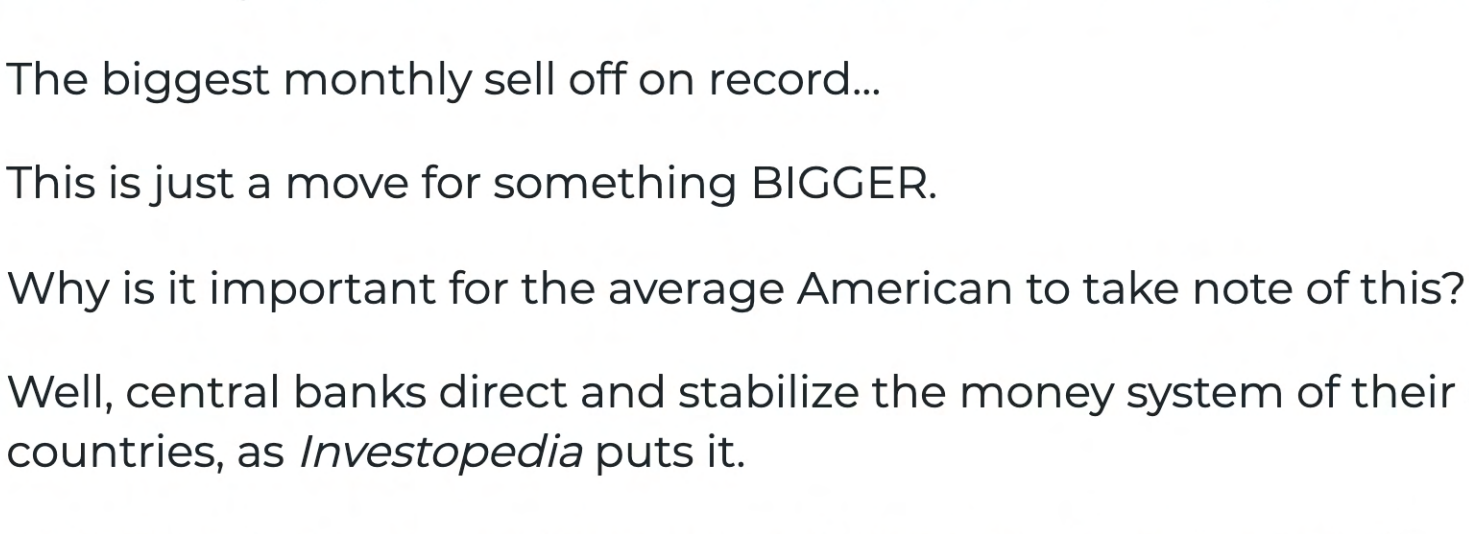
And J.P Morgan added...



"Recent data on currency reserves among global central banks suggest this shift is already underway."

- J.P. Morgan

Take a look at this chart:



Bloomberg reports that more than $100 billion was dumped recently.

The biggest monthly sell off on record...

This is just a move for something BIGGER.

Why is it important for the average American to take note of this?

Well, central banks direct and stabilize the money system of their own countries, as *Investopedia* puts it.

At their whim, they can team up and shut the U.S. dollar out of circulation virtually overnight.

Based on their actions, this is the point I believe we're at.

The Dollar's Crash is only Beginning

Recently, Mark Carney, the U.K's central bank governor, unleashed a firestorm at a meeting in Jackson Hole, Wyoming.

He suggested the IMF's SDR replace the dollar as the global reserve currency.

It's a major blow.

If the U.K. — America's biggest ally — doesn't want U.S dollars...

Who else would want our dollars?

Nobody!

China, Germany, France, Canada, and the U.K central banks already stockpile 43 billion SDRs.

That figure could increase if more SDRs are distributed to IMF members.

And remember our central bank, the Federal Reserve, already stockpiled 36 billion SDRs.

It's gearing up for this currency shift.

The facts don't lie.

The elites are pushing the currency reset.

They'll profit from it,

Just like the time FDR and his elites made $4.2 billion in profits from the dollar reset of 1933.

Because SDRs are not just in our banking system alone...

It's rapidly popping up in other major industries too.

Like at the Suez Canal in the Middle East.

It's one of the world's biggest oil hubs.

About 3 million barrels per day travel through the canal.

All shipped to North America and Europe.

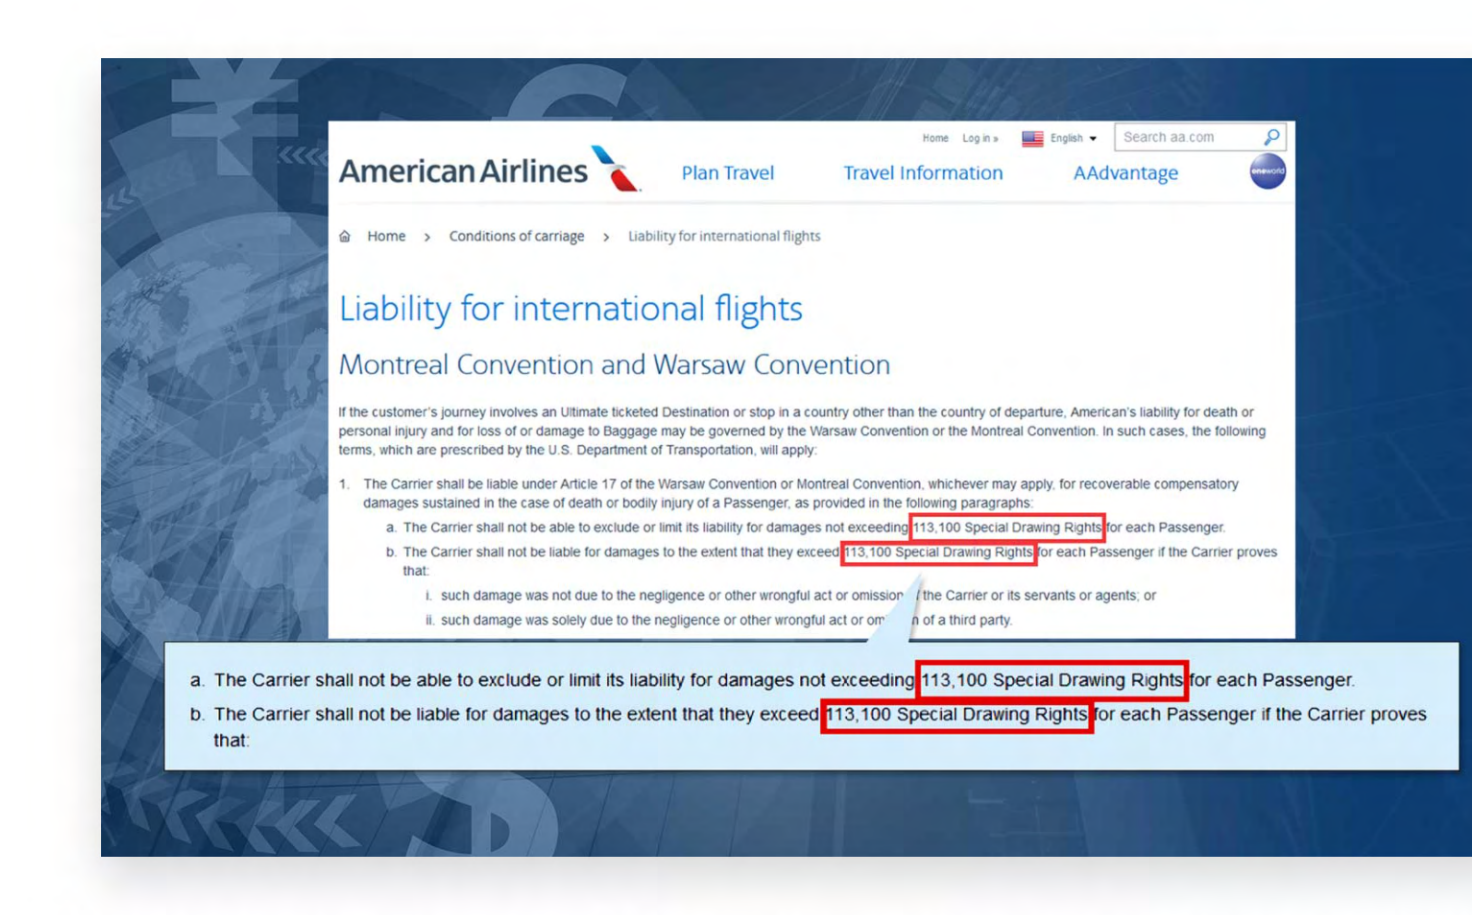
Did you know that transit fees there are denominated in SDRs?

I believe it's only a matter of time before oil – the world's most traded commodity — is priced in SDRs too.

Or take the $800 billion airline industry.

Some carriers use SDRs to price some of their liabilities.

You can see it on American Airlines' "condition of carriage" contract.



American Airlines

Liability for international flights

Montreal Convention and Warsaw Convention

a. The Carrier shall not be able to exclude or limit its liability for damages not exceeding 113,100 Special Drawing Rights for each Passenger

b. The Carrier shall not be liable for damages to the extent that they exceed 113,100 Special Drawing Rights for each Passenger if the Carrier proves that

Most people have no clue SDRs are activated every time they travel.

If you've flown recently, you may have already "conducted business" in this new world currency.

I won't be surprised if airlines could be forced to price their tickets in SDRs soon.

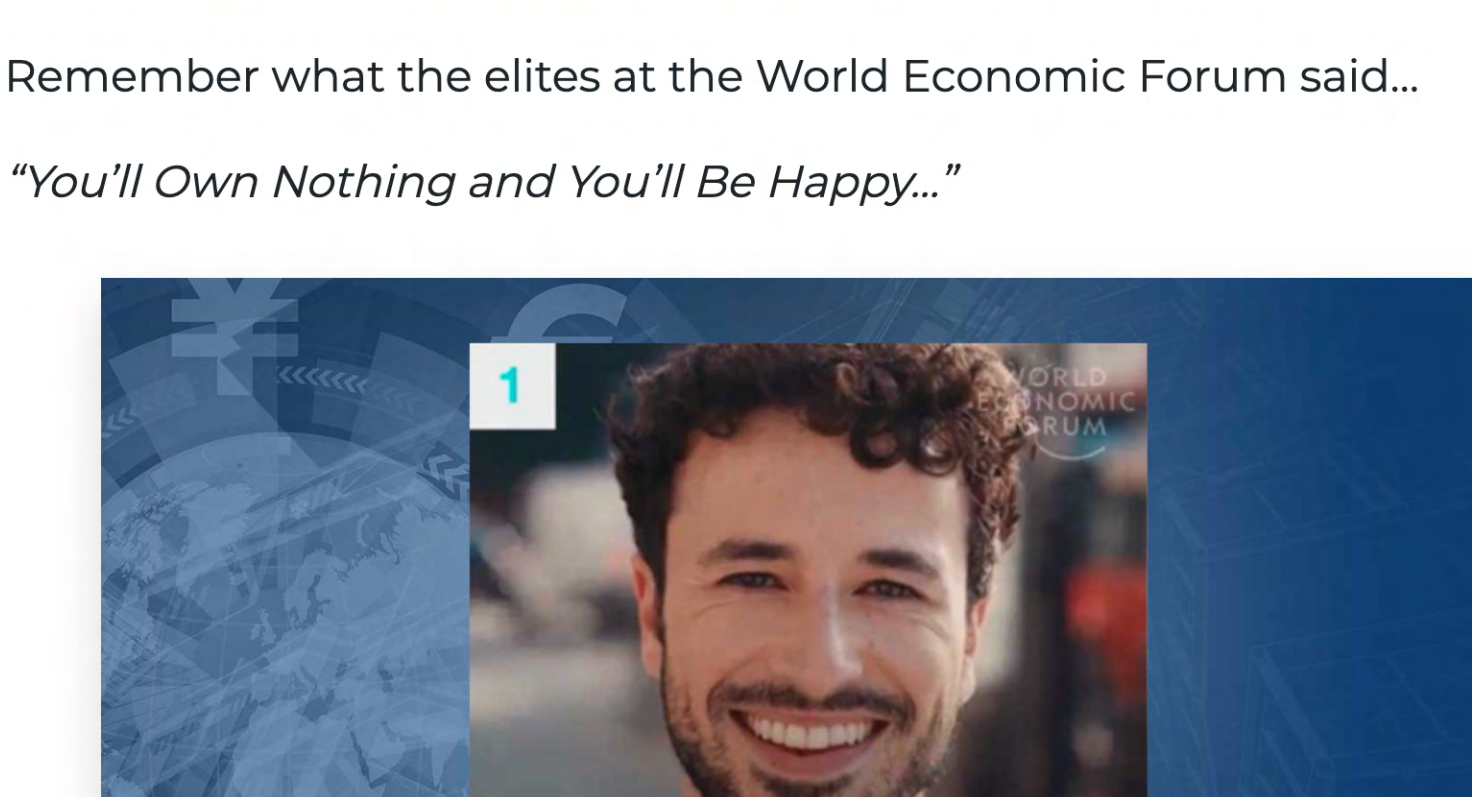
When you connect the dots...

It's not hard to see how the reset plan is taking shape on a global scale.

Americans won't know what to do when their savings and retirement are controlled by the bureaucrats pushing this currency.

Remember what the elites at the World Economic Forum said...

"You'll Own Nothing and You'll Be Happy..."



1
You'll own nothing.
And you'll be happy
Based on the input of members of the World Economic Forum's Global Future Councils
WORLD ECONOMIC FORUM

I believe now is the time to prepare.

Because Wall Street has joined the reset bandwagon too.

③ Wall Street's $120 Trillion Reset Plan

As I've told you, the financial reset could soon strike hedge funds...

Mutual funds...

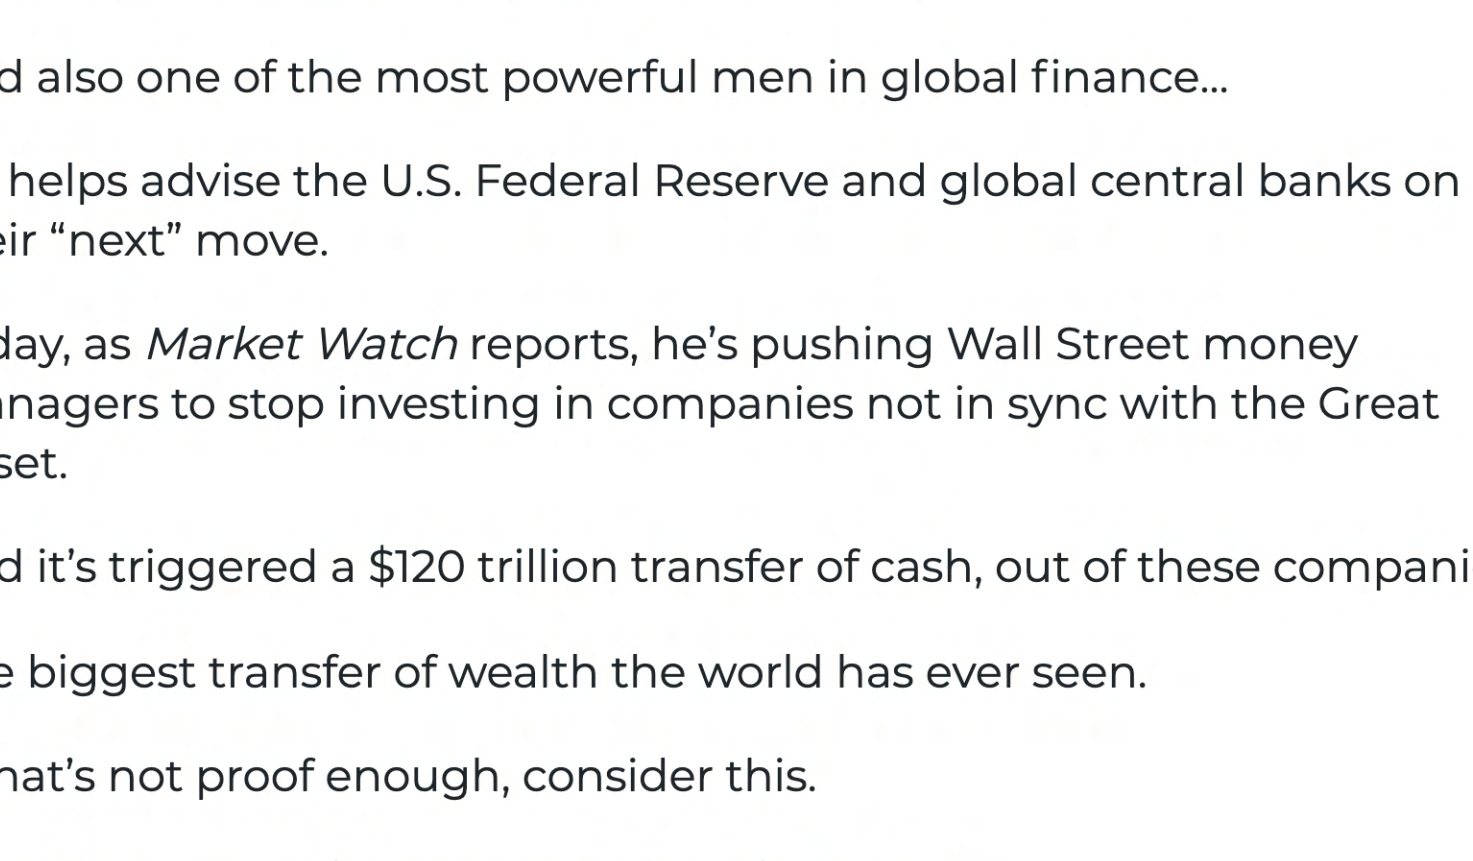
401(k)s...

And retirement plans.

Think it's impossible?

Let me explain...

Take a look at this Reuters headline....



Larry Fink is Right: It's Time for a Reset on Capitalism

Most people have no clue who Larry Fink is.

But if Mr. Fink says the free market needs to reset... you should pay attention.

He's a trustee at the World Economic Forum.

And also one of the most powerful men in global finance...

He helps advise the U.S. Federal Reserve and global central banks on their "next" move.

Today, as *Market Watch* reports, he's pushing Wall Street money managers to stop investing in companies not in sync with the Great Reset.

And it's triggered a $120 trillion transfer of cash, out of these companies.

The biggest transfer of wealth the world has ever seen.

If that's not proof enough, consider this.

Mr. Fink is the co-founder and CEO of BlackRock.

It's the world's biggest financial firm with $7 trillion under management.

BlackRock advises central banks, financial ministries, and big investors like state funds, pension funds, insurance companies and foundations.

If you have money in any bank, mutual fund, 401(k), IRA, or anywhere at all...

It could be tied to a BlackRock investment...

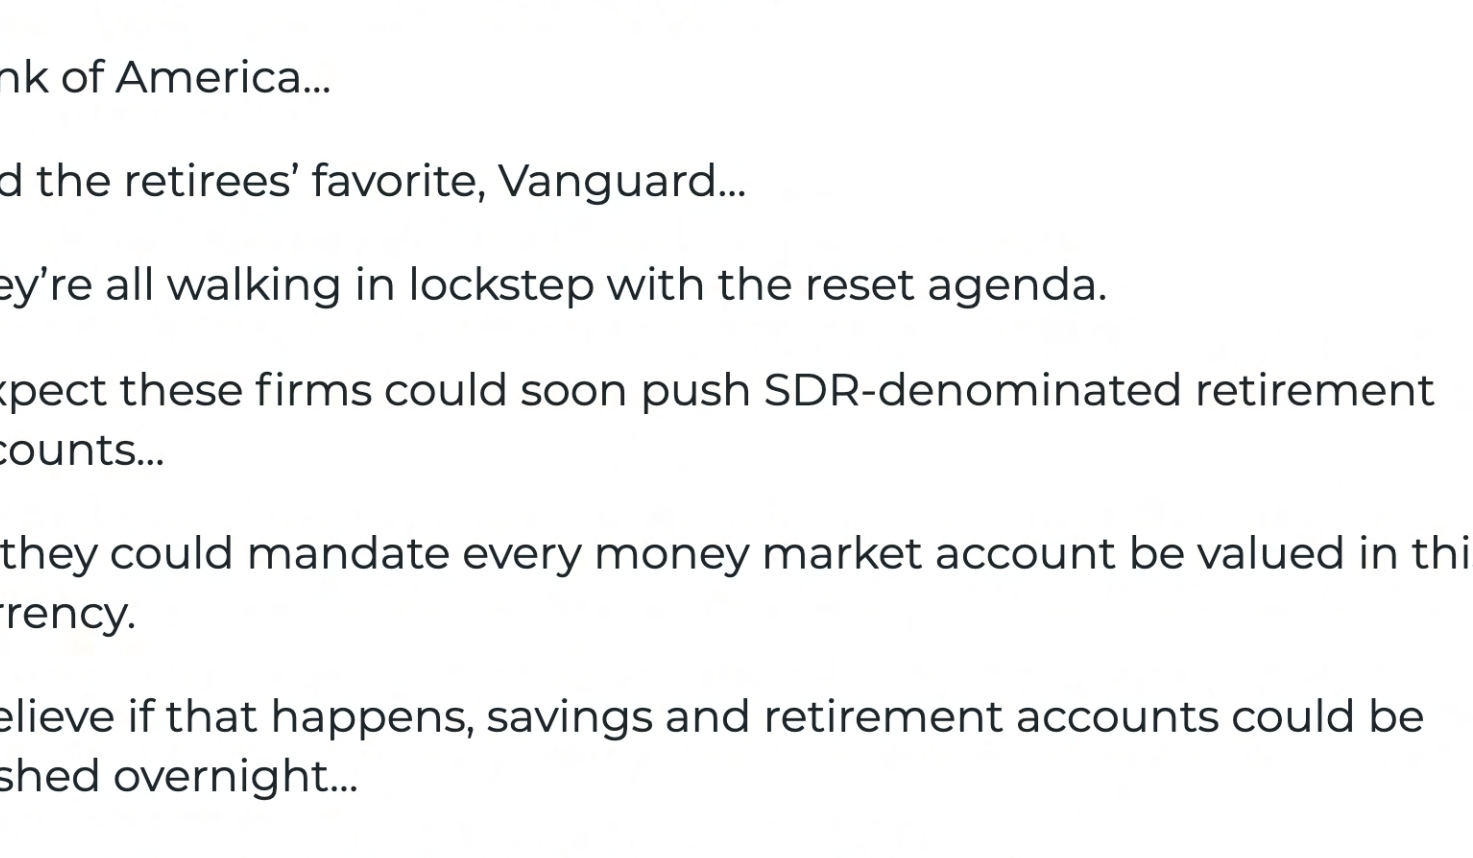
Which puts your money theoretically within reach of global central planners.

It's such a vast plan...

Nearly all money managers are in tune with the reset agenda.

Consider Lincoln Financial Group. They manage $275 billion.

They recently posted on their website...



"The new normal is an opportunity for the Great Reset"

- Lincoln Financial Group

Goldman Sachs Personal Wealth Manager Kara Murphy said...

"This is the Great Reset".

Other firms like State Street Advisors...

Bank of America...

And the retirees' favorite, Vanguard...

They're all walking in lockstep with the reset agenda.

I expect these firms could soon push SDR-denominated retirement accounts...

Or they could mandate every money market account be valued in this currency.

I believe if that happens, savings and retirement accounts could be slashed overnight...

The question is: *"Who's managing your money..."*

"...And will it still be there when you need it most?"

Look, I am no conspiracy theorist.

And I am not preaching doom and gloom...

I am only sharing the facts as I see them, and connecting the dots...

So you can draw your own conclusions.

Frankly, you won't likely hear about these developments anywhere else.

Let Me Quickly Recap...

Bottom line: The global elites needed the "perfect" crisis to reset the global financial system.

Now that they've got it... they're dead set on forcing the "Great Reset" down our throats. I believe:

- The U.S. dollar is set to be devalued 31% against the new reserve currency.
- Thousands of Americans could see their saving and retirement account decimated.
- Higher property tax, wealth tax, and a new "world tax" will be forced on hard-working Americans.

All in the name of "equality".

A good question is...

Will your assets still be in your name when you need them most?

Maybe, maybe not. One thing is for certain.

Without the right information, most people have no idea what's unfolding.

Not until it's too late.

But events like the dollar reset rarely happen suddenly.

The French revolution didn't suddenly start in 1789.

The signs were there years before.

Likewise, World War II didn't begin in 1939 without warning.

Just think about how an avalanche turns deadly.

First a weak layer of snow cracks and slips down the slope.

It gathers more snow and accelerates.

By the time most people see the danger...

It's too late to take action.

My hope is you can now see the danger ahead.

So you can prepare and protect yourself.

And perhaps even profit from these sweeping changes.

Here Are Three Critical Steps I Believe You Must Take Right Now To Protect Your Assets

If you wait till the Great Reset rolls out...

Your 401(k), savings, retirement account...

Even a simple bank account, with a few hundred dollars...

Could be locked within the grips of global authority.

In my opinion, you must take swift and decisive action right now, to protect what you've worked for.

I'll show you the exact steps I'm taking to protect me and my family as the Great Reset unfolds.

Step 1. You Should Own the World's Hardest Currency

The first step is to insulate and decentralize your wealth.

Get it out of central planner's grips.

I'll give you details on a relatively new asset that helps you move as much money as you like...

Completely out of the U.S. banking and financial system...

And potentially grow it at the same time.

It has nothing to do with gold, silver, or any precious metals.

And it's not any other paper currency you've heard of.

This asset is simply "hard money" that liberates you from government control.

No central authority controls it. No country's sanctions or laws can affect it.

It's not available in a central location for a SWAT team to raid, either.

While this asset is perfect for folks who believe in financial freedom...

You do need to have an open mind.

It's a relatively new way to protect and grow your wealth... safely, legally, and secretly.

Folks who put their money into this hard currency have seen their stake grow more than 900% in 21 months.

Now nothing is ever certain in the market.

But I believe you have a small window to get in and see even bigger potential returns.

And the great thing is you can get started with as little as $100.

It could well be the best investment you'll make for the next few years.

So you can sleep easy at nights as the Great Reset unfolds.

You'll get full details in a brand new research report I've written called:

THE GREAT RESET

The Great Reset: How to Own the World's Hardest Crisis Currency

Shortly, I'll show you how you can get this groundbreaking report.

But here's the next critical step you must take right now.

Step 2: Safeguard Your Assets and Privacy from the Feds

It's no secret that the central authorities will stop at nothing to create a surveillance state.

Every day, the elites drum up new laws and solutions to limit your privacy.

For instance, the U.S. authorities now own a COVID-19 contact tracing app.

They use Google and Apple products to deploy it.

And can tell where you've been and who stood next to you at the grocery store.

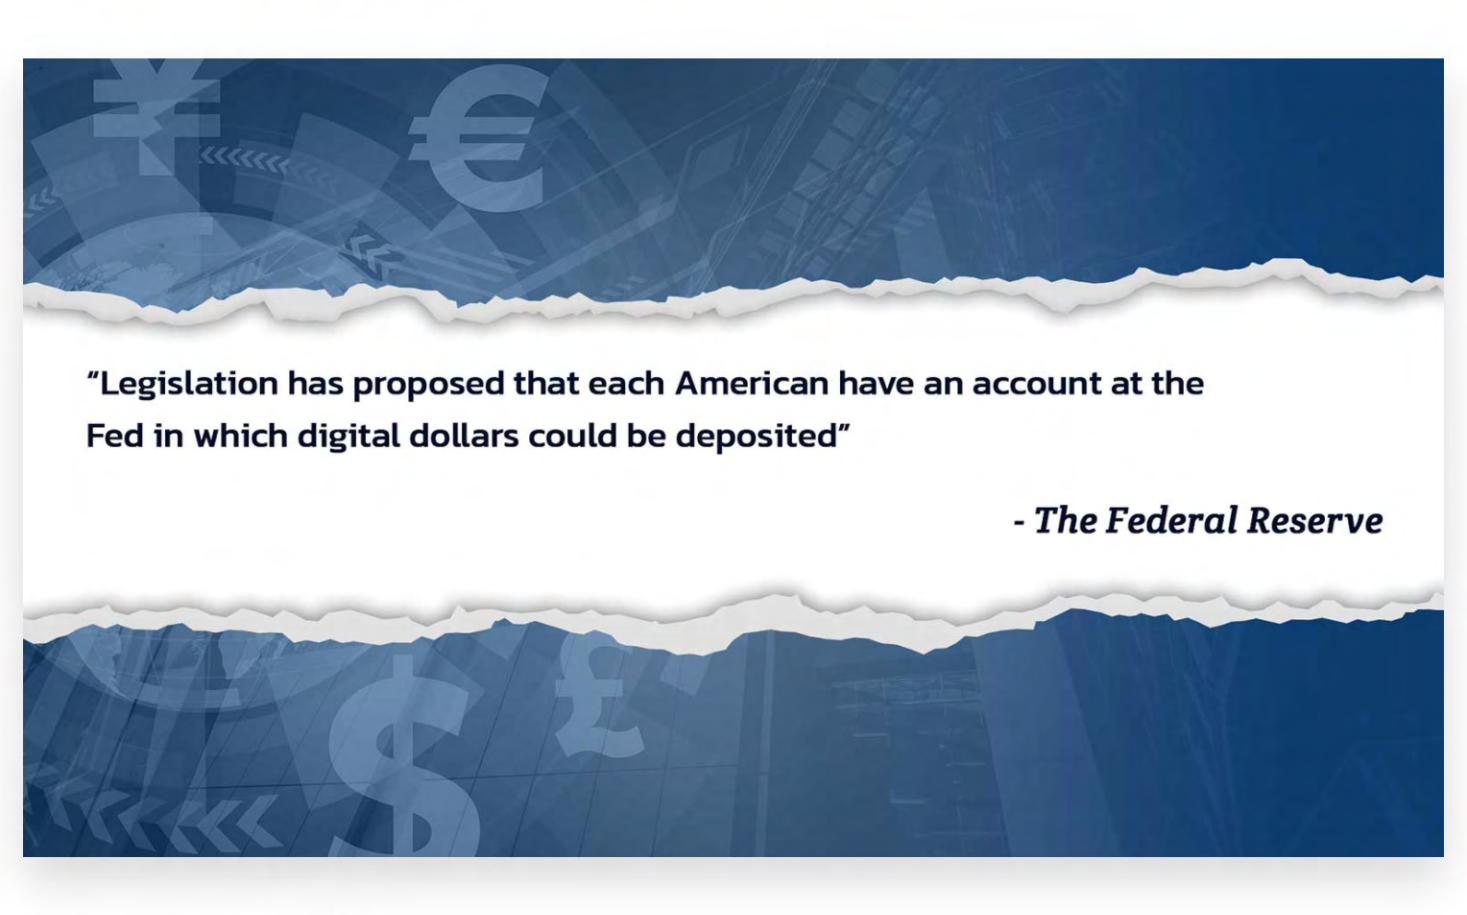
This type of surveillance is now making its way into our financial system.

The Fed recently announced they have plans to create a digital dollar.

On the surface it sounds innovative...

But it's dangerous for individuals like us.

According to the Federal Reserve...



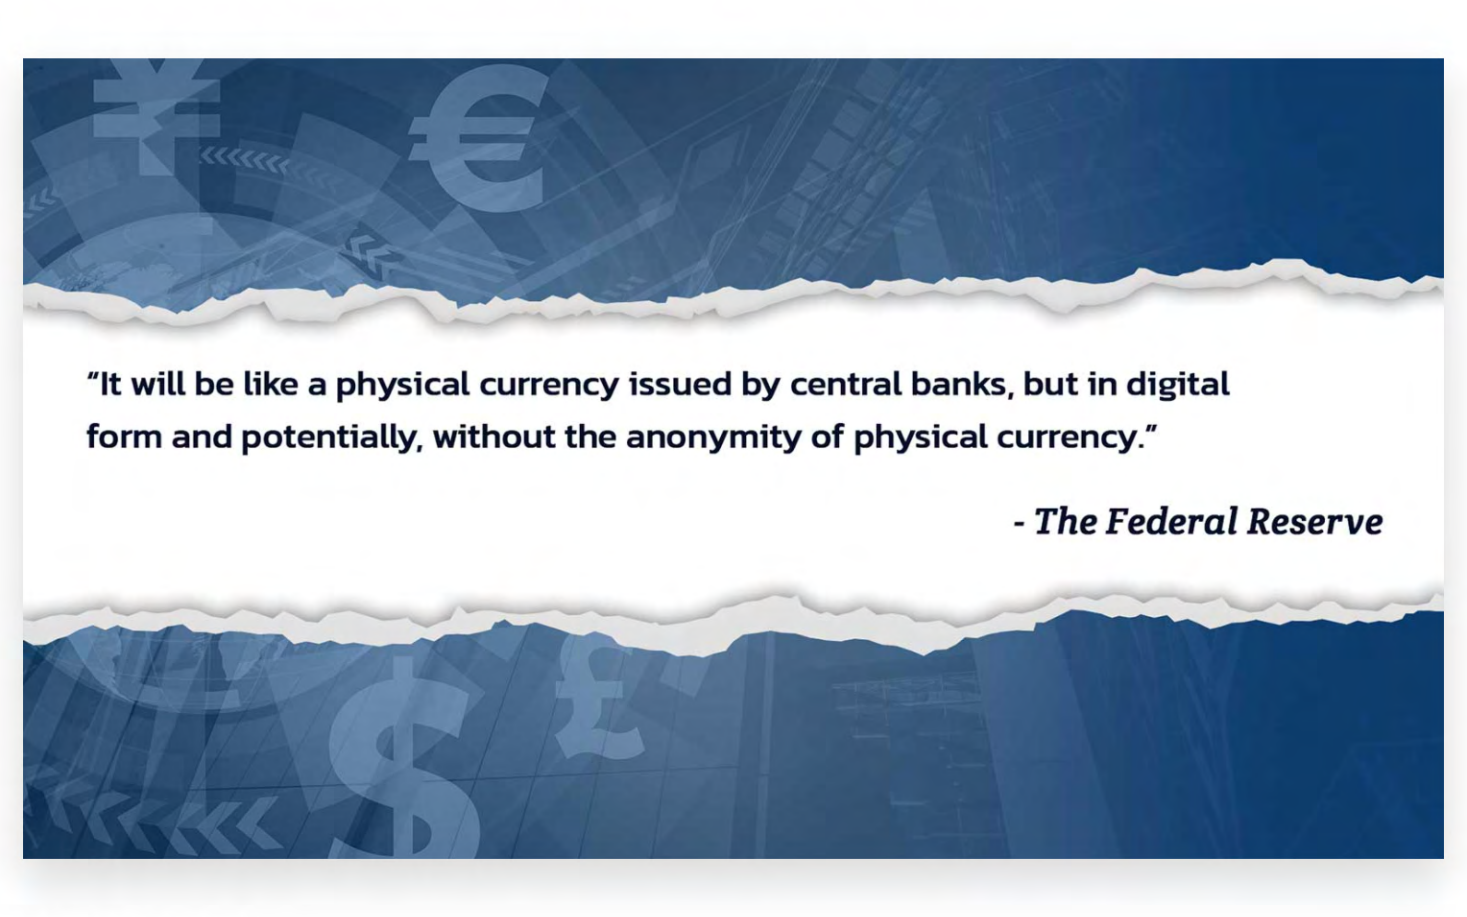
"Legislation has proposed that each American have an account at the Fed in which digital dollars could be deposited"

- The Federal Reserve

Think that is scary?

Check this out.

The Fed also proposed a new payment system.



"It will be like a physical currency issued by central banks, but in digital form and potentially, without the anonymity of physical currency."

- The Federal Reserve

Let that sink in...

"Without the anonymity of cash."

Are they planning to do away with the dollars in your pocket?

I believe the government is planning to crack down on financial privacy...

And central powers want to track everything you buy... from food, to clothing, to gas for your car.

That way they can better take their cut.

Heck if you buy stocks with your digital dollar, they'll know too.

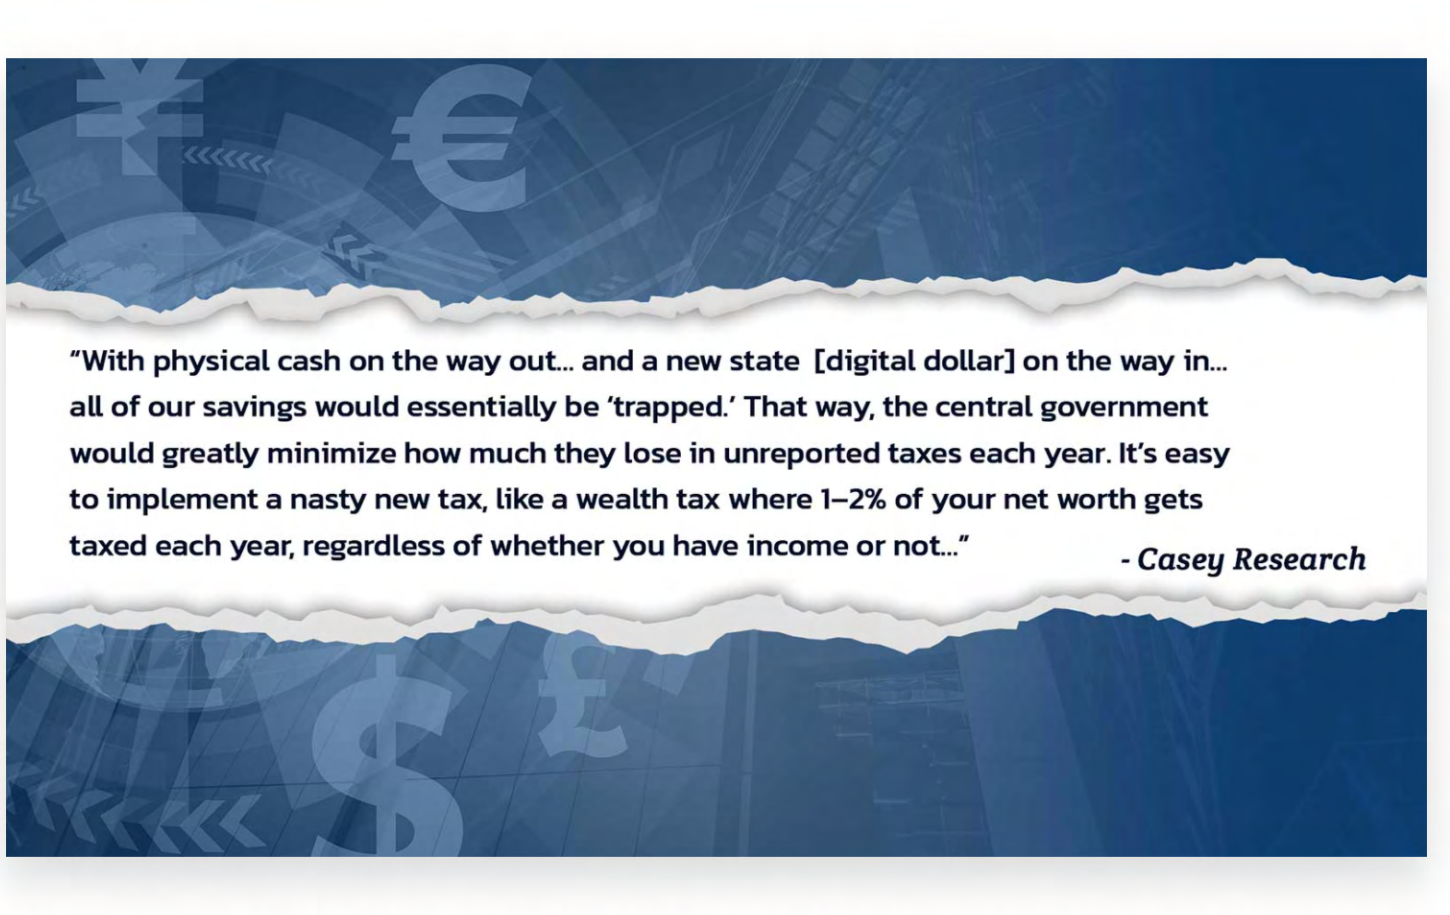
And if for some reason the government wants to confiscate your wealth...

I believe they'll have the means to lock you out of your account and snatch everything away from you.

Do you see where all this is headed?

Our firm was the first to forecast this Fed move back in 2018.

Here's what we wrote:



"With physical cash on the way out... and a new state [digital dollar] on the way in... all of our savings would essentially be 'trapped.' That way, the central government would greatly minimize how much they lose in unreported taxes each year. It's easy to implement a nasty new tax, like a wealth tax where 1–2% of your net worth gets taxed each year, regardless of whether you have income or not..."

- Casey Research

As you can see, our firm predicted these same reset-style taxes three years ago.

How uncanny, yet spot on our forecast has been.

That's why I've outlined 7 steps you can take right now to safeguard your money from the Fed's surveillance scheme.

That includes the best place to keep your money in case your debit or credit card becomes useless.

You'll also get a golden tip on how to lock out central planners, including your local bank, from your spending habits.

And if you hold any stocks or use a broker, please, *please*...

Take this one simple step I've outlined, immediately...

If not, you could lose your stocks or any holdings, should a crisis hit.

Also, you'll want to put a portion of your money into this one asset to help diversify your portfolio.

I'll also show you a simple solution to lock-out centralized companies like Google and Facebook, and retain your privacy.

These are critical steps I believe you won't find outlined anywhere else in the world.

THE ULTIMATE PRIVACY GUIDE

They're all covered in detail in a second new report called ***The Ultimate Privacy Guide: Protect Yourself from the Surveillance State.***

I encourage you to print it out and keep it handy.

Armed with this blueprint, I believe you'll have the resources to help you, not only survive this planned dollar "reset"...

But also to prosper — under the radar — so your assets and wealth are insulated.

The Great Reset is a fast-moving situation.

With central banks dumping U.S. dollars and the IMF pushing trillions of SDRs into banks...

Your financial institution may be under pressure to convert your U.S. dollar account into SDRs...

Could this be a sign?

Things are heating up.

Any number of things can happen to your money right now...

In the name of equality, climate change, and other flimsy excuses.

So I've arranged to send these reports to you immediately, at no extra charge when you take a look at our flagship research service, *The Casey Report.*

For 30-plus years, Doug Casey and our world-class team of researchers have warned readers of every meltdown and political shift that threaten the American way of life.

From the dot-com bust...

To the mortgage crisis of 2007...

And the meltdown of 2008...

We've been able to "peer in the future" and show our readers how to prepare in advance...

And also give them the chance to grow their wealth at the same time with sound investment recommendations.

Given the urgency of the Great Reset and what I believe are the dire implications for the average American...

Today I want to do something special for you...

Normally, the cost to access *The Casey Report* — published 12 times a year — is $199.

At that price, it's a steal. Each monthly issue comes with an investment recommendation...

Plus privacy and asset protection tips that you won't find anywhere.

But right now you can sample our work, risk-free, for a fraction of that price.

Before I give you details on this one-time discount, there's one more step I'd like you to take today...

I'll show you how to expand on your wealth using what I consider to be the world's safest asset.

Step 3: Buy the World's Safest "Hold in Your Hand" Asset

Gold is the world's oldest money.

Emperors and kings used it as far back as 500 BC as a store of wealth.

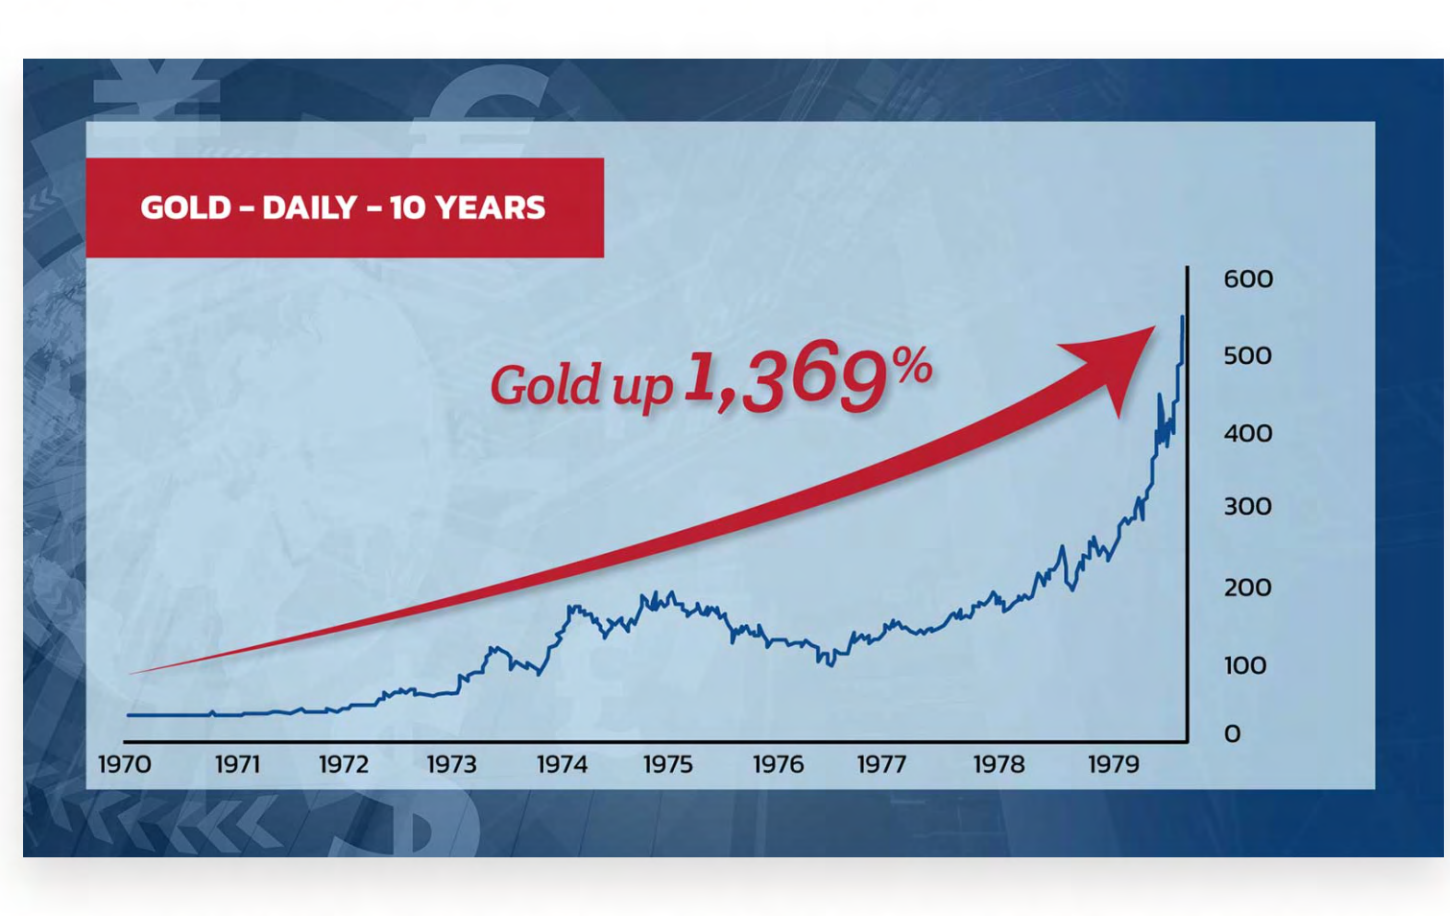
In fact, gold prices have rallied through every historic financial crisis.

In 1971, President Nixon took the U.S. dollar off the gold standard.

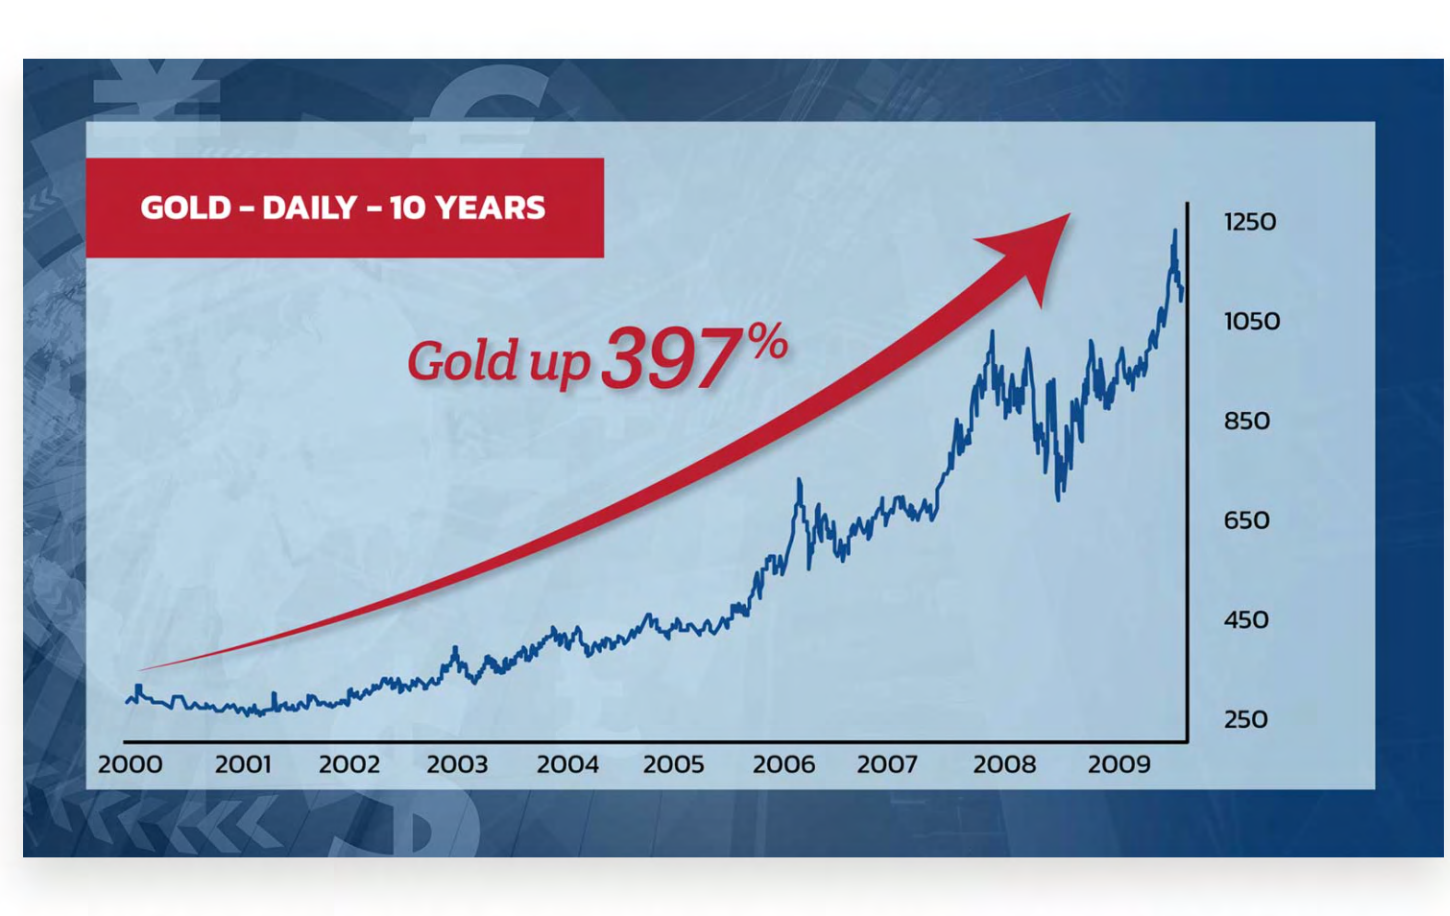
That move is known as the "Nixon Shock". And it devalued the dollar by 10% overnight.

But look how well you'd do with a small stake in gold.

Gold shot up 1,369% by the end of the decade.



And between the dot-com bust and the 2008 meltdown, gold surged 397%.



There isn't a single asset that posts these returns during bad times.

The reason is simple: Gold's value never depends on the health of any economy.

With the Great Reset looming...

The warning signs are blinking.

Central banks added 650 tons of gold to their reserves in 2019 ... the second highest buying spree in 50 years.

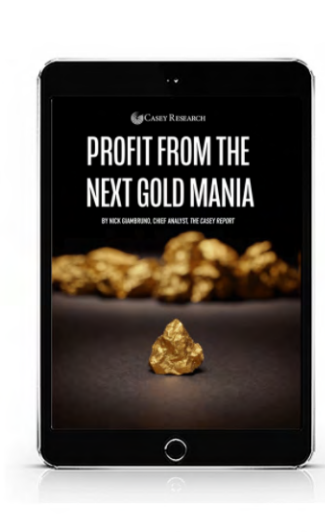
The IMF alone holds 2,814 metric tons. And they value it at 3.2 billion SDRs.

As the U.S. dollar resets, I predict gold could smash its all-time high.

I think $5,000 per ounce is a conservative prediction.

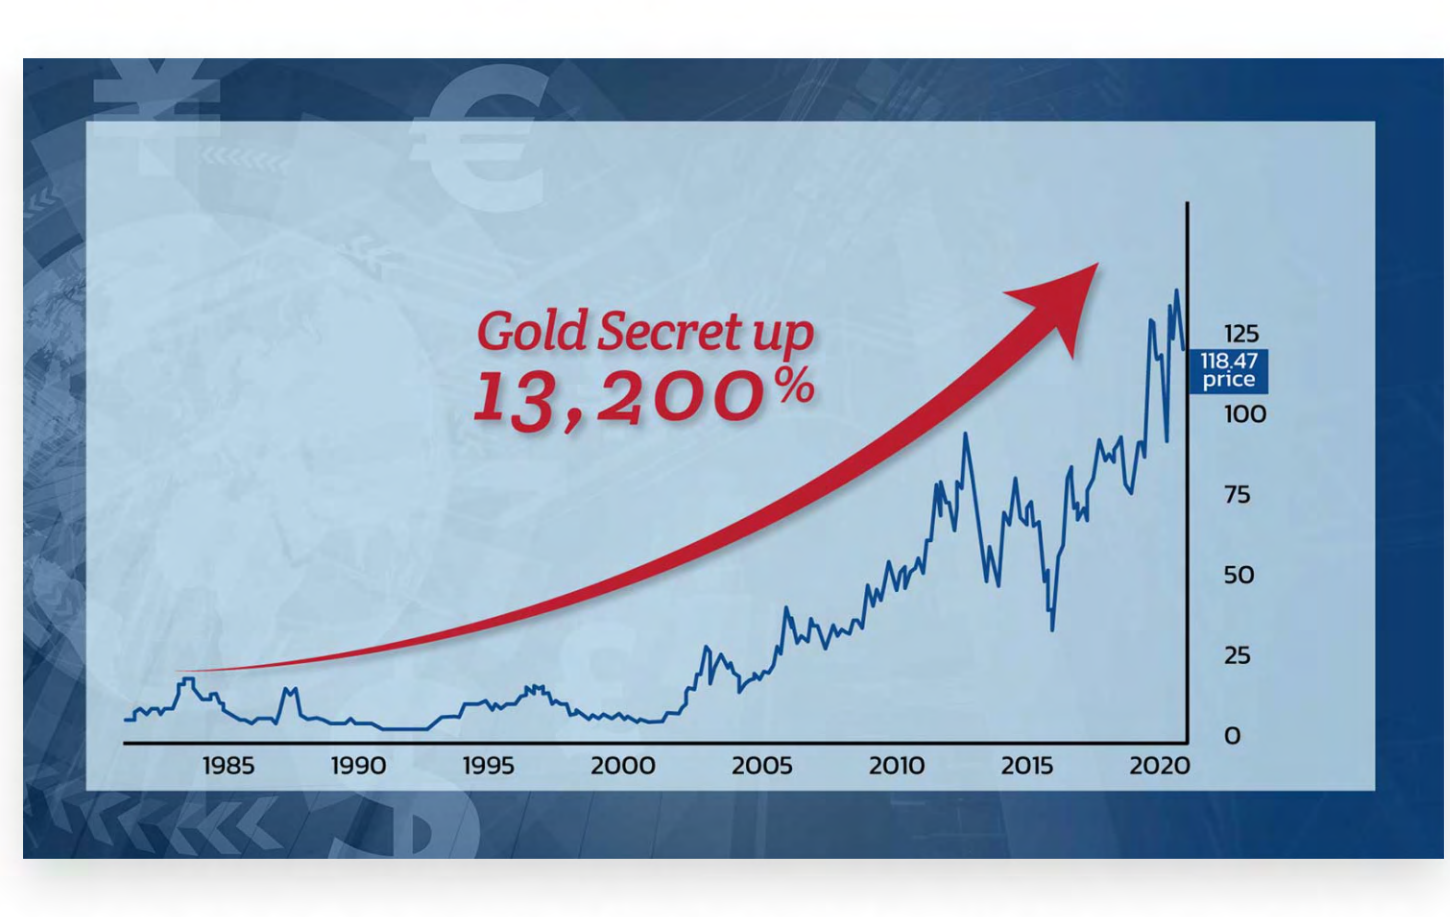
In any case, I believe you'll also want to leverage gold's upside...

To potentially grow your wealth as the reset grips the market.



It's all covered in a third report called ***Profit from the Next Gold Mania***.

I'll reveal a gold secret that historically turned $500 into $56,500 — a life-changing 13,200% gain.



It's not a mining company. And you don't have to buy any gold bullion.

Most folks have no idea this gold secret exists or how it operates.

But I'll show you all the details.

I'll also reveal another little-known gold technique.

You can buy physical gold, without worrying about storage, or coin premiums.

And here's the kicker.

If at some point in the future you want that physical gold shipped to your house...

It can be done at your discretion.

It's the only way I know to own physical gold and let it pay you a return.

But like all good things, space is limited on this gold "secret."

Right now there's a small window to get in.

So you'd have to act quickly.

And finally, I'll give you details on my top gold stock for 2021.

You can download details on all three gold opportunities shortly.

Now of course, all investments carry risk and past performance does not guarantee future success. Please do not invest more than you are willing to lose.

As I mentioned earlier...

Today all of our research is available to you at a steep discount — 75% to be exact.

Here's a look at everything you'll get when you accept my offer:

- 12 monthly issues of *The Casey Report*. You'll get one actionable recommendation each month.
- You'll have immediate access to my urgent report, ***The Great Reset: How to Own the World's Hardest Crisis Currency***
- Plus your second report, ***The Ultimate Privacy Guide: Protect Yourself from the Surveillance State***
- And you can instantly download ***Profit from the Next Gold Mania***
- You'll also have unlimited access to my entire research archive. Our private website holds a full library of money-making ideas and asset protection secrets not found anywhere else.
- Plus, members-only email and alerts: These flash alerts tell you when to take potential profits or take any evasive actions to protect your investments and assets.

All for just $49 for a full year.

That's just $4 a month to get the best money-making and investment protection secrets on the planet.

That's about the same price as a good draft beer.

Why so cheap?

With the storm of events I believe set to ransack the savings and lives of Americans...

I want to remove every reason to not try our research.

And even prosper, too.

Just as some of our readers have told us.

Take a look...

> *Your newsletter was the best money I ever spent. Count me a subscriber for life" — Drew*

Today, I'm opening the doors to our research.

And you have the opportunity to join us at a steep discounted rate.

Here's How To Get Started

I believe major changes to our financial system could happen soon.

As the "Great Reset" unfolds and SDRs are pushed as the new reserve currency...

Your dollar's value could be slashed and your savings could "reset" virtually overnight.

Financial records could be wiped clean.

Remember what the World Economic Forum and the global elites said...

"You'll Own Nothing and You'll be Happy. What Every You Want you'll rent...."

Are you prepared, or will you be blindsided like most Americans?

Only you can answer that.

My hope is that you take action right now...

Or risk getting left behind.

I've made it super affordable and easy for you to get all the resources you need.

Just $49 ($4 a month) gets you everything I've promised for a full year.

If you think my research doesn't give you the solutions you need, simply contact my Florida-based customer service team in the first 60 days. And they'll refund your entire payment.

Even if you think my work isn't right for you, I insist you keep all three special reports I'll send you today.

I can't be fairer than that.

The clock is ticking.

This is a unique turning point in America.

I believe the "Great Reset" is here.

The savings, property, and freedom of Americans… are all at the mercy of a few selective and unelected elites…

They're waging war on your money…

To take whatever you own and redistribute it as they see fit.

They promised you'll pay higher property taxes…

Higher wealth tax…

Asset and inheritance taxes…

And possibly a "world tax" (whatever the hell that is).

Think about it.

How will this affect your livelihood?

How will this impact what your family eats, where you socialize, or send your kids to school?

Your nest egg, your savings, and even your home value could all be in play.

We could be in the final days of enjoying what's left of America.

You must take action to protect yourself.

I know most people reading this will do nothing.

They'll say to themselves: "*I'll deal with that when the time comes.*"

But I'm afraid there won't be any time left to act when this crisis strikes.

Biden and the globalists have been hard at work.

And their cherished Great Reset could happen soon.

Take these simple steps now.
